Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended December 31, 2011

OR
 TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934
For the transition period from _____ to _____

Commission file number 000-25927

MACATAWA BANK CORPORATION

(Exact name of registrant as specified in its charter)

MICHIGAN

(State of other jurisdiction of incorporation or organization)

38-3391345

(I.R.S. Employer Identification No.)

10753 Macatawa Drive, Holland, Michigan 49424

(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: (616) 820-1444

Securities registered pursuant to Section 12(b) of the Exchange Act:

Title of each class

Common Stock

Name of each exchange on which registered

The Nasdaq Stock Market

Securities registered pursuant to Section 12(g) of the Exchange Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the past 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained in this form and no disclosure will be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendments to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

(Do not check if smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the registrant's common stock held by non-affiliates of the registrant, as of June 30, 2011, was \$69,561,481 based on the closing sale price of \$2.77 as reported on the Nasdaq Stock Market. There were 27,082,823 outstanding shares of the Company's common stock as of February 22, 2012.

DOCUMENTS INCORPORATED BY REFERENCE: Portions of the Company's Proxy Statement for the Annual Meeting of Shareholders to be held May 8, 2012 are incorporated by reference into Part III of this report.

Forward-Looking Statements

This report contains forward-looking statements that are based on management's beliefs, assumptions, current expectations, estimates and projections about the financial services industry, the economy, and Macatawa Bank Corporation. Forward-looking statements are identifiable by words or phrases such as "outlook", "plan" or "strategy"; that an event or trend "may", "should", "will", "is likely", or is "probable" to occur or "continue", has "begun" or "is scheduled" or "on track" or that the Company or its management "anticipates", "believes", "estimates", "plans", "forecasts", "intends", "predicts", "projects", or "expects" a particular result, or is "committed", "confident", "encouraged", "optimistic" or has an "opinion" that an event will occur, or other words or phrases such as "ongoing", "future", "signs", "efforts", "ensure", "tend", "exploring", "appearing", "until", "near term", "going forward", "starting" and variations of such words and similar expressions. Such statements are based upon current beliefs and expectations and involve substantial risks and uncertainties which could cause actual results to differ materially from those expressed or implied by such forward-looking statements. These statements include, among others, statements related to trends in our credit quality metrics, future capital levels, future charge-off levels, future amounts of provision for loan losses, real estate valuation, future levels of non-performing assets and costs associated with administration and disposition of non-performing assets, the rate of asset dispositions, dividends, future growth and funding sources, future liquidity levels, future profitability levels, future trust service income levels, future FDIC assessment levels, the effects on earnings of changes in interest rates and the future level of other revenue sources. Management's determination of the provision and allowance for loan losses, the appropriate carrying value of intangible assets (including deferred tax assets) and other real estate owned, and the fair value of investment securities (including whether any impairment on any investment security is temporary or other-than-temporary and the amount of any impairment) involves judgments that are inherently forward-looking. All statements with references to future time periods are forward-looking. All of the information concerning interest rate sensitivity is forward-looking. Our ability to sell other real estate owned at its carrying value or at all, successfully implement new programs and initiatives, increase efficiencies, maintain our current level of deposits and other sources of funding, maintain liquidity, respond to declines in collateral values and credit quality, increase loan volume, maintain mortgage banking income, realize the benefit of our deferred tax assets, resume payment of dividends and improve profitability is not entirely within our control and is not assured. The future effect of changes in the real estate, financial and credit markets and the national and regional economy on the banking industry, generally, and Macatawa Bank Corporation, specifically, are also inherently uncertain. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions ("risk factors") that are difficult to predict with regard to timing, extend, likelihood and degree of occurrence. Therefore, actual results and outcomes may materially differ from what may be expressed or forecasted in such forward-looking statements. Macatawa Bank Corporation does not undertake to update forward-looking statements to reflect the impact of circumstances or events that may arise after the date of the forward-looking statements.

Risk factors include, but are not limited to, the risk factors described in "Item 1A - Risk Factors" of this report. These and other factors are representative of the risk factors that may emerge and could cause a difference between an ultimate actual outcome and a preceding forward-looking statement.

PART I

ITEM 1: Business.

As used in this report, the terms "we," "us," "our" and "Company" mean Macatawa Bank Corporation and its subsidiaries, unless the context indicates another meaning. The term "Bank" means Macatawa Bank.

Overview

Macatawa Bank Corporation is a Michigan corporation and a registered bank holding company. Our business is concentrated in a single industry segment - commercial banking. Through our wholly-owned subsidiary, Macatawa Bank, we offer a full range of commercial and personal banking services, including checking, savings and certificates of deposit accounts, cash management, safe deposit boxes, trust services and commercial, mortgage and consumer loans through our twenty-six branch offices and a lending and operation service facility in Ottawa County, Kent County and northern Allegan County, Michigan. Other services we offer include ATMs, internet banking, telephone banking and debit cards. The Bank provides various brokerage services, including discount brokerage through Inflex, personal financial planning and consultation regarding mutual funds.

At December 31, 2011, we had total assets of \$1.51 billion, total loans of \$1.07 billion, total deposits of \$1.22 billion and shareholders' equity of \$94.4 million. We recognized net income of \$5.8 million in 2011, a substantial improvement over the prior two years, and we experienced our seventh consecutive quarter of net income to end 2011. During 2011, 2010 and 2009, our interest income accounted for approximately 80%, 81% and 85%, respectively, of our operating revenues and our non-interest income accounted for approximately 20%, 19% and 15%, respectively, of our operating revenues. For additional information about our financial condition and results of operations, see our consolidated financial statements and related notes included in this report.

In response to our losses during 2008, 2009 and the first quarter of 2010, our Board of Directors implemented additional corporate governance practices and disciplined business and banking principles, including more conservative lending principles. The focus of our management team turned from growth in our business to executing these disciplined business and banking procedures and policies designed to limit future losses, preserve capital and improve operational efficiencies. In addition, the Board of Directors added experienced members to provide further oversight and guidance. These and other efforts were reflected in our results of operations for 2011 and 2010 with lower levels of charge-offs and provision for loan losses, reductions in operating expenses and reduction in balance sheet totals resulting in improvement in our regulatory capital and liquidity ratios. We successfully completed our shareholder rights offering and public offering of common stock in June 2011 resulting in net proceeds of \$20.3 million and contributed \$10.0 million of the proceeds from the stock offering to the Bank retaining the remaining \$10.3 million at the holding company. As of December 31, 2011, the Company's and the Bank's regulatory capital ratios were the highest they have been since December 31, 1999.

Also within the past two years, much progress has been made at reducing our non-performing assets. The following table reflects period end balances of these non-performing assets as well as total loan delinquencies.

(dollars in thousands)	December 31, 2011	December 31, 2010	December 31, 2009
Non-performing loans	\$ 28,946	\$ 75,361	\$ 103,885
Other repossessed assets	---	50	124
Other real estate owned	66,438	57,984	37,184
Total non-performing assets	<u>\$ 95,384</u>	<u>\$ 133,395</u>	<u>\$ 141,193</u>
Total loan delinquencies 30 days or greater past due	<u>\$ 13,138</u>	<u>\$ 55,748</u>	<u>\$ 116,971</u>

Earnings have been severely impacted by high costs associated with administration and disposition of non-performing assets. These costs, including losses on repossessed and foreclosed properties, were \$15.6 million and \$15.4 million for the years ended December 31, 2011 and 2010, respectively. Going forward, as further reductions in non-performing assets are accomplished, we expect the costs associated with these assets to also decline thereby allowing for improved earnings in future periods.

Our earnings in 2011 were favorably impacted by negative provision for loan losses of \$4.7 million. As discussed in detail later in Item 7 of this report under the heading "Allowance for Loan Losses", this was a result of the decline in our historical charge-off levels from prior years. We do not expect a similar level of negative provision for loan losses in 2012. The following table reflects the provision for loan losses for the past two years along with certain metrics that impact the determination of the level of the provision for loan losses.

(Dollars in thousands)	For The Year Ended December 31	
	2011	2010
Provision for loan losses	\$ (4,700)	\$ 22,460
Net charge-offs	11,085	29,657
Net charge-offs to average loans	.99%	2.18%
Nonperforming loans to total loans	2.70%	6.19%
Loans transferred to ORE to average loans	3.42%	3.32%
Troubled debt restructurings ("TDRs") to average loans	5.15%	1.91%

The State of Michigan entered into a recession earlier than the rest of the country and has experienced heavy job loss as a result of the concentration the state has related to the automotive industry. Our market areas of Grand Rapids and Holland fared better than the state as a whole, but nevertheless the impact of our local economy on our results has been profound. The recession and job loss impacted housing values, commercial real estate values and consumer activity. Improvement has been evident during 2011, with the State of Michigan being identified in a Bloomberg Economic Evaluation of States as having the second fastest pace of recovery in the U.S., second only to North Dakota. The state's unemployment rate at the end of 2011 was 9.3%, no longer the highest in the country and down dramatically from 15.2% in June 2009. The Holland area unemployment was 6.5%, and the Grand Rapids area unemployment was 6.5% at the end of 2011. Residential housing values and commercial real estate property values decreased significantly over the past few years, but have shown recent signs of stabilization, with some of our newer appraisals tending to reflect values at or above prior year values.

It also appears that the housing market in our primary market area is beginning to show signs of stabilization. Based on U.S. Census data, housing building permits in the Grand Rapids-Wyoming metropolitan area were up approximately 7.65% in 2010 compared to 2009. In the Holland-Grand Haven metropolitan area, housing building permits were up approximately 9.21% in 2010 compared to 2009.

Over the past two years, we have reduced our balance of loans outstanding, diversified our commercial loan portfolio, reduced concentrations to residential real estate developers and increased our consumer loan portfolio and residential mortgage activity as a percentage of overall production. This has included adding experienced residential mortgage lenders and pulling back on commercial loan production in some cases. Our loans to residential developers have decreased from \$95.7 million at December 31, 2010 to \$66.3 million at December 31, 2011. In addition, overall commercial real estate loans have decreased from \$933.9 million at December 31, 2010 to \$795.3 million at December 31, 2011. Consumer loans have decreased at a slower pace, totaling \$275.7 million at December 31, 2011, compared to \$283.3 million at December 31, 2010. With our improved financial condition and successful capital raise in 2011, we expect our focus will shift from shrinkage in our loan portfolio to stabilizing our loan balances and slight growth in certain portfolios in 2012.

We have no material foreign loans, assets or activities. No material part of our business is dependent on a single customer or very few customers.

Our headquarters and administrative offices are located at 10753 Macatawa Drive, Holland, Michigan 49424, and our telephone number is (616) 820-1444. Our internet website address is www.macatawabank.com. We make available free of charge through this website our annual report on Form 10-K, our quarterly reports on Form 10-Q and our current reports on Form 8-K and amendments to those reports as soon as reasonably practicable after filing or furnishing such reports with the Securities and Exchange Commission. The information on our website address is not incorporated by reference into this report, and the information on the website is not part of this report.

Regulatory Developments

Termination of Consent Order with the Bank and its Regulators

On February 22, 2010, the Bank entered into a Consent Order with the Federal Deposit Insurance Corporation ("FDIC") and the Michigan Office of Financial and Insurance Regulation ("OFIR"), the primary banking regulators of the Bank. The Bank agreed to the terms of the negotiated Consent Order without admitting or denying any charges of unsafe or unsound banking practices. The Consent Order imposed no fines or penalties on the Bank. As a result of the improvement in our financial condition and results of operations, our implementation of additional corporate governance practices and disciplined business and banking principles, and our compliance with the Consent Order, upon completion of the Bank's 2011 joint examination by the FDIC and OFIR, the FDIC and OFIR terminated the Consent Order effective March 2, 2012.

In connection with the termination of the Consent Order, the Bank reached an understanding with the regulators in the form of a memorandum of understanding ("MOU"), which maintains many of the controls and procedures put in place by the Bank in response to the Consent Order, including: maintenance of a Tier 1 Leverage Capital Ratio of at least 8%, formulating and submitting a written plan of action on each asset classified as Substandard in the Report of Examination ("ROE"), charge-off of all assets classified as "Loss" in the ROE, submission of a written Profit Plan, Board review of the adequacy of the allowance for loan and lease losses each quarter and the receipt of prior written consent of the FDIC and OFIR before the Bank declares or pays any dividends. The Bank was in compliance with each of these requirements as of the date of this report.

Written Agreement with Macatawa Bank Corporation and its Regulator

Macatawa Bank Corporation has formally entered into a Written Agreement with the Federal Reserve Bank of Chicago ("FRB") with an effective date of July 23, 2010. Among other things, the Written Agreement provides that Macatawa Bank Corporation: (i) must take appropriate steps to fully utilize its financial and managerial resources to serve as a source of strength to the Bank; (ii) may not declare or pay any dividends without prior FRB approval; (iii) may not take dividends or any other payment representing a reduction in capital from the Bank without prior FRB approval; (iv) may not make any distributions of interest, principal or other sums on subordinated debentures or trust preferred securities without prior FRB approval; (v) may not incur, increase or guarantee any debt without prior FRB approval; (vi) may not purchase or redeem any shares of its stock without prior FRB approval; (vii) must submit a written capital plan to the FRB within 60 days of the Written Agreement; and (viii) may not appoint any new director or senior executive officer, or change the responsibilities of any senior executive officer so that the officer would assume a different senior executive officer position, without prior regulatory approval. Macatawa Bank Corporation separately requested and received approval from the FRB to make its third and fourth quarter 2010 and all of its 2011 quarterly interest payments on its \$1.65 million in outstanding subordinated debt. Each quarter Macatawa Bank Corporation intends to request approval from the FRB to make the next quarter's interest payment on its subordinated debt and is continuing to accrue the interest amounts due.

Deposit Gathering Activities

Because the Bank was subject to the Consent Order at December 31, 2011, it could not be categorized as "well-capitalized," regardless of actual capital levels. As a result, at December 31, 2011 the Bank was subject to restrictions in its deposit gathering activities, including limitations on the interest rate paid for deposits and that it could not accept, renew or rollover any brokered deposit unless it had applied for and had been granted a waiver of this prohibition by the FDIC. As a result of the termination of the Consent Order, these restrictions will no longer be applicable to the Bank if it is otherwise categorized as "well capitalized." We expect the Bank to be categorized as "well capitalized" at March 31, 2012. The Bank has not accepted or renewed brokered deposits since November of 2008 and the final brokered deposit was paid off at maturity in December 2011. The Bank expects to continue its focus on attracting and maintaining core deposits to achieve a non-core funding dependency ratio of below its peer group average.

Products and Services

Loan Portfolio

We have historically offered a broad range of loan products to business customers, including commercial and industrial and commercial real estate loans, and to retail customers, including residential mortgage and consumer loans. Given current soft economic conditions and the provisions of the Consent Order, new commercial loan origination activity is significantly lower than it was when economic conditions were stronger. However, select, well-managed loan renewal activity for non-real estate loans is taking place. Following is a discussion of our various types of lending activities.

Commercial and Industrial Loans

Our commercial and industrial lending portfolio contains loans with a variety of purposes and security, including loans to finance operations and equipment. Generally, our commercial and industrial lending has been limited to borrowers headquartered, or doing business, in our primary market area. These credit relationships typically require the satisfaction of appropriate loan covenants and debt formulas, and generally require that the Bank be the primary depository bank of the business. These loan covenants and debt formulas are monitored through periodic, required reporting of accounts receivable aging schedules and financial statements, and in the case of larger business operations, reviews or audits by independent professional firms.

Commercial and industrial loans typically are made on the basis of the borrower's ability to make repayment from the cash flow of the borrower's business. As a result, the availability of funds for the repayment of commercial business loans may be substantially dependent on the success of the business itself, as well as economic conditions. Further, the collateral securing the loans may depreciate over time, may be difficult to appraise and may fluctuate in value based on the success of the business.

Commercial Real Estate Loans

Because of the risks associated with this type of lending, combined with the sharp decline in demand for and resulting values of real estate in our market in recent years, we experienced a significant increase in non-performing loan levels during 2008 and 2009 and the first quarter of 2010 primarily associated with commercial real estate loans. The nonperforming loan balances are more fully discussed in Item 7 of this report under the heading "Loan Portfolio and Asset Quality" included in "Management's Discussion and Analysis of Results of Operations and Financial Condition."

Our commercial real estate loans consist primarily of construction and development loans and multi-family and other non-residential real estate loans.

Construction and Development Loans. These consist of construction loans to commercial customers for the construction of their business facilities. They also include construction loans to builders and developers for the construction of one- to four-family residences and the development of one- to four-family lots, residential subdivisions, condominium developments and other commercial developments.

This portfolio was particularly adversely affected by job losses, declines in real estate value, declines in home sale volumes, and declines in new home building. Declining real estate values resulted in sharp increases in losses, particularly in the land development and construction loan portfolios to residential developers. We curtailed this type of lending in 2008. During 2009, 2010 and 2011, we also made a significant effort to reduce exposure to residential land development and other construction and development loans. We have also established goals to further reduce this exposure in 2012.

Multi-Family and Other Non-Residential Real Estate Loans. These are permanent loans secured by multi-family and other non-residential real estate and include loans secured by apartment buildings, condominiums, small office buildings, small business facilities, medical facilities and other non-residential building properties, substantially all of which are located within our primary market area.

Multi-family and other non-residential real estate loans generally present a higher level of risk than loans secured by owner occupied one- to four-family residences. This greater risk is due to several factors, including the concentration of principal in a limited number of loans and borrowers, the effects of general economic conditions on income producing properties and the increased difficulty of evaluating and monitoring these types of loans. Furthermore, the repayment of these loans is typically dependent upon the successful operation of the related real estate project. For example, if leases are not obtained or renewed, or a bankruptcy court modifies a lease term, or a major tenant is unable to fulfill its lease obligations, cash flow from the project will be reduced. If cash flow from the project is reduced, the borrower's ability to repay the loan may be impaired.

Retail Loans

Our retail loans are loans to consumers and consist primarily of residential mortgage loans and consumer loans.

Residential Mortgage Loans. We originate construction loans to individuals for the construction of their residences and owner-occupied residential mortgage loans, which are generally long-term with either fixed or adjustable interest rates. Our general policy is to sell the majority of our fixed rate residential mortgage loans in the secondary market due primarily to the interest rate risk associated with these loans.

During 2010, we sold the majority of our loan originations in the secondary market to support our goal of shrinking the loan portfolio and preserving capital. We retained loans representing only approximately 10% of the dollar volume originated. During 2009, our ability to originate and sell mortgages was limited to some extent by disruptions in the secondary market and our loss of business relationships with certain companies that had historically purchased our mortgages. However, relationships were established with new investors in 2010 and 2011, allowing us to continue our historical practice of originating and selling most of our fixed rate mortgage loan volume. During 2011, in an effort to further diversify our loan concentrations, we increased our targeted retention of residential production, resulting in a \$21.7 million increase in balances held in portfolio at December 31, 2011.

Our borrowers generally qualify and are underwritten using industry standards for quality residential mortgage loans. We do not originate loans that are considered "sub-prime". Residential mortgage loan originations derive from a number of sources, including advertising, direct solicitation, real estate broker referrals, existing borrowers and depositors, builders and walk-in customers. Loan applications are accepted at most of our offices. The substantial majority of these loans are secured by one-to-four family properties in our market area.

Consumer Loans. We originate a variety of different types of consumer loans, including automobile loans, home equity lines of credit and installment loans, home improvement loans, deposit account loans and other loans for household and personal purposes. We also originate home equity lines of credit utilizing the same underwriting standards as for home equity installment loans. Home equity lines of credit are revolving line of credit loans. The majority of our existing home equity line of credit portfolio has variable rates with floors and ceilings, interest only payments and a maximum maturity of ten years.

The underwriting standards that we employ for consumer loans include a determination of the applicant's payment history on other debts and ability to meet existing obligations and payments on the proposed loan. Although creditworthiness of the applicant is of primary consideration, the underwriting process also includes a comparison of the value of the security, if any, in relation to the proposed loan amount. Consumer loans may entail greater credit risk than do residential mortgage loans, particularly in the case of consumer loans which are unsecured or are secured by rapidly depreciable assets, such as automobiles. In such cases, any repossessed collateral for a defaulted consumer loan may not provide an adequate source of repayment of the outstanding loan balance as a result of the greater likelihood of damage, loss or depreciation. In addition, consumer loan collections are dependent on the borrower's continuing financial stability, and are more likely to be affected by adverse personal circumstances. Furthermore, the application of various federal and state laws, including bankruptcy and insolvency laws, may limit the amount which can be recovered on such loans.

Loan Portfolio Composition

The following table reflects the composition of our loan portfolio and the corresponding percentage of our total loans represented by each class of loans as of the dates indicated.

(Dollars in thousands)

	December 31									
	2011		2010		2009		2008		2007	
	Amount	% of Total Loans	Amount	% of Total Loans	Amount	% of Total Loans	Amount	% of Total Loans	Amount	% of Total Loans

With predetermined interest rates	\$ 217,187	\$ 235,114	\$ 21,616	\$ 473,917
With floating or adjustable rates	524,684	32,713	12,785	570,182
Total (excluding nonaccrual loans)	\$ 741,871	\$ 267,827	\$ 34,401	\$ 1,044,099
Nonaccrual loans				26,876
Total Loans				\$ 1,070,975

(1) Consists of construction and development loans.

Nonperforming Assets

The following table shows the composition and amount of our nonperforming assets.

(Dollars in thousands)	December 31				
	2011	2010	2009	2008	2007
Nonaccrual loans	\$ 26,876	\$ 74,761	\$ 95,725	\$ 89,049	\$ 70,999
Loans 90 days or more delinquent and still accruing	2,070	600	8,160	3,200	2,872
Total nonperforming loans (NPLs)	28,946	75,361	103,885	92,249	73,871
Foreclosed assets	66,438	57,984	37,184	19,516	5,704
Reposessed assets	---	50	124	306	172
Total nonperforming assets (NPAs)	95,384	133,395	141,193	112,071	\$ 79,747
Accruing restructured loans (ARLs) (1)	55,679	25,395	18,000	---	---
Total NPAs and ARLs	\$ 151,063	\$ 158,790	\$ 159,193	\$ 112,071	\$ 79,747
NPLs to total loans	2.70%	6.19%	6.88%	5.20%	4.22%
NPAs to total assets	6.33%	8.45%	7.71%	5.21%	3.75%

- (1) Comprised of approximately \$40.9 million and \$12.1 million of commercial loans and \$14.8 million and \$13.3 million of residential mortgage loans at December 31, 2011 and 2010, respectively, whose terms have been restructured. Interest is being accrued on these loans under their restructured terms as they are less than 90 days past due.

Interest income totaling \$4.6 million was recorded in 2011 on loans that were on a non-accrual status or classified as restructured as of December 31, 2011. Additional interest income of \$921,000 would have been recorded during 2011 on these loans had they been current in accordance with their original terms. More information about the elevated levels of nonperforming loan balances in 2011 and 2010 and our policy for placing loans on non-accrual status may be found in Item 7 of this report under the heading "Loan Portfolio and Asset Quality" included in "Management's Discussion and Analysis of Results of Operations and Financial Condition."

Loans at December 31, 2011 that were classified as substandard or worse per our internal risk rating system not included in the nonperforming assets table above that would cause management to have serious doubts as to the ability of such borrowers to comply with the present loan repayment terms are discussed in Item 7 of this report under the heading "Loan Portfolio and Asset Quality" included in "Management's Discussion and Analysis of Results of Operations and Financial Condition." At December 31, 2011, there were no other interest-bearing assets that would be required to be disclosed under Industry Guide 3, Item III, C. 1. or 2. if such assets were loans.

Loan Loss Experience

The following is a summary of our loan balances at the end of each period and the daily average balances of these loans. It also includes changes in the allowance for loan losses arising from loans charged-off and recoveries on loans previously charged-off, and additions to the allowance which we have expensed.

(Dollars in thousands)	December 31				
	2011	2010	2009	2008	2007
Loans:					
Average daily balance of loans for the year	\$ 1,120,857	\$ 1,360,548	\$ 1,637,143	\$ 1,762,102	\$ 1,725,453
Amount of loans outstanding at end of period	1,070,975	1,217,196	1,510,816	1,774,063	1,750,632
Allowance for loan losses:

Deposit Portfolio

We offer a broad range of deposit services, including checking accounts, savings accounts and time deposits of various types. Transaction accounts and savings and time certificates are tailored to the principal market area at rates competitive with those offered in the area. All deposit accounts are insured by the FDIC up to the maximum amount permitted by law.

We solicit deposit services from individuals, businesses, associations, churches, nonprofit organizations, financial institutions and government authorities. Deposits are gathered primarily from the communities we serve through our network of 26 branches. We offer business and consumer checking accounts, regular and money market savings accounts, and certificates of deposit with many term options. We operate in a competitive environment, competing with other local banks similar in size and with significantly larger regional banks. We monitor rates at other financial institutions in the area to ascertain that our rates are competitive with the market. We also attempt to offer a wide variety of products to meet the needs of our customers. We set our deposit pricing to be competitive with other banks in our market area.

We have also utilized alternative funding sources as needed, including short-term borrowings, advances from the Federal Home Loan Bank of Indianapolis or the Federal Reserve Bank of Chicago, securities sold under agreements to repurchase ("repo borrowings") and certificates of deposit purchased from brokers.

Before November of 2008, we purchased brokered deposits to supplement funding needs from time to time. These are time accounts originated outside of our local market area. The Bank has not accepted or renewed brokered deposits since November of 2008. There were no brokered deposits remaining at December 31, 2011 as the last such deposit matured in December 2011. Brokered deposits comprised approximately 4% of total deposits at December 31, 2010.

Additional information about the restrictions on the Bank's deposit gathering activities may be found in this Item 1 under the heading "Regulatory Developments – Deposits and Other Funding Activities," and is here incorporated by reference.

Deposit Portfolio Composition

The following table sets forth the average deposit balances and the weighted average rates paid (dollars in thousands).

	2011		2010		2009	
	Average Amount	Average Rate	Average Amount	Average Rate	Average Amount	Average Rate
Noninterest bearing demand	\$ 296,926	---	\$ 238,974	---	\$ 202,978	---
Interest bearing demand	185,591	0.2%	224,843	0.3%	238,372	0.6%
Savings and money market accounts	369,758	0.6%	315,640	0.6%	391,758	0.7%
Time	371,870	1.8%	534,429	2.8%	730,358	3.7%
Total deposits	\$ 1,224,145	0.7%	\$ 1,313,886	1.3%	\$ 1,563,466	2.0%

The following table summarizes time deposits in amounts of \$100,000 or more by time remaining until maturity as of December 31, 2011 (dollars in thousands)

Three months or less	\$ 15,259
Over 3 months through 6 months	17,351
Over 6 months through 1 year	38,245
Over 1 year	35,449
Total	\$ 106,304

As of the date of this report, the Bank had no material foreign deposits.

Securities Portfolio

Our securities portfolio is classified as either "available for sale" or "held to maturity." Securities classified as "available for sale" may be sold prior to maturity due to changes in interest rates, prepayment risks, and availability of alternative investments, or to meet our liquidity needs.

The primary objective of our investing activities is to provide for the safety of the principal invested. Our secondary considerations include the maximization of earnings, liquidity and to help decrease our overall exposure to changes in interest rates. We have generally invested in bonds with lower credit risk; primarily those secured by government agencies or insured municipalities, to assist in the diversification of credit risk within our asset base. We have not experienced any credit losses within our investment portfolio.

The following table reflects the composition of our securities portfolio as of the dates indicated.

(Dollars in thousands)

	December 31	
	2011	2010
U.S. Treasury and U.S. Government Agencies	\$ 31,499	\$ 8,109
Tax-exempt state and municipal bonds	4,708	83
Taxable state and municipal bonds	16,716	---
Corporate bonds	1,081	---
Other equity securities	1,042	1,011
Total	\$ 55,046	\$ 9,203

At December 31, 2011, other than our holdings in U.S. Treasury and U.S. Government Agency Securities, we had no investments in securities of any one issuer with an aggregate book value in excess of 10% of shareholders' equity. At December 31, 2011, we had no investment in securities of issuers outside of the United States.

Schedule of Maturities of Investment Securities and Weighted Average Yields

The following is a schedule of investment securities maturities and their weighted average yield by category at December 31, 2011.

(Dollars in thousands)

	Due Within One Year		One to Five Years		Five to Ten Years		After Ten Years		No Contractual Maturity	
	Amount	Weighted Average Yield	Amount	Weighted Average Yield	Amount	Weighted Average Yield	Amount	Weighted Average Yield	Amount	Weighted Average Yield
U.S. Treasury and U.S. Government Agencies	\$ ---	---	\$ 9,953	1.53%	\$ 17,678	1.54%	\$ 3,868	2.26%	\$ ---	---
Tax-exempt state and municipal bonds (1)	---	---	---	---	3,031	3.85%	1,677	4.61%	---	---
Taxable state and municipal bonds	---	---	8,946	2.74%	7,770	3.21%	---	---	---	---
Corporate bonds	---	---	1,081	2.25%	---	---	---	---	---	---
Other equity securities	---	---	---	---	---	---	---	---	1,042	3.77%
Total (1)	\$ ---	---	\$ 19,980	2.11%	\$ 28,479	2.22%	\$ 5,545	2.96%	\$ 1,042	3.77%

(1) Yields on tax-exempt securities are computed on a fully taxable-equivalent basis.

Trust Services

We began offering trust services in January 1999 to further provide for the financial needs of our customers. As of December 31, 2011, the Trust Department managed assets of approximately \$560.5 million. Our types of service include both personal trust and retirement plan services.

Our personal trust services include financial planning, investment management services, trust and estate administration and custodial services. As of December 31, 2011, personal trust assets under management totaled approximately \$401.6 million. Our retirement plan services provide all types of qualified retirement plans, including profit sharing, 401(k) and pension plans. As of December 31, 2011, retirement plan assets under management totaled approximately \$158.9 million.

Market Area

Our primary market area includes Ottawa, Kent and northern Allegan Counties, all located in Western Michigan. This area includes two mid-sized cities, Grand Rapids and Holland, and rural areas. Grand Rapids is the second largest city in Michigan. Holland is the largest city in Ottawa County. Both cities and surrounding areas have a solid and diverse economic base, which includes health and life sciences, tourism, office and home furniture, automotive components and assemblies, pharmaceutical, transportation, equipment, food and construction supplies. Grand Valley State University, a 24,000-student regional university with nearly 2,000 employees, has its three main campuses in our market area. GVSU and several smaller colleges and university affiliates located in our market area help stabilize the local economy because they are not as sensitive to the fluctuations of the broader economy. Companies operating in the market area include the Van Andel Institute, Steelcase, Herman Miller, Alticor, Gentex, Spectrum Health, Haworth, Johnson Controls, General Motors, Gerber, Magna, and Meijer.

Competition

There are many bank, thrift, credit union and other financial institution offices located within our market area. Most are branches of larger financial institutions. We also face competition from finance companies, insurance companies, mortgage companies, securities brokerage firms, money market funds and other providers of financial services. Many of our competitors have been in business a number of years, have established customer bases, are larger and have higher lending limits than we do. We compete for loans, deposits and other financial services based on our ability to communicate effectively with our customers, to understand and meet their needs and to provide high quality customer service. Our management believes that our personal service philosophy, our local decision-making and diverse delivery channels enhances our ability to compete favorably in attracting individuals and small businesses. We actively solicit customers by offering our customers personal attention, professional service, and competitive interest rates.

Employees

As of December 31, 2011, we had 392 full-time equivalent employees consisting of 339 full-time and 93 part-time employees. We have assembled a staff of experienced, dedicated and qualified professionals whose goal is to meet the financial needs of our customers while providing outstanding service. The majority of our management team has at least 10 years of banking experience, and several key personnel have more than 20 years of banking experience. None of our employees are represented by collective bargaining agreements with us.

SUPERVISION AND REGULATION

The following is a summary of statutes and regulations affecting Macatawa Bank Corporation and Macatawa Bank. A change in applicable laws or regulations may have a material effect on us and our business.

General

Financial institutions and their holding companies are extensively regulated under federal and state law. Consequently, our growth and earnings performance can be affected not only by management decisions and general economic conditions, but also by the statutes administered by, and the regulations and policies of, various governmental regulatory authorities. Those authorities include, but are not limited to, the Board of Governors of the Federal Reserve System (the "Federal Reserve Board"), the FDIC, the State of Michigan's Office of Financial and Insurance Regulation ("OFIR"), the Internal Revenue Service, and state taxing authorities. The effect of such statutes, regulations and policies can be significant, and cannot be predicted with a high degree of certainty.

Federal and state laws and regulations generally applicable to financial institutions and their holding companies regulate, among other things, the scope of business, investments, reserves against deposits, capital levels relative to operations, lending activities and practices, the nature and amount of collateral for loans, the establishment of branches, mergers, consolidations and declaration and payment of dividends. The system of supervision and regulation applicable to us and our bank establishes a comprehensive framework for our respective operations and is intended primarily for the protection of the FDIC's deposit insurance fund, our depositors, and the public, rather than our shareholders.

Federal law and regulations establish supervisory standards applicable to our lending activities, including internal controls, credit underwriting, loan documentation and loan-to-value ratios for loans secured by real property.

Recent Developments

Dodd-Frank Act: The Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 ("Dodd-Frank Act"), was signed into law by President Obama on July 21, 2010. The Dodd-Frank Act represents a comprehensive overhaul of the financial services industry within the United States, establishes the federal Bureau of Consumer Financial Protection ("BCFP"), and will require the BCFP and other federal agencies to implement many new and significant rules and regulations. At this time, it is difficult to predict the extent to which the Dodd-Frank Act or the resulting rules and regulations will impact the Company's business. Compliance with these new laws and regulations will likely result in additional costs, which could be significant and could adversely impact the Company's results of operations, financial condition or liquidity.

Deposit Insurance: The FDIC has finalized changes to its deposit insurance assessment base effective April 1, 2011, which uses average consolidated total assets less average tangible equity as the assessment base instead of quarterly deposits. Additional information about these changes may be found in this Item 1 below under the heading "Macatawa Bank – Deposit Insurance."

As a result of provisions of the Dodd-Frank Act, all funds in a "noninterest-bearing transaction account" are insured in full by the FDIC from December 31, 2010, through December 31, 2012. This temporary unlimited coverage is in addition to, and separate from, the general FDIC deposit insurance coverage of up to \$250,000 available to depositors. The increase in maximum deposit insurance coverage to \$250,000 was made permanent under the Dodd-Frank Act.

Debit Card Interchange Fees and Routing: The Federal Reserve Board in June 2011 issued a rule to implement a provision in the Dodd-Frank Act that requires it to set debit-card interchange fees so they are "reasonable and proportional" in relation to the cost of the transaction incurred by the card issuer. The rule could result in a significant reduction in banks' debit-card interchange revenue. Though the rule technically does not apply to institutions with less than \$10 billion, there is concern that the price controls will harm community banks, such as Macatawa Bank, which will be pressured by the marketplace to lower their own interchange rates.

Macatawa Bank Corporation

General. Macatawa Bank Corporation is registered with, and subject to regulation by, the Federal Reserve Board under the Bank Holding Company Act of 1956, as amended (the "BHCA"). Under the BHCA, Macatawa Bank Corporation is subject to periodic examination by the Federal Reserve Board, and is required to file with the Federal Reserve Board periodic reports of our operations and such additional information as the Federal Reserve Board may require.

In accordance with Federal Reserve Board policy, Macatawa Bank Corporation is expected to act as a source of financial strength to the Bank and to commit resources to support the Bank in circumstances where we might not do so absent such policy. In addition, if the OFIR deems the Bank's capital to be impaired, the OFIR may require the Bank to restore its capital by a special assessment upon Macatawa Bank Corporation as the Bank's sole shareholder. If Macatawa Bank Corporation were to fail to pay any such assessment, the directors of the Bank would be required, under Michigan law, to sell the shares of the Bank's stock owned by Macatawa Bank Corporation to the highest bidder at either a public or private auction and use the proceeds of the sale to restore the Bank's capital.

As discussed in this Item 1 under the heading "Regulatory Developments," Macatawa Bank Corporation has formally entered into a Written Agreement with the Federal Reserve Bank of Chicago with an effective date of July 23, 2010. This information is here incorporated by reference.

Investments and Activities. In general, any direct or indirect acquisition by us of any voting shares of any bank which would result in our direct or indirect ownership or control of more than 5% of any class of voting shares of such bank, and any merger or consolidation between us and another financial holding company or bank holding company, will require the prior written approval of the Federal Reserve Board under the BHCA.

The merger or consolidation of the Bank with another bank, or the acquisition by the Bank of assets of another bank, or the assumption of liability by the Bank to pay any deposits of another bank, will require the prior written approval of the responsible federal depository institution regulatory agency under the Bank Merger Act. In addition, in certain such cases, an application to, and the prior approval of, the Federal Reserve Board under the BHCA or the OFIR under the Michigan Banking Code, may be required.

Capital Requirements. The Federal Reserve Board uses capital adequacy guidelines in its examination and regulation of bank holding companies. If capital falls below minimum guidelines, a bank holding company may, among other items, be denied approval to acquire or establish additional banks or non-bank businesses.

Additional information on our capital ratios may be found in Item 7 of this report under the heading "Capital Resources" included in "Management's Discussion and Analysis of Results of Operations and Financial Condition" and in Item 8 of this report in the Notes to the Consolidated Financial Statements, and is here incorporated by reference.

Dividends. Macatawa Bank Corporation is a corporation separate and distinct from the Bank. Most of our revenues are dividends paid by the Bank. Thus, Macatawa Bank Corporation's ability to pay dividends to our shareholders is indirectly limited by restrictions on the Bank's ability to pay dividends described below. Further, in a policy statement, the Federal Reserve Board has expressed its view that a bank holding company should not pay cash dividends if its net income available to shareholders for the past four quarters, net of dividends paid during that period, is not sufficient to fully fund the dividends, its prospective rate of earnings retention is not consistent with capital needs and overall current and prospective financial condition, or it will not meet, or is in danger of not meeting, its minimum regulatory capital adequacy ratios. The Federal Reserve Board also possesses enforcement powers over bank holding companies and their non-bank subsidiaries to prevent or remedy actions that represent unsafe or unsound practices or violations of applicable statutes and regulations. Among these powers is the ability to proscribe the payment of dividends by banks and bank holding companies. Similar enforcement powers over our bank are possessed by the FDIC. The "prompt corrective action" provisions of federal law and regulation authorizes the FDIC to restrict the payment of dividends to Macatawa Bank Corporation by our bank if it fails to meet specified capital levels.

In addition, the Michigan Business Corporation Act provides that dividends may be legally declared or paid only if after the distribution a corporation, like Macatawa Bank Corporation, can pay its debts as they come due in the usual course of business and its total assets equal or exceed the sum of its liabilities plus the amount that would be needed to satisfy the preferential rights upon dissolution of any holders of preferred stock whose preferential rights are superior to those receiving the distribution.

Macatawa Bank Corporation has suspended the payment of dividends on common and preferred stock and deferred interest payments on trust preferred securities. Additional information regarding the suspension of dividends and deferral of interest payments may be found in Item 5 of this report, Item 7 of this report under the heading "Capital Resources" included in "Management's Discussion and Analysis of Results of Operations and Financial Condition" and in Item 8 of this report in the Notes to the Consolidated Financial Statements, and is here incorporated by reference.

Changes in Directors and Senior Executive Officers. Macatawa Bank Corporation and the Bank have each been advised by their federal bank regulators that they are deemed to be in "troubled condition." As a result, Macatawa Bank Corporation and the Bank must each (i) provide their federal bank regulator with at least 30 days' prior notice before appointing any new director or senior executive officer or changing the responsibilities of any senior executive officer; and (ii) obtain the approval of their federal bank regulator before making (or agreeing to make) any severance payments (except pursuant to a qualified pension or retirement plan and certain other employee benefit plans). These regulatory requirements could make it more difficult for us to retain and hire qualified senior management.

Federal Securities Regulation. Our common stock is registered under the Securities Exchange Act of 1934, as amended (the "Exchange Act"). We are subject to the information, proxy solicitation, insider trading and other restrictions and requirements of the SEC under the Exchange Act. We are subject to the Sarbanes-Oxley Act, which imposes numerous reporting, accounting, corporate governance and business practices on companies, as well as financial and other professionals who have involvement with the U.S. public markets. We are generally subject to these requirements and applicable SEC rules and regulations.

Macatawa Bank

General. Macatawa Bank is a Michigan banking corporation, and its deposit accounts are insured by the Deposit Insurance Fund (the "DIF") of the FDIC. As a DIF-insured Michigan-chartered bank, the Bank is subject to the examination, supervision, reporting and enforcement requirements of the OFIR, as the chartering authority for Michigan banks, and the FDIC, as administrator of the DIF. These agencies, and the federal and state laws applicable to the Bank and its operations, extensively regulate various aspects of the banking business, including, among other things, permissible types and amounts of loans, investments and other activities, capital adequacy, branching, interest rates on loans and on deposits, the maintenance of non-interest bearing reserves on deposit accounts, and the safety and soundness of banking practices.

As discussed in this Item 1 under the heading "Regulatory Developments," the Bank's Consent Order was terminated effective March 2, 2012 and, in connection with termination of the Consent Order, the Bank reached an understanding with its regulators in the form of the MOU. This information is here incorporated by reference.

Deposit Insurance. As an FDIC-insured institution, the Bank is required to pay deposit insurance premium assessments to the FDIC. The FDIC has adopted a risk-based assessment system under which all insured depository institutions are placed into one of four categories and assessed insurance premiums, based upon their respective levels of capital and results of supervisory evaluation. Institutions categorized as well-capitalized (as defined by the FDIC) and considered healthy pay the lowest premium, while institutions that are categorized as less than adequately capitalized (as defined by the FDIC) and considered of substantial supervisory concern pay the highest premium. Risk classification of all insured institutions is made by the FDIC for each semi-annual assessment period.

The FDIC is required to establish assessment rates for insured depository institutions at levels that will maintain the DIF at a Designated Reserve Ratio (DRR) selected by the FDIC within a range of 1.15% to 1.50% of estimated insured deposits. The FDIC is allowed to manage the pace at which the reserve ratio varies within this range. Due to recent disruptions in the financial markets and large numbers of bank failures in recent years, the DRR fell below 1.15%. The FDIC has adopted an Amended Restoration Plan which established the time within which the reserve ratio must be returned to 1.15% at seven years. The FDIC imposed a special assessment on all insured depository institutions that was collected on September 30, 2009. The FDIC may impose additional special assessments under certain circumstances. Additionally, in the fourth quarter of 2009, insured institutions were required to prepay their estimated risk-based assessments for all of 2010, 2011 and 2012 based on a 5% annual growth rate.

The FDIC implemented changes to its deposit insurance assessment base effective April 1, 2011, which uses average consolidated total assets less average tangible equity as the assessment base instead of quarterly deposits. Under this new calculation, most well capitalized banks will pay 5 to 9 basis points annually, increasing to 35 basis points for banks that post significant supervisory concerns. This base rate may be adjusted for the level of unsecured debt and brokered deposits, resulting in adjusted rates ranging from 2.5 to 9 basis points annually for most well capitalized banks to 30 to 45 basis points for banks that pose significant supervisory concerns. We estimate our annual assessment rate under these new guidelines to be 14 basis points in 2012.

FICO Assessments. The Bank, as a member of the DIF, is subject to assessments to cover the payments on outstanding obligations of the Financing Corporation ("FICO"). From now until the maturity of the outstanding FICO obligations in 2019, DIF members will share the cost of the interest on the FICO bonds on a *pro rata* basis. It is estimated that FICO assessments during this period will be less than 0.025% of deposits.

Capital Requirements. The FDIC has established the following minimum capital standards for FDIC insured banks: a leverage requirement consisting of a ratio of Tier 1 capital to total average assets and risk-based capital requirements consisting of a ratio of total capital to total risk-weighted assets and a ratio of Tier 1 capital to total risk-weighted assets. Tier 1 capital consists principally of shareholders' equity.

Federal regulations define these capital categories as follows:

	<u>Total Risk-Based Capital Ratio</u>	<u>Tier 1 Risk-Based Capital Ratio</u>	<u>Leverage Ratio</u>
Well capitalized	10% or above	6% or above	5% or above
Adequately capitalized	8% or above	4% or above	4% or above
Undercapitalized	Less than 8%	Less than 4%	Less than 4%
Significantly undercapitalized	Less than 6%	Less than 3%	Less than 3%
Critically undercapitalized	--	--	A ratio of tangible equity to total assets of 2% or less

Federal law provides the federal banking regulators with broad power to take prompt corrective action to resolve the problems of undercapitalized institutions. Depending upon the capital category to which an institution is assigned, the regulators' corrective powers include: requiring the submission of a capital restoration plan; placing limits on asset growth and restrictions on activities; requiring the institution to issue additional capital stock (including additional voting stock) or to be acquired; restricting transactions with affiliates; restricting the interest rate the institution may pay on deposits; ordering a new election of directors of the institution; requiring that senior executive officers or directors be dismissed; prohibiting the institution from accepting deposits from correspondent banks; requiring the institution to divest certain subsidiaries; prohibiting the payment of principal or interest on subordinated debt; and ultimately, appointing a receiver for the institution.

In general, a depository institution may be reclassified to a lower category than is indicated by its capital levels if the appropriate federal depository institution regulatory agency determines the institution to be otherwise in an unsafe or unsound condition or to be engaged in an unsafe or unsound practice. This could include a failure by the institution, following receipt of a less-than-satisfactory rating on its most recent examination report, to correct the deficiency.

As of December 31, 2011, the Bank was categorized as "adequately capitalized" as a result of being subject to the Consent Order. However, had the Consent Order been terminated as of December 31, 2011, the Bank would have been categorized as "well capitalized." We expect the Bank to be categorized as "well capitalized" as of March 31, 2012. Additional information on our capital ratios may be found in Item 8 of this report in the Notes to the Consolidated Financial Statements, and is here incorporated by reference.

Dividends. Under Michigan law, the Bank is restricted as to the maximum amount of dividends it may pay on its common stock. The Bank may not pay dividends except out of net income after deducting its losses and bad debts. A Michigan state bank may not declare or pay a dividend unless the bank will have surplus amounting to at least 20% of its capital after the payment of the dividend.

Federal law generally prohibits a depository institution from making any capital distribution (including payment of a dividend) or paying any management fee to its holding company if the depository institution would thereafter be undercapitalized. The FDIC may prevent an insured bank from paying dividends if the bank is in default of payment of any assessment due to the FDIC. In addition, the FDIC may prohibit the payment of dividends by our bank, if such payment is determined to be an unsafe and unsound banking practice.

Additional information about restrictions on payment of dividends by the Bank may be found in this Item 1 under the heading "Regulatory Developments" and in Item 8 of this report in Notes 1 and 17 to the Consolidated Financial Statements, and is here incorporated by reference.

Insider Transactions. The Bank is subject to certain restrictions imposed by federal law on any extensions of credit to Macatawa or any subsidiary of Macatawa, on investments in the stock or other securities of Macatawa or any subsidiary of Macatawa and the acceptance of the stock or other securities of Macatawa or any subsidiary of Macatawa as collateral for loans. Certain limitations and reporting requirements are also placed on extensions of credit by our bank to its directors and officers, to Macatawa's directors and officers, to our principal shareholders and to "related interests" of such directors, officers and principal shareholders. In addition, federal law and regulations may affect the terms upon which any person becoming a director or officer of our company or any subsidiary or a principal shareholder in our company may obtain credit from banks with which our bank maintains a correspondent relationship.

Safety and Soundness Standards. The federal banking agencies have adopted guidelines to promote the safety and soundness of federally insured depository institutions. These guidelines establish standards for internal controls, information systems, internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth, compensation, fees and benefits, asset quality and earnings.

Investments and Other Activities. Under federal law and FDIC regulations, FDIC insured state banks are prohibited, subject to certain exceptions, from making or retaining equity investments of a type, or in an amount, that are not permissible for a national bank. Federal law, as implemented by FDIC regulations, also prohibits FDIC insured state banks and their subsidiaries, subject to certain exceptions, from engaging as principal in any activity that is not permitted for a national bank or its subsidiary, respectively, unless the bank meets, and continues to meet, its minimum regulatory capital requirements and the FDIC determines the activity would not pose a significant risk to the DIF. Impermissible investments and activities must be divested or discontinued within certain time frames set by the FDIC in accordance with federal law.

Consumer Protection Laws. The Bank's business includes making a variety of types of loans to individuals. In making these loans, we are subject to state usury and regulatory laws and to various federal laws and regulations, including the privacy of consumer financial information provisions of the Gramm-Leach-Bliley Act, the Equal Credit Opportunity Act, the Fair Credit Reporting Act, the Truth in Lending Act, the Real Estate Settlement Procedures Act, and the Home Mortgage Disclosure Act, which prohibit discrimination, specify disclosures to be made to borrowers regarding credit and settlement costs, and regulate the mortgage loan servicing activities of the Bank, including the maintenance and operation of escrow accounts and the transfer of mortgage loan servicing. In receiving deposits, the Bank is subject to extensive regulation under state and federal law and regulations, including the Truth in Savings Act, the Expedited Funds Availability Act, the Bank Secrecy Act, the Electronic Funds Transfer Act, and the Federal Deposit Insurance Act. Violation of these laws could result in the imposition of significant damages and fines upon the Bank and its directors and officers.

Branching Authority. Michigan banks have the authority under Michigan law to establish branches anywhere in the State of Michigan, subject to receipt of all required regulatory approvals. Banks may establish interstate branch networks through acquisitions of other banks. The establishment of de novo interstate branches or the acquisition of individual branches of a bank in another state (rather than the acquisition of an out-of-state bank in its entirety) is allowed only if specifically authorized by state law.

Michigan law permits both U.S. and non-U.S. banks to establish branch offices in Michigan. The Michigan Banking Code permits, in appropriate circumstances and with the approval of OFIR, (1) acquisition of Michigan banks by FDIC-insured banks, savings banks or savings and loan associations located in other states, (2) sale by a Michigan bank of branches to an FDIC-insured bank, savings bank or savings and loan association located in a state in which a Michigan bank could purchase branches of the purchasing entity, (3) consolidation of Michigan banks and FDIC-insured banks, savings banks or savings and loan associations located in other states having laws permitting such consolidation, (4) establishment of branches in Michigan by FDIC-insured banks located in other states, the District of Columbia or U.S. territories or protectorates having laws permitting a Michigan bank to establish a branch in such jurisdiction, and (5) establishment by foreign banks of branches located in Michigan. A Michigan bank holding company may acquire a non-Michigan bank and a non-Michigan bank holding company may acquire a Michigan bank.

ITEM 1A: Risk Factors.

Risks related to the our Business

We recognized significant losses in 2008, 2009 and the first quarter of 2010 and we may incur additional losses during 2012.

We were profitable in the second, third and fourth quarters of 2010 and each quarter of 2011, but we had posted a high consolidated net loss in each of the preceding six consecutive quarters, and a total consolidated net loss during that time period of \$123.5 million. Net income for the second quarter of 2010 was largely due to a \$2.7 million gain on the sale of securities. Net income for the fourth quarter of 2010 was impacted by a \$574,000 gain on the sale of a bank owned property. The last three quarters of 2010 and the each quarter of 2011 were positively affected by reductions in the allowance for loan losses. Total nonperforming assets as of December 31, 2011 remained high and related costs were also elevated. There is no assurance that our results of operations will stay profitable in the short term or at all. We have recorded provisions for loan losses of \$(4.7) million and \$22.5 million for the years ended December 31, 2011 and 2010, respectively. Costs associated with the administration and disposition of nonperforming assets were \$15.6 million and \$15.4 million for the years ended December 31, 2011 and 2010, respectively. In light of the current economic environment, significant additional provisions for loan losses and nonperforming asset costs may yet be necessary. As a result, we may incur significant additional credit costs in 2012 or beyond, which could adversely impact our financial condition, results of operations, and the value of our common stock.

Our elevated level of nonperforming assets and other problem loans could continue to have an adverse effect on the Company's results of operations and financial condition

Our nonperforming assets (which includes non-accrual loans, foreclosed properties and other accruing loans past due 90 days or more) were approximately \$95.4 million at December 31, 2011. These elevated levels could continue to negatively impact operating results through higher loan losses, lost interest and higher costs to administer problem assets. Until these elevated levels of problem assets are reduced, the Company could record operating losses that further materially deteriorate the Company's financial condition and reduce capital levels, further exposing the Company to additional risk factors discussed below.

National, state and local economic conditions could have a material adverse effect on the Company's results of operations and financial condition

The results of operations for financial institutions, including our Bank, may be materially and adversely affected by changes in prevailing national, state and local economic conditions. Our profitability is heavily influenced by the quality of the Company's loan portfolio and the stability of the Company's deposits. Unlike larger national or regional banks that are more geographically diversified, the Company provides banking and financial services to customers primarily in Ottawa, Kent and Allegan Counties of Western Michigan. The local economic conditions in these areas have a significant impact on the demand for the Company's products and services, and the ability of the Company's customers to repay loans, the value of the collateral securing loans and the stability of the Company's deposit funding sources. A significant decline in general economic conditions, caused by inflation, recession, acts of terrorism, outbreak of hostilities or other international or domestic occurrences, unemployment, changes in securities, financial, capital or credit markets or other factors, could impact national and local economic conditions and have a material adverse effect on the Company's results of operations and financial condition.

Our credit losses could increase and our allowance for loan losses may not be adequate to cover actual loan losses.

The risk of nonpayment of loans is inherent in all lending activities and nonpayment of loans may have a material adverse effect on our earnings and overall financial condition, and the value of our common stock. We make various assumptions and judgments about the collectability of our loan portfolio and provide an allowance for potential losses based on a number of factors. If our assumptions are wrong, our allowance for loan losses may not be sufficient to cover our losses, which could have an adverse affect on our operating results, and may cause us to increase the allowance in the future. The actual amount of future provisions for loan losses cannot now be determined and may exceed the amounts of past provisions for loan losses. Federal banking regulators, as an integral part of their supervisory function, periodically review our allowance for loan losses. These regulatory agencies may require us to increase our provision for loan losses or to recognize further loan charge-offs based upon their judgments, which may be different from ours. Any increase in the allowance for loan losses could have a negative effect on our regulatory capital ratios, net income, financial condition and results of operations.

Failure to comply with our regulatory agreements could result in enforcement proceedings.

Macatawa Bank Corporation is subject to a Written Agreement with the FRB. We believe that the Company was in full compliance with the Written Agreement as of December 31, 2011. Future compliance with the Written Agreement is not assured and not entirely within our control. If the Company fails to comply with the Written Agreement in the future, we could become subject to enforcement actions which could result in the removal of directors, officers, employees and institution affiliated parties and the imposition of civil money penalties and even ultimately closure of the Bank.

Macatawa Bank has reached an understanding in the form of the MOU with its regulators. Failure to comply with the terms of the MOU could result in enforcement orders or penalties from its regulators, under the terms of which the Bank could, among other things, become subject to restrictions on its ability to develop any new business and restrictions on its existing business, and it could be required to raise additional capital, dispose of certain assets and liabilities within a prescribed period of time, or both. The terms of any such enforcement order or action could have a material negative effect on our business, operations, financial condition, results of operations or the value of our common stock.

We are subject to liquidity risk in our operations, which could adversely affect our ability to fund various obligations.

Liquidity risk is the possibility of being unable to meet obligations as they come due, pay deposits when withdrawn, and fund loan and investment opportunities as they arise because of an inability to liquidate assets or obtain adequate funding on a timely basis, at a reasonable cost and within acceptable risk tolerances. Liquidity is required to fund various obligations, including credit obligations to borrowers, mortgage originations, withdrawals by depositors, repayment of debt, operating expenses and capital expenditures. Liquidity of the Bank is derived primarily from retail deposit growth and retention, principal and interest payments on loans and investment securities, net cash provided from operation and access to other funding sources. Liquidity is essential to our business. We must maintain sufficient funds to respond to the needs of depositors and borrowers. An inability to raise funds through deposits, borrowings, the sale or pledging as collateral of loans and other assets could have a material adverse effect on our liquidity. An inability to retain the current level of deposits, including the loss of one or more of the Bank's larger deposit relationships, could have a material adverse effect on the Bank's liquidity. Our access to funding sources in amounts adequate to finance activities could be impaired by factors that affect us specifically or the financial services industry in general. Factors that could detrimentally impact our access to liquidity sources include a decrease in the level of the business activity due to a market down turn or regulatory action that limits or eliminates access to alternate funding sources, including brokered deposits discussed above. Our ability to borrow could also be impaired by factors that are nonspecific to the Company, such as severe disruption of the financial markets or negative expectations about the prospects for the financial services industry as a whole.

Our construction and development lending has exposed us to significant risks and has resulted in a disproportionate amount of the increase in our provision for loan losses in 2008 through 2010.

Construction and development loans consist of loans to commercial customers for the construction of their business facilities. They also include construction loans to builders and developers for the construction of one- to four-family residences and the development of one- to four-family lots, residential subdivisions, condominium developments and other commercial developments. This portfolio has been particularly adversely affected by job losses, declines in real estate value, declines in home sale volumes, and declines in new home building. Declining real estate values have resulted in sharp increases in losses, particularly in the land development and construction loan portfolios to residential developers. This type of lending is generally considered to have more complex credit risks than traditional single-family residential lending because the principal is concentrated in a limited number of loans with repayment dependent on the successful completion and sales of the related real estate project. Consequently, these loans are often more sensitive to adverse conditions in the real estate market or the general economy than other real estate loans. These loans are generally less predictable and more difficult to evaluate and monitor and collateral may be difficult to dispose of in a market decline. Additionally, we may experience significant construction loan losses if independent appraisers or project engineers inaccurately estimate the cost and value of construction loan projects. The Company curtailed this type of lending in 2008. During 2009, 2010 and 2011, the Company also made a significant effort to reduce its exposure to residential land development and other construction and development loans.

Construction and development loans have contributed disproportionately to the increase in our provisions for loan losses in recent periods. As of December 31, 2011, we had approximately \$66.3 million in loans to residential developers, or approximately 6.2% of our loan portfolio. Approximately \$28.9 million, or 49.8%, of our net charge-offs during 2009, approximately \$9.2 million, or 31.0%, of our net charge-offs during 2010 and approximately \$473,000, or 4.3%, of our net charge-offs during 2011 were attributable to construction and development loans. Further deterioration in our construction and development loan portfolio could result in additional increases in the provision for loan losses and an increase in charge-offs, all of which could have a material adverse effect on our financial condition and results of operations.

We have significant exposure to risks associated with commercial and residential real estate.

A substantial portion of our loan portfolio consists of commercial and residential real estate-related loans, including real estate development, construction and residential and commercial mortgage loans. As of December 31, 2011, we had approximately \$568.3 million of commercial real estate loans outstanding, which represented approximately 53% of our loan portfolio. As of that same date, we had approximately \$156.9 million in residential real estate loans outstanding, or approximately 15% of our loan portfolio. Consequently, real estate-related credit risks are a significant concern for us. The adverse consequences from real estate-related credit risks tend to be cyclical and are often driven by national economic developments that are not controllable or entirely foreseeable by us or our borrowers. General difficulties in our real estate markets have recently contributed to significant increases in our nonperforming loans, charge-offs, and decreases in our income.

Commercial loans may expose us to greater financial and credit risk than other loans.

Our commercial loan portfolio, including commercial mortgages, was approximately \$795.3 million at December 31, 2011, comprising approximately 74% of our total loan portfolio. Commercial loans generally carry larger loan balances and can involve a greater degree of financial and credit risk than other loans. Any significant failure to pay on time by our customers would hurt our earnings. The increased financial and credit risk associated with these types of loans are a result of several factors, including the concentration of principal in a limited number of loans and borrowers, the size of loan balances, the effects of general economic conditions on income-producing properties and the increased difficulty of evaluating and monitoring these types of loans. In addition, when underwriting a commercial or industrial loan, we may take a security interest in commercial real estate, and, in some instances upon a default by the borrower, we may foreclose on and take title to the property, which may lead to potential financial risks for us under applicable environmental laws. If hazardous substances were discovered on any of these properties, we may be liable to governmental agencies or third parties for the costs of remediation of the hazard, as well as for personal injury and property damage. Many environmental laws can impose liability regardless of whether we knew of, or were responsible for, the contamination.

Our loan portfolio has and will continue to be affected by the ongoing correction in residential real estate prices and reduced levels of home sales.

Loans to residential developers involved in the development or sale of 1-4 family residential properties were approximately \$66.3 million, \$95.7 million, \$153.3 million and \$204.4 million at December 31, 2011, 2010, 2009 and 2008, respectively. There continues to be a general slowdown in the housing market in our market area, reflecting declining prices and excess inventories of houses to be sold. As a result, home builders have experienced financial deterioration. We expect the home builder market to continue to be volatile and anticipate continued pressure on the home builder segment. As we continue our on-going portfolio monitoring, we will make credit and reserve decisions based on the current conditions of the borrower or project combined with our expectations for the future. If the deterioration in the housing market continues, we could experience higher charge-offs and delinquencies in this portfolio.

We may face increasing pressure from historical purchasers of our residential mortgage loans to repurchase those loans or reimburse purchasers for losses related to those loans.

We generally sell the fixed rate long-term residential mortgage loans we originate on the secondary market and retain adjustable rate mortgage loans for our portfolios. In response to the financial crisis, we believe that purchasers of residential mortgage loans, such as government sponsored entities, are increasing their efforts to seek to require sellers of residential mortgage loans to either repurchase loans previously sold or reimburse purchasers for losses related to loans previously sold when losses are incurred on a loan previously sold due to actual or alleged failure to strictly conform to the purchaser's purchase criteria. As a result, while we have not yet been required to repurchase such loans, we may face increasing pressure from historical purchasers of our residential mortgage loans to repurchase those loans or reimburse purchasers for losses related to those loans and we may face increasing expenses to defend against such claims. If we are required in the future to repurchase loans previously sold, reimburse purchasers for losses related to loans previously sold, or if we incur increasing expenses to defend against such claims, our financial condition and results of operations would be negatively affected, and would lower our capital ratios as a result of increasing assets and lowering income through expenses and any loss incurred.

For the five-year period ended December 31, 2011, the Company has sold an aggregate of \$514.7 million of residential mortgage loans on the secondary market. As of December 31, 2011, the Company had two pending make whole requests with respect to loans having an aggregate of \$244,000 in principal amount, and had not realized any loss, related to residential mortgage loans sold on the secondary market during the five-year period ended December 31, 2011.

Changes in interest rates may negatively affect our earnings and the value of our assets.

Our earnings and cash flows depend substantially upon our net interest income. Net interest income is the difference between interest income earned on interest-earning assets, such as loans and investment securities, and interest expense paid on interest-bearing liabilities, such as deposits and borrowed funds. Interest rates are sensitive to many factors that are beyond our control, including general economic conditions, competition and policies of various governmental and regulatory agencies and, in particular, the policies of the Federal Reserve Board. Changes in monetary policy, including changes in interest rates, could influence not only the interest we receive on loans and investment securities and the amount of interest we pay on deposits and borrowings, but such changes could also affect: (i) our ability to originate loans and obtain deposits; (ii) the fair value of our financial assets and liabilities, including our securities portfolio; and (iii) the average duration of our interest-earning assets. This also includes the risk that interest-earning assets may be more responsive to changes in interest rates than interest-bearing liabilities, or vice versa (repricing risk), the risk that the individual interest rates or rates indices underlying various interest-earning assets and interest-bearing liabilities may not change in the same degree over a given time period (basis risk), and the risk of changing interest rate relationships across the spectrum of interest-earning asset and interest-bearing liability maturities (yield curve risk), including a prolonged flat or inverted yield curve environment. Any substantial, unexpected, prolonged change in market interest rates could have a material adverse effect on our financial condition and results of operations.

The Dodd-Frank Act may adversely impact the Company's results of operations, financial condition or liquidity.

On July 21, 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the "Dodd-Frank Act"), was signed into law by President Obama. The Dodd-Frank Act represents a comprehensive overhaul of the financial services industry within the United States, established the federal Bureau of Consumer Financial Protection (the "BCFP"), and requires the BCFP and other federal agencies to implement many new and significant rules and regulations. At this time, it is difficult to predict the extent to which the Dodd-Frank Act or the resulting rules and regulations will impact the Company's and the Bank's business. Compliance with these new laws and regulations will likely result in additional costs, which could be significant, and could adversely impact the Company's results of operations, financial condition or liquidity.

We are subject to significant government regulation, and any regulatory changes may adversely affect us.

The banking industry is heavily regulated under both federal and state law. These regulations are primarily intended to protect customers and the Deposit Insurance Fund, not our creditors or shareholders. We are subject to extensive regulation by the Federal Reserve, the FDIC and OFIR, in addition to other regulatory and self-regulatory organizations. Regulations affecting banks and financial services companies undergo continuous change, and we cannot predict the ultimate effect of such changes, which could have a material adverse effect on our profitability or financial condition.

The Company could be adversely affected by the soundness of other financial institutions, including defaults by larger financial institutions.

The Company's ability to engage in routine funding transactions could be adversely affected by the actions and commercial soundness of other financial institutions. Financial services institutions are interrelated as a result of credit, trading, clearing, counterparty or other relationships between financial institutions. The Company has exposure to multiple counterparties, and the Company routinely executes transactions with counterparties in the financial industry. As a result, defaults by, or even rumors or questions about, one or more financial services institutions, or the financial services industry generally, have led to market-wide liquidity problems and could lead to losses or defaults by the Company or by other institutions. This is sometimes referred to as "systemic risk" and may adversely affect financial intermediaries, such as clearing agencies, clearing houses, banks, securities firms and exchanges, with which the Company interacts on a daily basis, and therefore could adversely affect the Company.

We rely heavily on our management and other key personnel, and the loss of any of them may adversely affect our operations.

We are and will continue to be dependent upon the services of our management team and other key personnel. Losing the services of one or more key members of our management team could adversely affect our operations.

Our controls and procedures may fail or be circumvented.

Management regularly reviews and updates our internal controls, disclosure controls and procedures, and corporate governance policies and procedures. Any system of controls, however well designed and operated, is based in part on certain assumptions and can provide only reasonable, not absolute, assurances that the objectives of the system are met. If we fail to identify and remediate control deficiencies, it is possible that a material misstatement of interim or annual financial statements will not be prevented or detected on a timely basis. In addition, any failure or circumvention of our other controls and procedures or failure to comply with regulations related to controls and procedures could have a material adverse effect on our business, results of operations and financial condition.

The Bank may be required to pay additional insurance premiums to the FDIC, which could negatively impact earnings.

Insured institution failures, as well as deterioration in banking and economic conditions, have significantly increased FDIC loss provisions, resulting in a decline in the designated reserve ratio to historical lows. The reserve ratio may continue to decline in the future. In addition, the limit on FDIC coverage has been increased to \$250,000. Depending upon any future losses that the FDIC insurance fund may suffer, there can be no assurance that there will not be additional premium increases in order to replenish the fund. The FDIC may need to set a higher base rate schedule or impose special assessments due to future financial institution failures and updated failure and loss projections. Increased FDIC assessment rates could have an adverse impact on our results of operations.

If we cannot raise additional capital when needed, our ability to further expand our operations through organic growth and acquisitions could be materially impaired.

We are required by federal and state regulatory authorities to maintain specified levels of capital to support our operations. We may need to raise additional capital to support our current level of assets or our growth. Our ability to raise additional capital will depend on conditions in the capital markets at that time, which are outside our control, and on our financial performance. We cannot assure that we will be able to raise additional capital in the future on terms acceptable to us or at all. If we cannot raise additional capital when needed, our ability to maintain our current level of assets or to expand our operations through organic growth and acquisitions could be materially limited. Additional information on the capital requirements applicable to the Bank may be found under the heading "Capital Requirements" in Item 1 and "Regulatory Capital" in Note 17 in Item 8.

We may be a defendant in a variety of litigation and other actions, which may have a material adverse effect on our financial condition and results of operations.

We may be involved from time to time in a variety of litigation arising out of our business. Our insurance may not cover all claims that may be asserted against us, and any claims asserted against us, regardless of merit or eventual outcome, may harm our reputation or cause us to incur unexpected expenses, which could be material in amount. Should the ultimate expenses, judgments or settlements in any litigation exceed our insurance coverage, they could have a material adverse effect on our financial condition and results of operations. In addition, we may not be able to obtain appropriate types or levels of insurance in the future, and we may not be able to obtain adequate replacement of our existing policies with acceptable terms, if at all.

Our future success is dependent on our ability to compete effectively in the highly competitive banking industry.

We face substantial competition in all phases of our operations from a variety of different competitors. Our future growth and success will depend on our ability to compete effectively in this highly competitive environment. We compete for deposits, loans and other financial services with numerous Michigan-based and out-of-state banks, thrifts, credit unions and other financial institutions as well as other entities which provide financial services. Some of the financial institutions and financial services organizations with which we compete are not subject to the same degree of regulation as we are. Most of our competitors have been in business for many years, have established customer bases, are larger, and have substantially higher lending limits than we do. The financial services industry is also likely to become more competitive as further technological advances enable more companies to provide financial services.

Evaluation of investment securities for other-than-temporary impairment involves subjective determinations and could materially impact our results of operations and financial condition.

The evaluation of impairments is a quantitative and qualitative process, which is subject to risks and uncertainties and is intended to determine whether declines in the fair value of investments should be recognized in current period earnings. The risks and uncertainties include changes in general economic conditions, the issuer's financial condition or future recovery prospects, the effects of changes in interest rates or credit spreads and the expected recovery period. Estimating future cash flows involves incorporating information received from third-party sources and making internal assumptions and judgments regarding the future performance of the underlying collateral and assessing the probability that an adverse change in future cash flows has occurred. The determination of the amount of other-than-temporary impairments is based upon our periodic evaluation and assessment of known and inherent risks associated with the respective asset class. Such evaluations and assessments are revised as conditions change and new information becomes available. Our management considers a wide range of factors about the security issuer and uses reasonable judgment in evaluating the cause of the decline in the estimated fair value of the security and in assessing the prospects for recovery. Inherent in management's evaluation of the security are assumptions and estimates about the operations of the issuer and its future earnings potential. Impairments to the carrying value of our investment securities may need to be taken in the future, which could have a material adverse effect on our results of operations and financial condition.

We depend upon the accuracy and completeness of information about customers.

In deciding whether to extend credit to customers, we rely on information provided to us by our customers, including financial statements and other financial information. We also rely on representations of customers as to the accuracy and completeness of that information and, with respect to financial statements, on reports of independent auditors. Our financial condition and results of operations could be negatively impacted to the extent that we extend credit in reliance on financial statements or other information provided by customers that is false, misleading or incomplete.

Unauthorized disclosure of sensitive or confidential client or customer information, whether through a breach of computer systems or otherwise, or failure or interruption of the Company's communication or information systems, could severely harm the Company's business.

As part of its business, the Corporation collects, processes and retains sensitive and confidential client and customer information on behalf of the Company and other third parties. Despite the security measures the Company has in place for its facilities and systems, and the security measures of its third party service providers, the Company may be vulnerable to security breaches, acts of vandalism, computer viruses, misplaced or lost data, programming and/or human errors or other similar events.

The Company relies heavily on communications and information systems to conduct its business. Any failure or interruption of these systems could result in failures or disruptions in the Company's customer relationship management, general ledger, deposit, loan and other systems. In addition, customers could lose access to their accounts and be unable to conduct financial transactions during a period of failure or interruption of these systems.

Any security breach involving the misappropriation, loss or other unauthorized disclosure of confidential customer information, whether by the Company or by its vendors, or failure or interruption of the Company's communication or information systems, could severely damage the Company's reputation, expose it to risks of regulatory scrutiny, litigation and liability, disrupt the Company's operations, or result in a loss of customer business, the occurrence of any of which could have a material adverse effect on the Company's business.

We continually encounter technological change, and we may have fewer resources than our competitors to continue to invest in technological improvements.

The banking industry is undergoing rapid technological changes with frequent introductions of new technology-driven products and services. In addition to better serving customers, the effective use of technology increases efficiency and enables financial institutions to reduce costs. Our future success will depend, in part, on our ability to address the needs of our customers by using technology to provide products and services that will satisfy customer demands for convenience as well as to create additional efficiencies in our operations. Many of our competitors have substantially greater resources to invest in technological improvements. There can be no assurance that we will be able to effectively implement new technology-driven products and services or be successful in marketing such products and services to our customers.

An "ownership change" for purposes of Section 382 of the Internal Revenue Code could materially impair our ability to use our deferred tax assets.

At December 31, 2011, our gross deferred tax asset was \$26.8 million (before valuation allowance). Our ability to use our deferred tax assets to offset future taxable income will be limited if we experience an "ownership change" as defined in Section 382 of the Internal Revenue Code. In general, an ownership change will occur if there is a cumulative increase in our ownership by "5-percent shareholders" (as defined in the Code) that exceeds 50 percentage points over a rolling three-year period. A corporation that experiences an ownership change will generally be subject to an annual limitation on the use of its pre-ownership change deferred tax assets equal to the equity value of the corporation immediately before the ownership change, multiplied by the long-term tax-exempt rate.

If an "ownership change" occurs, we could realize a permanent loss of a significant portion of our U.S. federal deferred tax assets (related to net operating loss carryforwards) and lose certain built-in losses that have not been recognized for tax purposes. The amount of the permanent loss would depend on the size of the annual limitation (which is in part a function of our market capitalization at the time of an "ownership change") and the remaining carry forward period (U.S. federal net operating losses generally may be carried forward for a period of 20 years).

Due to the losses incurred in recent years, we continue to maintain a full valuation allowance on our entire deferred tax asset. If an "ownership change" had occurred on December 31, 2011, there would have been no direct financial impact because the asset is fully reserved. However, the ownership change would have affected the amount of valuation allowance we may be able to reverse in the future.

Risks Associated With the Company's Stock

The market price of our common stock can be volatile, which may make it more difficult to resell our common stock at a desired time and price.

Stock price volatility may make it more difficult for a shareholder to resell our common stock when a shareholder wants to and at prices a shareholder finds attractive or at all. Our stock price can fluctuate significantly in response to a variety of factors, regardless of operating results. These factors include, among other things:

- Variations in our anticipated or actual operating results or the results of our competitors;
- Changes in investors' or analysts' perceptions of the risks and conditions of our business;
- The size of the public float of our common stock;
- Regulatory developments;
- Interest rate changes or credit loss trends;
- Trading volume in our common stock;
- Market conditions; and
- General economic conditions.

The Company may issue additional shares of its common stock in the future, which could dilute a shareholder's ownership of common stock.

The Company's articles of incorporation authorize its Board of Directors, without shareholder approval, to, among other things, issue additional shares of common or preferred stock. The issuance of any additional shares of common or preferred stock could be dilutive to a shareholder's ownership of Company common stock. The Company may offer additional shares of its common stock in exchange for its outstanding 11% Subordinated Notes due 2017 and may seek to issue additional shares of common stock in exchange for some or all outstanding shares of its preferred stock.

As of December 31, 2011, subordinated notes (comprised of the 11% Subordinated Notes due 2017) having an aggregate principal amount of \$1,650,000 were outstanding. The Company has no present plans to issue any additional shares of common stock in exchange for subordinated notes.

To the extent that the Company issues options or warrants to purchase common stock in the future and the options or warrants are exercised, the Company's shareholders may experience further dilution. Holders of shares of Company common stock have no preemptive rights that entitle holders to purchase their pro rata share of any offering of shares of any class or series and, therefore, shareholders may not be permitted to invest in future issuances of Company common or preferred stock.

Exercise of our outstanding Warrants to purchase common stock or conversion of our outstanding preferred stock could substantially dilute a shareholder's ownership of common stock.

We have issued Warrants to purchase a total of 1,478,811 shares of our common stock at an exercise price of \$9.00 per share. We have outstanding 31,290 shares of Class A Preferred Stock, which are convertible into approximately 3,496,032 shares of our common stock at a conversion price of \$8.95 per share. We have outstanding 2,600 shares of Class B Preferred Stock, which are convertible into approximately 433,333 shares of our common stock at a conversion price of \$6.00 per share. Additional information about the preferred stock and Warrants may be found in Item 8, Note 17 – "Shareholders' Equity."

The exercise or conversion, in whole or in part, of these securities into shares of our common stock could substantially dilute a shareholder's ownership of common stock.

The Company's ability to pay dividends is limited and it may be unable to pay future dividends.

We have suspended payment of dividends on our common and preferred stock in order to preserve capital and we do not expect to resume payment of dividends in the near term. Our ability to pay dividends is limited by regulatory restrictions and the need to maintain sufficient regulatory capital. The ability of the Bank to pay dividends to Macatawa Bank Corporation is limited by its obligation to maintain sufficient capital and by other general restrictions on dividends that are applicable to us. Under Michigan law, the Bank is restricted from paying dividends to the Company until its deficit retained earnings has been restored. The Bank had a retained deficit of approximately \$31.7 million at December 31, 2011.

In addition, the Company may not pay dividends on shares of common stock if the Company has not paid full cash dividends for the most recently completed dividend period for both the Series A and Series B Preferred Stock. Additional information on restrictions on payments of dividends by us may be found in Item 1 of this report under the headings "Regulatory Developments" and "Supervision and Regulation," in Item 7 of this report under the heading "Capital Resources" included in "Management's Discussion and Analysis of Results of Operations and Financial Condition" and in Item 8 of this report in Notes 1 and 17 to the Consolidated Financial Statements, and is here incorporated by reference.

Although publicly traded, our common stock has substantially less liquidity than the average liquidity of stocks listed on The Nasdaq Global Select Market.

Although our common stock is listed for trading on The Nasdaq Global Select Market our common stock has substantially less liquidity than the average liquidity for companies listed on The Nasdaq Global Select Market. A public trading market having the desired characteristics of depth, liquidity and orderliness depends on the presence in the marketplace of willing buyers and sellers of our common stock at any given time. This marketplace depends on the individual decisions of investors and general economic and market conditions over which we have no control. This limited market may affect a shareholder's ability to sell their shares on short notice, and the sale of a large number of shares at one time could temporarily depress the market price of our common stock. For these reasons, our common stock should not be viewed as a short-term investment.

The Company's common stock is not insured by any governmental entity.

Our common stock is not a deposit account or other obligation of any bank and is not insured by the FDIC or any other governmental entity. Investment in Company common stock is subject to risk, including possible loss.

The Company may issue debt and equity securities that are senior to Company common stock as to distributions and in liquidation, which could negatively affect the value of Company common stock.

The Company has in the past and may in the future increase its capital by entering into debt or debt-like financing or issuing debt or equity securities, which could include issuances of senior notes, subordinated notes, preferred stock or common stock. In the event of the Company's liquidation, its lenders and holders of its debt securities would receive a distribution of the Company's available assets before distributions to the holders of Company common stock. The Company's decision to incur debt and issue securities in future offerings will depend on market conditions and other factors beyond its control. The Company cannot predict or estimate the amount, timing or nature of its future offerings and debt financings. Future offerings could reduce the value of shares of Company common stock and dilute a shareholder's interest in the Company.

Our articles of incorporation and bylaws and Michigan laws contain certain provisions that could make a takeover more difficult.

Our articles of incorporation and bylaws, and the laws of Michigan, include provisions which are designed to provide our Board of Directors with time to consider whether a hostile takeover offer is in our best interest and the best interests of our shareholders. These provisions could discourage potential acquisition proposals and could delay or prevent a change in control. The provisions also could diminish the opportunities for a holder of our common stock to participate in tender offers, including tender offers at a price above the then-current price for our common stock. These provisions could also prevent transactions in which our shareholders might otherwise receive a premium for their shares over then current market prices, and may limit the ability of our shareholders to approve transactions that they may deem to be in their best interests.

The Michigan Business Corporation Act contains provisions intended to protect shareholders and prohibit or discourage certain types of hostile takeover activities. In addition to these provisions and the provisions of our articles of incorporation and bylaws, federal law requires the Federal Reserve Board's approval prior to acquisition of "control" of a bank holding company. All of these provisions may have the effect of delaying or preventing a change in control of the Company without action by our shareholders, and therefore, could adversely affect the price of our common stock.

If an entity holds as little as a 5% interest in our outstanding securities, that entity could, under certain circumstances, be subject to regulation as a "bank holding company."

Any entity, including a "group" composed of natural persons, owning or controlling with the power to vote 25% or more of our outstanding securities, or 5% or more if the holder otherwise exercises a "controlling influence" over us, may be subject to regulation as a "bank holding company" in accordance with the Bank Holding Company Act of 1956, as amended (the "BHC Act"). In addition, any bank holding company or foreign bank with a U.S. presence may be required to obtain the approval of the Federal Reserve Board under the BHC Act to acquire or retain 5% or more of our outstanding securities. Becoming a bank holding company imposes statutory and regulatory restrictions and obligations, such as providing managerial and financial strength for its bank subsidiaries. Regulation as a bank holding company could require the holder to divest all or a portion of the holder's investment in our securities or those nonbanking investments that may be deemed impermissible or incompatible with bank holding company status, such as a material investment in a company unrelated to banking.

Any person not defined as a company by the BHC Act may be required to obtain the approval of the Federal Reserve Board under the Change in Bank Control Act of 1978, as amended, to acquire or retain 10% or more of our outstanding securities.

Any person not otherwise defined as a company by the BHC Act and its implementing regulations may be required to obtain the approval of the Federal Reserve Board under the Change in Bank Control Act of 1978, as amended, to acquire or retain 10% or more of our outstanding securities. Applying to obtain this approval could result in a person incurring substantial costs and time delays. There can be no assurance that regulatory approval will be obtained.

ITEM 1B: Unresolved Staff Comments.

None.

ITEM 2: Properties.

We own or lease facilities located in Ottawa County, Allegan County and Kent County, Michigan. Our administrative offices are located at 10753 Macatawa Drive, Holland, Michigan 49424. Our administrative offices are approximately 49,000 square feet and contain our administration, human resources, trust, loan underwriting and processing, and deposit operations. We believe our facilities are well-maintained and adequately insured. We own each of the facilities except those identified in the “Use” column as “(Leased facility)”. Our facilities as of March 7, 2012, were as follows:

<u>Location of Facility</u>	<u>Use</u>
10753 Macatawa Drive, Holland	Main Branch, Administrative, and Loan Processing Offices
815 E. Main Street, Zeeland	Branch Office
125 Ottawa Avenue N.W., Grand Rapid	Trust and Mortgage Offices (Leased facility)

ITEM 3: Legal Proceedings.

As of the date of this report, there are no material pending legal proceedings, other than routine litigation incidental to the business of banking, to which Macatawa Bank Corporation or the Bank are a party or of which any of our properties are the subject.

ITEM 4: Mine Safety Disclosures.

Not applicable.

PART II**ITEM 5: Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.**

Our common stock is quoted on the Nasdaq Global Select Market under the symbol MCBC. High and low closing prices (as reported on the Nasdaq Global Select Market) of, and the amount of dividends declared on, our common stock for each quarter for the years ended December 31, 2011 and 2010 are set forth in the table below.

Quarter	2011			2010		
	High	Low	Dividends Declared	High	Low	Dividends Declared
First Quarter	\$ 4.91	\$ 2.42	\$ ---	\$ 2.08	\$ 1.50	\$ ---
Second Quarter	\$ 2.82	\$ 2.24	\$ ---	\$ 2.78	\$ 1.10	\$ ---
Third Quarter	\$ 3.15	\$ 2.55	\$ ---	\$ 1.83	\$ 1.12	\$ ---
Fourth Quarter	\$ 2.95	\$ 2.06	\$ ---	\$ 4.13	\$ 1.46	\$ ---

On February 22, 2012, there were approximately 808 owners of record and approximately 6,566 beneficial owners of our common stock.

Information regarding our equity compensation plans may be found in Item 12 of this report and is here incorporated by reference. Information on restrictions on payments of dividends by us may be found in Item 1 of this report under the headings "Regulatory Developments" and "Supervision and Regulation," in Item 7 of this report under the heading "Capital Resources" included in "Management's Discussion and Analysis of Results of Operations and Financial Condition" and in Item 8 of this report in Notes 1 and 17 to the Consolidated Financial Statements, and is here incorporated by reference.

ITEM 6: Selected Financial Data.

The following unaudited table sets forth selected historical consolidated financial information as of and for the years ended December 31, 2011, 2010, 2009, 2008, and 2007 which is derived from our audited consolidated financial statements. You should read this information in conjunction with our consolidated financial statements and related notes and "Management's Discussion and Analysis of Financial Condition and Results of Operations" included elsewhere in this report.

ITEM 7: Management's Discussion and Analysis of Results of Operations and Financial Condition.

Management's discussion and analysis of results of operations and financial condition contains forward-looking statements. Please refer to the discussion of forward-looking statements at the beginning of this report.

The following section presents additional information to assess our results of operations and financial condition. This section should be read in conjunction with the consolidated financial statements and the supplemental financial data contained elsewhere in this report.

OVERVIEW

Macatawa Bank Corporation is a Michigan corporation and a registered bank holding company. It wholly-owns Macatawa Bank, Macatawa Statutory Trust I and Macatawa Statutory Trust II. Macatawa Bank is a Michigan chartered bank with deposit accounts insured by the FDIC. The Bank operates twenty-six branch offices and a lending and operational service facility, providing a full range of commercial and consumer banking and trust services in Kent County, Ottawa County, and northern Allegan County, Michigan. Macatawa Statutory Trusts I and II are grantor trusts and issued \$20.0 million each of pooled trust preferred securities. These trusts are not consolidated in our Consolidated Financial Statements. For further information regarding consolidation, see the Notes to the Consolidated Financial Statements.

At December 31, 2011, we had total assets of \$1.51 billion, total loans of \$1.07 billion, total deposits of \$1.22 billion and shareholders' equity of \$94.4 million. We recognized net income of \$5.8 million in 2011, a substantial improvement over the prior two years, and we experienced our seventh consecutive quarter of net income to end 2011.

In response to our losses during 2008, 2009 and the first quarter of 2010, our Board of Directors implemented additional corporate governance practices and disciplined business and banking principles, including more conservative lending principles. The focus of our management team turned from growth in our business to executing these disciplined business and banking procedures and policies designed to limit future losses, preserve capital and improve operational efficiencies. In addition, the Board of Directors added experienced members to provide further oversight and guidance. These and other efforts were reflected in our results of operations for 2011 and 2010 with lower levels of charge-offs and provision for loan losses, reductions in operating expenses and reduction in balance sheet totals resulting in improvement in our regulatory capital and liquidity ratios. We successfully completed our shareholder rights offering and public offering of common stock in June 2011 resulting in net proceeds of \$20.3 million and contributed \$10.0 million of the proceeds from the stock offering to the Bank retaining the remaining \$10.3 million at the holding company. As of December 31, 2011, the Company's and the Bank's regulatory capital ratios were the highest they have been since December 31, 1999.

Also within the past two years, much progress has been made at reducing our non-performing assets. The following table reflects period end balances of these non-performing assets as well as total loan delinquencies.

(dollars in thousands)	December 31, 2011	December 31, 2010	December 31, 2009
Non-performing loans	\$ 28,946	\$ 75,361	\$ 103,885
Other repossessed assets	---	50	124
Other real estate owned	66,438	57,984	37,184
Total non-performing assets	<u>\$ 95,384</u>	<u>\$ 133,395</u>	<u>\$ 141,193</u>
Total loan delinquencies 30 days or greater past due	<u>\$ 13,138</u>	<u>\$ 55,748</u>	<u>\$ 116,971</u>

Earnings have been severely impacted by high costs associated with administration and disposition of non-performing assets. These costs, including losses on repossessed and foreclosed properties, were \$15.6 million and \$15.4 million for the years ended December 31, 2011 and 2010, respectively. Going forward, as further reductions in non-performing assets are accomplished, we expect the costs associated with these assets to also decline thereby allowing for improved earnings in future periods.

Our earnings in 2011 were favorably impacted by negative provision for loan losses of \$4.7 million. As discussed in detail later in this section, this was a result of the decline in our historical charge-off levels from prior years. We do not expect a similar level of negative provision for loan losses in 2012.

The following table reflects the provision for loan losses for the past two years along with certain metrics that impact the determination of the level of the provision for loan losses.

(dollars in thousands)	For The Year Ended December 31	
	2011	2010
Provision for loan losses	\$ (4,700)	\$ 22,460
Net charge-offs	11,085	29,657
Net charge-offs to average loans	.99%	2.18%
Nonperforming loans to total loans	2.70%	6.19%
Loans transferred to ORE to average loans	3.42%	3.32%
TDRs to average loans	5.15%	1.91%

Under the direction of our Board, we have worked closely with our regulators at the FRB, the FDIC and the OFIR to put in place improved controls and procedures. On February 22, 2010, the Bank entered into a Consent Order with the FDIC and OFIR, its primary banking regulators. As a result of the improvement in our financial condition and results of operations, our implementation of additional corporate governance practices and disciplined business and banking principles, and our compliance with the Consent Order, upon completion of the Bank's 2011 joint examination by the FDIC and OFIR, the FDIC and OFIR terminated the Consent Order effective March 2, 2012. In connection with the termination of the Consent Order, the Bank reached an understanding with the regulators in the form of the MOU. Additional information about the termination of the Consent Order and the MOU may be found in Item 1 of this report under the heading "Regulatory Developments." This information is here incorporated by reference. The Company entered into a Written Agreement with the FRB effective July 23, 2010. As of December 31, 2011, we believe that we were in full compliance with all aspects of the Written Agreement.

The state of Michigan entered into the recession a couple of years before the rest of the country did and has experienced heavy job loss as a result of the concentration the state had related to the automotive industry. Our market areas of Grand Rapids and Holland fared better than the state as a whole, but nevertheless the impact of our local economy on our results has been profound. The recession and job loss impacted housing values, commercial real estate values and consumer activity. Improvement has been evident during 2011, with the state of Michigan being identified in a Bloomberg Economic Evaluation of States as having the second fastest pace of recovery in the U.S., second only to North Dakota. The state's unemployment rate at the end of 2011 was 9.3%, no longer the highest in the country, and was down dramatically from 15.2% in June 2009. The Holland area unemployment was 6.5% and the Grand Rapids area unemployment was 6.5% at the end of 2011. Residential housing values and commercial real estate property values decreased significantly over the past few years, but have shown recent signs of stabilization, with newer appraisals reflecting values at or above prior year values.

It also appears that the housing market in our primary market area is beginning to show signs of stabilization. Based on U.S. Census data, housing building permits in the Grand Rapids-Wyoming metropolitan area were up approximately 7.65% in 2010 compared to 2009. In the Holland-Grand Haven metropolitan area, housing building permits were up approximately 9.21% in 2010 compared to 2009.

Over the past two years, we have reduced our balance of loans outstanding, diversified our commercial loan portfolio, reduced concentrations to residential real estate developers and increased our consumer loan portfolio and residential mortgage activity as a percentage of overall production. This has included adding experienced residential mortgage lenders and pulling back on commercial loan production in some cases. Our loans to residential developers have decreased from \$95.7 million at December 31, 2010 to \$66.3 million at December 31, 2011. In addition, overall commercial real estate loans have decreased from \$933.9 million at December 31, 2010 to \$795.3 million at December 31, 2011. Consumer loans have decreased at a slower pace, totaling \$275.7 million at December 31, 2011, compared to \$283.3 million at December 31, 2010.

RESULTS OF OPERATIONS

Summary: Net income available to common shares was \$5.8 million or \$0.26 income per common share for 2011 compared to a net loss of \$17.9 million or \$1.01 loss per common share for 2010.

The results for 2011 were significantly impacted by a negative provision for loan losses of \$4.7 million as a result of a significantly lower level of net charge-offs experienced over the past two years, along with a reduction in the overall level of nonperforming loans in 2011. This compares to provision for loan losses of \$22.5 million in 2010. The results for 2010 included the following: a \$2.7 million gain on the sale of our investment securities portfolio in the second quarter and a \$574,000 gain recognized on the sale of property in the fourth quarter that had been held for future expansion. These items are discussed more fully below.

The overall improvement in financial results for 2011 compared to 2010 relate primarily to the performance of the loan portfolio. The provision for loan losses was a negative \$4.7 million for 2011 compared to \$22.5 million for 2010. Net charge-offs of loans were down sharply in 2011 at \$11.1 million compared to \$29.7 million in 2010. Costs associated with nonperforming assets were \$15.6 million in 2011, compared to \$15.4 million for 2010. Lost interest from non-performing assets decreased to approximately \$7.5 million for 2011 compared to \$9.8 million for 2010. Each of these items is discussed more fully below.

Net Interest Income: Net interest income totaled \$46.3 million during 2011 compared to \$50.6 million during 2010.

The decrease in net interest income during 2011 compared to 2010 was due primarily to a \$142.2 million decrease in average earning assets as a result of our focus on reducing credit exposure within certain segments of our loan portfolio and liquidity improvement. Our net interest income as a percentage of average interest-earning assets (i.e. "net interest margin" or "margin") held steady in 2011, increasing by 1 basis point compared to 2010. As is customary in the banking industry, interest income on tax-exempt securities is adjusted in the computation of the yield on tax-exempt securities and net interest margin using a 35% tax rate to report these items on a fully taxable equivalent basis. Average interest earning assets decreased from \$1.54 billion to \$1.39 billion throughout 2011.

The yield on earning assets decreased 61 basis points to 4.32% for 2011 from 4.93% for 2010. The decline was from decreases in the yield on our residential and consumer loan portfolios, which have repriced in the generally lower rate environment during 2011. Our margin has been constrained by our decision to hold significant balances in liquid and short-term investments in the past two years. Going forward, as we deploy these balances into higher yielding assets within the investment securities and loan portfolios, we expect our net interest margin to be positively impacted.

While yield on earning assets decreased, our net interest margin for 2011 remained stable due to an offsetting 62 basis point decrease in our cost of funds from 1.88% for 2010 to 1.26% for 2011. Average interest bearing liabilities decreased from \$1.34 billion in 2010 to \$1.15 billion in 2011. A decrease in the rates paid on our deposit accounts in response to declining market rates and the rollover of time deposits and other borrowings at lower rates within the current rate environment caused the reduction in our cost of funds. We had a sharp increase in institutional deposits late in 2010 and these balances were maintained throughout 2011. While maintaining a strong liquidity position for the Bank, these excess short-term deposits had the impact of decreasing net interest margin.

Margin continues to be dampened by the impact of our elevated levels of nonperforming assets, including other real estate owned and nonaccrual loans. However, as we continue to reduce these levels, our margin will benefit. The estimated negative impact of these nonperforming assets on net interest margin decreased from 64 basis points in 2010 to 54 basis points in 2011.

The continued decline in the level of average earning assets may have a further negative impact on net interest income in 2012; however, we expect the balances to stabilize in 2012. A continued decline in the cost of funds, primarily from the repricing of term funding at lower costs, is expected to partially offset the impact of lower earning asset levels in 2012.

The following table shows an analysis of net interest margin for the years ended December 31, 2011, 2010 and 2009.

(Dollars in Thousands)	For the years ended December 31,								
	2011			2010			2009

Provision for Loan Losses: The provision for loan losses for 2011 was a negative \$4.7 million compared to \$22.5 million for 2010. The provision for 2011 was significantly impacted by decreases in net charge-offs and sustained improvement in our levels of nonperforming loans over the past two years. The provision for loan losses was higher in 2009 and early in 2010 as we responded to rapid declines in real estate values due to weakness in the economy. Our response required higher levels of charge-offs in 2009 and 2010 which also led to a higher provision for loan losses. Net charge-offs were \$58.0 million in 2009 and \$29.7 million in 2010, compared to \$11.1 million in 2011. The lower level of charge-offs was a result of a slowing in the rate of declines in real estate values and success at reducing our levels of non-performing loans.

As discussed in previous reports, in response to our elevated loan losses in 2009 and the need to comply with the requirements of the Consent Order, our Board of Directors increased the governance over the lending function and, working directly with the management team, took steps to reduce our exposure within certain credit concentrations, establish more conservative lending principles that comply with regulatory standards and implement new lending and compliance procedures and policies and new problem loan identification and resolution plans. These steps have had a profound impact on our credit performance and loss mitigation in 2011.

The ultimate amount of the loan loss provision in all periods is a byproduct of establishing our allowance for loan losses at levels believed to be adequate under our methodology for determining the adequacy of the allowance. More information about our allowance for loan losses and our methodology for establishing its level may be found in this Item 7 of the report under the heading "Allowance for Loan Losses" below and in Item 8 of this report in Note 4 of the Consolidated Financial Statements.

Noninterest Income: Noninterest income totaled \$14.9 million in 2011 compared to \$18.0 million in 2010. Noninterest income for 2010 was impacted by a couple of nonrecurring items, including \$2.7 million in gains on the sale of our investment securities portfolio and a \$574,000 gain on the sale of a property we were holding for future expansion.

Revenue from deposit services decreased \$560,000 to \$3.7 million in 2011 compared to \$4.3 million in 2010. The decline in 2011 was related primarily to decreases in non-sufficient fund fees, consistent with a decline experienced across the entire banking industry resulting from regulatory changes regarding fees and improved account administration practices by customers.

Net gains on mortgage loans included gains on the sale of real estate mortgage loans to the secondary market. We sell the majority of the fixed-rate mortgage loans we originate. We do not retain the servicing rights for the loans we sell. This income was up significantly during 2011 as a result of our renewed focus on residential mortgage volume and the addition of experienced mortgage professionals in late 2010 and in the first half of 2011. This activity was also impacted positively by the low interest rate environment that existed throughout 2011.

A summary of net gains on mortgage loans and related volume was as follows:

(Dollars in thousands)	For The Year Ended December 31	
	2011	2010
Net gains on sales of loans	\$ 1,728	\$ 1,462
Real estate mortgage loans originated for sale	\$ 84,470	\$ 93,764
Real estate mortgage loans sold	87,709	93,338
Net gain on the sale of real estate mortgage loans as a percent of real estate mortgage loans sold ("Loan sales margin")	1.97%	1.57%

As mortgage rates remain low at the end of 2011, we anticipate continued elevated levels of mortgage banking income in the first part of 2012. Loan sales margin improved during 2011 as we refined our product pricing during the year.

Trust service revenue declined \$536,000 to \$2.5 million in 2011 from \$3.1 million in 2010. Our financial performance in previous years and the existence of the Consent Order likely have impacted how we are perceived in the marketplace, resulting in challenges to retain trust customers and maintain levels of trust revenue. We believe that our improved financial performance in 2011 and the termination of the Consent Order could have a positive impact on our future trust service revenue.

ATM and debit card processing income increased \$174,000 in 2011 to \$4.0 million compared to \$3.8 million in 2010. The increase reflected a continued increase in usage from current customers and overall growth in the number of debit and ATM card customers. Promotional efforts to increase volume in these low cost transaction alternatives continued to be successful. Recent regulatory changes implementing price controls over what financial institutions can charge for these services may impact the level of such income we recognize in the future.

We did not sell any investment securities during 2011, and therefore had no gain on sale of securities during the year. During the second quarter of 2010, the sale of our securities portfolio resulted in a gain of \$2.7 million. We completed the disposition of nearly all of the municipal, corporate and U.S. agency securities in our available-for-sale investment portfolio through sales in the open market. These securities were comprised of approximately \$46.9 million in municipal securities with an average yield of 4.15% and an average life of 3.5 years, \$5.2 million in corporate securities with an average yield of 2.94% and an average life of 2.6 years, and \$50.2 million in U.S. agency securities with an average yield of 3.84% and an average life of 1.1 years. The sales were executed as part of our overall strategy to increase our regulatory capital ratios. The majority of the proceeds were initially invested in liquid money market balances with money center banks. During 2011, we began reinvesting these proceeds in higher yielding investment securities as market conditions and liquidity allowed.

Other income was \$3.0 million in 2011 compared to \$2.7 million in 2010. Earnings from bank owned life insurance increased \$323,000 from 2010 as the underlying investments performed better in 2011 than in 2010. ORE rental income increased to \$549,000 in 2011 from \$191,000 in 2010. Much of this increase came from a property that was sold late in 2011. Other income for 2010 included a gain on the sale of a property that was held for future branch expansion which was sold in the fourth quarter of 2010 for a gain \$574,000.

Noninterest Expense: Total noninterest expense was \$60.1 million in 2011, compared to \$62.7 million in 2010. The steady decline in our other expense areas reflects our active management of controllable costs to offset the increases in nonperforming asset costs.

Costs associated with nonperforming assets continue to remain elevated, increasing \$186,000 in 2011 to \$15.6 million compared to \$15.4 million in 2010. These costs included legal costs, repossessed and foreclosed property administration expense and losses on repossessed and foreclosed properties. Repossessed and foreclosed property administration expense included survey and appraisal, property maintenance and management and other disposition and carrying costs. Losses on repossessed and foreclosed properties included both net losses on the sale of properties and unrealized losses from value declines for outstanding properties.

Costs associated with nonperforming assets are itemized in the following table (in thousands):

	<u>2011</u>	<u>2010</u>
Legal and professional	\$ 2,389	\$ 2,609
Reposessed and foreclosed property administration	4,841	4,360
Losses on reposessed and foreclosed properties	8,371	8,446
Total	<u>\$ 15,601</u>	<u>\$ 15,415</u>

In response to the elevated problem asset levels, the related costs to administer these assets and the need to comply with the requirements of the Consent Order, the Board of Directors and management took tangible steps to reduce problem asset levels. These steps are discussed further in this Item 7 under the heading "Loan Portfolio and Asset Quality" below. Because of these additional steps and as problems loans move through the collection process, the costs associated with nonperforming assets have remained elevated, yet stabilized during 2011. As we reduce our balances of other real estate owned, we expect these costs to decline.

Salaries and benefit expense increased \$331,000, or 1.5%, to \$22.2 million in 2011 from \$21.9 million in 2010. This increase was primarily due to our hiring of experienced real estate professionals to facilitate sales of other real estate owned and mortgage origination professionals to increase focus on our consumer portfolios to diversify credit risk. The impact of these increased costs was mitigated by our continued focus on operational efficiencies, continued curtailment of bonuses and wage increases in response to economic conditions and managed attrition. We have continued to scale down our operations with the shrinkage in size of the Bank and focus on a disciplined approach to our business. Salaries and benefit expense are expected to decrease in 2012 due to continued managed attrition.

Legal and professional fees decreased significantly in 2011, from \$1.8 million in 2010 to \$971,000 in 2011. These expenses were unusually high in 2010 as a result of legal fees associated with consultation related to the Consent Order, the material weakness reported in our 2009 Form 10-K and our implementation of additional corporate governance procedures, including more consultation with corporate legal counsel. Also, legal fees during 2010 included increased costs associated with an SEC investigation. By letter dated May 23, 2011, the Commission advised us that the investigation had been completed and that no enforcement action had been recommended to the Commission. We anticipate continued reductions in legal and professional expenses in 2012.

FDIC assessments decreased to \$3.5 million in 2011 compared to \$4.7 million in 2010 as a result of our reduced level of deposits and changes to the assessment base implemented by the FDIC. While these costs have decreased compared to 2010, they are elevated due to our assessment category. We expect our FDIC assessments for 2012 to decrease due to a smaller assessment base and due to the termination of our Consent Order. We estimate an annual cost savings of \$1.2 million, based on December 31, 2011 asset levels. Because the Consent Order was not terminated until March 2, 2012, we expect to recognize less than all of these estimated annual cost savings during 2012. Further discussion regarding the determination of FDIC assessments for the Bank may be found in Item 1 of this report under the heading "Supervision and Regulation."

Insurance costs for bond and directors and officers ("D&O") insurance decreased significantly from \$2.2 million in 2010 to \$1.5 million in 2011. Our costs continued to be significantly higher than historically normal levels as a result of a higher rate per dollar of coverage charged due to the perceived increased risk by our insurance carriers from our coming under the Consent Order in 2010. The reductions experienced in 2011 were a result of our financial condition improvements demonstrated to the insurance carriers and the resulting reduction in premiums charged. We expect further reductions in these costs in 2012 with the termination of the Consent Order and as we continue to improve our financial performance.

Occupancy expense declined \$107,000 in 2011 following a decrease of \$287,000 in 2010. Furniture and equipment expense was down \$236,000 in 2011 after a decrease of \$472,000 in 2010. Marketing expenses decreased slightly in 2011 and data processing expenses increased slightly in 2011. Other expense was down \$136,000 in 2011. The declines in 2011 within these expense areas were the direct result of our continued initiatives to reduce controllable costs. In addition to eliminating or outsourcing certain backroom functions, these initiatives included restructuring third party contracts, acceleration of electronic delivery for certain customers and trimming controllable costs.

When excluding FDIC assessments and problem asset costs, non-interest expense would have been approximately \$41.0 million for 2011, down \$1.6 million from \$42.6 million for 2010. We expect efficiency to continue to improve in 2012 as a result of our continued expense reduction initiatives.

Federal Income Tax Expense (Benefit): We recorded no federal income tax expense or benefit in 2011 and recorded federal income tax expense of \$1.3 million in 2010. We recorded income tax expense of \$1.3 million for 2010 primarily related to a reclassification from other comprehensive income for gains recognized in earnings associated with the sale of our investment securities. A valuation allowance has been maintained on our deferred tax assets each reporting period since 2009. The realization of deferred tax assets (net of a recorded valuation allowance) is largely dependent upon future taxable income, future reversals of existing taxable temporary differences and the ability to carry-back losses to available tax years. In assessing the need for a valuation allowance, we consider all positive and negative evidence, including taxable income in carry-back years, scheduled reversals of deferred tax liabilities, expected future taxable income and tax planning strategies. At December 31, 2011, our tax valuation allowance totaled \$24.0 million. The valuation allowance may be reversed to income in future periods to the extent that the related deferred tax assets are realized or the valuation allowance is no longer required. The realization of our deferred tax assets is largely dependent upon our ability to generate future taxable income. We returned to profitability in each of the last three quarters of 2010 and each quarter of 2011. As we continue to generate consistent profitability, the need to maintain the valuation allowance diminishes. We perform an analysis each quarter as to the need to maintain the valuation allowance.

During the fourth quarter of 2009, a tax law change extended the carry-back of 2009 and 2008 net operating losses to five years from the previous two year carry-back period. As a result we recorded an \$11.4 million favorable tax benefit that reduced our net operating loss for 2009. This carry-back extension was only available to financial institutions like us that did not receive capital under the U.S. Treasury's Troubled Asset Relief Program (TARP). This change allowed us to carry-back and recover the full tax benefit of our 2009 net operating loss. We received \$18.1 million in income tax refunds during 2010 as a result of this tax law change.

FINANCIAL CONDITION

Summary: Due to the Consent Order and the continuing soft economic conditions, we have been focused on reducing our loan portfolio, reducing exposure in higher loan concentration types and improving our financial condition through increased liquidity, diversification of credit risk, improved capital ratios and reduced reliance on non-core funding. We have experienced positive results in each of these areas over the past seven quarters.

Total assets were \$1.51 billion at December 31, 2011, a decrease of \$70.6 million from \$1.58 billion at December 31, 2010. The decrease in total assets was largely from a decline of \$146.2 million in our loan portfolio due to efforts to reduce concentration in certain loan types and improve on-balance-sheet liquidity.

The reduction in assets since December 31, 2010 allowed us to reduce wholesale funding, including out-of-market deposits from brokers by \$84.9 million. All of our remaining brokered deposits matured and were paid off during 2011. Total deposits were \$1.22 billion at December 31, 2011, down \$61.3 million, from \$1.28 billion at December 31, 2010. In addition to the decline in brokered deposits, local jumbo time deposits were down \$38.2 million.

Total shareholders' equity increased by \$26.6 million primarily from the successful completion of our shareholder rights offering and public offering of common stock which were completed in June 2011, resulting in net proceeds of \$20.3 million. In addition, net income of \$5.8 million contributed to the increase in total shareholders' equity. We contributed \$10.0 million of the proceeds from the stock offering to the Bank and retained the remaining \$10.3 million at the holding company. This allowed the Bank's regulatory capital ratios to grow to levels exceeding those required by the Consent Order and to levels ordinarily considered to be "well-capitalized." As discussed earlier in this report in Item 1 under "Regulatory Developments", the Consent Order has been terminated. As of December 31, 2011, the Bank was categorized as "adequately capitalized" as a result of being subject to the Consent Order. However, had the Consent Order been terminated as of December 31, 2011, the Bank would have been categorized as "well capitalized." We expect the Bank to be categorized as "well capitalized" as of March 31, 2012.

Cash and Cash Equivalents: Our cash and cash equivalents, which include federal funds sold and short-term investments, were \$243.0 million at December 31, 2011 compared to \$236.1 million at December 31, 2010. The \$6.9 million increase was primarily the result of excess liquidity caused by loan shrinkage exceeding our ability to redeploy proceeds into other earning assets. These balances are also elevated due to high short term balances maintained by our large deposit customers. We expect our balances of short term investments to remain high until loan demand materially increases and more attractive investment opportunities emerge.

Securities: Securities increased \$45.6 million to \$55.0 million at December 31, 2011 from \$9.2 million at December 31, 2010. We began rebuilding our investment portfolio during the second quarter of 2011. The balance at December 31, 2011 primarily consisted of U.S. agency securities and various municipal investments. The balance at December 30, 2010 primarily consisted of U.S. Treasury securities held for collateral purposes. We expect to continue to reinvest excess liquidity and selectively rebuild our investment portfolio to continue our diversification of asset quality throughout 2012.

Loan Portfolio and Asset Quality: In response to the losses we have incurred and the need to comply with the requirements of the Consent Order, our Board of Directors has increased governance over the lending function and has taken tangible steps to reduce our loan portfolio, including our exposure within certain credit concentrations. More discussion regarding these steps may be found in Item 8 of this report in Note 2 of the Consolidated Financial Statements.

Our total loan portfolio decreased \$146.2 million to \$1.07 billion at December 31, 2011 from \$1.22 billion at December 31, 2010. During 2011, our commercial and industrial loans decreased \$37.6 million, commercial real estate loans declined \$100.9 million and consumer loans decreased \$7.7 million.

A breakdown of the composition of the loan portfolio is shown in the table below (in thousands):

	December 31, 2011	Percent of Total Loans	December 31, 2010	Percent of Total Loans
Commercial real estate: ⁽¹⁾				
Residential developed	\$ 33,829	3.2%	\$ 46,835	3.8%
Unsecured to residential developers	5,937	0.5	7,631	0.6
Vacant and unimproved	66,046	6.2	71,528	5.9
Commercial development	4,586	0.4	8,952	0.7
Residential improved	82,337	7.7	96,784	8.0
Commercial improved	304,070	28.4	355,899	29.2
Manufacturing and industrial	71,462	6.7	81,560	6.7
Total commercial real estate loans	568,267	53.1	669,189	54.9
Commercial and industrial	227,051	21.2	264,679	21.8
Total commercial loans	795,318	74.3	933,868	76.7
Consumer:				
Residential mortgage	156,891	14.6	135,227	11.1
Unsecured	1,952	0.2	2,867	0.2
Home equity	101,074	9.4	125,866	10.4
Other secured	15,740	1.5	19,368	1.6
Total consumer	275,657	25.7	283,328	23.3
Total loans	\$ 1,070,975	100.0%	\$ 1,217,196	100.0%

(1) Includes both owner occupied and non-owner occupied commercial real estate.

Our consumer residential mortgage loan portfolio, which also includes residential construction loans made to individual homeowners, comprised approximately 15% of portfolio loans at the end of 2011, up from 11% of portfolio loans at the end of 2010 as we execute our strategy to diversify our credit risk from commercial real estate. A large portion of our residential mortgage loan origination volume of these types of loans continues to be sold on the secondary market with servicing released.

As a result of our holding more of our residential mortgage production in portfolio (which increased \$21.7 million in 2011), we saw a decrease in the volume of residential mortgage loans originated for sale during 2011 compared to 2010. Residential mortgage loans originated for sale were \$84.5 million in 2011 compared to \$93.8 million in 2010. We have not yet had to repurchase any loans sold, however, due to market conditions many banks are being required to repurchase loans due to actual or alleged failure to strictly conform to the investor's purchase criteria. During 2012, we expect to continue to retain in our loan portfolio certain types of residential mortgage loans (primarily high quality, low loan to value loans) in an effort to stabilize the recent decreases we have experienced in the loan portfolio and diversify our credit risk.

Our portfolio of other consumer loans includes loans secured by personal property and home equity fixed term and line of credit loans. These types of loans decreased to \$118.8 million at December 31, 2011 from \$148.1 million at December 31, 2010 and comprised approximately 11% of our portfolio loans at the end of 2011 and 12% at the end of 2010.

The decline in the commercial loan portfolio during 2011 and 2010 reflected the continuing soft economic conditions in West Michigan and efforts to reduce our exposure within certain credit concentrations. We focused our efforts throughout 2010 and 2011 on reducing our exposure to residential land development loans which were the source of most of our loan losses since 2008, thereby diversifying our commercial loan portfolio and improving asset quality. We expect continued shrinkage, though at a slower pace, in our real estate development portfolios as we continue to diversify our credit exposure.

Total commercial loans, consisting of commercial and industrial loans and commercial real estate loans, were \$795.3 million at December 31, 2011 and \$933.9 million at December 31, 2010. This portfolio remains our largest loan segment and accounted for approximately 74% of the total loan portfolio at December 31, 2011 and 77% at December 31, 2010. Our commercial loan portfolio is made up of loans to small and mid-sized business.

Our commercial and industrial loan portfolio decreased by \$37.6 million to \$227.1 million at December 31, 2011 and represented 21% of our commercial portfolio. The decrease was primarily from a general decline in business activity resulting from the soft economy. The commercial real estate loan portfolio declined by \$100.9 million due to substantial efforts to reduce problem loans and overall exposure in this segment.

Commercial real estate accounted for approximately 53% of the commercial loan portfolio at December 31, 2011 and consisted primarily of loans to business owners and developers of owner and non-owner occupied commercial properties and loans to developers of single and multi-family residential properties. In the table above, we show our commercial real estate portfolio by loans secured by residential and commercial real estate, and by stage of development. Improved loans are generally secured by properties that are under construction or completed and placed in use. Development loans are secured by properties that are in the process of development or fully developed. Vacant land loans are secured by raw land for which development has not yet begun and agricultural loans.

Total commercial real estate loans declined \$100.9 million since December 31, 2010 as we continued to focus on reducing our real estate loan concentrations and balances. Commercial loans related to residential real estate, the portfolio that has created the majority of stress within our loan portfolio, declined \$29.1 million. The balance of commercial loans secured by nonresidential real estate declined \$71.5 million since December 31, 2010. We expect continued reductions, though at a slower pace in 2012, in our commercial real estate loan portfolio.

The following table shows our loan origination activity for portfolio loans during 2011, broken out by loan type and also shows average originated loan size (dollars in thousands):

	Portfolio Loan Originations 2011	Percent of Total Originations	Average Loan Size 2011
Commercial real estate:			
Residential developed	\$ 14,284	4.0%	\$ 571
Unsecured to residential developers	---	---	---
Vacant and unimproved	16,766	4.7	699
Commercial development	80	---	80
Residential improved	27,709	7.8	187
Commercial improved	36,363	10.2	455
Manufacturing and industrial	8,656	2.5	346
Total commercial real estate loans	103,858	29.2	343
Commercial and industrial	172,655	48.5	32
Total commercial loans	276,513	77.7	48
Consumer:			
Residential mortgage	57,820	16.3	172
Unsecured	442	0.1	10
Home equity	17,561	4.9	65
Other secured	3,392	1.0	11
Total consumer	79,215	22.3	35
Total portfolio loan originations	\$ 355,728	100.0%	\$ 53

Our loan portfolio is reviewed regularly by our senior management, our loan officers, and an internal loan review team that is independent of our loan originators and credit administration. An administrative loan committee consisting of senior management and seasoned lending and collections personnel meets monthly to manage our internal watch list and proactively manage high risk loans.

When reasonable doubt exists concerning collectability of interest or principal of one of our loans, that loan is placed in non-accrual status. Any interest previously accrued but not collected is reversed and charged against current earnings.

Nonperforming assets are comprised of nonperforming loans, foreclosed assets and repossessed assets. At December 31, 2011, nonperforming assets totaled \$95.4 million compared to \$133.4 million at December 31, 2010. The relative level of new loans moving to a nonperforming status has significantly declined as our efforts to proactively address credit risks have taken hold. During 2010, we completed an independent re-evaluation of our commercial loan portfolio. Significant progress was made to accelerate workout strategies with problem assets, leading to several properties moving to other real estate owned, which increased by \$8.5 million since December 31, 2010. Based on the amount of loans currently in their redemption period (\$2.1 million at December 31, 2011), we expect reduced levels of loans moving into other real estate owned in 2012. Proceeds from sales of foreclosed properties were \$21.5 million in 2011 resulting in a net gain of \$1.5 million. This is an increase from the volume of sales in 2010, when we experienced proceeds of \$16.0 million and realized a net loss of \$167,000.

Nonperforming loans include loans on non-accrual status and loans delinquent more than 90 days but still accruing. As of December 31, 2011, nonperforming loans totaled \$28.9 million, or 2.70% of total portfolio loans, compared to \$75.4 million, or 6.19% of total portfolio loans, at December 31, 2010.

Loans for development or sale of 1-4 family residential properties comprised a large portion of non-performing loans. They were approximately \$8.5 million, or 29.4% of total non-performing loans, at December 31, 2011 compared to \$22.1 million, or 29.3% of total non-performing loans, at December 31, 2010. The remaining balance of non-performing loans at December 31, 2011 consisted of \$8.4 million of commercial real estate loans secured by various types of non-residential property, \$9.6 million of commercial and industrial loans, and \$2.4 million of consumer and residential mortgage loans.

Foreclosed and repossessed assets include assets acquired in settlement of loans. Foreclosed assets totaled \$66.4 million at December 31, 2011 compared to \$58.0 million at December 31, 2010. Of this balance, there were 135 commercial real estate loan properties totaling approximately \$60.4 million. The remaining balance was comprised of 69 residential properties totaling approximately \$6.0 million. All properties acquired through or in lieu of foreclosure are initially transferred at their fair value less estimated costs to sell and then evaluated monthly for impairment after transfer using a lower of cost or market approach. Updated property valuations are obtained at least annually on all foreclosed assets to ensure proper carrying values are maintained.

At December 31, 2011, our foreclosed asset portfolio had a weighted average age held in portfolio of 482 days. Below is a breakout of our foreclosed asset portfolio at December 31, 2011 by property type and the percentages the property has been written down since taken into our possession and the combined writedown percentage, including losses taken when the property was loan collateral (dollars in thousands):

Foreclosed Asset Property type	Carrying Value at December 31, 2011	Foreclosed Asset Writedown	Combined Writedown (Loan and Foreclosed Asset)
Single Family	\$ 4,538	14.1%	37.2%
Residential Lot	1,463	30.5%	56.4%
Multi-Family	330	10.2%	42.1%
Vacant Land	8,439	30.2%	47.5%
Residential Development	21,478	25.8%	58.3%
Commercial Office	7,556	16.9%	49.5%
Commercial Industrial	2,061	6.9%	25.4%
Commercial Improved	20,573	6.3%	27.1%
	<u>\$ 66,438</u>	19.0%	46.7%

The following table shows the composition and amount of our nonperforming assets (dollars in thousands):

	December 31, 2011	December 31, 2010
Nonaccrual loans	\$ 26,876	\$ 74,761
Loans 90 days past due and still accruing	2,070	600
Total nonperforming loans (NPLs)	28,946	75,361
Foreclosed assets	66,438	57,984
Repossessed assets	---	50
Total nonperforming assets (NPAs)	95,384	133,395
Accruing restructured loans (ARLs) (1)	55,679	25,395
Total NPAs and ARLs	<u>\$ 151,063</u>	<u>\$ 158,790</u>
NPLs to total loans	2.70%	6.19%
NPAs to total assets	6.33%	8.45%

(1) Comprised of approximately \$40.9 million and \$12.1 million of commercial loans and \$14.8 million and \$13.3 million of consumer loans whose terms have been restructured at December 31, 2011 and December 31, 2010, respectively. Interest is being accrued on these loans under their restructured terms as they are less than 90 days past due.

Allowance for Loan Losses: Determining the appropriate level of the allowance for loan losses is highly subjective. As loan losses escalated over 2008 and 2009 and then began to slow in 2010 and stabilize in 2011, we re-evaluated and refined our approach to determining the allowance for loan losses. Timely identification of risk rating changes within the commercial loan portfolio is key to our process of establishing an appropriate allowance balance. The internal risk rating system is discussed below.

In early 2010, our Loan Review function began reporting functionally to the Audit Committee. The Risk Management department is now administratively responsible for the Loan Review function. Under this framework, all commercial loan risk ratings are independently evaluated by our internal loan review function upon origination or renewal. In addition, the majority of our commercial loans are independently reviewed by our internal loan review function at least annually to monitor the accuracy and completeness of the watch list and all risk ratings. Also, we complete our analysis of the adequacy of the allowance for loan losses on a monthly basis versus the quarterly approach used prior to 2010. These actions were intended to further strengthen our process for establishing, in a timely fashion, the amount of the allowance for loan losses that management believes to be appropriate in light of changes in the condition of our loan portfolio.

The allowance for loan losses at December 31, 2011 was \$31.6 million, a decrease of \$15.8 million, compared to \$47.4 million at December 31, 2010. The balance of the allowance for loan losses represented 2.95% of total portfolio loans at December 31, 2011 compared to 3.90% of total portfolio loans at December 31, 2010. While this ratio decreased, the allowance to nonperforming loan coverage ratio increased significantly from 62.93% at December 31, 2010 to 109.31% at December 31, 2011.

The following is a summary of our portfolio loan balances and changes in the allowance for loan losses and related ratios.

(Dollars in thousands)	December 31	
	2011	2010
Portfolio Loans:		
Average daily balance of loans for the year	\$ 1,120,857	\$ 1,360,548
Amount of loans outstanding at end of period	1,070,975	1,217,196
Allowance for loan losses:		
Balance at beginning of year	\$ 47,426	\$ 54,623
Addition to allowance charged to operations	(4,700)	22,460
Loans charged-off:		
Real estate - construction	(3,014)	(9,768)
Real estate - mortgage	(7,704)	(11,499)
Commercial and industrial	(3,198)	(7,400)
Total Commercial	(13,916)	(28,667)
Residential mortgage	(1,559)	(1,364)
Consumer	(976)	(1,806)
	(16,451)	(31,837)
Recoveries:		
Real estate - construction	2,541	575
Real estate - mortgage	802	663
Commercial and industrial	1,727	732
Total Commercial	5,070	1,970
Residential mortgage	39	115
Consumer	257	95
	5,366	2,180
Net charge-offs	(11,085)	(29,657)
Balance at end of year	\$ 31,641	\$ 47,426
Ratios:		
Net charge-offs to average loans outstanding	.99%	2.18%
Allowance for loan losses to loans outstanding at year end	2.95%	3.90%
Allowance for loan losses to nonperforming loans at year-end	109.31%	62.93%

The continued reduction in net charge-offs over the past several quarters had a significant effect on the historical loss component of our allowance for loan loss computation as did the improvements in our credit quality metrics. The table below shows the changes in these metrics over the past five quarters:

(in millions)	Quarter Ended December 31, 2011	Quarter Ended September 30, 2011	Quarter Ended June 30, 2011	Quarter Ended March 31, 2011	Quarter Ended December 31, 2010
Commercial loans	\$ 795.3	\$ 819.6	\$ 836.6	\$ 886.4	\$ 933.9
Nonperforming loans	28.9	35.0	40.4	56.1	75.4
Other real estate owned and repo assets	66.4	66.5	65.4	65.0	58.0
Total nonperforming assets	95.4	101.5	105.9	121.1	133.4
Net charge-offs	3.2	1.4	2.9	3.6	5.2
Total delinquencies	13.1	20.7	30.4	41.2	55.7

Nonperforming loans have continually declined since the first quarter of 2010 to \$28.9 million at December 31, 2011, which was our lowest level of nonperforming loans since the second quarter of 2007. The first three quarters of 2011 reflected reduced charge-offs from the linked quarter. While net charge-offs during the fourth quarter increased, they were still below the level in the first quarter of 2011 and prior year quarters. Perhaps even more importantly, our total delinquencies have continued to decline, from \$124.8 million at March 31, 2010 to just \$13.1 million at December 31, 2011.

As discussed earlier, the sustained reduced level of quarterly net charge-offs has had a significant effect on our 18 month (6 quarter) historical loss ratios, which are the base for our allowance for loan loss computation. The change in the 18 month historical loss ratios from December 31, 2010 to December 31, 2011 reduced the historical loss allocations in our allowance computation by \$10.0 million.

These factors all provide for a reduction in our provision for loan losses. The provision for loan losses decreased \$27.2 million to a negative \$4.7 million for 2011 compared to \$22.5 million for 2010. Net charge-offs were \$11.1 million for 2011 compared to \$29.7 million for 2010, a reduction of \$18.6 million. The ratio of net charge-offs to average loans was 0.99% for 2011 compared to 2.18% for 2010.

We are encouraged by the reduced level of charge-offs over the past two years. We do, however, recognize that future charge-offs and resulting provisions for loan losses are expected to be impacted by the timing and extent of changes in the overall economy and the real estate markets. We believe we have seen some stabilization in the pace of decline in economic conditions and real estate markets. However, we expect it to take additional time for sustained improvement in the economy and real estate markets in order for us to reduce our non-performing and impaired loans to acceptable levels.

Our allowance for loan losses is maintained at a level believed appropriate based upon our monthly assessment of the probable estimated losses inherent in the loan portfolio. Our methodology for measuring the appropriate level of allowance and related provision for loan losses relies on several key elements, which include specific allowances for loans considered impaired, general allowance for commercial loans not considered impaired based upon applying our loan rating system, and general allocations based on historical trends for homogeneous loan groups with similar risk characteristics.

Overall, impaired loans decreased to \$84.6 million at December 31, 2011, from \$92.2 million at December 31, 2010. Included in impaired loans at December 31, 2011 were \$18.0 million of performing loans that renewed at their existing contractual rates. Under new accounting guidance applicable beginning with the third quarter of 2011 (ASU 2011-02), because these loans were graded substandard and the contractual rates were less than market rates for similar loans, these loan renewals are considered troubled debt restructurings, and thus are impaired at December 31, 2011. The specific allowance for overall impaired loans increased \$2.2 million to \$9.6 million, or 11.3% of total impaired loans, at December 31, 2011 compared to \$7.4 million, or 8.0% of total impaired loans, at December 31, 2010. The decrease in impaired loans was primarily attributable to migration to other real estate owned, loan payoffs and upgrades more than offsetting new loans moving into an impaired status. As previously discussed under the heading "Portfolio Loans and Asset Quality", this decline was consistent with a relative decline in the level of loans moving to a nonperforming status. Charge-offs totaling \$10.5 million had previously been taken on these impaired loans, bringing the balance to \$84.6 million as of December 31, 2011. Combined with the \$9.6 million of specific reserves at December 31, 2011, these loans have been written down 24%.

Specific allowances are established on individually impaired credits where we believe it is probable that a loss may be incurred. Specific allowances are determined based on discounting estimated cash flows over the life of the loan or based on the fair value of collateral supporting the loan. For commercial real estate, generally appraisals are used to estimate the fair value and determine the appropriate specific allowance. Estimated selling costs are also considered in the estimate. When it becomes apparent that liquidation of the collateral is the only source of repayment, the collateral shortfall is charged off rather than carried as a specific allowance.

The general allowance allocated to commercial loans that were not considered to be impaired was based upon the internal risk grade of such loans. We use a loan rating method based upon an eight point system. Loans are stratified between real estate secured and non real estate secured. The real estate secured portfolio is further stratified by the type of real estate. Each stratified portfolio is assigned a loss allocation factor. A lower grade assigned to a loan category generally results in a greater allocation percentage. Changes in risk grade of loans affect the amount of the allowance allocation.

The determination of our loss factors is based upon our actual loss history by loan grade and adjusted for significant factors that, in management's judgment, affect the collectability of the portfolio as of the analysis date. We use a rolling 18 month (6 quarter) actual net charge-off history as the base for our computation for commercial loans. The 18 month period ended December 31, 2011 reflected a sizeable decrease in net charge-off experience. We addressed this volatility in the qualitative factor considerations applied in our allowance computation. Adjustments to the qualitative factors also involved consideration of different loss periods for the Bank, including 12 and 24 month periods. Considering the change in our qualitative factors and the decrease in our commercial loan portfolio balances, the general commercial loan allowance decreased to \$18.9 million at December 31, 2011 compared to \$35.1 million at December 31, 2010. This resulted in a general reserve percentage allocated at December 31, 2011 of 2.61% of commercial loans, a decrease from 4.10% at December 31, 2010. The qualitative component of our allowance allocated to commercial loans was \$14.3 million at December 31, 2011 (down from \$14.7 million at December 31, 2010) to maintain the allowance balances despite the reduction in the historical loss rate.

Groups of homogeneous loans, such as residential real estate and open- and closed-end consumer loans, receive allowance allocations based on loan type. A rolling 12 month (4 quarter) historical loss experience period was applied to residential mortgage and consumer loan portfolios. As with commercial loans that are not considered impaired, the determination of the allowance allocation percentage is based principally on our historical loss experience. These allocations are adjusted for consideration of general economic and business conditions, credit quality and delinquency trends, collateral values, and recent loss experience for these similar pools of loans. The homogeneous loan allowance was \$3.1 million at December 31, 2011 compared to \$5.0 million at December 31, 2010. The decrease was related to significant improvements in delinquencies in both residential mortgage and consumer loan portfolios.

The formula allowance allocated to commercial loans that are not considered to be impaired is calculated by applying historical loss factors to outstanding loans based on the internal risk rating of such loans. We use a loan rating method based upon an eight point system. Loans rated a 4 or better are considered of acceptable risk. Loans rated a 5 exhibit above normal risk to the Company and warrant a greater level of attention by management. These loans are subject to on-going review and assessment by our Administrative Loan Committee. Loans rated a 6 or worse are considered substandard, doubtful or loss, exhibit a greater relative risk of loss to the Company based upon the rating and warrant an active workout plan administered by our Special Asset Group, as discussed above.

Loans are assigned a loss allocation factor for each loan class based principally on the loss history for each risk rating within each loan category. Commercial real estate loans are stratified and grouped by the type of real estate securing such loans for determining the loan classification category. For 2009 and the first three quarters of 2010 the loss history was based upon the latest 12 month period, as this was considered most representative within the then current economic cycle. However, given the significant improvement in our charge-off history over the 12 month periods in late 2010, we determined that an 18 month (6 quarter) historical period was more appropriate for the fourth quarter 2010 as heavy charge-off months would have rolled off the 12 month period, and would have resulted in a substantially smaller overall allowance balance. Until overall levels of nonperforming loans decline over a sustained period, we believe such a reduction in the allowance balance would be premature. The historical loss allocation factor used is adjusted for consideration of significant qualitative factors that affect the collectability of the portfolio as of the analysis date. The worse the risk rating assigned to a loan category, the greater the loss allocation factor that is applied.

The qualitative factors assessed and used to adjust historical loss experience reflect our best assessment of the impact of economic trends, delinquency and other problem loan trends, trends in valuations supporting underlying collateral, changes in loan portfolio concentrations and changes in internal credit administration practices have on probable losses inherent in our loan portfolio. Qualitative adjustments are inherently subjective and there can be no assurance that these adjustments have properly identified probable losses in our loan portfolio. More information regarding the subjectivity involved in determining the estimate of the allowance for loan losses may be found in this Item 7 of the report under the heading "Critical Accounting Policies and Estimates."

The following table shows the allocation of the allowance for loan losses by portfolio type at the dates indicated.

(Dollars in thousands)	December 31			
	2011		2010	
	Allowance Amount	% of Each Category to Total Loans	Allowance Amount	% of Each Category to Total Loans
Commercial and commercial real estate	\$ 26,821	74%	\$ 42,011	77%
Residential mortgage	3,092	15%	2,155	11%
Consumer	1,728	11%	3,260	12%
Total	\$ 31,641	100%	\$ 47,426	100%

The components of the allowance for loan losses were as follows:

(Dollars in thousands)	December 31			
	2011		2010	
	Balance of Loans	Allowance Amount	Balance of Loans	Allowance Amount
Commercial and commercial real estate:				
Impaired with allowance recorded	\$ 48,738	\$ 7,845	\$ 29,915	\$ 6,910
Impaired with no allowance recorded	20,788	0	48,519	0
Loss allocation factor on non-impaired loans	725,792	18,975	855,434	35,101
	795,318	26,820	933,868	42,011
Residential mortgage and consumer:				
Reserves on residential mortgage troubled debt restructurings	15,085	1,752	13,752	458
Loss allocation factor	260,572	3,069	269,576	4,957
Total	\$ 1,070,975	\$ 31,641	\$ 1,217,196	\$ 47,426

With the exception of certain TDRs, impaired commercial loans at December 31, 2011 were classified as substandard or worse per our internal risk rating system. The \$15.1 million of residential mortgage troubled debt restructurings were associated with programs approved by the U.S. government during 2009 to minimize the number of consumer foreclosures. These loans involved the restructuring of terms on consumer mortgages to allow customers to mitigate foreclosure by meeting a lower loan payment requirement based upon their current cash flow. We have been active at utilizing these programs and working with our customers to reduce the risk of foreclosure. Additional information regarding impaired loans at December 31, 2011 and 2010 may be found in Item 8 of this report in the Notes to the Consolidated Financial Statements in Note 3.

The decrease in the level of the allowance for 2011 was due to decreases in net charge-offs from commercial loans, shrinkage in the overall loan portfolio during 2011, a reduction in the level of impaired loans and nonperforming loans, and improvement in the loan grades, which provides a lower allocation. Our weighted average loan grade improved from 4.38 at December 31, 2010 to 4.19 at December 31, 2011. The decrease of \$15.2 million in reserves on commercial loans was due to a \$16.1 million decrease in the loss allocation factor allowance on non-impaired loans, partially offset by a \$935,000 increase in specific reserves on impaired loans. The decrease in the loss experience incurred during this period and a general improvement in the credit quality and the overall risk ratings of commercial loans is the primary reason for this decrease.

The general allowance for residential real estate and consumer loans was \$3.1 million at December 31, 2011 compared to \$5.0 million at December 31, 2010. The decrease was largely related to improvements in delinquency for residential mortgages and home equity loans at December 31, 2011 compared to December 31, 2010.

Of the \$31.6 million allowance at December 31, 2011, 30% related to specific allocations on impaired loans, 60% related to the formula allowance on commercial loans and 10% related to general allocations for homogeneous loans. Of the \$47.4 million allowance at December 31, 2010, 15% related to specific allocations on impaired loans, 74% related to formula allowance on commercial loans and 11% related to general allocations for homogeneous loans.

Of the \$22.0 million total formula based allowance for loan loss allocations at December 31, 2011, \$15.0 million is from general/environmental allocations with \$7.0 million driven from historical experience. Of the \$35.1 million total formula based allowance for loan loss allocations at December 31, 2010, \$14.7 million is from general/environmental allocations with \$20.4 million driven from historical experience.

The above allocations are not intended to imply limitations on usage of the allowance. The entire allowance is available for any loan losses without regard to loan type.

More information regarding steps to address the elevated levels of substandard, impaired and nonperforming loans, which have largely resulted in the need to increase the allowance for loan losses, may be found in this Item 7 of the report under the heading "Loan Portfolio and Asset Quality" above and in Item 8 of this report in the Notes to the Consolidated Financial Statements in Note 3.

Although we believe our allowance for loan losses has captured the losses that are probable in our portfolio as of December 31, 2011, there can be no assurance that all losses have been identified or that the allowance is sufficient. The additional efforts by management to accelerate the identification and disposition of problem assets discussed above, and the impact of the lasting economic slowdown may result in additional losses in 2012.

Premises and Equipment: Premises and equipment totaled \$55.4 million at December 31, 2011, representing a decrease of \$1.6 million from \$57.0 million at December 31, 2010. The decline was largely from depreciation of current facilities in excess of capital additions during 2011. When economic conditions and financial performance improve, we will assess the prospects for future branch expansion.

Deposits: Total deposits decreased \$61.3 million to \$1.22 billion at December 31, 2011, as compared to \$1.28 billion at December 31, 2010.

Because of the decline in assets during 2011, we decreased many of our higher costing deposits. The decline in deposits was primarily from a \$48.2 million decrease in out-of-market deposits generated from brokers and a \$38.2 million decrease in local jumbo time deposits. The Bank had no brokered deposits as of December 31, 2011.

The overall declines in deposit categories noted above were partially offset by growth in balances of personal and business checking and savings accounts. Non-interest checking account balances increased \$68.4 million during 2011. These increases are particularly noteworthy considering the limited economic expansion in Western Michigan. We believe our growth in balances of personal and business checking and savings accounts was primarily attributable to our focus on quality customer service, the desire of customers to deal with a local bank, the convenience of our maturing branch network and the breadth and depth of our sophisticated product line.

Noninterest bearing demand accounts comprised 27% of total deposits at December 31, 2011 compared to 20% of total deposits at December 31, 2010. Part of the reason for the increase in noninterest bearing demand accounts was associated with temporary insurance programs provided for these account types by the U.S Government. Because of the generally low rates paid on interest bearing account alternatives, many of our business customers chose to keep their balances in these more liquid and insured account types. Interest bearing demand, including money market and savings accounts, comprised 48% of total deposits at December 31, 2011 compared to 45% at the end of 2010. Time accounts as a percentage of total deposits were 25% at December 31, 2011 compared to 35% at December 31, 2010.

Additional information about the restrictions on the Bank's deposit gathering activities may be found in Item 8 of this report in the Notes to the Consolidated Financial Statements in Note 1 and is here incorporated by reference.

Borrowed Funds: Borrowed funds consist of advances from the Federal Home Loan Bank, long-term debt associated with the issuance of trust preferred securities, subordinated debt, and federal funds purchased provided by our correspondent banks.

Borrowed funds totaled \$191.5 million at December 31, 2011; including \$148.6 million of Federal Home Loan Bank advances, \$41.2 million in long-term debt associated with trust preferred securities and \$1.7 million in subordinated debt. Borrowed funds totaled \$228.2 million at December 31, 2010; including \$185.3 million of Federal Home Loan Bank advances, \$41.2 million in long-term debt associated with trust preferred securities and \$1.7 million in subordinated debt.

As discussed in Item 8 of this report in Note 8 to the Consolidated Financial Statements, during the third quarter of 2011 we modified the terms of six of our FHLB advances, resulting in the lengthening of the maturity from 1.49 years to 4.76 years and reducing the weighted average rate on those advances from 1.93% to 1.72%. This transaction was executed to provide an interest rate maturity distribution to match with our strategy of holding more long-term fixed rate residential mortgages in our loan portfolio.

We have exercised our right to defer interest payments on our trust preferred securities for 20 consecutive quarters or until such earlier time as is determined by further action of the Board of Directors. During the deferral period, we may not declare or pay any dividends on our common stock or preferred stock or make any payment on any outstanding debt obligations that rank equally with or junior to the trust preferred securities. Through December 31, 2011, we have deferred interest payments for nine quarters. We continue to accrue interest during the deferral period and at December 31, 2011 total interest accrued for trust preferred securities was \$3.1 million, compared to \$1.7 million at December 31, 2010.

Borrowed funds decreased during 2011 as we were able to payoff maturing borrowings with excess liquidity derived from shrinkage in assets on our balance sheet.

CAPITAL RESOURCES

Holding Company:

Total shareholders' equity was \$94.4 million at December 31, 2011 compared to \$67.8 million at December 31, 2010. The increase was primarily a result of the successful completion of our shareholder rights offering and public offering of common stock which were completed in June 2011. The offerings resulted in the issuance of 8,912,372 shares of common stock and net proceeds of \$19.3 million. The conversion of our 2% Subordinated Note due 2018 resulted in the issuance of 491,380 shares of common stock, adding \$1.0 million to shareholders' equity. Also positively impacting total shareholders' equity was the \$5.8 million of net income earned during 2011.

Our regulatory capital ratios improved throughout 2011 and ended the year at their highest levels since December 31, 1999. The following table shows our regulatory capital ratios (on a consolidated basis) for the past several quarters.

	Dec 31, 2011	Sept 30, 2011	June 30, 2011	March 31, 2011	Dec 31, 2010	Sept 30, 2010	June 30, 2010	March 31, 2010
Total capital to risk weighted assets	13.2%	12.9%	12.7%	10.3%	9.7%	9.3%	8.8%	8.3%
Tier 1 capital to average assets	8.3%	8.1%	8.1%	5.8%	5.8%	5.4%	5.3%	4.8%

Cash dividends of \$2.9 million were declared on preferred shares during 2009. Following this, we suspended payment of cash dividends on our common and preferred stock for the remainder of 2009 and ever since then in an effort to preserve capital. As disclosed in Note 1 of the Consolidated Financial Statements, the Bank has an understanding with its regulators that it will not declare or pay any dividend without their prior written consent. As the payment of future cash dividends by Macatawa Bank Corporation is largely dependent upon dividends received from the Bank out of its earnings, we do not expect to pay cash dividends in the near term. During the period that we do not declare and pay cash dividends on our preferred stock, we may not declare and pay cash dividends on our common stock. We expect to reassess our ability to resume the payment of dividends on our preferred and common stock if and when current levels of cash, earnings and capital are at acceptable levels and the prospects are positive for sustained economic growth and improved performance.

Additional information on restrictions on payments of dividends by us may be found in Item 1 of this report under the headings "Regulatory Developments" and "Supervision and Regulation," and in Item 8 of this report in Notes 1 and 17 to the Consolidated Financial Statements, and is here incorporated by reference.

We earlier increased our capital through the sale of \$31.3 million of Series A Preferred Stock in the fourth quarter of 2008. During second and third quarters of 2009, we increased our capital by \$5.9 million through the issuance of Series B Preferred Stock, common stock and the subordinated debt discussed above. We had no preferred or common stock issuances during 2010. As discussed above, during 2011 we issued \$20.3 million in common stock. We had no preferred stock issuances during 2011. For more information regarding the private offerings, see Item 8 of this report under the Notes to the Consolidated Financial Statements in Note 18.

The following table shows the Company's various consolidated capital ratios for 2011 and 2010.

As of and for the year ended December 31,	2011	2010
Average equity to average assets	5.4%	4.3%
Total risk-based capital	13.2%	9.7%
Tier 1 risk-based capital	11.0%	6.9%
Tier 1 capital to average assets	8.3%	5.8%

Capital ratios have been positively impacted by the decline in our total assets and the common stock issuance in 2011. Approximately \$31.3 million of the \$40.0 million of trust preferred securities outstanding at December 31, 2011 qualified as Tier 1 capital. The remaining \$8.7 million qualified as Tier II capital, a component of total risk-based capital.

Capital sources include, but are not limited to, additional private and public common stock offerings, preferred stock offerings and subordinated debt.

Macatawa Bank:

The Bank was categorized as "adequately capitalized" at December 31, 2011. The Bank's regulatory capital ratios exceeded the levels ordinarily required to be categorized as "well capitalized" at December 31, 2011. However, because the Bank was subject to the Consent Order at December 31, 2011, the Bank could not be categorized as "well capitalized" regardless of its actual capital levels. Under the Consent Order, the Bank was required to have and maintain a Tier 1 Leverage Capital Ratio of at least 8% and a Total Risk Based Capital Ratio of at least 11%. At December 31, 2011, the Bank was in compliance with each of these capital ratios. The following table shows the Bank's various capital ratios at December 31, 2011 and 2010.

As of and for the year ended December 31,	2011	2010
Average equity to average assets	7.8%	6.7%
Total risk-based capital	12.5%	9.7%
Tier 1 risk-based capital	11.2%	8.4%
Tier 1 capital to average assets	8.4%	7.1%

As discussed earlier in this report in Item 1 under "Regulatory Developments", the Consent Order has been terminated. Had the Consent Order been terminated as of December 31, 2011, the Bank would have been categorized as "well capitalized." We expect the Bank to be categorized as "well capitalized" as of March 31, 2012. In connection with the termination of the Consent Order, the Bank reached an understanding with the regulators to maintain a Tier 1 Leverage Capital Ratio of at least 8%, which the Bank exceeded at December 31, 2011.

LIQUIDITY

Liquidity of Macatawa Bank: The liquidity of a financial institution reflects its ability to manage a variety of sources and uses of funds. Our Consolidated Statements of Cash Flows categorize these sources and uses into operating, investing and financing activities. We primarily focus on developing access to a variety of borrowing sources to supplement our deposit gathering activities and provide funds for growing our investment and loan portfolios. Our sources of liquidity include our borrowing capacity with the Federal Reserve Bank of Chicago's discount window, the Federal Home Loan Bank, federal funds purchased lines and other secured borrowing sources with our correspondent banks, loan payments by our borrowers, maturity and sales of our securities available for sale, growth of our deposits and deposit equivalents, federal funds sold, and the various capital resources discussed above.

Liquidity management involves the ability to meet the cash flow requirements of our customers. Our customers may be either borrowers with credit needs or depositors wanting to withdraw funds. Our liquidity management involves periodic monitoring of our assets considered to be liquid and illiquid, and our funding sources considered to be core and non-core and short-term (less than 12 months) and long-term. We have established parameters that monitor, among other items, our level of liquid assets to short-term liabilities, our level of non-core funding reliance and our level of available borrowing capacity. We have also developed a contingency funding plan to stress test our liquidity requirements arising from certain events that may trigger liquidity shortages, such as rapid loan growth in excess of normal growth levels or the loss of deposits and other funding sources under extreme circumstances.

Prior to 2008, our balance sheet size was led by loan growth. During that time, the Bank utilized brokered deposits and other wholesale funding sources to augment its local deposits within its liquidity and interest rate risk tolerances. Limits have always been placed on brokered deposit and wholesale funding exposure and monitored monthly by the ALCO Committee. We maintained a diversified wholesale funding structure and actively manage our maturing wholesale sources to reduce the risk to liquidity shortages.

In response to the volatile conditions in the national markets since 2008, we have actively pursued initiatives to further strengthen our liquidity position. The Bank has made significant progress to intentionally reduce its reliance on non-core funding sources, including brokered deposits, and is focused on achieving a non-core funding dependency ratio of below its peer group average. During 2011, we paid off \$48.2 million in brokered deposits and had no such deposits outstanding at December 31, 2011. Since December 31, 2008, we have reduced our brokered deposits by \$337.8 million. We also reduced other borrowed funds by \$36.7 million in 2011, thereby shrinking non-core funding by a total of \$84.9 million during 2011. We sold our investment security portfolio in the second quarter of 2010 and reinvested the proceeds into short term investments. We continued to maintain a large portion of these proceeds in liquid investments throughout 2011. The Bank held \$212.1 million of liquid money market investments at December 31, 2011.

In addition to strategies focused on improving the liquidity of the balance sheet, the Bank's borrowing capacity from correspondent banks has been improved and was approximately \$111.6 million as of December 31, 2011.

In the normal course of business, we enter into certain contractual obligations including obligations which are considered in our overall liquidity management. The table below summarizes our significant contractual obligations at December 31, 2011.

(Dollars in thousands)	Less than 1 year	1-3 years	3-5 years	More than 5 years
Long term debt	\$ ---	\$ ---	\$ ---	\$ 41,238
Subordinated debt	---	---	---	1,650
Time deposit maturities	225,757	41,954	37,425	---
Other borrowed funds	36,781	23,715	85,989	2,118
Total	\$ 262,538	\$ 65,669	\$ 123,414	\$ 45,006

In addition to normal loan funding, we also maintain liquidity to meet customer financing needs through unused lines of credit, unfunded loan commitments and standby letters of credit. The level and fluctuation of these commitments is also considered in our overall liquidity management. At December 31, 2011, we had a total of \$230.7 million in unused lines of credit, \$60.9 million in unfunded loan commitments and \$3.2 million in standby letters of credit.

Liquidity of Holding Company: The primary sources of liquidity for the Company are dividends from the Bank, existing cash resources and the various capital resources discussed above. Banking regulations and the laws of the state of Michigan in which our Bank is chartered limit the amount of dividends the Bank may declare and pay to the Company in any calendar year. Under the state law limitations, the Bank is restricted from paying dividends to the Company until its deficit retained earnings has been restored. Throughout 2010 and 2011, the Company has not received dividends from the Bank and the Company has suspended payment of dividends on its common stock. Under the Bank's understanding with the FDIC and OFIR and the Written Agreement with the FRB, the Bank and the Company may not pay any dividends without prior regulatory approval.

The Company continued to suspend payments of cash dividends on its preferred stock during 2010 and 2011 until further action by the Board of Directors. During the period that the Company does not declare and pay cash dividends on its preferred stock, it may not declare and pay cash dividends on its common stock.

During 2010 and 2011, the Company also continued to exercise its right to defer interest payments on its trust preferred securities for 20 consecutive quarters or until such earlier time as is determined by further action of the Board of Directors. During the deferral period, the Company may not declare or pay any dividends on its common stock or preferred stock or make any payment on any outstanding debt obligations that rank equally with or junior to the trust preferred securities.

As discussed earlier, on June 7, 2011, the Company closed its shareholder rights offering, resulting in the issuance of 4,456,186 shares of common stock. On June 29, 2011, the Company closed its public offering, resulting in the issuance of 4,456,186 shares of common stock. These offerings resulted in net proceeds of \$19.3 million. The conversion of our 2% Subordinated Note due 2018 into 491,830 shares of common stock provided another \$1.0 million in proceeds. The Company contributed \$10.0 million of the proceeds to the Bank and retained the remaining \$10.3 million at the holding company level.

Additional information on restrictions on payments of dividends by us may be found in Item 1 of this report under the headings "Regulatory Developments" and "Supervision and Regulation," in this Item 7 under the heading "Capital Resources," and in Item 8 of this report in Notes 1 and 18 to the Consolidated Financial Statements, and is here incorporated by reference.

The Company's cash balance at December 31, 2011 was \$10.5 million. The Company believes it has sufficient liquidity to meet its cash flow requirements for 2012.

For information on the liquidity risks we face, see the risk factors in Item 1A of this report entitled "We are subject to liquidity risk in our operations, which could adversely affect our ability to fund various obligations," and "If the condition of the Bank's loan portfolio worsens, its ability to borrow funds from the Federal Home Loan Bank could be adversely affected, which could materially adversely affect the Bank's and the Company's liquidity position."

CRITICAL ACCOUNTING POLICIES AND ESTIMATES:

To prepare financial statements in conformity with accounting principles generally accepted in the United States of America, management makes estimates and assumptions based on available information. These estimates and assumptions affect the amounts reported in the financial statements and future results could differ. The allowance for loan losses, other real estate owned valuation, loss contingencies and income taxes are deemed critical due to the required level of management judgment and the use of estimates, making them particularly subject to change.

Our methodology for determining the allowance for loan losses and the related provision for loan losses is described above in the "Allowance for Loan Losses" discussion. This area of accounting requires significant judgment due to the number of factors which can influence the collectability of a loan. Unanticipated changes in these factors could significantly change the level of the allowance for loan losses and the related provision for loan losses. Although, based upon our internal analysis, and in our judgment, we believe that we have provided an adequate allowance for loan losses, there can be no assurance that our analysis has properly identified all of the probable losses in our loan portfolio. As a result, we could record future provisions for loan losses that may be significantly different than the levels that we recorded in 2011.

Assets acquired through or instead of foreclosure, primarily other real estate owned, are initially recorded at fair value less costs to sell when acquired, establishing a new cost basis. New real estate appraisals are generally obtained at the time of foreclosure and are used to establish fair value. If fair value declines, a valuation allowance is recorded through expense. Estimating the initial and ongoing fair value of these properties involves a number of factors and judgments including holding time, costs to complete, holding costs, discount rate, absorption and other factors.

Loss contingencies are recorded as liabilities when the likelihood of loss is probable and an amount or range of loss can be reasonably estimated. This, too, is an accounting area that involves significant judgment. Although, based upon our judgment, internal analysis, and consultations with legal counsel we believe that we have properly accounted for loss contingencies, future changes in the status of such contingencies could result in a significant change in the level of contingent liabilities and a related impact to operating earnings.

Our accounting for income taxes involves the valuation of deferred tax assets and liabilities primarily associated with differences in the timing of the recognition of revenues and expenses for financial reporting and tax purposes. At December 31, 2011, we had gross deferred tax assets of \$26.7 million, gross deferred tax liabilities of \$2.7 million and a valuation allowance of \$24.0 million for the entire amount of net deferred tax assets. Accounting standards require that companies assess whether a valuation allowance should be established against their deferred tax assets based on the consideration of all available evidence using a "more likely than not" standard. Based upon a number of factors, including our net operating loss in recent years and the challenging environment currently confronting banks that could negatively impact future operating results, we concluded that we needed to continue to maintain a valuation allowance during 2011 for our net deferred tax assets. Changes in tax laws, changes in tax rates, changes in ownership and our future level of earnings can impact the ultimate realization of our net deferred tax asset as well as the valuation allowance that we established.

ITEM 7A: Quantitative and Qualitative Disclosures About Market Risk.

Not Applicable.

ITEM 8: Financial Statements and Supplementary Data.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Shareholders
Macatawa Bank Corporation
Holland, Michigan

We have audited the accompanying consolidated balance sheets of Macatawa Bank Corporation as of December 31, 2011 and 2010 and the related consolidated statements of income, comprehensive income, changes in shareholders' equity, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Macatawa Bank Corporation at December 31, 2011 and 2010, and the results of its operations and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Macatawa Bank Corporation's internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) and our report dated March 7, 2012 expressed an unqualified opinion thereon.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2011 and 2010

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Operations and Principles of Consolidation: The accompanying consolidated financial statements include the accounts of Macatawa Bank Corporation ("Macatawa" or the "Company") and its wholly-owned subsidiary, Macatawa Bank (the "Bank"). All significant intercompany accounts and transactions have been eliminated in consolidation.

Macatawa Bank is a Michigan chartered bank with depository accounts insured by the Federal Deposit Insurance Corporation. The Bank operates 26 full service branch offices providing a full range of commercial and consumer banking and trust services in Kent County, Ottawa County, and northern Allegan County, Michigan.

The Company owns all of the common securities of Macatawa Statutory Trust I and Macatawa Statutory Trust II. These are grantor trusts that issued trust preferred securities and are discussed in a separate note. Under generally accepted accounting principles, these trusts are not consolidated into the financial statements of the Company.

Regulatory Developments:

Termination of Consent Order with Macatawa Bank and its Regulators

On February 22, 2010, the Bank entered into a Consent Order with the Federal Deposit Insurance Corporation ("FDIC") and the Michigan Office of Financial and Insurance Regulation ("OFIR"), the primary banking regulators of the Bank. The Bank agreed to the terms of the negotiated Consent Order without admitting or denying any charges of unsafe or unsound banking practices. The Consent Order imposed no fines or penalties on the Bank. As a result of the improvement in our financial condition and results of operations, our implementation of additional corporate governance practices and disciplined business and banking principles, and our compliance with the Consent Order, upon completion of the Bank's 2011 joint examination by the FDIC and OFIR, the FDIC and OFIR terminated the Consent Order effective March 2, 2012.

In connection with the termination of the Consent Order, the Bank reached an understanding with the regulators in the form of a memorandum of understanding ("MOU"), which maintains many of the controls and procedures put in place by the Bank in response to the Consent Order, including: maintenance of a Tier 1 Leverage Capital Ratio of at least 8%, formulating and submitting a written plan of action on each asset classified as Substandard in the Report of Examination ("ROE"), charge-off of all assets classified as "Loss" in the ROE, submission of a written Profit Plan, Board review of the adequacy of the allowance for loan and lease losses each quarter and the receipt of prior written consent of the FDIC and OFIR before the Bank declares or pays any dividends. The Bank was in compliance with each of these requirements as of the date of filing of the Company's Annual Report on Form 10-K for the year ended December 31, 2011.

Written Agreement with Macatawa and its Regulator

The Company has formally entered into a Written Agreement with the Federal Reserve Bank of Chicago ("FRB"). The Written Agreement became effective on July 29, 2010, when it was executed and published by the FRB, and was assigned an effective date of July 23, 2010. Among other things, the Written Agreement provides that: (i) the Company must take appropriate steps to fully utilize its financial and managerial resources to serve as a source of strength to Macatawa Bank; (ii) the Company may not declare or pay any dividends without prior FRB approval; (iii) the Company may not take dividends or any other payment representing a reduction in capital from Macatawa Bank without prior FRB approval; (iv) the Company may not make any distributions of interest, principal or other sums on subordinated debentures or trust preferred securities without prior FRB approval; (v) the Company may not incur, increase or guarantee any debt without prior FRB approval; (vi) the Company may not purchase or redeem any shares of its stock without prior FRB approval; (vii) the Company must submit a written capital plan to the FRB within 60 days of the Written Agreement; and (viii) the Company may not appoint any new director or senior executive officer, or change the responsibilities of any senior executive officer so that the officer would assume a different senior executive officer position, without prior regulatory approval. The Company separately requested and received approval from the FRB to make each 2011 quarterly interest payments on its \$1.65 million in outstanding subordinated debt. Each quarter the Company requests approval from the FRB to make the next quarter's interest payment on its subordinated debt and is continuing to accrue the interest amounts due.

We believe that as of December 31, 2011, the Company was in compliance with all material respects with all the provisions of the Written Agreement.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2011 and 2010

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Use of Estimates: To prepare financial statements in conformity with accounting principles generally accepted in the United States of America, management makes estimates and assumptions based on available information. These estimates and assumptions affect the amounts reported in the financial statements and the disclosures provided, and future results could differ. The allowance for loan losses, fair value of intangible assets, valuation of deferred tax assets, loss contingencies, fair value of other real estate owned and fair values of financial instruments are particularly subject to change.

Concentration of Credit Risk: Loans are granted to, and deposits are obtained from, customers primarily in the western Michigan area as described above. Substantially all loans are secured by specific items of collateral, including residential real estate, commercial real estate, commercial assets and consumer assets. Commercial real estate loans are the largest concentration, comprising 53% of total loans. Commercial and industrial loans total 21%, while residential real estate and consumer loans make up the remaining 26%. Other financial instruments, which potentially subject the Company to concentrations of credit risk, include deposit accounts in other financial institutions.

Cash Flow Reporting: Cash and cash equivalents include cash on hand, demand deposits with other financial institutions and short-term securities (securities with maturities equal to or less than 90 days and federal funds sold). Cash flows are reported net for customer loan and deposit transactions, interest-bearing time deposits with other financial institutions and short-term borrowings with maturities of 90 days or less.

Securities: Securities are classified as held to maturity and carried at amortized cost when management has the positive intent and ability to hold them to maturity. Securities available for sale consist of those securities which might be sold prior to maturity due to changes in interest rates, prepayment risks, yield and availability of alternative investments, liquidity needs or other factors. Securities classified as available for sale are reported at their fair value and the related unrealized holding gain or loss is reported in other comprehensive income, net of tax.

Interest income includes amortization of purchase premium or discount. Premiums and discounts on securities are amortized on the level yield method without anticipating prepayments. Gains and losses on sales are based on the amortized cost of the security sold.

Management evaluates securities for other-than-temporary impairment ("OTTI") at least on a quarterly basis, and more frequently when economic or market conditions warrant such an evaluation. Investment securities classified as available for sale or held-to-maturity are generally evaluated for OTTI under ASC Topic 320, *Investments — Debt and Equity Instruments*.

In determining OTTI, management considers many factors, including: (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, (3) whether the market decline was affected by macroeconomic conditions, and (4) whether the entity has the intent to sell the debt security or more likely than not will be required to sell the debt security before its anticipated recovery. The assessment of whether an other-than-temporary decline exists involves a high degree of subjectivity and judgment and is based on the information available to management at a point in time. Management has determined that no OTTI charges were necessary during 2011 and 2010.

Federal Home Loan Bank (FHLB) Stock: The Bank is a member of the FHLB system. Members are required to own a certain amount of stock based on the level of borrowings and other factors, and may invest in additional amounts. FHLB stock is carried at cost, classified as a restricted security, and periodically evaluated for impairment. Because this stock is viewed as a long term investment, impairment is based on ultimate recovery of par value. Management has determined that there is no impairment of FHLB stock. Both cash and stock dividends are reported as income.

Loans Held for Sale: Mortgage loans originated and intended for sale in the secondary market are carried at fair value, as determined by outstanding commitments from investors. As of December 31, 2011 and 2010 these loans had a net unrealized gain of \$20,510 and \$40,163 which are reflected in their carrying value. Changes in fair value of loans held for sale are included in net gains on mortgage loans. Loans are sold servicing released; therefore no mortgage servicing right assets are established.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2011 and 2010

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Loans: Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at the principal balance outstanding, net of unearned interest, deferred loan fees and costs and an allowance for loan losses.

Interest income is accrued on the unpaid principal balance. Loan origination fees, net of certain direct origination costs, are deferred and recognized in interest income over the respective term of the loan using the level-yield method without anticipating prepayments.

Interest income on mortgage and commercial loans is discontinued at the time the loan is 90 days delinquent unless the loan is well-secured and in process of collection. Consumer loans are typically charged off no later than 120 days past due. Past due status is based on the contractual terms of the loan. In all cases, loans are placed on nonaccrual or charged-off at an earlier date if collection of principal or interest is considered doubtful. Nonaccrual loans and loans past due 90 days still on accrual include both smaller balance homogeneous loans that are collectively evaluated for impairment and individually classified impaired loans.

All interest accrued but not received for loans placed on nonaccrual is reversed against interest income. Interest received on such loans is accounted for on the cash-basis or cost-recovery method, until qualifying for return to accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Allowance for Loan Losses: The allowance for loan losses is a valuation allowance for probable incurred credit losses, increased by the provision for loan losses and recoveries, and decreased by charge-offs of loans. Management believed the estimated allowance for loan losses to be adequate based on known and inherent risks in the portfolio, past loan loss experience, information about specific borrower situations and estimated collateral values, economic conditions and other factors. Allocations of the allowance may be made for specific loans, but the entire allowance is available for any loan that, in management's judgment, should be charged-off. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed.

The allowance consists of specific and general components. The specific component relates to loans that are individually classified as impaired. The general component covers non-classified loans and is based on historical loss experience adjusted for current qualitative environmental factors. The Company maintains a loss migration analysis that tracks loan losses and recoveries based on loan class as well as the loan risk grade assignment for commercial loans. At December 31, 2011, an 18 month (six quarter) annualized historical loss experience was used for commercial loans and a 12 month (four quarter) historical loss experience period was applied to residential mortgage and consumer loan portfolios. These historical loss percentages are adjusted (both upwards and downwards) for certain qualitative environmental factors, including economic trends, credit quality trends, valuation trends, concentration risk, quality of loan review, changes in personnel, external factors and other considerations.

A loan is impaired when, based on current information and events, it is believed to be probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. Loans for which the terms have been modified and for which the borrower is experiencing financial difficulties, are considered troubled debt restructurings and classified as impaired.

Commercial and commercial real estate loans with relationship balances exceeding \$500,000 and an internal risk grading of 6 or worse are evaluated for impairment. If a loan is impaired, a portion of the allowance is allocated so that the loan is reported, net, at the present value of estimated future cash flows using the loan's existing interest rate or at the fair value of collateral, less estimated costs to sell, if repayment is expected solely from the collateral. Large groups of smaller balance homogeneous loans, such as consumer and residential real estate loans are collectively evaluated for impairment and, accordingly, they are not separately identified for impairment disclosures. Troubled debt restructurings are also considered impaired with impairment generally measured at the present value of estimated future cash flows using the loan's effective rate at inception or using the fair value of collateral, less estimated costs to sell, if repayment is expected solely from the collateral.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2011 and 2010

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Transfers of Financial Assets: Transfers of financial assets are accounted for as sales, when control over the assets has been relinquished. Control over transferred assets is deemed to be surrendered when the assets have been isolated from the Company, the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

Foreclosed Assets: Assets acquired through or instead of loan foreclosure, primarily other real estate owned, are initially recorded at fair value less costs to sell when acquired, establishing a new cost basis. If fair value declines, a valuation allowance is recorded through expense. Costs after acquisition are expensed unless they add value to the property.

Premises and Equipment: Land is carried at cost. Premises and equipment are stated at cost less accumulated depreciation. Buildings and related components are depreciated using the straight-line method with useful lives ranging from 5 to 40 years. Furniture, fixtures and equipment are depreciated using the straight-line method with useful lives ranging from 3 to 15 years. Maintenance, repairs and minor alterations are charged to current operations as expenditures occur and major improvements are capitalized.

Bank-Owned Life Insurance (BOLD): The Bank has purchased life insurance policies on certain officers. Bank-owned life insurance is recorded at its currently realizable cash surrender value. Changes in cash surrender value are recorded in other income.

Goodwill and Acquired Intangible Assets: Goodwill resulting from business combinations represents the excess of the purchase price over the fair value of the net assets of businesses acquired. Goodwill and intangible assets acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but tested for impairment at least annually. Intangible assets with definite useful lives are amortized over their estimated useful lives to their estimated residual values. The Company had no goodwill at December 31, 2011 and 2010.

Acquired intangible assets consist of core deposit and customer relationship intangible assets arising from acquisitions. They are initially measured at fair value and then are amortized on an accelerated method over their estimated useful lives, which range from ten to sixteen years. The Company had a core deposit intangible asset with a balance of \$63,750 and \$321,750 at December 31, 2011 and 2010, respectively.

Long-term Assets: Premises and equipment and other long-term assets are reviewed for impairment when events indicate their carrying amount may not be recoverable from future undiscounted cash flows. If impaired, the assets are recorded at fair value.

Loan Commitments and Related Financial Instruments: Financial instruments include off-balance sheet credit instruments, such as commitments to make loans and commercial letters of credit, issued to meet customer financing needs. The face amount for these items represents the exposure to loss, before considering customer collateral or ability to repay. Such financial instruments are recorded when they are funded.

Mortgage Banking Derivatives: Commitments to fund mortgage loans (interest rate locks) to be sold into the secondary market and forward commitments for the future delivery of these mortgage loans are accounted for as derivatives not qualifying for hedge accounting. Fair values of these mortgage derivatives are estimated based on changes in mortgage interest rates from the date the interest on the loan is locked. At times, the Company enters into forward commitments for the future delivery of mortgage loans when interest rate locks are entered into, in order to hedge the change in interest rates resulting from its commitments to fund the loans. During 2011 and 2010, the Company did not use forward commitments, but instead entered into best efforts agreements. Changes in the fair values of these interest rate lock and forward commitment derivatives are included in net gains on mortgage loans. The net fair value of mortgage banking derivatives was approximately \$69,363 and (\$126,674) at December 31, 2011 and 2010.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2011 and 2010

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Income Taxes: Income tax expense is the sum of the current year income tax due or refundable and the change in deferred tax assets and liabilities. Deferred tax assets and liabilities are the expected future tax consequences of temporary differences between the carrying amounts and tax bases of assets and liabilities, computed using enacted tax rates. A valuation allowance, if needed, reduces deferred tax assets to the amount expected to be realized.

The Company recognizes a tax position as a benefit only if it is "more likely than not" that the tax position would be sustained in a tax examination, with a tax examination being presumed to occur. The amount recognized is the largest amount of tax benefit that is greater than 50% likely of being realized on examination. For tax positions not meeting the "more likely than not" test, no tax benefit is recorded.

The Company recognizes interest and/or penalties related to income tax matters in income tax expense.

Earnings Per Common Share: Basic earnings per common share is net income divided by the weighted average number of common shares outstanding during the period. All outstanding unvested restricted stock awards that contain rights to nonforfeitable dividends are considered participating securities for this calculation. Diluted earnings per common share includes the dilutive effect of additional potential common shares issuable under stock options and the conversion of the Company's convertible preferred stock.

Comprehensive Income (Loss): Comprehensive income (loss) consists of net income and other comprehensive income (loss). Other comprehensive income (loss) includes unrealized gains and losses on securities available for sale.

Loss Contingencies: Loss contingencies, including claims and legal actions arising in the ordinary course of business, are recorded as liabilities when the likelihood of loss is probable and an amount or range of loss can be reasonably estimated.

Restrictions on Cash: Cash on hand or on deposit with the Federal Reserve Bank of \$3,543,000 and \$2,386,000 at December 31, 2011 and 2010 was required to meet regulatory reserve and clearing requirements.

Stock Splits and Dividends: Stock dividends in excess of 20% are reported by transferring the par value of the stock issued from retained earnings to common stock. Stock dividends for 20% or less are reported by transferring the fair value, as of the ex-dividend date, of the stock issued from retained earnings to common stock and additional paid-in capital. Fractional share amounts are paid in cash with a reduction in retained earnings. All share and per share amounts are retroactively adjusted for stock splits and dividends.

Dividend Restriction: Banking regulations and the Bank's MOU with its regulators require maintaining certain capital levels and impose limitations on dividends paid by the Bank to the Company and by the Company to shareholders. This is discussed further in this Note 1 under "Regulatory Developments" above and elsewhere in the Notes to the Consolidated Financial Statements.

Fair Values of Financial Instruments: Fair values of financial instruments are estimated using relevant market information and other assumptions, as more fully disclosed separately. Fair value estimates involve uncertainties and matters of significant judgment regarding interest rates, credit risk, prepayments and other factors, especially in the absence of broad markets for particular items. Changes in assumptions or in market conditions could significantly affect the estimates. The fair value estimates of existing on-and off-balance sheet financial instruments do not include the value of anticipated future business or the values of assets and liabilities not considered financial instruments.

Segment Reporting: The Company, through the branch network of the Bank, provides a broad range of financial services to individuals and companies in western Michigan. These services include demand, time and savings deposits; lending; ATM and debit card processing; cash management; and trust and brokerage services. While the Company's management team monitors the revenue streams of the various Company products and services, operations are managed and financial performance is evaluated on a Company-wide basis. Accordingly, all of the Company's banking operations are considered by management to be aggregated in one operating segment – commercial banking.

Reclassifications: Some items in the prior year financial statements were reclassified to conform to the current presentation.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2011 and 2010

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Adoption of New Accounting Standards:

In January 2010, the FASB issued ASU 2010-06, *Improving Disclosure about Fair Value Measurements*. This standard requires new disclosures on the amount and reason for transfers in and out of Level 1 and Level 2 recurring fair value measurements. The standard also requires disclosure of activities (i.e., on a gross basis), including purchases, sales, issuances, and settlements, in the reconciliation of Level 3 fair value recurring measurements. The standard clarifies existing disclosure requirements on levels of disaggregation and disclosures about inputs and valuation techniques. The new disclosures regarding Level 1 and Level 2 fair value measurements and clarification of existing disclosures were effective for periods beginning after December 15, 2009. The disclosures about the reconciliation of information in Level 3 recurring fair value measurements were required for periods beginning after December 15, 2010. Adoption of this standard did not have a significant impact on our disclosures.

In April 2011, the FASB issued ASU 2011-02, *A Creditor's Determination of Whether a Restructuring Is a Troubled Debt Restructuring*. This ASU provides guidance for companies when determining whether a loan modification is a troubled debt restructuring. The ASU also provides additional disclosure requirements. It is effective for public companies for interim and annual periods beginning on or after June 15, 2011. The guidance is to be applied retrospectively to restructurings occurring on or after the beginning of the fiscal year of adoption. As a result of adopting the amendments in ASU 2011-02, the Company reassessed all restructurings that occurred on or after the beginning of the current fiscal year (January 1, 2011) to determine whether they are now considered troubled debt restructurings (TDRs). The Company identified as TDRs certain loans for which the allowance for loan losses had previously been measured under a general allowance methodology. Upon identifying those loans as TDRs, the Company identified them as impaired under the applicable accounting guidance. The amendments in ASU 2011-02 require prospective application of the impairment measurement guidance for those loans newly identified as impaired. In 2011, the recorded investment in loans for which the allowance was previously measured under a general allowance methodology and are now impaired was \$26.6 million, and the allowance for loan losses associated with those loans, on the basis of a current evaluation of loss was \$1.9 million. Adoption of this guidance did not materially affect the amount of allowance allocated to these loans.

The FASB has issued ASU 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*. This ASU amends accounting standards to allow an entity the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. ASU 2011-05 eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. The amendments in the ASU do not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. ASU 2011-05 should be applied retrospectively effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. The FASB also issued ASU 2011-12, *Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in ASU 2011-05*. This standard delays the requirement to present on the face of the financial statements the effect of reclassifications out of comprehensive income. This requirement is now effective for fiscal years ending after December 15, 2012. The Company early adopted ASU 2011-05 in 2011 by adding a statement of comprehensive income, consistent with presentation in the Company's quarterly filings.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2011 and 2010

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Newly Issued Not Yet Effective Standards:

The FASB has issued ASU 2011-03, *Transfers and Servicing (Topic 860): Reconsideration of Effective Control for Repurchase Agreements*. The ASU is intended to improve financial reporting of repurchase agreements (“repos”) and other agreements that both entitle and obligate a transferor to repurchase or redeem financial assets before their maturity. In a typical repo transaction, an entity transfers financial assets to a counterparty in exchange for cash with an agreement for the counterparty to return the same or equivalent financial assets for a fixed price in the future. Codification Topic 860, Transfers and Servicing, prescribes when an entity may or may not recognize a sale upon the transfer of financial assets subject to repo agreements. That determination is based, in part, on whether the entity has maintained effective control over the transferred financial assets. The amendments to the Codification in this ASU are intended to improve the accounting for these transactions by removing from the assessment of effective control the criterion requiring the transferor to have the ability to repurchase or redeem the financial assets. The guidance in the ASU is effective for the first interim or annual period beginning on or after December 15, 2011. The guidance should be applied prospectively to transactions or modifications of existing transactions that occur on or after the effective date. Adoption of this ASU is not expected to have any effect as the Company does not currently hold any such repurchase agreements.

The FASB has issued ASU 2011-04, *Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*. This ASU represents the converged guidance of the FASB and the IASB (the Boards) on fair value measurement. The collective efforts of the Boards and their staffs, reflected in ASU 2011-04, have resulted in common requirements for measuring fair value and for disclosing information about fair value measurements, including a consistent meaning of the term “fair value.” The Boards have concluded the common requirements will result in greater comparability of fair value measurements presented and disclosed in financial statements prepared in accordance with U.S. GAAP and IFRSs. The amendments to the Codification in this ASU are to be applied prospectively. For public entities, the amendments are effective during interim and annual periods beginning after December 15, 2011. Early application by public entities is not permitted. The impact of adoption of this ASU by the Company is not expected to be material.

 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 December 31, 2011 and 2010

NOTE 2 - SECURITIES

The amortized cost and fair value of securities at year-end were as follows (dollars in thousands):

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
December 31, 2011				
Available for Sale				
U.S. Treasury and federal agency securities	\$ 31,261	\$ 238	\$ ---	\$ 31,499
Tax-exempt state and municipal bonds	4,292	116	---	4,408
Taxable state and municipal bonds	16,531	239	(54)	16,716
Corporate bonds	1,081	1	(1)	1,081
Other equity securities	1,000	42	---	1,042
	<u>\$ 54,165</u>	<u>\$ 636</u>	<u>\$ (55)</u>	<u>\$ 54,746</u>
Held to Maturity				
State and municipal bonds	<u>\$ 300</u>	<u>\$ ---</u>	<u>\$ ---</u>	<u>\$ 300</u>
December 31, 2010				
Available for Sale				
U.S. Treasury and federal agency securities	\$ 8,103	\$ 6	\$ ---	\$ 8,109
Other equity securities	1,000	11	---	1,011
	<u>\$ 9,103</u>	<u>\$ 17</u>	<u>\$ ---</u>	<u>\$ 9,120</u>
Held to Maturity				
Tax-exempt state and municipal bonds	<u>\$ 83</u>	<u>\$ ---</u>	<u>\$ ---</u>	<u>\$ 83</u>

Securities with unrealized losses at year-end 2011, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, are as follows (dollars in thousands): The Company had no securities with unrealized losses at year-end 2010.

	Less than 12 Months		12 Months or More		Total	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
December 31, 2011						
U.S. Treasury and federal agency securities	\$ ---	\$ ---	\$ ---	\$ ---	\$ ---	\$ ---
Tax-exempt state and municipal bonds	---	---	---	---	---	---
Taxable state and municipal bonds	6,196	(54)	---	---	6,196	(54)
Corporate bonds	539	(1)	---	---	539	(1)
Other equity securities	---	---	---	---	---	---
Total temporarily impaired	<u>\$ 6,735</u>	<u>\$ (55)</u>	<u>\$ ---</u>	<u>\$ ---</u>	<u>\$ 6,735</u>	<u>\$ (55)</u>

Management evaluates securities for other-than-temporary impairment ("OTTI") at least on a quarterly basis, and more frequently when economic or market conditions warrant such an evaluation. Management determined that no OTTI charges were necessary during 2011 and 2010.

MACATAWA BANK CORPORATION
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 December 31, 2011 and 2010

NOTE 2 – SECURITIES (Continued)

Contractual maturities of debt securities at December 31, 2011 were as follows (dollars in thousands):

	Held-to-Maturity Securities		Available-for-Sale Securities	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Due in one year or less	\$ ---	\$ ---	\$ ---	\$ ---
Due from one to five years	---	---	19,729	19,980
Due from five to ten years	---	---	28,276	28,479
Due after ten years	300	300	5,160	5,245
	<u>\$ 300</u>	<u>\$ 300</u>	<u>\$ 53,165</u>	<u>\$ 53,704</u>

There were no sales of securities in 2011. Proceeds from the sale of available for sale securities were \$105.6 million, resulting in gross gains of \$2.7 million for the year ended December 31, 2010.

At December 31, 2011 and 2010, securities with a carrying value of approximately \$2.0 million and \$2.2 million, respectively, were pledged as security for public deposits, letters of credit and for other purposes required or permitted by law.

NOTE 3 – LOANS

Year-end portfolio loans were as follows (dollars in thousands):

	2011	2010
Commercial and industrial	\$ 227,051	\$ 264,679

The Company had allocated \$2,118,000 and \$1,361,000 of specific reserves to customers whose loan terms have been modified in troubled debt restructurings (“TDRs”) as of December 31, 2011 and 2010, respectively. These loans involved the restructuring of terms to allow customers to mitigate the risk of foreclosure by meeting a lower loan payment requirement based upon their current cash flow. These may also include loans that renewed at existing contractual rates, but below market rates for comparable credit. The Company has been active at utilizing these programs and working with its customers to reduce the risk of foreclosure. For commercial loans, these modifications typically include an interest only period and, in some cases, a lowering of the interest rate on the loan. In some cases, the modification will include separating the note into two notes with the first note structured to be supported by current cash flows and collateral, and the second note made for the remaining unsecured debt. The second note is charged off immediately and collected only after the first note is paid in full. This modification type is commonly referred to as an A-B note structure. For consumer mortgage loans, the restructuring typically includes a lowering of the interest rate to provide payment and cash flow relief. For each restructuring, a comprehensive credit underwriting analysis of the borrower’s financial condition and prospects of repayment under the revised terms is performed to assess whether the structure can be successful and that cash flows will be sufficient to support the restructured debt. An analysis is also performed to determine whether the restructured loan should be on accrual status. Generally if the loan is on accrual at the time of restructure, it will remain on accrual after the restructuring. In some cases, a nonaccrual loan may be placed on accrual at restructuring if the loan’s actual payment history demonstrates it would have cash flowed under the restructured terms. After six consecutive payments under the restructured terms, a nonaccrual restructured loan is reviewed for possible upgrade to accruing status.

Typically, once a loan is identified as a TDR, it will retain that designation until it is paid off, since the restructured loans generally are not at market rates at the time of restructuring. An exception to this would be a loan that is modified under an A-B note structure. If the remaining “A” note is at a market rate at the time of restructuring (taking into account the borrower’s credit risk and prevailing market conditions), the loan can be removed from TDR designation in a subsequent calendar year after six months of performance in accordance with the new terms. The market rate relative to the borrower’s credit risk is determined through analysis of market pricing information gathered from peers and use of a loan pricing model. The general objective of the model is to achieve a consistent return on equity from one credit to the next, taking into consideration their differences in credit risk. In the model, credits with higher risk receive a higher potential loss allocation, and therefore require a higher interest rate to achieve the target return on equity. In general, when a loan is removed from TDR status it would no longer be considered impaired. As a result, allowance allocations for loans removed from TDR status would be based on the historical based allocation for the applicable loan grade and loan class. During 2011, no loans were removed from TDR status. Given the nature of the TDRs outstanding at December 31, 2011, it is unlikely that any such loans will be removed from TDR status in 2012.

MACATAWA BANK CORPORATION
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 December 31, 2011 and 2010

NOTE 3 – LOANS (Continued)

As with other impaired loans, an allowance for loan loss is estimated for each TDR based on the most likely source of repayment for each loan. For impaired commercial real estate loans that are collateral dependent, the allowance is computed based on the fair value of the underlying collateral. For impaired commercial loans where repayment is expected from cash flows from business operations, the allowance is computed based on a discounted cash flow computation. Certain groups of TDRs, such as residential mortgages, have common characteristics and for them the allowance is computed based on a discounted cash flow computation on the change in weighted rate for the pool. The allowance allocations for commercial TDRs where we have reduced the contractual interest rate are computed by measuring cash flows using the new payment terms discounted at the original contractual rate.

Total TDRs of \$77.2 million at December 31, 2011 included the additional \$26.6 million in TDRs identified upon adoption of the new accounting standard ASU 2011-02, *Creditor's Determination of Whether a Restructuring Is a Troubled Debt Restructuring*. Since adoption of the new standard was appropriately applied only to restructurings occurring on or after January 1, 2011, the December 31, 2010 TDR total does not include TDRs identified under the new standard.

The following table presents information regarding troubled debt restructurings as of December 31, 2011 and December 31, 2010 (dollars in thousands):

	December 31, 2011		December 31, 2010	
	Number of Loans	Outstanding Recorded Balance	Number of Loans	Outstanding Recorded Balance

Commercial real estate	106	44,122	961
Consumer	16	2,509	---
	217	\$ 56,357	\$ 1,531

According to the accounting standards, not all loan modifications are TDRs. TDRs are modifications or renewals where the Company has granted a concession to a borrower in financial distress. The Company reviews all modifications and renewals for determination of TDR status. In some situations a borrower may be experiencing financial distress, but the Company does not provide a concession. These modifications are not considered TDRs. In other cases, the Company might provide a concession, such as a reduction in interest rate, but the borrower is not experiencing financial distress. This could be the case if the Company is matching a competitor's interest rate. These modifications would also not be considered TDRs. Finally, any renewals at existing terms for borrowers not experiencing financial distress would not be considered TDRs. The following table presents information regarding modifications and renewals executed during the twelve months ended December 31, 2011 that are not considered TDRs (dollars in thousands):

	Number of Loans	Outstanding Recorded Balance
Commercial and industrial	584	\$ 88,196
Commercial real estate	436	129,002
Consumer	112	4,626
	1,132	\$ 221,824

MACATAWA BANK CORPORATION
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 December 31, 2011 and 2010

NOTE 3 – LOANS (Continued)

The table below presents by class, information regarding troubled debt restructured loans which had payment defaults during the twelve month period ended December 31, 2011 (dollars in thousands). Included are loans that became delinquent more than 90 days past due or transferred to nonaccrual within 12 months of restructuring.

	Number of Loans	Outstanding Recorded Balance
Commercial and industrial	5	\$ 871
Commercial real estate	11	2,806
Consumer	2	402
	18	\$ 4,079

Credit Quality Indicators: The Company categorizes loans into risk categories based on relevant information about the ability of the borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information and current economic trends, among other factors. The Company analyzes commercial loans individually and classifies these relationships by credit risk grading. The Company uses an eight point grading system, with grades 5 through 8 being considered classified, or watch, credits. All commercial loans are assigned a grade at origination, at each renewal or any amendment. When a credit is first downgraded to a watch credit (either through renewal, amendment, lender identification or the loan review process), an Administrative Loan Review (“ALR”) is generated by credit and the lender. All watch credits have an ALR completed monthly which analyzes the collateral position and cash flow of the borrower and its guarantors. The lender is required to complete both a short term and long term plan to rehabilitate or exit the credit and to give monthly comments on the progress to these plans. Management meets quarterly with lenders to discuss each of these credits in detail and to help formulate solutions where progress has stalled. When necessary, the loan officer proposes changes to the assigned loan grade as part of the ALR. Additionally, Loan Review reviews all loan grades upon origination, renewal or amendment and again as loans are selected through the loan review process. The credit will stay on the ALR until either its grade has improved to a 4 or the credit relationship is at a zero balance. The Company uses the following definitions for the risk grades:

1. Excellent - Borrowings supported by extremely strong financial condition or secured by the Bank’s own deposits. Minimal risk to the Bank and the probability of serious rapid financial deterioration is extremely small.
2. Above Average - Borrowings supported by sound financial statements that indicate the ability to repay or borrowings secured (and margined properly) with marketable securities. Nominal risk to the Bank and probability of serious financial deterioration is highly unlikely. The overall quality of these credits is very high.
3. Good Quality - Average borrowings supported by satisfactory asset quality and liquidity, good debt capacity coverage, and good management in all critical positions. Loans are secured by acceptable collateral with adequate margins. There is a slight risk of deterioration if adverse market conditions prevail.
4. Acceptable Risk - This is an acceptable risk to the Bank, which may be slightly below average quality. The borrower has limited financial strength with considerable leverage. There is some probability of deterioration if adverse market conditions prevail. These credits should be monitored closely by the Relationship Manager.
5. Marginally Acceptable - Loans are of marginal quality with above normal risk to the Bank. The borrower shows acceptable asset quality but very little liquidity with high leverage. There is inconsistent earning performance without the ability to sustain adverse market conditions. The primary source of repayment is questionable, but the secondary source of repayment still remains an option. Very close attention by the Relationship Manager and management is needed.

MACATAWA BANK CORPORATION
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 December 31, 2011 and 2010

NOTE 3 – LOANS (Continued)

6. Substandard- Loans are inadequately protected by the net worth and paying capacity of the borrower or the collateral pledged. The primary and secondary sources of repayment are questionable. Heavy debt condition may be evident and volume and earnings deterioration may be underway. It is possible that the Bank will sustain some loss if the deficiencies are not immediately addressed and corrected.

7. Doubtful- Borrowings supported by weak or no financial statements, as well as the ability to repay the entire loan, are questionable. Loans in this category are normally characterized less than adequate collateral, insolvent, or extremely weak financial condition. A loan classified doubtful has all the weaknesses inherent in one classified substandard with the added characteristic that the weaknesses makes collection or liquidation in full highly questionable. The possibility of loss is extremely high, however, activity may be underway to minimize the loss or maximize the recovery.

8. Loss - Loan are considered uncollectible and of little or no value as a bank asset.

As of December 31, 2011, the risk grade category of loans by class of loans is as follows (dollars in thousands):

	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>	<u>6</u>	<u>7</u>	<u>8</u>

NOTE 3 – LOANS (Continued)

Loans rated a 6 or worse per the Company's internal risk rating system are considered substandard, doubtful or loss. Loans classified as substandard or worse were as follows at year-end (dollars in thousands):

	2011	2010
Not classified as impaired	\$ 29,687	\$ 65,533
Classified as impaired	53,363	78,434
Total loans classified substandard or worse	\$ 83,050	\$ 143,967

The Company considers the performance of the loan portfolio and its impact on the allowance for loan losses. For consumer loan classes, the Company also evaluates credit quality based on the aging status of the loan, which was previously presented, and by payment activity. The following tables present the recorded investment in consumer loans based on payment activity as of December 31, 2011 and 2010 (dollars in thousands):

	Residential Mortgage	Consumer Unsecured	Home Equity	Consumer Other
December 31, 2011				
Performing	\$ 155,374	\$ 1,952	\$ 100,576	\$ 15,738
Nonperforming	1,517	---	498	2
Total	\$ 156,891	\$ 1,952	\$ 101,074	\$ 15,740
December 31, 2010				
Performing	\$ 133,738	\$ 2,867	\$ 124,939	\$ 19,358
Nonperforming	1,489	---	927	10
Total	\$ 135,227	\$ 2,867	\$ 125,866	\$ 19,368

NOTE 4 – OTHER REAL ESTATE OWNED

Year-end other real estate owned was as follows (dollars in thousands):

	2011	2010
Beginning balance	\$ 68,388	\$ 41,987
Additions, transfers from loans	38,358	45,248
Proceeds from sales of other real estate owned	(21,540)	(16,003)
Valuation allowance reversal upon sale	(3,058)	(2,677)
Gain (loss) on sale of other real estate owned	1,515	(167)
	83,663	68,388
Less: valuation allowance	(17,225)	(10,404)
Ending balance	\$ 66,438	\$ 57,984

Activity in the valuation allowance was as follows:

	2011	2010
Beginning balance	\$ 10,404	\$ 4,804
Additions charged to expense	9,879	8,277
Reversals upon sale	(3,058)	(2,677)
Ending balance	\$ 17,225	\$ 10,404

NOTE 5 – FAIR VALUE

Fair value is the exchange price that would be received for an asset or paid to transfer a liability (exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The three levels of inputs that may be used to measure fair value include:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a reporting entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

Securities: The fair values of investment securities are determined by matrix pricing, which is a mathematical technique widely used in the industry to value debt securities without relying exclusively on quoted prices for the specific securities. The pricing service utilizes evaluated pricing models that vary based on asset class and include available trade, bid, and other market information. The methodology used includes broker quotes, proprietary modes, vast descriptive terms and conditions databases as well as extensive quality control programs (Level 2 inputs).

Loans Held for Sale: The fair value of loans held for sale is based upon binding quotes from 3^d party investors (Level 2 inputs).

Impaired Loans: The fair value of impaired loans with specific fair value based allocations of the allowance for loan losses is generally based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value.

Other Real Estate Owned: Nonrecurring adjustments to certain commercial and residential real estate properties classified as other real estate owned (OREO) are measured at the lower of carrying amount or fair value, less costs to sell. Fair values are generally based on third party appraisals of the property, resulting in a Level 3 classification. In cases where the carrying amount exceeds the fair value, less costs to sell, an impairment loss is recognized.

Assets measured at fair value on a recurring basis are summarized below (in thousands):

	Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
December 31, 2011				
US Treasury and federal agency securities	\$ 31,499	\$ ---	\$ 31,499	\$ ---
Tax-exempt state and municipal bonds	4,408	---	4,408	---
Taxable state and municipal bonds	16,716	---	16,716	---
Corporate bonds	1,081	---	1,081	---

NOTE 5 – FAIR VALUE (Continued)

Assets measured at fair value on a non-recurring basis are summarized below (in thousands):

	Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
December 31, 2011				
Impaired loans	\$ 22,525	\$ ---	\$ ---	\$ 22,525
Other real estate owned	39,730	---	---	39,730
December 31, 2010				
Impaired loans	\$ 37,173	\$ ---	\$ ---	\$ 37,173
Other real estate owned	32,262	---	---	32,262

The following represent impairment charges recognized during the period:

Impaired loans which are measured for impairment using the fair value of the collateral had a carrying amount of \$22.5 million net of a valuation allowance of \$6.8 million at December 31, 2011, resulting in an additional provision for loan losses of approximately \$3.3 million for the year. Impaired loans which are measured for impairment using the fair value of the collateral had a carrying amount of \$37.2 million net of a valuation allowance of \$5.6 million at December 31, 2010, resulting in an additional provision for loan losses of approximately \$409,000 for the year.

Other real estate owned measured using the fair value of collateral, had a carrying amount of \$39.7 million net of a valuation allowance of \$17.2 million at December 31, 2011 resulting in write-downs of approximately \$9.9 million for the year ending December 31, 2011. Other real estate owned measured using the fair value of collateral, had a carrying amount of \$32.3 million net of a valuation allowance of \$10.4 million at December 31, 2010 resulting in write-downs of approximately \$8.3 million for the year ending December 31, 2010.

Carrying amount and estimated fair value of financial instruments, not previously presented, were as follows at year-end (dollars in thousands).

	2011		2010	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial assets				
Cash and cash equivalents	\$ 243,042	\$ 243,042	\$ 236,127	\$ 236,127

Off-balance sheet credit-related items				
Loan commitments	---	---	---	---

MACATAWA BANK CORPORATION
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 December 31, 2011 and 2010

NOTE 5 – FAIR VALUE (Continued)

The methods and assumptions used to estimate fair value are described as follows.

Carrying amount is the estimated fair value for cash and cash equivalents, short-term borrowings, accrued interest receivable and payable, demand deposits, and variable rate loans or deposits that reprice frequently and fully. Security fair values are determined by matrix pricing, which is a mathematical technique widely used in the industry to value debt securities as discussed above. For fixed rate loans or deposits and for variable rate loans or deposits with infrequent repricing or repricing limits, fair value is based on discounted cash flows using current market rates applied to the estimated life and credit risk (including consideration of widening credit spreads). Fair value of debt is based on current rates for similar financing. It was not practicable to determine the fair value of FHLB stock due to restrictions placed on its transferability. The fair value of off-balance-sheet credit-related items is not significant.

NOTE 6 - PREMISES AND EQUIPMENT - NET

Year-end premises and equipment were as follows (dollars in thousands):

	2011	2010
Land	\$ 18,236	\$ 18,236
Building	42,378	42,368
Leasehold improvements	779	826
Furniture and equipment	18,986	21,309
Construction in progress	547	199
	80,926	82,938
Less accumulated depreciation	(25,568)	(25,950)
	\$ 55,358	\$ 56,988

Depreciation expense was \$2,661,000 and \$2,971,000 for 2011 and 2010.

During the fourth quarter of 2010, the Bank sold a property it held for future branch expansion in downtown Grand Rapids for \$2.2 million, recognizing a gain of \$574,000.

The Bank leases certain office and branch premises and equipment under operating lease agreements. Total rental expense for all operating leases aggregated to \$481,000 and \$473,000 for 2011 and 2010. Future minimum rental expense under noncancelable operating leases as of December 31, 2011 is as follows (dollars in thousands):

2012	\$ 303
2013	34
2014	9
Thereafter	17
	\$ 363

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2011 and 2010

NOTE 7 - DEPOSITS

Deposits at year-end were as follows (dollars in thousands):

	<u>2011</u>	<u>2010</u>
Noninterest bearing demand	\$ 324,253	\$ 255,897
Interest bearing demand	204,402	216,827
Savings and money market accounts	381,498	355,657
Certificates of deposit	305,136	448,239
	<u>\$ 1,215,289</u>	<u>\$ 1,276,620</u>

The following table depicts the maturity distribution of certificates of deposit at December 31, 2011 (dollars in thousands):

2012	\$ 225,757
2013	39,187
2014	2,767
2015	27,231
2016	10,194
After	---
	<u>\$ 305,136</u>

Approximately \$106,304,000 and \$192,657,000 in certificates of deposit were in denominations of \$100,000 or more at December 31, 2011 and 2010, respectively. Brokered deposits totaled approximately \$48,172,000 at December 31, 2010, all of which matured and were paid off during 2011. Since the Bank was not categorized as "well capitalized" at December 31, 2011 and 2010, regulatory waiver is required to accept, renew or rollover brokered deposits. The Bank has not issued brokered deposits since November of 2008. At December 31, 2010, brokered deposits had interest rates ranging from 3.75% to 4.55%.

MACATAWA BANK CORPORATION
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 December 31, 2011 and 2010

NOTE 8 - OTHER BORROWED FUNDS

Other borrowed funds include advances from the Federal Home Loan Bank, securities sold under agreements to repurchase and borrowings from the Federal Reserve Bank.

Federal Home Loan Bank Advances

At year-end, advances from the Federal Home Loan Bank were as follows (dollars in thousands):

Principal Terms	Advance Amount	Range of Maturities	Weighted Average Interest Rate
December 31, 2011			
Single maturity fixed rate advances	\$ 135,000	March 2012 to September 2016	1.79%
Amortizable mortgage advances	13,603	March 2018 to July 2018	3.77%
	<u>\$ 148,603</u>		

Principal Terms	Advance Amount	Range of Maturities	Weighted Average Interest Rate
December 31, 2010			
Single maturity fixed rate advances	\$ 170,000	March 2011 to November 2015	1.95%
Amortizable mortgage advances	15,336	March 2018 to July 2018	3.77%
	<u>\$ 185,336</u>		

Each advance is subject to a prepayment penalty if paid prior to its maturity date. Fixed rate advances are payable at maturity. Amortizable mortgage advances are fixed rate advances with scheduled repayments based upon amortization to maturity. These advances were collateralized by residential and commercial real estate loans totaling \$389,833,000 and \$482,717,000 under a specific loan collateral arrangement at December 31, 2011 and 2010.

During the third quarter of 2011, the Bank modified the terms of six of its existing FHLB advances (totaling \$60.0 million) having the effect of extending the weighted average maturity from 1.49 years to 4.76 years and decreasing the weighted average interest rate from 1.93% to 1.72%. As the modification did not result in the terms being substantially different (as defined in ASC 470-50-40-10), the transaction is accounted for as a modification, not extinguishment of debt. Accordingly, the prepayment fees incurred are amortized as an adjustment of the yield over the remaining life of each advance.

Scheduled repayments of FHLB advances as of December 31, 2011 were as follows (in thousands):

2012	\$ 36,781
2013	1,831
2014	21,884
2015	21,938
2016	61,996
Thereafter	4,173
	<u>\$ 148,603</u>

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2011 and 2010

NOTE 8 - OTHER BORROWED FUNDS (Continued)

Federal Reserve Bank borrowings

The Company has a financing arrangement with the Federal Reserve Bank. There were no borrowings outstanding at December 31, 2011 and 2010, and the Company had approximately \$39.5 million and \$46.2 million in unused borrowing capacity based on commercial and mortgage loans pledged to the Federal Reserve Bank totaling \$55.9 million and \$62.6 million at December 31, 2011 and 2010, respectively.

NOTE 9 – LONG-TERM DEBT

The Company has issued \$40.0 million of pooled trust preferred securities ("Preferred Securities") through its wholly-owned subsidiary grantor trusts. Macatawa Statutory Trust I issued \$619,000 of common securities to the Company and \$20.0 million of Preferred Securities on July 15, 2003 at a floating interest rate of three-month LIBOR plus 3.05%. Macatawa Statutory Trust II issued \$619,000 of common securities and \$20.0 million of Preferred Securities on March 18, 2004 at a floating interest rate of three-month LIBOR plus 2.75%.

The Company issued subordinated debentures ("Debentures") to each trust in exchange for ownership of all of the common securities of each trust and the \$41,238,000 in proceeds of the offerings, which Debentures represent the sole asset of each trust. The Preferred Securities represent an interest in the Company's Debentures, which have terms that are similar to the Preferred Securities. The Company is not considered the primary beneficiary of each trust (variable interest entity), therefore each trust is not consolidated in the Company's financial statements, but rather the Debentures are shown as a liability.

As provided in each trust's indenture, the Preferred Securities accrue and pay distributions quarterly at a specified rate and are subject to mandatory redemption upon the maturity of the Debentures, 30 years from the date of issuance, or upon earlier redemption. The Company has the right to redeem the Debentures in whole or in part beginning five years from the date of issuance at a redemption price specified in each trust's indenture. The Debentures are also redeemable in whole or in part from time to time, upon the occurrence of specific events defined within the trust indenture.

The Company has the option to defer interest payments on the Debentures from time to time for up to twenty consecutive quarterly payments, although interest continues to accrue on the outstanding balance. On December 4, 2009, the Board of Directors of the Company resolved that the Company will exercise its right to defer interest payments on the Debentures for each trust for twenty consecutive quarterly periods or until such earlier time as is determined by further action of the Board of Directors. The Company is not in default with respect to each trust's indenture and the deferral of interest does not constitute an event of default under the indentures. Upon expiration of the deferral, all accrued and unpaid interest is due and payable. During the deferral period, the Company may not declare or pay any dividends on the Company's common stock or preferred stock or make any payment on any outstanding debt obligations that rank equally with or junior to the Debentures. Accrued and unpaid interest that was included in accrued expenses and other liabilities totaled approximately \$3.1 million and \$1.7 million at December 31, 2011 and 2010, respectively.

At December 31, 2011 and 2010, the Debentures totaling \$41,238,000 are reported in liabilities as long-term debt, and the common securities of \$1,238,000 and unamortized debt issuance costs are included in other assets. The Preferred Securities may be included in Tier I capital (with certain limitations applicable) under current regulatory guidelines and interpretations. At December 31, 2011, approximately \$31.3 million of Preferred Securities issued qualified as Tier 1 capital for regulatory capital purposes. At December 31, 2010, approximately \$22.4 million of Preferred Securities issued qualified as Tier 1 capital for regulatory capital purposes.

December 31, 2011 and 2010

NOTE 10 - RELATED PARTY TRANSACTIONS

Loans to principal officers, directors, and their affiliates were as follows (dollars in thousands).

	<u>2011</u>	<u>2010</u>
Beginning balance	\$ 868	\$ 7,092
New loans and renewals	3,937	2,470
Repayments and renewals	(3,535)	(3,043)
Effect of changes in related parties	100	(5,651)
Ending balance	<u>\$ 1,370</u>	<u>\$ 868</u>

Deposits from principal officers, directors, and their affiliates at December 31, 2011 and 2010 were \$149.4 million and \$145.7 million, respectively. The majority of the deposit balances for each year are associated with institutional accounts of affiliated organizations of one of the Company's directors.

NOTE 11 - STOCK-BASED COMPENSATION

The Company has stock-based compensation plans for its employees (the Employees' Plans) and directors (the Directors' Plans). The Employees' Plans permit the grant of stock options or the issuance of restricted stock for up to 1,917,210 shares of common stock. The Directors' Plans permit the grant of stock options or the issuance of restricted stock for up to 473,278 shares of common stock. There were 573,733 shares under the Employees' Plans and 165,375 shares under the Directors' Plans available for future issuance as of December 31, 2011. The Company issues new shares under its stock-based compensation plans from its authorized but unissued shares.

Stock Options

Option awards are granted with an exercise price equal to the market price at the date of grant. Option awards have vesting periods ranging from one to three years and have ten year contractual terms.

The fair value of each option award is estimated on the date of grant using a closed form option valuation (Black-Scholes) model. Expected volatilities are based on historical volatilities of the Company's common stock. The Company uses historical data to estimate option exercise and post-vesting termination behavior. The expected term of options granted is based on historical data and represents the period of time that options granted are expected to be outstanding, which takes into account that the options are not transferable. The Company expects that all options granted will vest and become exercisable. The risk-free interest rate for the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of the grant.

There were no options granted during 2011 and 2010.

MACATAWA BANK CORPORATION
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 December 31, 2011 and 2010

NOTE 11 - STOCK-BASED COMPENSATION (Continued)

A summary of option activity in the plans is as follows (dollars in thousands, except per option data):

Options	Number Outstanding	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Life in Years	Aggregate Intrinsic Value
Outstanding at January 1, 2011	722,564	\$ 15.02		
Forfeited	(72,769)	15.70		
Expired	(15,368)	8.07		
Outstanding at December 31, 2011	<u>634,427</u>	<u>\$ 15.11</u>	<u>2.98</u>	<u>\$ ---</u>
Exercisable at December 31, 2011	<u>634,427</u>	<u>\$ 15.11</u>	<u>2.98</u>	<u>\$ ---</u>

Information related to stock options during each year follows (dollars in thousands):

	2011	2010
Intrinsic value of options exercised	\$ ---	\$ ---
Cash received from option exercises	---	---
Tax benefit realized from option exercises	---	---

There was no compensation cost for stock options in 2011 and \$36,000 in compensation cost for stock options (with no tax benefit), representing less than \$0.01 per share for 2010.

As of December 31, 2011, there was no unrecognized compensation cost related to nonvested stock options granted under the Company's stock-based compensation plans.

Restricted Stock Awards

Stock awards have vesting periods of up to four years. A summary of changes in the Company's nonvested stock awards for the year follows:

Nonvested Stock Awards	Shares	Weighted- Average Grant-Date Fair Value
Outstanding at January 1, 2011	37,125	\$ 5.23
Vested	(36,124)	5.30
Forfeited	(1,001)	2.68
Outstanding at December 31, 2011	<u>---</u>	<u>\$ ---</u>

Compensation cost related to stock awards totaled \$66,000 and \$102,000 for 2011 and 2010, respectively.

As of December 31, 2011, there was no remaining unrecognized compensation cost related to nonvested shares granted under the Company's stock-based compensation plans. The total fair value of shares vested was \$192,000 and \$145,000 during 2011 and 2010, respectively.

MACATAWA BANK CORPORATION
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 December 31, 2011 and 2010

NOTE 12 – EMPLOYEE BENEFITS

The Company sponsors a 401(k) plan which covers substantially all employees. Employees may elect to contribute to the plan up to the maximum percentage of compensation and dollar amount subject to statutory limitations. Prior to 2010, the Company made matching contributions equal to 100% of the first 3% of employee contributions and 50% of employee contributions in excess of 3%, up to 6%. Effective January 1, 2010, the Company temporarily suspended the matching contribution.

The Company sponsors an Employee Stock Purchase Plan which covers substantially all employees. Employees are allowed to direct the Company to withhold payroll dollars and purchase Company stock at market price on a payroll by payroll basis. The Company has reserved 210,000 shares of common stock to be issued under the plan. The plan allows for shares to be issued directly from the Company or purchased on the open market.

NOTE 13 – EARNINGS PER COMMON SHARE

A reconciliation of the numerators and denominators of basic and diluted earnings per common share are as follows (dollars in thousands except per share data):

	2011	2010
Net income (loss)	\$ 5,829	\$ (17,854)
Dividends declared on preferred shares	---	---
Net income (loss) available to common shares	<u>\$ 5,829</u>	<u>\$ (17,854)</u>
Weighted average shares outstanding, including participating stock awards – Basic	22,739,990	17,686,362
Dilutive potential common shares:		
Stock options	---	---
Conversion of preferred stock	---	---
Stock warrants	---	---
Weighted average shares outstanding – Diluted	<u>22,739,990</u>	<u>17,686,362</u>
Basic earnings (loss) per common share	\$.26	\$ (1.01)
Diluted earnings (loss) per common share (1)	.26	(1.01)

- (1) For any period in which a loss is recorded, the assumed exercise of stock options would have an anti-dilutive impact on loss per share and thus are ignored in the diluted per share calculation.

Stock options for 634,427 and 722,564 shares of common stock were not considered in computing diluted earnings per common share for 2011 and 2010, respectively, because they were antidilutive. Potential common shares associated with the convertible preferred stock were excluded from dilutive potential common shares for 2011 and 2010 as they were antidilutive. Potential common shares associated with stock warrants issued in 2009 were excluded from dilutive potential common shares for 2011 and 2010 as they were antidilutive.

NOTE 14 - FEDERAL INCOME TAXES

Income tax expense (benefit) was as follows (dollars in thousands):

	2011	2010
Current	\$ (198)	\$ (7)
Deferred (benefit) expense	198	1,310
Change in valuation allowance	---	---
	<u>\$ ---</u>	<u>\$ 1,303</u>

MACATAWA BANK CORPORATION
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 December 31, 2011 and 2010

NOTE 14 - FEDERAL INCOME TAXES (Continued)

The difference between the financial statement tax expense (benefit) and amount computed by applying the statutory federal tax rate to pretax income was reconciled as follows (dollars in thousands):

	2011	2010
Statutory rate	35%	35%
Statutory rate applied to income (loss) before taxes	\$ 2,040	\$ (5,793)
Add (deduct)		
Change in valuation allowance	(1,624)	7,629
Tax-exempt interest income	(10)	(246)
Bank-owned life insurance	(330)	(217)
Other, net	(76)	(70)
	\$ ---	\$ 1,303

The realization of deferred tax assets (net of a recorded valuation allowance) is largely dependent upon future taxable income, future reversals of existing taxable temporary differences and the ability to carryback losses to available tax years. In assessing the need for a valuation allowance, we consider all positive and negative evidence, including taxable income in carry-back years, scheduled reversals of deferred tax liabilities, expected future taxable income and tax planning strategies.

We established an \$18.0 million valuation allowance on deferred tax assets in 2009 based primarily on the Company's net operating loss for 2009 and 2008. As a result of losses incurred in 2010, the Company increased the valuation allowance to \$25.6 million at December 31, 2010. At December 31, 2011, a valuation allowance of \$24.0 million was maintained as the Company continued to face a challenging economic environment currently confronting banks that could negatively impact future operating results. The valuation allowance may be reversed to income in future periods to the extent that the related deferred tax assets are realized or when the Company returns to consistent, sustained profitability.

The net deferred tax asset recorded included the following amounts of deferred tax assets and liabilities (dollars in thousands):

	2011	2010
Deferred tax asset		
Allowance for loan losses	\$ 11,074	\$ 16,599
Nonaccrual loan interest	839	548
Valuation allowance on other real estate owned	6,029	3,641
Net operating loss carryforward	7,673	6,656
Other	1,137	975
Gross deferred tax assets	26,752	28,419
Valuation allowance	(24,026)	(25,649)
Total net deferred tax assets	2,726	2,770
Deferred tax liabilities		
Depreciation	(1,758)	(1,984)
Purchase accounting adjustments	(22)	(113)
Unrealized gain on securities available for sale	(204)	(6)
Prepaid expenses	(407)	(347)
Other	(335)	(320)
Gross deferred tax liabilities	(2,726)	(2,770)
Net deferred tax asset	\$ ---	\$ ---

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2011 and 2010

NOTE 14 - FEDERAL INCOME TAXES (Continued)

At December 31, 2011, we had federal net operating loss carryforwards of \$21.9 million that expire in 2030.

There were no unrecognized tax benefits at December 31, 2011 or 2010 and the Company does not expect the total amount of unrecognized tax benefits to significantly increase or decrease in the next twelve months. The Company is no longer subject to examination by the Internal Revenue Service for years before 2008.

NOTE 15 - COMMITMENTS AND OFF-BALANCE-SHEET RISK

Some financial instruments are used to meet customer financing needs and to reduce exposure to interest rate changes. These financial instruments include commitments to extend credit and standby letters of credit. These involve, to varying degrees, credit and interest rate risk in excess of the amount reported in the financial statements.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the commitment, and generally have fixed expiration dates. Standby letters of credit are conditional commitments to guarantee a customer's performance to a third party. Exposure to credit loss if the other party does not perform is represented by the contractual amount for commitments to extend credit and standby letters of credit. Collateral or other security is normally not obtained for these financial instruments prior to their use, and many of the commitments are expected to expire without being used.

A summary of the contractual amounts of financial instruments with off-balance-sheet risk was as follows at year-end (dollars in thousands):

	2011	2010
Commitments to make loans	\$ 60,890	\$ 50,377
Letters of credit	3,245	4,873
Unused lines of credit	230,674	242,448

The notional amount of commitments to fund mortgage loans to be sold into the secondary market was approximately \$13.2 million and \$12.1 million at December 31, 2011 and 2010, respectively.

At year-end 2011, approximately 22% of the Bank's commitments to make loans were at fixed rates, offered at current market rates. The remainder of the commitments to make loans was at variable rates tied to prime and generally expire within 30 days. The majority of the unused lines of credit were at variable rates tied to prime.

NOTE 16 – CONTINGENCIES

The Company and its subsidiaries periodically become defendants in certain claims and legal actions arising in the ordinary course of business.

As of the date hereof, there were no material pending legal proceedings to which we or any of our subsidiaries are a party of or which any of our properties are the subject.

MACATAWA BANK CORPORATION
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 December 31, 2011 and 2010

NOTE 17 - SHAREHOLDERS' EQUITY

Regulatory Capital

The Company and the Bank are subject to regulatory capital requirements administered by federal banking agencies. Capital adequacy guidelines and prompt corrective action regulations involve quantitative measures of assets, liabilities, and certain off-balance-sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators about components, risk weightings, and other factors, and the regulators can lower classifications in certain cases. Failure to meet various capital requirements would result in regulatory action that could have a direct material effect on the financial statements.

The prompt corrective action regulations provide five classifications, including well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized, although these terms are not used to represent overall financial condition. If the Bank is only adequately capitalized, regulatory approval is required to accept brokered deposits; and if the Bank is undercapitalized, capital distributions are limited, as is asset growth and expansion, and plans for capital restoration are required.

Actual capital levels (dollars in thousands) and minimum required levels were as follows at year-end:

	Actual		Minimum Required For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Regulations		Minimum Required Under Consent Order	
	Amount	Ratio	Amount	Ratio	Amount	Ratio	Amount	Ratio
December 31, 2011								
Total capital (to risk weighted assets)								
Consolidated	\$ 149,905	13.2%	\$ 91,201	8.0%	N/A	N/A	N/AA	N/A
Bank	142,059	12.5	91,193	8.0	\$ 113,991	10.0%	\$ 125,390	11.0%
Tier 1 capital (to risk weighted assets)								
Consolidated	125,028	11.0	45,601	4.0	N/A	N/A	N/A	N/A
Bank	127,576	11.2	45,596	4.0	68,394	6.0	N/A	N/A
Tier 1 capital (to average assets)								
Consolidated	125,028	8.3	60,598	4.0	N/A	N/A	N/A	N/A
Bank	127,576	8.4	60,528	4.0	75,660	5.0	121,056	8.0
December 31, 2010								
Total capital (to risk weighted assets)								
Consolidated	\$ 125,483	9.7%	\$ 104,013	8.0%	N/A	N/A	N/AA	N/A
Bank	125,797	9.7	103,970	8.0	\$ 129,963	10.0%	142,960	11.0%
Tier 1 capital (to risk weighted assets)								
Consolidated	89,585	6.9	52,007	4.0	N/A	N/A	N/A	N/A
Bank	109,160	8.4	51,985	4.0	77,978	6.0	N/A	N/A
Tier 1 capital (to average assets)								
Consolidated	89,585	5.8	61,605	4.0	N/A	N/A	N/A	N/A
Bank	109,160	7.1	61,520	4.0	76,901	5.0	123,041	8.0

Approximately \$31.3 million and \$22.4 million of trust preferred securities outstanding at December 31, 2011 and 2010, respectively, qualified as Tier 1 capital for regulatory capital purposes.

The Bank was categorized as "adequately capitalized" at December 31, 2011 and 2010. The Bank's total regulatory capital was \$28.1 million above the level required to be categorized as "well capitalized" at December 31, 2011. However, because the Bank was subject to the Consent Order, the Bank could not be categorized as "well capitalized" regardless of actual capital levels. On March 2, 2012, the Bank's regulators terminated the Consent Order. Had the Consent Order been terminated as of December 31, 2011, the Bank would have been categorized as "well capitalized." We expect the Bank to be categorized as "well capitalized" as of March 31, 2012. In connection with the termination of the Consent Order, the Bank reached an understanding with its regulators to maintain a Tier 1 Leverage Capital Ratio of at least 8%, which the Bank exceeded at December 31, 2011.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2011 and 2010

NOTE 17 - SHAREHOLDERS' EQUITY (Continued)

As part of the Consent Order, the Bank was required to have and maintain a Tier 1 Leverage Capital Ratio of at least 8% and a Total Risk Based Capital Ratio of at least 11%. With the successful capital raise in 2011 along with positive earnings and asset shrinkage in 2011, at December 31, 2011, the Bank exceeded these capital ratios. The Bank's Tier 1 capital exceeded the Consent Order requirement by \$6.5 million and exceeded the total risk based requirement by \$16.7 million at December 31, 2011.

The Consent Order also prohibited the Bank from declaring or paying any cash dividend without the prior written consent of its regulators. In connection with the termination of the Consent Order, the Bank reached an understanding with its regulators to obtain prior written consent of its regulators before the Bank declares or pays any dividends. The payment of future cash dividends by the Company is largely dependent upon dividends received from the Bank out of its earnings. Under Michigan law, the Bank is also restricted from paying dividends to the Company until its deficit retained earnings has been restored. The Bank had a retained deficit of approximately \$31.7 million at December 31, 2011.

Additional information about the termination of the Consent Order and the Bank's understanding with its regulators may be found in Note 1 under the heading "Regulatory Developments."

Issuance of Capital

A summary of the capital instruments issued to accredited investors during recent years is as follows:

Convertible Preferred Stock

In 2008, the Company completed a private offering of 31,290 shares of 12.0% Series A Non-cumulative Convertible Perpetual Preferred Stock (Series A Preferred Stock) with a liquidation preference of \$1,000 per share, resulting in an aggregate liquidation preference of \$31.3 million. Proceeds of \$30.6 million from issuance were net of \$686,000 of costs.

Each share of the Series A Preferred Stock is non-voting and may be convertible at any time, at the option of the holder, into 111.73 shares of common stock of the Company, which represents an approximate initial conversion price of \$8.95 per share of common stock. On or after the third anniversary of the issue date, at the option of the Company, the Series A Preferred Stock will be subject to mandatory conversion into common stock at the prevailing conversion rate, if the closing price of the Company's common stock exceeds 130% of the then applicable conversion price for 20 trading days during any 30 consecutive trading day period and the Company has paid full dividends on the Series A Preferred Stock for four consecutive quarters. The conversion rate and conversion price will be subject to adjustments in certain circumstances.

In 2009, the Company issued 2,600 shares of 9.0% Series B Non-cumulative Convertible Perpetual Preferred Stock (Series B Preferred Stock) with a liquidation preference of \$1,000 per share, resulting in an aggregate liquidation preference of \$2.6 million. Proceeds of \$2.6 million from issuance were net of \$40,000 of costs.

Each share of the Series B Preferred Stock is non-voting and may be convertible at any time, at the option of the holder, into 166.67 shares of common stock of the Company, which represents an approximate initial conversion price of \$6.00 per share of common stock. On or after the third anniversary of the issue date, at the option of the Company, the Series B Preferred Stock will be subject to mandatory conversion into common stock at the prevailing conversion rate, if the closing price of the Company's common stock exceeds 120% of the then applicable conversion price for 20 trading days during any 30 consecutive trading day period and the Company has paid full dividends on the Series B Preferred Stock for four consecutive quarters. The conversion rate and conversion price will be subject to adjustments in certain circumstances. The Series B Preferred Stock is subordinate to the Series A Preferred Stock. If all of the outstanding shares of the Series A and Series B Preferred Stock were converted into common stock, the shares of Series A and Series B Preferred Stock would convert into a total of approximately 3.9 million shares of common stock at December 31, 2011.

On December 4, 2009, the Board of Directors of the Company resolved that it will not declare or pay any cash dividends on the Series A or Series B Preferred Stock until further action by the Board of Directors. During the period that the Company does not declare and pay cash dividends on its Series A or Series B Preferred Stock, it may not declare or pay any cash dividends on the Company's common stock.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2011 and 2010

NOTE 17 - SHAREHOLDERS' EQUITY (Continued)

Both the Series A and Series B Preferred Stock qualified as Tier I capital for the Company.

Subordinated Notes

In 2009, the Company received proceeds of \$1,650,000 from the issuance of unsecured subordinated debt. The subordinated debt was in the form of 11% subordinated notes due 2017 and redeemable three years after issued. The subordinated notes are not convertible into common stock or preferred stock.

In order to temporarily replenish the Company's liquidity pending the Company's planned public offering of common stock, on April 21, 2011, the Company issued and sold a 2% Subordinated Note due 2018 in the aggregate principal amount of \$1,000,000 to a director of the Company. The note had a maturity date of April 30, 2018. The note holder had a continuing right to convert the note in full into common stock with the stock to be valued at book value and the note to be valued at principal and interest accrued. On June 29, 2011, the director executed his right to convert the 2% Subordinated Note into 491,830 shares of common stock.

Common Stock

In 2009, the Company issued 538,386 shares of common stock to accredited investors as part of the private offering. The shares were issued at an average price of \$3.06 per share resulting in total proceeds of \$1.7 million.

On June 7, 2011, the Company closed on a rights offering to existing shareholders, issuing 4,456,186 shares of common stock for \$2.30 per share. On June 29, 2011, the Company closed on its public offering, issuing 4,456,186 shares of common stock for \$2.30 per share. As indicated above, on June 29, 2011, the director discussed above executed his right to convert the 2% Subordinated Note into 491,830 shares of common stock. The net proceeds from the offerings and subordinated note conversion were \$20.3 million. The Company contributed \$10.0 million to the Bank on June 30, 2011 and held the remaining proceeds at the holding company.

Warrants

As previously disclosed, in 2009 the Company and Macatawa Bank entered into a Settlement and Release and Stock and Warrant Issuance Agreement in connection with legal proceedings related to Trade Partners, Inc. In connection with the Settlement, the Company issued warrants to purchase a total of 1,478,811 shares of common stock at an exercise price of \$9.00 per share. The fair value of the warrants issued was \$806,000 and was recorded in Common Stock based upon \$0.54 per warrant as determined using a Black-Scholes model.

First quarter	\$ 20,938	\$ 13,028	\$ 19,710	\$ (21,140)	\$ (1.19)	\$ (1.19)
Second quarter	19,537	12,818	1,800	1,748	.10	.10
Third quarter	18,444	12,437	550	703	.04	.04
Fourth quarter	17,084	12,284	400	835	.05	.05

(1) Net income for the second quarter of 2010 includes a \$2.7 million gain on sale of investment securities.

Net income for the fourth quarter of 2010 includes a \$574,000 gain on the sale of a property owned by the Bank.

ITEM 9: Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.

None.

ITEM 9A: Controls and Procedures.

(a) Evaluation of Disclosure Controls and Procedures.

Under the supervision of and with the participation of our management, including our Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”), we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934 (Exchange Act), as of December 31, 2011. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, as the Company’s are designed to do, and management necessarily was required to apply its judgment in evaluating whether the benefits of the controls and procedures that the Company adopts outweigh their costs. Our management, including our CEO and CFO, after evaluating the effectiveness of the Company’s disclosure controls and procedures, have concluded that, as of December 31, 2011, the Company’s disclosure controls and procedures were effective to ensure that information required to be disclosed by us in the reports that we file under the Exchange Act is recorded, processed, summarized and reported within time periods specified in the Commission’s rules and forms.

(b) Changes in Internal Controls.

There were no significant changes in the Company’s internal controls over financial reporting during the quarter ended December 31, 2011 that have materially affected, or are reasonably likely to materially affect, the Company’s internal control over financial reporting.

(c) Management’s Report on Internal Control over Financial Reporting.

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting. The Company’s internal control system was designed by, or under the supervision of, our CEO and CFO and effected by our Board of Directors, management and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements and related notes for external purposes in accordance with generally accepted accounting principles in the United States of America.

An internal control system, no matter how well designed, has inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable, not absolute, assurance that the control system’s objectives have been met. The inherent limitations include the realities that judgments in decision-making can be deficient and breakdowns can occur because of simple errors or mistakes.

Company management assessed the effectiveness of the Company’s internal control over financial reporting as of December 31, 2011. In making this assessment, it used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control-Integrated Framework*. Based on this assessment, management concluded that the Company maintained effective internal control over financial reporting as of December 31, 2011 based on those criteria.

BDO USA LLP, an independent registered certified public accounting firm that audited the consolidated financial statements included herein, has issued an attestation report on our internal control over financial reporting as of December 31, 2011, as stated in their report below.

(d) Report of Independent Registered Public Accounting Firm.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Shareholders
Macatawa Bank Corporation
Holland, Michigan

We have audited Macatawa Bank Corporation's internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Macatawa Bank Corporation's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Macatawa Bank Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Macatawa Bank Corporation as of December 31, 2011 and 2010, and the related consolidated statements of income, comprehensive income, changes in shareholders' equity, and cash flows for the years then ended, and our report dated March 7, 2012 expressed an unqualified opinion thereon.

**MACATAWA BANK CORPORATION
2006 STOCK COMPENSATION PLAN**

**ARTICLE 1
ESTABLISHMENT AND PURPOSE OF THE PLAN**

1.1 **Establishment of the Plan.** MACATAWA BANK CORPORATION, a Michigan corporation (the “Company”), hereby establishes a stock compensation plan to be known as the “Macatawa Bank Corporation 2006 Stock Compensation Plan” (the “Plan”), as set forth in this document. The Plan permits the granting of stock options, restricted stock, and other stock-based awards to employees of the Company and its subsidiaries.

1.2 **Purpose of the Plan.** The purpose of the Plan is to promote the long-term success of the Company for the benefit of the Company’s shareholders, through stock-based compensation, by aligning the personal interests of the Company’s employees with those of its shareholders. The Plan is also designed to allow employees to participate in the Company’s future, as well as to enable the Company to attract, retain and award such employees. Compensation related to Awards under the Plan is generally intended to qualify as “performance-based compensation” under Section 162(m) of the Internal Revenue Code of 1986, as amended (“Code”).

1.3 **Term of Plan.** No Awards shall be granted pursuant to the Plan on or after the tenth anniversary of the Effective Date (“Termination Date”), provided that Awards granted prior to the Termination Date may extend beyond that date.

**ARTICLE 2
DEFINITIONS**

For purposes of this Plan, the following terms shall have the meanings set forth below:

- 2.1 **Award** means any award under this Plan of any Options, Restricted Stock, Performance Shares or Other Stock-Based Award.
- 2.2 **Award Agreement** means an agreement evidencing the grant of an Award under this Plan. Awards under the Plan shall be evidenced by Award Agreements that set forth the details, conditions and limitations for each Award, as established by the Committee and shall be subject to the terms and conditions of the Plan.
- 2.3 **Award Date** means the date that an Award is made, as specified in an Award Agreement.
- 2.4 **Board** means the Board of Directors of the Company.
- 2.5 **Change in Control** is defined in Article 12.
- 2.6 **Code** means the Internal Revenue Code of 1986, as amended.

- 2.7 **Committee** means the Committee, as specified in Article 3, appointed by the Board to administer the Plan, no members of which shall be eligible to receive an Award pursuant to the Plan.
- 2.8 **Common Stock** means the Common Stock, no par value per share, of the Company.
- 2.9 **Disability** means permanent and total disability as determined under the rules and guidelines established by the Committee for purposes of the Plan.
- 2.10 **Effective Date** means February 16, 2006.
- 2.11 **Employee** means any person employed by the Company or a Subsidiary (including officers and directors who are also employees).
- 2.12 **Fair Market Value** means the closing sale price of the Company's Common Stock for such date on the National Association of Securities Dealers Automated Quotation System or any successor system then in use ("NASDAQ"). If no sale of shares of Common Stock is reflected on NASDAQ on a date, then "Fair Market Value" shall be determined according to the closing sale price on the next preceding day on which there was a sale of shares of Common Stock reflected on NASDAQ. If the Common Stock is not traded on NASDAQ but is traded on another recognized market, then the "Fair Market Value" for such date shall be the closing sale price on that market. If the shares of Common Stock are not actively traded in any recognized market, then the "Fair Market Value" shall be determined by such procedures as may be determined by the Committee.
- 2.13 **Incentive Stock Option or ISO** means an option to purchase shares of Common Stock granted under Article 6, which is designated as an Incentive Stock Option and is intended to meet the requirements of Section 422 of the Code.
- 2.14 **Non-Employee Director** has the meaning set forth in Rule 16b-3(b)(3)(i) or any successor definition adopted by the Securities and Exchange Commission.
- 2.15 **Nonqualified Stock Option or NQSO** means an option to purchase shares of Common Stock, granted under Article 6, which is not an Incentive Stock Option.
- 2.16 **Option** means an Incentive Stock Option or a Nonqualified Stock Option.
- 2.17 **Option Price** means the price at which a share of Common Stock may be purchased by a Participant pursuant to an Option, as determined by the Committee.
- 2.18 **Other Stock-Based Award** means an Award under Article 9 of this Plan that is valued in whole or in part by reference to, or is payable in or otherwise based on, Common Stock.
- 2.19 **Participant** means an Employee of the Company or a Subsidiary who holds an outstanding Award granted under the Plan.
- 2.20 **Permitted Transferee** means (i) the spouse, a child, or a grandchild of a Participant (each an "Immediate Family Member"), (ii) a trust for the exclusive benefit of a Participant and/or one or more Immediate Family Members, or (iii) a partnership or limited liability company whose only partners or members are a Participant and/or one or more Immediate Family Members.

2.21 **Performance Shares** means an Award granted under Article 8 of this Plan evidencing the right to receive Common Stock or cash of an equivalent value at the end of a specified performance period and upon achievement of specified performance goals or objectives.

2.22 **Retirement** means the termination of a Participant's employment with the Company or a Subsidiary after the Participant attains the age and years of service as determined under the rules and guidelines established by the Committee in its discretion for purposes of the Plan.

2.23 **Restricted Stock** means an Award granted to a Participant under Article 7 of this Plan.

2.24 **Rule 16b-3** means Rule 16b-3 promulgated by the Securities and Exchange Commission under the Securities Exchange Act of 1934 (the "Act"), as amended from time to time or any successor rule.

2.25 **Subsidiary** means any corporation in which the Company owns directly, or indirectly through subsidiaries, at least fifty percent (50%) of the total combined voting power of all classes of stock, or any other entity (including, but not limited to, partnerships and joint ventures) in which the Company owns at least fifty percent (50%) of the combined equity thereof.

2.26 **Termination of Employment** means the termination of a Participant's employment with the Company or a Subsidiary. A Participant employed by a Subsidiary shall also be deemed to incur a Termination of Employment if the Subsidiary ceases to be a Subsidiary and the Participant does not immediately thereafter become an Employee of the Company or another Subsidiary.

ARTICLE 3 ADMINISTRATION

3.1 **The Committee.** The Plan shall be administered by a Committee designated by the Board consisting of not less than three (3) directors who shall be appointed from time to time by the Board, each of whom shall qualify as a Non-Employee Director. Initially, the Committee shall consist of all directors of the Company who are Non-Employee Directors.

3.2 **Committee Authority.** Subject to the Company's Articles of Incorporation, Bylaws and the provisions of this Plan, the Committee shall have full authority to grant Awards to employees of the Company or a Subsidiary. Awards may be granted singly, in combination, or in tandem. The authority of the Committee shall include the following:

- (a) To select the employees of the Company or a Subsidiary to whom Awards may be granted under the Plan;
- (b) To determine whether and to what extent Options, Restricted Stock, Performance Shares and Other Stock-Based Awards, or any combination thereof are to be granted under the Plan;
- (c) To determine the number of shares of Common Stock to be covered by each Award;
- (d) To determine the terms and conditions of any Award Agreement, including, but not limited to, the Option Price, any vesting restriction or limitation, any vesting schedule or acceleration thereof, or any forfeiture restrictions or waiver thereof, regarding any Award and the shares Common Stock relating thereto, based on such factors as the Committee shall determine in its sole discretion;

- (e) To determine whether, to what extent and under what circumstances grants of Awards are to operate on a tandem basis and/or in conjunction with or apart from other cash compensation arrangement made by Company other than under the terms of this Plan;
- (f) To determine under what circumstances an Award may be settled in cash, Common Stock, or a combination thereof; and
- (g) To determine to what extent and under what circumstances shares of Common Stock and other amounts payable with respect to an Award shall be deferred.

The Committee shall have the authority to adopt, alter and repeal such administrative rules, guidelines and practices governing the Plan as it shall, from time to time, deem advisable, to interpret the terms and provisions of the Plan and any Award issued under the Plan (including any Award Agreement) and to otherwise supervise the administration of the Plan. However, the Committee shall take no action which will impair any Award previously granted under the Plan or cause the Plan or the Award not to meet the requirements of Rule 16b-3. A majority of the Committee shall constitute a quorum, and the acts of a majority of a quorum at any meeting, or acts reduced to or approved in writing by a majority of the members of the Committee, shall be the valid acts of the Committee. The interpretation and construction by the Committee of any provisions of the Plan or any Award granted under the Plan shall be final and binding upon the Company, the Board and Participants, including their respective heirs, executors and assigns. No member of the Board or the Committee shall be liable for any action or determination made in good faith with respect to the Plan or an Award granted hereunder.

ARTICLE 4 COMMON STOCK SUBJECT TO THE PLAN

Subject to adjustment as provided in Section 12.1, the maximum aggregate number of shares of Common Stock which may be issued under this Plan shall not exceed 500,000 shares, which may be either unauthorized and unissued Common Stock or issued Common Stock reacquired by the Company ("Plan Shares").

Determinations as to the number of Plan Shares that remain available for issuance under the Plan shall be made in accordance with such rules and procedures as the Committee shall determine from time to time, which shall be consistent with the requirements of Rule 16b-3 and such interpretations thereof. If an Award expires unexercised or is forfeited, canceled, terminated or settled in cash in lieu of Common Stock, the shares of Common Stock that were theretofore subject (or potentially subject) to such Award may again be made subject to an Award Agreement; provided, however, that any such shares subject to a forfeited or canceled Award shall not again be made subject to an Award Agreement to any Participant who received, directly or indirectly, any of the benefits of ownership of the securities underlying such Award, excluding the right to vote such shares.

**ARTICLE 5
ELIGIBILITY**

The persons who shall be eligible to receive Awards under the Plan shall be such Employees as the Committee shall select from time to time. In making such selections, the Committee shall consider such factors as the Committee in its discretion shall deem relevant. Participants may hold more than one Award, but only on the terms and subject to the restrictions set forth in the Plan and their respective Award Agreements.

**ARTICLE 6
STOCK OPTIONS**

6.1 Options. Options may be granted alone or in addition to other Awards granted under this Plan. Each Option granted under this Plan shall be either an Incentive Stock Option ("ISO") or a Nonqualified Stock Option ("NQSO").

6.2 Grants. The Committee shall have the authority to grant to any Participant one or more Incentive Stock Options, Nonqualified Stock Options, or both types of Options. To the extent that any Option does not qualify as an Incentive Stock Option (whether because of its provisions or the time or manner of its exercise or otherwise), such Option or the portion thereof which does not qualify shall constitute a separate Nonqualified Stock Option.

6.3 Incentive Stock Options. Anything in the Plan to the contrary notwithstanding, no term of this Plan relating to Incentive Stock Options shall be interpreted, amended or altered, nor shall any discretion or authority granted under the Plan be so exercised, so as to disqualify the Plan under Section 422 of the Code, or, without the consent of the Participants affected, to disqualify any Incentive Stock Option under such Section 422. An Incentive Stock Option shall not be granted to an individual who, on the date of grant, owns stock possessing more than ten percent (10%) of the total combined voting power of all classes of stock of the Company. The aggregate Fair Market Value, determined on the Award Date of the shares of Common Stock with respect to which one or more Incentive Stock Options (or other incentive stock options within the meaning of Section 422 of the Code, under all other option plans of the Company) granted on or after January 1, 1987, that are exercisable for the first time by a Participant during any calendar year shall not exceed the \$100,000 limitation imposed by Section 422(d) of the Code. Notwithstanding any provision of this Plan providing for an extended period to exercise Options following a termination of employment, an Option will be taxed as an Incentive Stock Option only if it is exercised within the Incentive Stock Option time periods stated in the tax Code (within three months after termination of employment, unless the individual is disabled, in which case the three month period is extended to one year).

6.4 Terms of Options. Options granted under the Plan shall be evidenced by Award Agreements in such form as the Committee shall, from time to time approve, which Agreement shall comply with and be subject to the following terms and conditions:

(a) Option Price. The Option Price per share of Common Stock purchasable under an Option shall be determined by the Committee at the time of grant but shall be not less than one hundred percent (100%) of the Fair Market Value of the Common Stock at the Award Date.

(b) Option Term. The term of each Option shall be fixed by the Committee, but no Option shall be exercisable more than ten (10) years after the date the Option is granted.

(c) Exercisability. Except as provided in Section 12.2, no Option shall be exercisable in either in whole or in part prior to the first anniversary of the Award Date. Thereafter, an Option shall be exercisable at such time or times and subject to such terms and conditions as shall be determined by the Committee and set forth in the Award Agreement. If the Committee provides that any Option is exercisable only in installments, the Committee may at any time waive such installment exercise provisions, in whole or in part, based on such factors as the Committee may determine.

(d) Method of Exercise. Subject to whatever installment exercise and waiting period provisions apply under subsection (c) above, Options may be exercised in whole or in part at any time during the term of the Option, by giving written notice of exercise to the Company specifying the number of shares to be purchased. Such notice shall be accompanied by payment in full of the purchase price in such form as the Committee may accept. Notwithstanding the foregoing, an Option shall not be exercisable with respect to less than 100 shares of Common Stock unless the remaining shares covered by an Option are fewer than 100 shares. If and to the extent determined by the Committee in its sole discretion at or after grant, payment in full or in part may also be made in the form of Common Stock owned for at least six months by the Participant (and for which the Participant has good title free and clear of any liens and encumbrances) or Restricted Stock. No shares of stock shall be issued until payment has been made. A Participant shall generally have the rights to dividends or other rights of a shareholder with respect to shares subject to the Option when the optionee has given written notice of exercise, has paid for such shares as provided herein, and, if requested, has given the representation described in Section 13.1 of the Plan. Notwithstanding the foregoing, if payment in full or in part has been made in the form of Restricted Stock, an equivalent number of shares of Common Stock issued on exercise of the Option shall be subject to the same restrictions and conditions, and during the remainder of the Restriction Period (as defined in Section 7.3(a)), applicable to the shares of Restricted Stock surrendered therefor.

(e) Nontransferability of Options. No Option may be sold, transferred, pledged, assigned, or otherwise alienated or hypothecated, other than by will or by the laws of descent and distribution, provided, however, a Nonqualified Stock Option may be transferred, without consideration, to a Permitted Transferee if the Participant satisfies such conditions to the transfer as may be required by the Committee. A Permitted Transferee shall succeed to all rights and benefits (except any right to further transfer of the Option) and be subject to all obligations and limitations applicable to the original Participant. However, such rights and benefits (except any right to further transfer of the Option), and obligations and limitations shall be determined as if the original Participant continued to hold the Option, whereby provisions of this Plan dealing with termination of employment, retirement, disability or death of a Participant will continue to refer to the original Participant regardless of whether a Nonqualified Stock Option has been transferred to a Permitted Transferee. The Company shall have no obligation to notify a Permitted Transferee of the termination of employment, retirement, disability, or death of a Participant. Further, all Options shall be exercisable, during the Participant's lifetime, only by such Participant, or, in the case of a Nonqualified Stock Option, by a Participant or a Permitted Transferee, as the case may be. The designation of a person entitled to exercise an Option after a person's death will not be deemed a transfer.

(f) Termination of Employment for Reasons other than Retirement, Disability, or Death Upon Termination of Employment for any reason other than Retirement or on account of Disability or death, each Option held by the Participant shall, to the extent rights to purchase shares under such Option have accrued at the date of such Termination of Employment and shall not have been fully exercised, be exercisable, in whole or in part, at any time within a period of three (3) months following Termination of Employment, subject, however, to prior expiration of the term of such Options and any other limitations on the exercise of such Options in effect at the date of exercise.

(g) Termination of Employment for Retirement or Disability. Upon Termination of Employment by reason of Retirement or Disability, each Option held by such Participant shall, to the extent rights to purchase shares under the Option have accrued at the date of such Retirement or Disability and shall not have been fully exercised, remain exercisable in whole or in part, for a period of three (3) years following such Termination of Employment, subject, however, to prior expiration according to its terms and other limitations imposed by the Plan. If the Participant dies after such Retirement or Disability, the Participant's Options shall be exercisable in accordance with Section 6.4(h) below.

(h) Termination of Employment for Death. Upon Termination of Employment due to death, each Option held by such Participant shall, to the extent rights to purchase shares under the Options have accrued at the date of death and shall not have been fully exercised, be exercisable, in whole or in part, by the personal representative of the Participant's estate or by any person or persons who shall have acquired the Option directly from the Participant by bequest or inheritance only under the following circumstances and during the following periods: (i) if the Participant dies while employed by the Company or a Subsidiary, at any time within three (3) years after his death, or (ii) if the Participant dies during the extended exercise period following Termination of Employment specified in Section 6.4(g), at any time within the longer of such extended period or one (1) year after death, subject, however, in any case, to the prior expiration of the term of the Option and any other limitation on the exercise of such Option in effect at the date of exercise.

(i) Termination of Options. Any Option that is not exercised within whichever of the exercise periods specified in Sections 6.4(f), (g) or (h) is applicable shall terminate upon expiration of such exercise period.

(j) Purchase and Settlement Provisions. The Committee may at any time offer to purchase an Option previously granted, based on such terms and conditions as the Committee shall establish and communicate to the Participant at the time that such offer is made.

ARTICLE 7 RESTRICTED STOCK

7.1 Awards of Restricted Stock. Shares of Restricted Stock may be issued either alone or in addition to other Awards granted under the Plan. The Committee shall determine the eligible persons to whom, and the time or times at which, grants of Restricted Stock will be made, the number of shares to be awarded, the price (if any) to be paid by the Participant, the time or times within which such Awards may be subject to forfeiture, the vesting schedule and rights to acceleration thereof, and all other terms and conditions of the Awards. The Committee may condition the grant of Restricted Stock upon the achievement of specific business objectives, measurements of individual or business unit or Company performances, or such other factors as the Committee may determine. The provisions of Restricted Stock awards need not be the same with respect to each Participant, and such Awards to individual Participants need not be the same in subsequent years.

7.2 Awards and Certificates. A prospective Participant selected to receive a Restricted Stock Award shall not have any rights with respect to such Award, unless and until such Participant has executed an Award Agreement evidencing the Award and has delivered a fully executed copy thereof to the Company, and has otherwise complied with the applicable terms and conditions of such Award. Further, such Award shall be subject to the following conditions:

(a) Acceptance. Awards of Restricted Stock must be accepted within a period of 20 days (or such shorter period as the Committee may specify at grant) after the Award Date, by executing an Award Agreement and by paying whatever price (if any) the Committee has designated for such shares of Restricted Stock.

(b) Legend. The Committee in its discretion may elect to have shares of Restricted Stock issued in book-entry form with an appropriate notation referencing any applicable restrictions. Alternatively, the Committee may in its discretion determine that a Participant receiving a Restricted Stock Award be issued a stock certificate in respect of such shares of Restricted Stock. Any such stock certificates shall be registered in the name of such Participant, and shall bear an appropriate legend referring to the terms, conditions, and restrictions applicable to such Award, substantially in the following form:

“The transferability of this certificate and the shares of stock represented hereby are subject to the terms and conditions (including forfeiture) of the Macatawa Bank Corporation 2006 Stock Compensation Plan and related Award Agreement entered into between the registered owner and the Company, dated _____ . Copies of such Plan and Agreement are on file in the offices of the Company, 10753 Macatawa Drive, Holland, Michigan 49424.”

(c) Custody. The Committee may require that the stock certificates evidencing such shares be held in custody by the Company until the restrictions thereon shall have lapsed, and that, as a condition of any award of Restricted Stock, the Participant shall have delivered a duly signed stock power, endorsed in blank, relating to the Common Stock covered by such Award.

7.3 Restrictions and Conditions. The shares of Restricted Stock awarded pursuant to this Plan shall be subject to the following restrictions and conditions:

(a) Restriction Period. Subject to the provisions of this Plan and the Award Agreement, during a period set by the Committee (the “Restriction Period”), the Participant shall not be permitted to sell, transfer, pledge, or assign shares of Restricted Stock awarded under this Plan. Subject to these limits, the Committee, in its sole discretion, may provide for the lapse of such restrictions in installments and may accelerate or waive such restrictions in whole or in part, based on service, performance and/or such other factors or criteria as the Committee may determine.

(b) Rights as Shareholder. Except as provided in this subsection (b) and subsection (a) above, the Participant shall have, with respect to the shares of Restricted Stock, all of the rights of a holder of shares of Common Stock of the Company including the right to receive any dividends. The Committee, in its sole discretion, as determined at the time of Award, may permit or require the payment of dividends to be deferred. If any dividends or other distributions are paid in shares of Common Stock, such shares shall be subject to the same restrictions on transferability and forfeitability as the shares of Restricted Stock with respect to which they were paid.

(c) Termination of Employment. Subject to the applicable provisions of the Award Agreement and this Article 7, upon Termination of Employment for any reason during the Restriction Period, all Restricted Shares still subject to restriction will vest or be forfeited in accordance with the terms and conditions established by the Committee as specified in the Award Agreement.

(d) Lapse of Restrictions. If and when the Restriction Period expires without a prior forfeiture of the Restricted Stock, the certificates for such shares shall be delivered to the Participant.

ARTICLE 8 PERFORMANCE SHARES

8.1 Award of Performance Shares. Performance Shares may be awarded either alone or in addition to other Awards granted under this Plan. The Committee shall determine the eligible persons to whom and the time or times at which Performance Shares shall be awarded, the number of Performance Shares to be awarded to any person, the duration of the period (the "Performance Period") during which, and the conditions under which, receipt of the Performance Shares will be deferred, and the other terms and conditions of the Award in addition to those set forth in Section 8.2, as specified in the Award Agreement. The Committee may condition the grant of Performance Shares upon the achievement of specific business objectives, measurements of individual or business unit or Company performance, or such other factors or criteria as the Committee shall determine. The provisions of the award of Performance Shares need not be the same with respect to each Participant, and such Awards to individual Participants need not be the same in subsequent years.

8.2 Terms and Conditions. Performance Shares awarded pursuant to this Article 8 shall be subject to the following terms and conditions:

(a) Nontransferability. Subject to the provisions of this Plan and the related Award Agreement, Performance Shares may not be sold, assigned, transferred, pledged or otherwise encumbered during the Performance Period. At the expiration of the Performance Period, share certificates or cash of an equivalent value (as the Committee may determine in its sole discretion) shall be delivered to the Participant, or his legal representative, in a number equal to the shares covered by the Award Agreement.

(b) Dividends. Unless otherwise determined by the Committee at the time of Award, amounts equal to any cash dividends declared during the Performance Period with respect to the number of shares of Common Stock covered by a Performance Share Award will not be paid to the Participant.

(c) Termination of Employment. Subject to the provisions of the Award Agreement and this Article 8, upon Termination of Employment for any reason during the Performance Period for a given Award, the Performance Shares in question will vest or be forfeited in accordance with the terms and conditions established by the Committee at or after grant.

(d) Accelerated Vesting. Based on service, performance and/or such other factors or criteria as the Committee may determine and set forth in the Award Agreement, the Committee may, at or after grant, accelerate the vesting of all or any part of any award of Performance Shares and/or waive the deferral limitations for all or any part of such Award.

ARTICLE 9
OTHER STOCK-BASED AWARDS

9.1 Other Awards. Other Awards of Common Stock and other Awards that are valued in whole or in part by reference to, or are payable in or otherwise based on, Common Stock (“Other Stock-Based Awards”), may be granted either alone or in addition to or in tandem with Options, Restricted Stock or Performance Shares. Subject to the provisions of this Plan, the Committee shall have authority to determine the persons to whom and the time or times at which such Awards shall be made, the number of shares of Common Stock to be awarded pursuant to such awards, and all other conditions of the Awards. The Committee may also provide for the grant of Common Stock under such Awards upon the completion of a specified performance period. The provisions of Other Stock-Based Awards need not be the same with respect to each Participant and such Awards to individual Participants need not be the same in subsequent years.

9.2 Terms and Conditions. Other Stock-Based Awards made pursuant to this Article 9 shall be set forth in an Award Agreement and shall be subject to the following terms and conditions:

- (a) Nontransferability. Subject to the provisions of this Plan and the Award Agreement, shares of Common Stock subject to Awards made under this Article 9 may not be sold, assigned, transferred, pledged, or otherwise encumbered prior to the date on which the shares are issued, or, if later, the date on which any applicable restriction, performance or deferral period lapses.
- (b) Dividends. Unless otherwise determined by the Committee at the time of Award, subject to the provisions of this Plan and the Award Agreement, the recipient of an Award under this Article 9 shall be entitled to receive, currently or on a deferred stock basis, dividends or other distributions with respect to the number of shares of Common Stock covered by the Award.
- (c) Vesting. Any Award under this Article 9 and any Common Stock covered by any such Award shall vest or be forfeited to the extent so provided in the Award Agreement, as determined by the Committee, in its sole discretion.
- (d) Waiver of Limitation. In the event of the Participant’s Retirement, Disability or death, or in cases of special circumstances, the Committee may, in its sole discretion, waive in whole or in part any or all of the limitations imposed hereunder (if any) with respect to any or all of an Award under this Article 9.
- (e) Price. Common Stock issued or sold under this Article 9 may be issued or sold for no cash consideration or such consideration as the Committee shall determine and specify in the Award Agreement.

ARTICLE 10
TERMINATION OR AMENDMENT OF THE PLAN

The Board may at any time amend, discontinue or terminate this Plan or any part thereof (including any amendment deemed necessary to ensure that the Company may comply with any applicable regulatory requirement); provided, however, that, unless otherwise required by law, the rights of a Participant with respect to Awards granted prior to such amendment, discontinuance or termination, may not be impaired without the consent of such Participant and, provided further, without the approval of the Company’s shareholders, no amendment may be made which would (i) increase the aggregate number of shares of Common Stock that may be issued under this Plan (except by operation of Section 12.1); (ii) change the definition of Employees eligible to receive Awards under this Plan; (iii) decrease the option price of any Option to less than one hundred percent (100%) of the Fair Market Value on the date of grant for an Option; (iv) extend the maximum option period under Section 6.4(b) of the Plan; or (v) cause the Plan not to comply with either Rule 16b-3, or any successor rule under the Act, or Section 162(m) of the Code. The Committee may amend the terms of any Award theretofore granted, prospectively or retroactively, but, subject to Section 12.2, no such amendment or other action by the Committee shall impair the rights of any Participant without the Participant’s consent. Awards may not be granted under the Plan after the Termination Date, but Awards granted prior to such date shall remain in effect or become exercisable pursuant to their respective terms and the terms of this Plan.

**ARTICLE 11
UNFUNDED PLAN**

This Plan is intended to constitute an “unfunded” plan for incentive and deferred compensation. With respect to any payment not yet made to a Participant by the Company, nothing contained herein shall give any such Participant any rights that are greater than those of a general creditor of the Company.

**ARTICLE 12
ADJUSTMENT PROVISIONS**

12.1 Antidilution. Subject to the provisions of this Article 12, if the outstanding shares of Common Stock are increased, decreased, or exchanged for a different number or kind of shares or other securities, or if additional shares or new or different shares or other securities are distributed with respect to such shares of Common Stock or other securities, through merger, consolidation, sale of all or substantially all of the assets of the Company, reorganization, recapitalization, reclassification, stock dividend, stock split, reverse stock split or other distribution with respect to such shares of Common Stock or other securities, an appropriate and proportionate adjustment may be made in (i) the maximum number and kind of shares provided in Article 4 of the Plan, (ii) the number and kind of shares or other securities subject to the then outstanding Awards, and (iii) the price for each share or other unit of any other securities subject to the then outstanding Awards.

12.2 Change in Control. Notwithstanding Section 12.1, upon the occurrence of a Change in Control, all Awards then outstanding under the Plan will be fully vested and exercisable and all restrictions will immediately cease, unless, in the case of a transaction described in clause (iii) or (iv) in the following definition of Change in Control, provisions are made in connection with such transaction for the continuance of the Plan and the assumption of or the substitution for such Awards of new Awards covering the stock of a successor employer corporation, or a parent or subsidiary thereof, with appropriate adjustments as to the number and kind of shares and prices. As used in this Plan, “Change in Control” shall mean a change in control of the Company of a nature that would be required to be reported in response to Item 6(e) of Schedule 14A of Regulation 14A promulgated under the Act; provided that, for purposes of this Plan, a Change in Control shall be deemed to have occurred if: (i) any Person (other than the Company) is or becomes the “beneficial owner” (as defined in Rule 13d-3 under the Act), directly or indirectly, of securities of the Company which represent 20% or more of the combined voting power of the Company’s then outstanding securities; (ii) during any period of two (2) consecutive years, individuals who at the beginning of such period constitute the Board cease for any reason to constitute at least a majority thereof, unless the election, or the nomination for election, by the Company’s stockholders, of each new director is approved by a vote of at least two-thirds (2/3) of the directors then still in office who were directors at the beginning of the period but excluding any individual whose initial assumption of office occurs as a result of either an actual or threatened election contest (as such term is used in Rule 14a-11 of Regulation 14A promulgated under the Act) or other actual or threatened solicitation of proxies or consents by or on behalf of a person other than the Board; (iii) there is consummated any consolidation or merger of the Company in which the Company is not the continuing or surviving corporation or pursuant to which shares of Common Stock are converted into cash, securities or other property, other than a merger of the Company in which the holders of Common Stock immediately prior to the merger have the same proportionate ownership of common stock of the surviving corporation immediately after the merger; (iv) there is consummated any consolidation or merger of the Company in which the Company is the continuing or surviving corporation in which the holders of Common Stock immediately prior to the merger do not own at least fifty percent (50%), or such greater percentage as shall be set in any agreement with any Participant, or more of the stock of the surviving corporation immediately after the merger; (v) there is consummated any sale, lease, exchange or other transfer (in one transaction or a series of related transactions) of all, or substantially all, of the assets of the Company; or (vi) the stockholders of the Company approve any plan or proposal for the liquidation or dissolution of the Company.

12.3 Adjustments by Committee. Any adjustments pursuant to this Article 12 will be made by the Committee, whose determination as to what adjustments will be made and the extent thereof will be final, binding, and conclusive. No fractional interest will be issued under the Plan on account of any such adjustments. Only cash payments will be made in lieu of fractional shares.

ARTICLE 13

GENERAL PROVISIONS

13.1 Legend. The Committee may require each person purchasing shares pursuant to an Award under the Plan to represent to and agree with the Company in writing that the Participant is acquiring the shares without a view to distribution thereof. In addition to any legend required by this Plan, the certificates for such shares may include any legend which the Committee deems appropriate to reflect any restrictions on transfer.

All certificates for shares of Common Stock delivered under the Plan shall be subject to such stock transfer orders and other restrictions as the Committee may deem advisable under the rules, regulations and other requirements of the Securities and Exchange Commission, any stock exchange upon which the Stock is then listed, any applicable Federal or state securities law, and any applicable corporate law, and the Committee may cause a legend or legends to be put on any such certificates to make appropriate reference to such restrictions.

13.2 No Right to Employment. Neither this Plan nor the grant of any Award hereunder shall give any Participant or other Employee any right with respect to continuance of employment by the Company or any Subsidiary, nor shall there be a limitation in any way on the right of the Company or any Subsidiary by which an Employee is employed to terminate his or her employment at any time.

13.3 Withholding of Taxes. The Company shall have the right to deduct from any payment to be made pursuant to this Plan, or to otherwise require, prior to the issuance or delivery of any shares of Common Stock or the payment of any cash hereunder, payment by the Participant of, any Federal, state or local taxes required by law to be withheld. Unless otherwise prohibited by the Committee, each Participant may satisfy any such withholding tax obligation by any of the following means or by a combination of such means: (a) tendering a cash payment; (b) authorizing the Company to withhold from the shares otherwise issuable to the Participant a number of shares having a Fair Market Value as of the "Tax Date", less than or equal to the amount of the withholding tax obligation; or (c) delivering to the Company unencumbered shares owned by the Participant having a Fair Market Value, as of the Tax Date, less than or equal to the amount of the withholding tax obligation. The "Tax Date" shall be the date that the amount of tax to be withheld is determined.

13.4 No Assignment of Benefits. No Option, Award or other benefit payable under this Plan shall, except as otherwise specifically provided in this Plan or as otherwise specifically provided by law, be subject in any manner to anticipation, alienation, attachment, sale, transfer, assignment, pledge, encumbrance or charge, and any attempt to anticipate, alienate, attach, sell, transfer, assign, pledge, encumber or charge, any such benefits shall be void, and any such benefit shall not in any manner be liable for or subject to the debts, contracts, liabilities, engagements or torts of any person who shall be entitled to such benefit, nor shall it be subject to attachment or legal process for or against such person.

13.5 Governing Law. This Plan and actions taken in connection herewith shall be governed and construed in accordance with the laws and in the courts of the state of Michigan.

13.6 Application of Funds. The proceeds received by the Company from the sale of shares of Common Stock pursuant to Awards granted under this Plan will be used for general corporate purposes.

13.7 Rights as a Shareholder. Except as otherwise provided in an Award Agreement, a Participant shall have no rights as a shareholder of the Company until he or she becomes the holder of record of Common Stock.

ARTICLE 14 SHAREHOLDER APPROVAL

The Plan shall be submitted to the Company's shareholders for approval.

MACATAWA BANK CORPORATION
2006 DIRECTORS' STOCK COMPENSATION PLAN

Section 1. Establishment and Purpose.

Macatawa Bank Corporation hereby establishes a Stock Compensation Plan to be named the Macatawa Bank Corporation 2006 Directors' Stock Compensation Plan, for certain persons serving as a director of the Company and/or its Subsidiaries. The purpose of the Plan is: (i) to provide a non-cash method of compensating directors of the Company and its Subsidiaries; and (ii) to aid the Company and its Subsidiaries in competing with other enterprises for the services of new directors needed to help ensure the Company's continued success.

Section 2. Definitions.

- (a) **Act** means the Securities Exchange Act of 1934, as amended from time to time.
- (b) **Board** means the Board of Directors of the Company.
- (c) **Committee** means a committee appointed by the Board of Directors to administer the Plan as specified in Section 3.
- (d) **Company** means Macatawa Bank Corporation, a corporation organized and existing under the laws of the State of Michigan.
- (e) **Eligible Director** means a person who is a director of the Company or of a Subsidiary.
- (f) **Effective Date** means February 16, 2006.
- (g) **Fair Market Value** means the closing sale price of the Company's Stock for such date on the National Association of Securities Dealers Automated Quotation System or any successor system then in use ("NASDAQ"). If no sale of shares of Stock is reflected on NASDAQ on a date, then "Fair Market Value" shall be determined according to the closing sale price on the next preceding day on which there was a sale of shares of Stock reflected on NASDAQ. If the Stock is not traded on NASDAQ but is traded on another recognized market, then the "Fair Market Value" for such date shall be the closing sale price on that market. If the shares of Stock are not actively traded in any recognized market, then the "Fair Market Value" shall be determined by such procedures as may be determined by the Committee.
- (h) **Grant Date** means, with respect to each Option and Restricted Stock award, the day that an Eligible Director is granted the Option or Restricted Stock award.
- (i) **Non-employee Director** has the meaning set forth in Rule 16b-3(b)(3)(i) or any successor definition adopted by the Securities and Exchange Commission
- (j) **Option** means an option granted under this Plan to acquire Stock.
- (k) **Optionee** means the person to whom an Option is granted.

- (l) **Option Agreement** means an Agreement issued to each Eligible Director with respect to each Option.
- (m) **Permitted Transferee** means either (i) the spouse, a child, or a grandchild of an Optionee (each an “Immediate Family Member”), (ii) a trust for the exclusive benefit of an Optionee and/or one or more Immediate Family Members, or (iii) a partnership or limited liability company whose only partners or members are an Optionee and/or one or more Immediate Family Members.
- (n) **Plan** means the Macatawa Bank Corporation 2006 Directors’ Stock Compensation Plan.
- (o) **Post-Death Representative(s)** means the executor(s) or administrator(s) of the Optionee’s estate or the person or persons to whom the Optionee’s rights under his or her Option pass by Optionee’s will or the laws of descent and distribution.
- (p) **Restricted Stock** means an award granted to an Eligible Director under Section 9 of this Plan.
- (q) **Rule 16b-3** means Rule 16b-3 promulgated by the Securities and Exchange Commission under the Act, as amended from time to time or any successor rule.
- (r) **Shares** means shares of Stock.
- (s) **Stock** means authorized and unissued shares of common stock, no par value, of the Company and includes Shares which may be reacquired by the Company.
- (t) **Subsidiary** means any banking corporation in which the Company owns directly, or indirectly through subsidiaries, at least fifty percent (50%) of the total combined voting power of all classes of stock, or any other entity (including, but not limited to, partnerships and joint ventures) in which the Company owns at least fifty percent (50%) of the combined equity thereof.

Section 3. Administration.

The Plan shall be administered by a Committee designated by the Board consisting of not less than three (3) directors who shall be appointed from time to time by the Board, each of whom shall qualify as a Non-Employee Director. Initially, the Committee shall consist of all directors of the Company who are Non-Employee Directors.

Subject to the Company’s Articles of Incorporation, Bylaws and the provisions of this Plan, the Committee shall have full authority to grant Options to Eligible Directors. The authority of the Committee shall include the following: (a) To select the Eligible Directors to whom Options may be granted under the Plan; (b) To determine whether and to what extent Options are to be granted under the Plan; (c) To determine the number of shares of Common Stock to be covered by each Option; and (d) To determine the terms and conditions of any Option Agreement, including, but not limited to, the Option Price, any vesting restriction or limitation, any vesting schedule or acceleration thereof, or any forfeiture restrictions or waiver thereof, regarding any Option and the Shares relating thereto, based on such factors as the Committee shall determine in its sole discretion.

The Committee shall have the authority to adopt, alter and repeal such administrative rules, guidelines and practices governing the Plan as it shall, from time to time, deem advisable, to interpret the terms and provisions of the Plan and any Option issued under the Plan (including any Option Agreement) and to otherwise supervise the administration of the Plan. However, the Committee shall take no action which will impair any Option previously granted under the Plan or cause the Plan or the Option not to meet the requirements of Rule 16b-3. A majority of the Committee shall constitute a quorum, and the acts of a majority of a quorum at any meeting, or acts reduced to or approved in writing by a majority of the members of the Committee, shall be the valid acts of the Committee. The interpretation and construction by the Committee of any provisions of the Plan or any Option granted under the Plan shall be final and binding upon the Company, the Board and Optionees, including their respective heirs, executors and assigns. No member of the Board or the Committee shall be liable for any action or determination made in good faith with respect to the Plan or an Option granted hereunder.

Section 4. Shares Reserved Under the Plan.

Subject to adjustment as provided in Section 11, the maximum aggregate number of Shares which may be issued under this Plan shall not exceed 100,000 shares, which may be either unauthorized and unissued Common Stock or issued Shares or issued Shares reacquired by the Company ("Plan Shares").

Determinations as to the number of Plan Shares that remain available for issuance under the Plan shall be made in accordance with such rules and procedures as the Committee shall determine from time to time, which shall be consistent with the requirements of Rule 16b-3 and such interpretations thereof. If an award expires unexercised or is forfeited, canceled, terminated or settled in cash in lieu of Shares, the shares that were theretofore subject (or potentially subject) to such award may again be made subject to an award agreement; provided, however, that any such shares subject to a forfeited or canceled award shall not again be made subject to an award agreement to any Eligible Director who received, directly or indirectly, any of the benefits of ownership of the securities underlying such award, excluding the right to vote such shares.

Section 5. Granting of Options.

The Committee may from time to time grant Options to such of the Eligible Directors as the Committee may select. In making such selections, the Committee shall consider such factors as the Committee in its discretion shall deem relevant.

Section 6. Terms of Options.

Notwithstanding any other provisions of the Plan, each Option shall be evidenced by an Option Agreement, which shall include the substance of the following terms and conditions:

(a) The option price for each Share covered by an Option shall be an amount equal to one hundred percent (100%) of the Fair Market Value of a Share on the Grant Date of such Option.

(b) The Option by its terms shall not be transferable by the Optionee otherwise than by will or by the laws of descent and distribution; *provided, however*, an Option may be transferred, without consideration, to a Permitted Transferee if the Optionee satisfies such conditions to the transfer as may be required by the Committee. A Permitted Transferee shall succeed to all rights and benefits (except any right to further transfer of the Option) and be subject to all obligations and limitations applicable to the original Optionee. However, such rights and benefits (except any right to further transfer of the Option), and obligations and limitations shall be determined as if the original Optionee continued to hold the Option, whereby provisions of this Plan dealing with termination of service or death of an Optionee will continue to refer to the original Optionee regardless of whether an Option has been transferred to a Permitted Transferee. The Company shall have no obligation to notify a Permitted Transferee of the termination of service or death of an Optionee. The designation of a beneficiary does not constitute a transfer. The Option shall be exercisable, during the Optionee's lifetime, only by the Optionee or a Permitted Transferee, as the case may be.

(c) No Option shall be exercisable in either whole or in part prior to the first anniversary of the Grant Date. Thereafter, an Option shall be exercisable at such time or times and subject to such terms and conditions as shall be determined by the Committee and set forth in the Option Agreement. If the Committee provides that any Option is exercisable only in installments, the Committee may at any time waive such installment exercise provisions, in whole or in part, based on such factors as the Committee may determine.

(d) Options shall not be exercisable after the earlier of (i) the last day of the thirty-sixth month after the month in which the Optionee's service as a director terminates for any reason or (ii) the expiration of ten years from the Grant Date.

Section 7. No Right to Remain a Director.

The grant of an Option shall not create any right in any person to remain as a director of the Company.

Section 8. Exercise of Option.

(a) An Option shall be exercisable only (1) upon payment to the Company on the exercise date of cash in the full amount of the option price of the Shares with respect to which the Option is exercised, (2) upon delivery to the Company on the exercise date of certificates representing unencumbered Shares, owned by the Optionee or the Permitted Transferee, as the case may be, having a Fair Market Value, on the last trading date preceding such exercise and delivery, equal to the full amount of the purchase price of the Shares with respect to which the Option is exercised, or (3) a combination of (1) and (2), except that (i) any portion of the exercise price representing a fraction of a Share shall in any event be paid in cash, and (ii) no Shares which have been held for less than six months may be delivered in payment of the exercise price of an Option.

(b) An Optionee or Permitted Transferee, as the case may be, shall have none of the rights of a shareholder with respect to Shares subject to the Option until Shares are issued to the Optionee or Permitted Transferee upon the exercise of an Option.

Section 9. Restricted Stock.

(a) Awards of Restricted Stock. Shares of Restricted Stock may be issued either alone or in addition to other awards granted under the Plan. The Committee shall determine the Eligible Directors to whom, and the time or times at which, grants of Restricted Stock will be made, the number of shares to be awarded, the price (if any) to be paid by the Eligible Director, the time or times within which such awards may be subject to forfeiture, the vesting schedule and rights to acceleration thereof, and all other terms and conditions of the awards. The Committee may condition the grant of Restricted Stock upon the achievement of specific business objectives, measurements of individual or business unit or Company performances, or such other factors as the Committee may determine. The provisions of Restricted Stock awards need not be the same with respect to each Eligible Director, and such awards to individual Eligible Directors need not be the same in subsequent years.

(b) Awards and Certificates. A prospective Eligible Director selected to receive a Restricted Stock award shall not have any rights with respect to such award, unless and until such Participant has executed a Restricted Stock Agreement evidencing the award and has delivered a fully executed copy thereof to the Company, and has otherwise complied with the applicable terms and conditions of such award. Further, such award shall be subject to the following conditions:

(i) Acceptance. Awards of Restricted Stock must be accepted within a period of 20 days (or such shorter period as the Committee may specify at grant) after the Award Date, by executing a Restricted Stock Agreement and by paying whatever price (if any) the Committee has designated for such shares of Restricted Stock.

(ii) Legend. The Committee in its discretion may elect to have shares of Restricted Stock issued in book-entry form with an appropriate notation referencing any applicable restriction. Alternatively, the Committee may in its discretion determine that an Eligible Director receiving a Restricted Stock award shall be issued a stock certificate in respect of such shares of Restricted Stock. Such certificate shall be registered in the name of such Eligible Director, and shall bear an appropriate legend referring to the terms, conditions, and restrictions applicable to such award, substantially in the following form:

“The transferability of this certificate and the shares of stock represented hereby are subject to the terms and conditions (including forfeiture) of the Macatawa Bank Corporation 2006 Directors’ Stock Compensation Plan and related Restricted Stock Agreement entered into between the registered owner and the Company, dated _____ . Copies of such Plan and Agreement are on file in the offices of the Company, 10753 Macatawa Drive, Holland, Michigan 49424.”

(ii) Custody. The Committee may require that the stock certificates evidencing such shares be held in custody by the Company until the restrictions thereon shall have lapsed, and that, as a condition of any award of Restricted Stock, the Participant shall have delivered a duly signed stock power, endorsed in blank, relating to the Common Stock covered by such award.

(c) Restrictions and Conditions. The shares of Restricted Stock awarded pursuant to this Plan shall be subject to the following restrictions and conditions:

(i) Restriction Period. Subject to the provisions of this Plan and the Award Agreement, during a period set by the Committee (the “Restriction Period”), the Eligible Director shall not be permitted to sell, transfer, pledge, or assign shares of Restricted Stock awarded under this Plan. Subject to these limits, the Committee, in its sole discretion, may provide for the lapse of such restrictions in installments and may accelerate or waive such restrictions in whole or in part, based on service, performance and/or such other factors or criteria as the Committee may determine.

(ii) Rights as Shareholder. Except as provided in this subsection (ii) and subsection (i) above, the Eligible Director shall have, with respect to the shares of Restricted Stock, all of the rights of a holder of shares of Common Stock of the Company including the right to receive any dividends. The Committee, in its sole discretion, as determined at the time of award, may permit or require the payment of dividends to be deferred. If any dividends or other distributions are paid in shares of Common Stock, such shares shall be subject to the same restrictions on transferability and forfeitability as the shares of Restricted Stock with respect to which they were paid.

(iii) Termination of Employment. Subject to the applicable provisions of the Award Agreement and this Section 9, upon termination of service as a director for any reason during the Restriction Period, all Restricted Shares still subject to restriction will vest or be forfeited in accordance with the terms and conditions established by the Committee as specified in the Restricted Stock Agreement.

(iv) Lapse of Restrictions. If and when the Restriction Period expires without a prior forfeiture of the Restricted Stock, the certificates for such shares shall be delivered to the Participant.

Section 10. General Provisions.

The Company shall not be required to issue or deliver any certificate for Shares to an Optionee or Permitted Transferee, as the case may be, upon the exercise of an Option prior to:

(a) If requested by the Company, the filing with the Company by the Optionee, the Permitted Transferee or the Optionee's Post-Death Representative, as the case may be, of a representation in writing that at the time of such exercise it is their then present intention to acquire the Shares being purchased for investment and not for resale, and/or the completion of any registration or other qualification of such Shares under any state or federal laws or rulings or regulations of any governmental regulatory body, which the Company shall determine to be necessary or advisable; and

(b) The obtaining of any other consent, approval, or permit from any state or federal governmental agency which the Committee shall, in the Committee's absolute discretion upon the advice of counsel, determine to be necessary or advisable.

Section 11. Adjustment Provisions.

In the event any stock dividend is declared upon the Stock or in the event outstanding Shares shall be changed into or exchanged for a different number, class or kind of Shares or other securities of the Company or another corporation, whether by reason of a split or combination of shares, recapitalization, reclassification, reorganization, merger, consolidation, or otherwise, the maximum number of Shares which may be charged against the Authority shall be appropriately and proportionately adjusted and in any such event a corresponding adjustment shall be made changing the number, class or kind of Shares or other securities which are deliverable upon the exercise of any Option theretofore granted without change in the total price applicable to the unexercised portion of such Option, but with a corresponding adjustment in the price for each Share or other securities covered by the unexercised portion of such Option. In the event the Company is merged, consolidated, or reorganized with another corporation, appropriate provision shall be made for the continuance of outstanding Options with respect to shares of the succeeding parent corporation following a merger, or with respect to shares of the consolidated or reorganized corporation in the case of a consolidation or reorganization, and to prevent their dilution or enlargement compared to the total shares issuable therein in respect of the Stock. Adjustments under this Section 11 shall be made in an equitable manner by the Committee, whose determination shall be conclusive and binding on all concerned.

Section 12. Duration, Amendment, and Termination.

The Board of Directors may at any time terminate the Plan or make such amendments thereof as it shall deem advisable and in the best interests of the Company, without further action on the part of the Shareholders of the Company; *provided, however*, that no such termination or amendment shall, without the consent of the Optionee or Permitted Transferee, as the case may be, adversely affect or impair the rights of such Optionee or Permitted Transferee, as the case may be, and provided further, that, unless the Shareholders of the Company shall have first approved thereof, no amendment of this Plan shall be made whereby: (a) the total number of Shares which may be granted under the Plan to all individuals shall be increased, except by operation of the adjustment provisions of Section 11 hereof; (b) the term of the Options shall be extended; (c) the minimum option price shall be decreased; or (d) the class of eligible persons to whom Options may be granted shall be changed. The period during which Options may be granted shall terminate on the tenth anniversary of the Effective Date, unless the Plan earlier shall have been terminated as provided above.

Section 13. Date of Granting Options and Restricted Stock.

All Options and Restricted Stock granted under the Plan shall be in writing and shall be granted as of a Grant Date.

Section 14. Shareholder Approval.

The Plan shall be submitted to the Company's shareholders for approval.

Section 15. Miscellaneous.

- (a) Subject to the provisions of applicable federal law, the Plan shall be administered, construed and enforced according to the internal laws of the State of Michigan, excluding its conflict of law rules, and applicable federal law and in courts situated in the State of Michigan.
- (b) Transactions under this Plan are intended to comply with applicable conditions for exemption under Rule 16b-3. To the extent any provision of this Plan or action by the Committee fails to so comply, it shall be deemed null and void, to the extent permitted by law and deemed advisable by the Committee.
- (c) The invalidity of any particular provision herein shall not invalidate all or any part of the remainder of the Plan, but such remainder shall be and remain valid in all respects as fully as the law will permit.

MACATAWA BANK CORPORATION
2006 STOCK COMPENSATION PLAN
STOCK OPTION AGREEMENT
(Nonqualified Stock Option)

This **STOCK OPTION AGREEMENT** is made this {Date}, between **MACATAWA BANK CORPORATION** (the "Company") and **employee name**, an employee of the Company or one of its subsidiaries (the "Employee"), pursuant to the Macatawa Bank Corporation 2006 Stock Compensation Plan (the "Plan"). All capitalized defined terms in this Agreement shall have the meaning ascribed to such terms in the Plan, unless otherwise defined in this Agreement.

IT IS AGREED AS FOLLOWS:

1. **Grant of Option.** Pursuant to the Plan, the Company hereby grants to the Employee the option to purchase [Number of Shares] shares of the Company's common stock, no par value, on the terms and conditions herein set forth (the "Option"). All of the shares covered by this Option shall be considered and hereby are designated as Nonqualified Stock Options.

2. **Purchase Price.** The purchase price of the shares covered by this Option shall be **Price per share** per share. The "Committee" (provided for in Article 3 of the Plan) has determined that such price represents one hundred percent 100% of the fair market value of a share of the Company's common stock on this date.

3. **Term of Option.** The term of this Option shall be for a period of ten (10) years from the date hereof, subject in each case to earlier termination as provided in subsequent paragraphs of this Agreement.

4. **Employee's Agreement.** In consideration of the granting of the Option, the Employee agrees to remain in the employ of the Company for a period of at least thirty six (36) months from the date hereof (the "Minimum Employment Period"). Such employment, subject to the provisions of any written contract between the Company and the Employee, shall be at the pleasure of the Board of Directors, and this Option Agreement shall not impose on the Company any obligation to retain the Employee in its employ for any period. In the event of the termination of employment of the Employee for any reason during the Minimum Employment Period, this Option shall terminate, unless this Option becomes exercisable as provided in Paragraph 9.

5. **Exercise of Option.** Except as provided in paragraph 9, this Option shall not be exercisable prior to the expiration of the Minimum Employment Period. Thereafter, this Option may be exercised in whole or in part, at any time and from time to time. This Option may not be exercised as to less than 100 shares at any one time, unless the number purchased is the total number at that time purchasable under this Option. This Option shall be exercised by written notice to the Company. The notice shall state the number of shares with respect to which the Option is being exercised, shall be signed by the person exercising this Option, and shall be accompanied by payment of the full purchase price of the shares in such form as the Committee may accept. This Option agreement shall be submitted to the Company with the notice for purposes of recording the shares being purchased, if exercised in part, or for purposes of cancellation if all shares subject to this Option are being purchased. In the event the Option shall be exercised pursuant to paragraph 8(c) hereof by any person other than the Employee, such notice shall be accompanied by appropriate proof of the right of such person to exercise the Option. To the extent determined by the Committee in its sole discretion, payment of the purchase price shall be made by: (a) cash, check, bank draft, or money order, payable to the order of the Company; (b) the delivery by the Employee of unencumbered shares of common stock of the Company with a Fair Market Value on the last trading day preceding payment equal to the total purchase price of the shares to be purchased;

(c) a combination of (a) and (b), except that no shares of stock which have been held for less than six months may be delivered in payment of the exercise price. Upon exercise of all or a portion of this Option, the Company shall issue to the Employee a stock certificate representing the number of shares with respect to which this Option was exercised.

6. **Tax Withholding.** The exercise of this Option is subject to the satisfaction of withholding tax or other withholding liabilities, if any, under federal, state and local laws in connection with such exercise or the delivery or purchase of shares pursuant hereto. The exercise of this Option shall not be effective unless applicable withholding shall have been effected or obtained in the following manner or in any other manner acceptable to the Committee. Unless otherwise prohibited by the Committee, Optionee may satisfy any such withholding tax obligation by any of the following means or by a combination of such means: (a) tendering a cash payment; (b) authorizing the Company to withhold from the shares otherwise issuable to Optionee as a result of the exercise of this Option a number of shares having a fair market value as of the date that the amount of tax to be withheld is to be determined ("Tax Date"), which shall be the date of exercise of the Option, less than or equal to the amount of the withholding tax obligation; or (c) delivering to the Company unencumbered shares of the Company's common stock owned by Optionee having a fair market value, as of the Tax Date, less than or equal to the amount of the withholding tax obligation.

7. **Nontransferability of Option.** This Option shall not be sold, transferred, pledged, assigned, or otherwise alienated or hypothecated other than by will or by the laws of descent and distribution, and shall not be subject to execution, levy, attachment or similar process. Any attempted sale, transfer, assignment, pledge, hypothecation or other disposition of this Option contrary to the terms hereof, and any execution, levy, attachment or similar process upon the Option, shall be null and void and without effect. Following any transfer, this Option shall continue to be subject to the same terms and conditions immediately prior to transfer. The designation of a person entitled to exercise this Option after the Employee's death will not be deemed a transfer.

8. **Termination of Employment**

(a) **Termination of Employment for Reasons Other Than Retirement, Disability or Death.** Upon Termination of Employment for any reason other than Retirement or on account of Disability or death, this Option shall, to the extent rights to purchase shares hereunder have accrued at the date of such Termination of Employment and shall not have been fully exercised, be exercisable, in whole or in part, at any time within a period of three (3) months following Termination of Employment, subject, however, to prior expiration of the term of this Option and any other limitations upon its exercise in effect at the date of exercise.

(b) Termination of Employment for Retirement or Disability. Upon Termination of Employment by reason of Retirement or Disability, this Option shall, to the extent rights to purchase shares hereunder have accrued at the date of such Retirement or Disability and have not been fully exercised, be exercisable, in whole or in part, for a period of three (3) years following such Termination of Employment, subject to any other limitations imposed by the Plan. If the Employee dies after such Retirement or Disability, this Option shall be exercisable in accordance with paragraph 8(c) hereof.

(c) Termination of Employment for Death. Upon Termination of Employment due to death, this Option shall, to the extent rights to purchase shares hereunder have accrued at the date of death and shall not have been fully exercised, be exercisable, in whole or in part, by the personal representative of the Employee's estate, by any person or persons who shall have acquired this Option directly from the Employee by bequest or inheritance, by a person designated to exercise the Option after the Employee's death, or a Permitted Transferee only under the following circumstances and during the following periods: (i) if the Employee dies while employed by the Company or a subsidiary, at any time within three (3) years after his or her death, or (ii) if the Employee dies during the extended exercise period following termination of employment specified in paragraph 8(b), at any time within the longer of such extended period or one (1) year after his or her death, subject, in any case, to the earlier expiration of this Option.

(d) Termination of Option. If this Option is not exercised within whichever of the exercise periods specified in paragraph 8(a), 8(b) or 8(c) is applicable, this Option shall terminate upon expiration of such exercise period.

9. Changes in Capital Structure. The number of shares covered by this Option, and the price per share, shall be proportionately adjusted for any increase or decrease in the number of issued shares of common stock of the Company resulting from any combination of shares or the payment of a stock dividend on the Company's common stock or any other increase or decrease in the number of shares effected without receipt of consideration by the Company.

In the event of a "Change of Control" (as defined in Section 12.2 of the Plan) of the Company, this Option will be and become fully vested and exercisable irrespective the Minimum Employment Period and irrespective any vesting schedule set forth in this Agreement, unless in the case of a transaction described in clause (iii) or (iv), of Section 12.2 of the Plan, provisions are made in connection with such transaction for the continuance of the Plan and the assumption of this Option or the substitution for this Option of a new option covering the stock of a successor employer corporation, or a parent or subsidiary thereof, covering the stock of a successor employer corporation, or a parent or subsidiary thereof, with appropriate adjustments as to the number and kind of shares and prices.

In the event of a change in the common stock of the Company as presently constituted, which is limited to a change of all its authorized shares into the same number of shares with a different par value or without par value, the shares resulting from any such change shall be deemed to be the shares subject to this Option.

Except as expressly provided in this paragraph 9, the Employee shall have no rights by reason of: (i) any subdivision or combination of shares of stock of any class, (ii) the payment of any stock dividend or any other increase or decrease in the number of shares of stock of any class; or (iii) any dissolution, liquidation, merger or consolidation or spinoff of assets or stock of another corporation. Except as provided in this paragraph 9, any issue by the company of shares of stock of any class, or securities convertible into shares of stock of any class, shall not affect, and no adjustment by reason thereof shall be made with respect to, the number or price of shares subject to this Option.

The grant of this Option shall not affect in anyway the right or power of the Company to make adjustments, reclassifications, reorganizations or changes of its capital or business structure or to merge or to consolidate or to dissolve, liquidate or sell, or transfer all or any part of its business or assets.

10. Rights as a Shareholder. Neither the Employee nor a transferee of this Option shall have any rights as a shareholder with respect to any shares covered hereby until the date he or she shall have become the holder of record of such shares. No adjustment shall be made for dividends, distributions or other rights for which the record date is prior to the date on which he or she shall have become the holder of record thereof, except as provided in paragraph 9 hereof.

11. Modification, Extension and Renewal. Subject to the terms and conditions and within the limitations of the Plan, the Committee, subject to approval of the Board of Directors, may modify or renew this Option, or accept its surrender (to the extent not theretofore exercised) and authorize the granting of a new option or options in substitution therefore (to the extent not theretofore exercised). Notwithstanding the foregoing, no modification shall, without the consent of the Employee, alter or impair any rights or obligations hereunder.

12. Postponement of Delivery of Shares and Representations. The Company, in its discretion, may postpone the issuance and/or delivery of shares upon any exercise of this Option until completion of such stock exchange listing, or registration, or other qualification of such shares under any state and/or federal law, rule or regulation as the Company may consider appropriate, and may require any person exercising this Option to make such representations, including a representation that it is the Employee's intention to acquire shares for investment and not with a view to distribution thereof, and furnish such information as it may consider appropriate in connection with the issuance or delivery of shares in compliance with applicable laws, rules and regulations. In such event, no shares shall be issued to such holder unless and until the Company is satisfied with the accuracy of any such representations.

13. Subject to Plan. This Option is subject to the terms and provisions of the Plan. If any inconsistency exists between the provisions of this Agreement and the Plan, the Plan shall govern.

14. Nonqualified Stock Option. This Option is a Nonqualified Stock Option. This Option does not qualify as an incentive stock option within the meaning of Section 422 of the Internal Revenue Code of 1986, as amended.

In Witness Whereof, this Stock Option Agreement has been executed the date first above written.

MACATAWA BANK CORPORATION
2006 STOCK COMPENSATION PLAN
STOCK OPTION AGREEMENT
(Incentive Stock Option)

This **STOCK OPTION AGREEMENT** is made this **DATE**, between **MACATAWA BANK CORPORATION** (the "Company") and **Employee Name**, an employee of the Company or one of its subsidiaries (the "Employee"), pursuant to the Macatawa Bank Corporation 2006 Stock Compensation Plan (the "Plan"). All capitalized defined terms in this Agreement shall have the meaning ascribed to such terms in the Plan, unless otherwise defined in this Agreement.

IT IS AGREED AS FOLLOWS:

1. **Grant of Option.** Pursuant to the Plan, the Company hereby grants to the Employee the option to purchase shares of the Company's common stock, no par value, on the terms and conditions herein set forth (the "Option"). All of the shares covered by this Option shall be considered and hereby are designated as incentive stock options ("ISOs") qualifying under the provisions of Section 422 of the Internal Revenue Code of 1986, as amended, to the maximum extent permitted under Section 422.

2. **Purchase Price.** The purchase price of the shares covered by this Option shall be \$ per share. The "Committee" (provided for in Article 3 of the Plan) has determined that such price represents one hundred percent 100% of the fair market value of a share of the Company's common stock on this date.

3. **Term of Option.** The term of this Option shall be for a period of ten (10) years from the date hereof, subject in each case to earlier termination as provided in subsequent paragraphs of this Agreement.

4. **Employee's Agreement.** In consideration of the granting of the Option, the Employee agrees to remain in the employ of the Company for a period of at least thirty six (36) months from the date hereof (the "Minimum Employment Period"). Such employment, subject to the provisions of any written contract between the Company and the Employee, shall be at the pleasure of the Board of Directors, and this Option Agreement shall not impose on the Company any obligation to retain the Employee in its employ for any period. In the event of the termination of employment of the Employee for any reason during the Minimum Employment Period, this Option shall terminate, unless this Option becomes exercisable as provided in Paragraph 9.

5. **Exercise of Option.** Except as provided in paragraph 9, this Option shall not be exercisable prior to the expiration of the Minimum Employment Period. Thereafter, this Option may be exercised in whole or in part, at any time and from time to time. This Option may not be exercised as to less than 100 shares at any one time, unless the number purchased is the total number at that time purchasable under this Option. This Option shall be exercised by written notice to the Company. The notice shall state the number of shares with respect to which the Option is being exercised, shall be signed by the person exercising this Option, and shall be accompanied by payment of the full purchase price of the shares in such form as the Committee may accept. This Option agreement shall be submitted to the Company with the notice for purposes of recording the shares being purchased, if exercised in part, or for purposes of cancellation if all shares subject to this Option are being purchased. In the event the Option shall be exercised pursuant to paragraph 8(c) hereof by any person other than the Employee, such notice shall be accompanied by appropriate proof of the right of such person to exercise the Option. To the extent determined by the Committee in its sole discretion, payment of the purchase price shall be made by: (a) cash, check, bank draft, or money order, payable to the order of the Company; (b) the delivery by the Employee of unencumbered shares of common stock of the Company with a Fair Market Value on the last trading day preceding payment equal to the total purchase price of the shares to be purchased; (c) a combination of (a) and (b), except that no shares of stock which have been held for less than six months may be delivered in payment of the exercise price. Upon exercise of all or a portion of this Option, the Company shall issue to the Employee a stock certificate representing the number of shares with respect to which this Option was exercised.

6. **Tax Withholding.** The exercise of this Option is subject to the satisfaction of withholding tax or other withholding liabilities, if any, under federal, state and local laws in connection with such exercise or the delivery or purchase of shares pursuant hereto. The exercise of this Option shall not be effective unless applicable withholding shall have been effected or obtained in the following manner or in any other manner acceptable to the Committee. Unless otherwise prohibited by the Committee, Optionee may satisfy any such withholding tax obligation by any of the following means or by a combination of such means: (a) tendering a cash payment; (b) authorizing the Company to withhold from the shares otherwise issuable to Optionee as a result of the exercise of this Option a number of shares having a fair market value as of the date that the amount of tax to be withheld is to be determined ("Tax Date"), which shall be the date of exercise of the Option, less than or equal to the amount of the withholding tax obligation; or (c) delivering to the Company unencumbered shares of the Company's common stock owned by Optionee having a fair market value, as of the Tax Date, less than or equal to the amount of the withholding tax obligation.

7. **Nontransferability of Option.** This Option shall not be sold, transferred, pledged, assigned, or otherwise alienated or hypothecated other than by will or by the laws of descent and distribution, and shall not be subject to execution, levy, attachment or similar process. Any attempted sale, transfer, assignment, pledge, hypothecation or other disposition of this Option contrary to the terms hereof, and any execution, levy, attachment or similar process upon the Option, shall be null and void and without effect. Following any transfer, this Option shall continue to be subject to the same terms and conditions immediately prior to transfer. The designation of a person entitled to exercise this Option after the Employee's death will not be deemed a transfer.

8. **Termination of Employment.**

(a) **Termination of Employment for Reasons Other Than Retirement, Disability or Death.** Upon Termination of Employment for any reason other than Retirement or on account of Disability or death, this Option shall, to the extent rights to purchase shares hereunder have accrued at the date of such Termination of Employment and shall not have been fully exercised, be exercisable, in whole or in part, at any time within a period of three (3) months following Termination of Employment, subject, however, to prior expiration of the term of this Option and any other limitations upon its exercise in effect at the date of exercise.

(b) **Termination of Employment for Retirement or Disability.** Upon Termination of Employment by reason of Retirement or Disability, this Option shall, to the extent rights to purchase shares hereunder have accrued at the date of such Retirement or Disability and have not been fully exercised, be exercisable, in whole or in part, for a period of three (3) years following such Termination of Employment, subject to any other limitations imposed by the Plan. If the Employee dies after such Retirement or Disability, this Option shall be exercisable in accordance with paragraph 8(c) hereof.

(c) **Termination of Employment for Death.** Upon Termination of Employment due to death, this Option shall, to the extent rights to purchase shares hereunder have accrued at the date of death and shall not have been fully exercised, be exercisable, in whole or in part, by the personal representative of the Employee's estate, by any person or persons who shall have acquired this Option directly from the Employee by bequest or inheritance, by a person designated to exercise the Option after the Employee's death, or a Permitted Transferee only under the following circumstances and during the following periods: (i) if the Employee dies while employed by the Company or a subsidiary, at any time within three (3) years after his or her death, or (ii) if the Employee dies during the extended exercise period following termination of employment specified in paragraph 8(b), at any time within the longer of such extended period or one (1) year after his or her death, subject, in any case, to the earlier expiration of this Option.

(d) **Termination of Option.** If this Option is not exercised within whichever of the exercise periods specified in paragraph 8(a), 8(b) or 8(c) is applicable, this Option shall terminate upon expiration of such exercise period.

9. **Changes in Capital Structure.** The number of shares covered by this Option, and the price per share, shall be proportionately adjusted for any increase or decrease in the number of issued shares of common stock of the Company resulting from any combination of shares or the payment of a stock dividend on the Company's common stock or any other increase or decrease in the number of shares effected without receipt of consideration by the Company.

In the event of a "Change of Control" (as defined in Section 12.2 of the Plan) of the Company, this Option will be and become fully vested and exercisable irrespective the Minimum Employment Period and irrespective any vesting schedule set forth in this Agreement, unless in the case of a transaction described in clause (iii) or (iv), of Section 12.2 of the Plan, provisions are made in connection with such transaction for the continuance of the Plan and the assumption of this Option or the substitution for this Option of a new option covering the stock of a successor employer corporation, or a parent or subsidiary thereof, covering the stock of a successor employer corporation, or a parent or subsidiary thereof, with appropriate adjustments as to the number and kind of shares and prices.

In the event of a change in the common stock of the Company as presently constituted, which is limited to a change of all its authorized shares into the same number of shares with a different par value or without par value, the shares resulting from any such change shall be deemed to be the shares subject to this Option.

Except as expressly provided in this paragraph 9, the Employee shall have no rights by reason of: (i) any subdivision or combination of shares of stock of any class, (ii) the payment of any stock dividend or any other increase or decrease in the number of shares of stock of any class; or (iii) any dissolution, liquidation, merger or consolidation or spinoff of assets or stock of another corporation. Except as provided in this paragraph 9, any issue by the company of shares of stock of any class, or securities convertible into shares of stock of any class, shall not affect, and no adjustment by reason thereof shall be made with respect to, the number or price of shares subject to this Option.

The grant of this Option shall not affect in anyway the right or power of the Company to make adjustments, reclassifications, reorganizations or changes of its capital or business structure or to merge or to consolidate or to dissolve, liquidate or sell, or transfer all or any part of its business or assets.

10. **Rights as a Shareholder.** Neither the Employee nor a transferee of this Option shall have any rights as a shareholder with respect to any shares covered hereby until the date he or she shall have become the holder of record of such shares. No adjustment shall be made for dividends, distributions or other rights for which the record date is prior to the date on which he or she shall have become the holder of record thereof, except as provided in paragraph 9 hereof.

11. **Modification, Extension and Renewal.** Subject to the terms and conditions and within the limitations of the Plan, the Committee, subject to approval of the Board of Directors, may modify or renew this Option, or accept its surrender (to the extent not theretofore exercised) and authorize the granting of a new option or options in substitution therefore (to the extent not theretofore exercised). Notwithstanding the foregoing, no modification shall, without the consent of the Employee, alter or impair any rights or obligations hereunder.

12. **Postponement of Delivery of Shares and Representations.** The Company, in its discretion, may postpone the issuance and/or delivery of shares upon any exercise of this Option until completion of such stock exchange listing, or registration, or other qualification of such shares under any state and/or federal law, rule or regulation as the Company may consider appropriate, and may require any person exercising this Option to make such representations, including a representation that it is the Employee's intention to acquire shares for investment and not with a view to distribution thereof, and furnish such information as it may consider appropriate in connection with the issuance or delivery of shares in compliance with applicable laws, rules and regulations. In such event, no shares shall be issued to such holder unless and until the Company is satisfied with the accuracy of any such representations.

13. **Subject to Plan.** This Option is subject to the terms and provisions of the Plan. If any inconsistency exists between the provisions of this Agreement and the Plan, the Plan shall govern.

14. **ISO Stock Option.** Any provision of this Option or the Plan to the contrary notwithstanding, neither the Company, the Company's Board of Directors nor the Committee shall have any authority to take any action or to do anything which would cause the shares designated herein as ISOs to fail to qualify as ISOs within the meaning of Section 422 of the Internal Revenue Code of 1986, as amended. Notwithstanding any provision of this Plan providing for an extended period to exercise Options following a termination of employment, an Option will be taxed as an Incentive Stock Option only if it is exercised within the Incentive Stock Option time periods stated in the tax Code (within three months after termination of employment, unless the individual is disabled, in which case the three month period is extended to one year).

In Witness Whereof, this Stock Option Agreement has been executed the date first above written.

MACATAWA BANK CORPORATION
2006 DIRECTORS' STOCK COMPENSATION PLAN

STOCK OPTION AGREEMENT

STOCK OPTION AGREEMENT, made this _ day of _ between MACATAWA BANK CORPORATION (herein called the "Company") and Director Name a director of the Company (the "Grantee"), pursuant to the Macatawa Bank Corporation 2006 Directors' Stock Compensation Plan (herein called the "Plan").

IT IS AGREED AS FOLLOWS:

1. Grant of Option

Pursuant to the Plan and the terms of this Agreement, the Company hereby grants to Grantee, an Eligible Director under the terms of the Plan, the option to purchase shares of the Company's common stock, no par value, on the terms and conditions herein set forth (the "Option").

2. Purchase Price

The purchase price of the shares covered by this option shall be \$_ per share, which represents one hundred percent (100) of the Fair Market Value of the Company's common stock on this date ("Grant Date").

3. Additional Terms

(a) Exercise Period

The Option may be exercised and Option Shares may be purchased at any time and from time to time on or after the third anniversary of the date of this Agreement and prior to the tenth anniversary of the date of this Agreement ("Exercise Period"), subject to the following:

(1) If Grantee dies while serving as a director of the Company, this Option shall become immediately exercisable as of the date of death and shall remain exercisable until the earlier of (a) the last day of the 36th month after the month of Grantee's death, or (b) the tenth anniversary of the Grant Date; and

(2) This Option may not be exercised after (the earlier of (a) the last day of the 36th month following the month in which Grantee's service as a director terminates, or (b) the tenth anniversary of the Grant Date.

(b) Procedure for Exercise

Subject to conditions of this Agreement, the Option may be exercised at any time and from time to time during the Exercise Period by delivering written notice to the Company, signed by Grantee, a Permitted Transferee, or Post-Death Representative, specifying the number of Option Shares to be purchased and accompanied by this Agreement.

(c) Payment of Option Price

The Option Price shall be paid in full either (1) in cash or (2) through the delivery of unencumbered shares of the Company's common stock owned by the person exercising this Option having a Fair Market Value on the date of exercise equal to the total exercise price, or (3) by a combination of (1) and (2) above, except that (i) any portion of the exercise price representing a fraction of a Share shall be paid in cash, and (ii) no Shares of Stock which have been held for less than six months may be delivered in payment of the exercise price.

4. Transferability of Option

Except as otherwise provided in this paragraph, this Option shall not be sold, pledged, assigned or transferred in any way, nor be assignable by operation of law or subject to execution, levy, attachment or similar process. Except as provided in this paragraph, any attempted sale, pledge, assignment or other transfer of this Option contrary to the terms hereof, and any execution, levy, attachment or similar process upon the Option, shall be null and void without any effect. Notwithstanding the foregoing, this Option shall, subject to the conditions set forth in this paragraph 4, be transferable by the original Grantee by gift, or other transfer that involves no payment of consideration to the original Grantee, at any time after the grant of the Option to the Grantee's spouse and/or the Grantee's descendants or to a trust created primarily for the benefit of the Grantee, the Grantee's spouse and/or the Grantee's descendants ("Authorized Transferee"). Payment of any consideration by an Authorized Transferee to the original Grantee is prohibited and any attempted transfer for consideration shall be void. An Authorized Transferee shall have no right to transfer the Option. An Authorized Transferee shall succeed to all rights and benefits (except the right to further transfer the Option) and be subject to all obligations, conditions and limitations of the original Grantee. However, such rights and benefits (except the rights to further transfer the Option) and obligations, conditions and limitations shall be determined as if the original Grantee continued to hold the Option, whereby, the provisions of this Option Agreement dealing with termination of employment, retirement, disability and death of a Grantee continue to refer to the original Grantee regardless of whether the options are or are not transferred to an Authorized Transferee. In order to transfer this Option, the Grantee must first give prior written notice to the Company's president or chief financial officer stating the name address and tax identification or social security number of the proposed transferee and the relationship of the proposed transferee to the Grantee and certifying that the transfer involves no payment of consideration. This Option may not be transferred if the transfer would constitute a violation of any applicable federal or state securities or other law or valid regulation. As a condition to the transfer of this Option, the Company may require the proposed transferee to make any representations and warranties to the Company as the Company may deem to be required by applicable law or regulation. In such event, the Option may not be transferred unless and until the Company is satisfied with the correctness of any such representation and warranty. Moreover, the Company, in its discretion, may postpone the transfer of this Option until completion of such stock exchange listing, or registration, or other qualification under any state and/or federal law, rule or regulation as the Company may consider appropriate.

5. Conformity with Plan

The Option is intended to conform in all respects with and is subject to all applicable provisions of the Plan which is incorporated herein by reference. Any inconsistencies between this Agreement and the Plan shall be resolved in accordance with the terms of the Plan. By executing and returning the enclosed copy of this Agreement, Grantee acknowledges receipt of the Plan and agrees to be bound by all of the terms of the Plan.

6. Service as a Director

Grantee acknowledges that nothing in this Agreement or in the Plan imposes upon the Company, its Board of Directors, or its shareholders any obligation to retain or elect the Grantee as director of the Company for any period.

7. Adjustments

The Company shall make appropriate and proportionate adjustments, to the number of Option Shares and the Option Price to reflect any stock dividend, stock split, or combination of shares, merger, consolidation, or other change in the capitalization of the Company, as provided in Section 11 of the Plan. In the event of any such adjustment, all new, substituted, or additional securities or other property to which Grantee is entitled under the Option shall be included in the term "Option Shares."

8. Postponement of Delivery of Shares and Representations

The Company, in its discretion, may postpone the issuance or delivery of Shares upon any exercise of this Option until completion of the registration, or other qualification of such shares under any state and/or federal law, rule, or regulation as the Company may consider appropriate. The Company may require any person exercising this Option to make such representations, including a representation that it is their intention to acquire Shares for investment and not with a view to distribution thereof, and furnish such information as it may consider appropriate in connection with the issuance or delivery of the Shares in compliance with applicable laws, rules and regulations. No Shares shall be issued unless the Company is satisfied with the accuracy of any such representations.

9. Rights as a Shareholder

The Grantee shall have no rights as a shareholder with respect to any Option Shares until the Grantee becomes the holder of record of such shares.

10. Further Actions

The parties agree to execute such further instruments and to take such further actions as may reasonably be required to carry out the intent of this Agreement.

11. Notice

Any notice required or permitted hereunder shall be given in writing and shall be deemed effectively given upon personal delivery or upon deposit in the United States Post Office, by registered or certified mail with postage and fees prepaid, addressed to the other party hereto at the address set forth in this Agreement or at such other address as such party may designate by ten day's advance written notice to the other party.

12. Successors and Assigns

This Agreement shall be binding upon and inure to the benefit of the successors and assigns of the Company and, subject to the restrictions on transfer set forth herein, be binding upon and inure to the benefit of Grantee's heirs, personal representatives, successors, and permitted assigns.

13. Governing Law

This Agreement and all documents contemplated hereby, and all remedies in connection therewith and all questions or transactions relating thereto, shall be construed in accordance with and governed by the laws of the state of Michigan.

14. Entire Agreement

This Agreement constitutes the entire understanding between the Grantee and the Company with respect to the Option Shares and supersedes all other agreements, whether written or oral, with respect to such Shares.

EXHIBIT 31.1

**Certification Pursuant to Section 302 of
the Sarbanes-Oxley Act of 2002**

I, Ronald L. Haan, certify that:

1. I have reviewed this annual report on Form 10-K of Macatawa Bank Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15f and 15d-15(f)) for the registrant and have:
 - (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - (a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
