**Macatawa Bank Corporation Reports
Second Quarter 2019 Results**

HOLLAND, Mich. (July 25, 2019) – Macatawa Bank Corporation (NASDAQ: MCBC) today announced its results for the second quarter of 2019, reflecting continued strong financial performance.

- Net income of \$8.0 million in second quarter 2019 versus \$6.7 million in second quarter 2018 – up 19%
- Growth in revenue (up 10%) over second quarter of 2018 while expenses were stable (up less than 1%)
- Strong profitability with return on assets and equity of 1.62% and 15.94%, respectively, in second quarter of 2019
- Seasonal decline in loan portfolio balances during the quarter
- Growth in core deposit balances during the quarter of \$43.2 million and up 5% from June 30, 2018
- Asset quality metrics remained strong

Macatawa reported net income of \$8.0 million, or \$0.24 per diluted share, in the second quarter 2019 compared to \$6.7 million, or \$0.20 per diluted share, in the second quarter 2018. For the first six months of 2019, Macatawa reported net income of \$15.6 million, or \$0.46 per diluted share, compared to \$12.5 million, or \$0.37 per diluted share, for the same period in 2018. Macatawa's 2019 earnings were positively impacted by improving revenues with nominal increases in non-interest expenses.

"Macatawa Bank Corporation continued its strong performance in the second quarter of 2019," said Ronald L. Haan, President and CEO of the Company. "Revenue growth, primarily higher net interest income, increased non-interest revenue and continued expense management resulted in a 19 percent increase in net income compared to the second quarter of 2018. Continued growth in our balances of interest-earning assets has positively affected our net interest income while our core operating expenses remained well-controlled during the quarter."

Mr. Haan concluded: "In the first half of 2019 our efforts have again resulted in strong and consistent financial performance for our shareholders. The banking environment in Western Michigan remains highly competitive, yet with the focus of our strong and committed team of professional bankers, we believe that Macatawa Bank Corporation remains well-positioned for continued growth and success in the second half of 2019."

Operating Results

Net interest income for the second quarter 2019 totaled \$16.0 million, a decrease of \$65,000 from the first quarter 2019 and an increase of \$1.3 million from the second quarter 2018. Net interest margin was 3.45 percent, down 9 basis points from the first quarter 2019, and up 8 basis points from the second quarter 2018. Net interest income for the first quarter 2019 benefitted from the collection of \$251,000 in prepayment fees on commercial loans, primarily related to one commercial relationship. Prepayment fees were only \$6,000 in the second quarter 2019 and \$32,000 in the second quarter 2018.

Average interest earning assets for the second quarter 2019 increased \$26.4 million from the first quarter 2019 and were up \$103.4 million from the second quarter 2018. This growth along with increases in yields on interest earning assets were the primary contributors to the improvement in net interest income.

Non-interest income increased \$770,000 in the second quarter 2019 compared to the first quarter 2019 and increased \$630,000 from the second quarter 2018. These changes were largely due to fluctuations in gains on sales of mortgage loans. Gains on sales of mortgage loans in the second quarter 2019 were up \$403,000 compared to the first quarter 2019 and were up \$392,000 from the second quarter 2018. The Bank originated \$21.4 million in mortgage loans for sale in the second quarter 2019 compared to \$6.8 million in the first quarter 2019 and \$8.4 million in the second quarter 2018. This increase in production is due to a declining mortgage rate environment as well as customer preference for loan types that are typically sold (long-term fixed rate loans). This resulted in a reduction in the volume of loans originated for portfolio compared to 2018. The Bank originated \$8.8 million in portfolio mortgage loans in the second quarter 2019 compared to \$6.8 million in the first quarter 2019 and \$18.8 million in the second quarter 2018. Also positively impacting non-interest income in the second quarter 2019 were increases in trust fee income and debit card interchange income.

Non-interest expense was \$11.3 million for the second quarter 2019, compared to \$11.2 million for the first quarter 2019 and \$11.3 million for the second quarter 2018. The largest component of non-interest expense was salaries and benefit expenses. Salaries and benefit expenses were up \$135,000 compared to the first quarter 2019 and were down \$10,000 compared to the second quarter 2018. The increase compared to the first quarter 2019 was largely due to higher variable based compensation from mortgage production volume. The decrease from the second quarter 2018 was attributed to decreases in medical insurance costs due to lower claims experience in 2019.

Nonperforming asset expenses decreased \$38,000 in the second quarter 2019 compared to the first quarter 2019 and decreased \$68,000 compared to the second quarter 2018. Net gains of \$34,000 were realized on sales of foreclosed properties in the second quarter 2019, while there were net gains of \$45,000 in the first quarter 2019 and net losses of \$6,000 in the second quarter 2018. Other categories of non-interest expense were relatively stable compared to the first quarter 2019 and the second quarter 2018.

Federal income tax expense was \$1.9 million for the second quarter 2019 compared to \$1.7 million for the first quarter 2019 and \$1.4 million for the second quarter 2018. The effective tax rate was 19.3 percent for the second quarter 2019, compared to 18.3 percent for the first quarter 2019 and 17.6 percent for the second quarter 2018.

Asset Quality

The Bank's asset quality remained strong in the second quarter 2019 and again experienced net loan recoveries in the second quarter. A negative provision for loan losses of \$200,000 was recorded in the second quarter 2019, compared to a negative provision of \$250,000 in the first quarter 2019 and a negative provision of \$300,000 in the second quarter 2018. Net loan recoveries for the second quarter 2019 were \$194,000, compared to first quarter 2019 net loan recoveries of \$266,000 and second quarter 2018 net loan recoveries of \$320,000. The Company has experienced net loan recoveries in seventeen of the past eighteen quarters. Total loans past due on payments by 30 days or more amounted to \$360,000 at June 30, 2019, down 47 percent from \$674,000 at March 31, 2019 and down 31 percent from \$525,000 at June 30, 2018. Delinquency as a percentage of total loans was a nominal 0.03 percent at June 30, 2019.

The allowance for loan losses of \$16.9 million was 1.26 percent of total loans at June 30, 2019, compared to 1.22 percent of total loans at March 31, 2019, and 1.26 percent at June 30, 2018. The coverage ratio of allowance for loan losses to nonperforming loans continued to be strong and significantly exceeded 1-to-1 coverage at 58-to-1 as of June 30, 2019.

At June 30, 2019, the Company's nonperforming loans were \$293,000, representing 0.02 percent of total loans. This compares to \$409,000 (0.03 percent of total loans) at March 31, 2019 and \$125,000 (0.01 percent of total loans) at June 30, 2018. Other real estate owned and repossessed assets were \$3.1 million at June 30, 2019, compared to \$3.3 million at March 31, 2019 and \$3.9 million at June 30, 2018. Total nonperforming assets, including other real estate owned and nonperforming loans, decreased by \$637,000, or 16 percent, from June 30, 2018 to June 30, 2019.

The commercial and industrial portfolio is subject to seasonal fluctuations as the Company typically experiences large paydowns on agricultural credits and loans to automobile, recreational vehicle and boat dealers in the first half of each year. The seasonal paydowns in these loan categories amounted to \$38.4 million in the second quarter of 2019. In addition there were two relationships totaling \$7.9 million that paid-off during the second quarter of 2019 resulting from the sale of their businesses.

Total deposits were \$1.66 billion at June 30, 2019, up \$43.2 million from \$1.62 billion at March 31, 2019 and up \$80.6 million, or 5 percent, from \$1.58 billion at June 30, 2018. Certificates of deposit were up \$5.9 million in the second quarter 2019 compared to March 31, 2019 and were up \$42.1 million compared to June 30, 2018. As deposit rates have risen, the Bank has experienced some shifting between deposit types, particularly certificates of deposit. The Bank continues to be successful at attracting and retaining core deposit customers. Customer deposit accounts remain insured to the highest levels available under FDIC deposit insurance.

The Bank's risk-based regulatory capital ratios were higher at June 30, 2019 compared to March 31, 2019 and December 31, 2018 due to earnings growth, and continued to be at levels comfortably above those required to be categorized as "well capitalized" under applicable regulatory capital guidelines. As such, the Bank was categorized as "well capitalized" at June 30, 2019.
