SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549**

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2020

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 000-25927

MACATAWA BANK CORPORATION

(Exact name of registrant as specified in its charter)

Michigan

(State or other jurisdiction of incorporation or organization)

38-3391345

(I.R.S. Employer Identification No.)

10753 Macatawa Drive, Holland, Michigan 49424

(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: (616) 820-1444

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of each class</u>	<u>Trading Symbol</u>	<u>Name of each exchange on which registered</u>
Common stock	MCBC	NASDAQ

Indicate by checkmark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act:

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company Emerging Growth Company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date: 34,114,901 shares of the Company's Common Stock (no par value) were outstanding as of July 23, 2020.

Forward-Looking Statements

This report contains forward-looking statements that are based on management's beliefs, assumptions, current expectations, estimates and projections about the financial services industry, the economy, and Macatawa Bank Corporation. Forward-looking statements are identifiable by words or phrases such as "outlook", "plan" or "strategy"; that an event or trend "could", "may", "should", "will", "is likely", or is "possible" or "probable" to occur or "continue", has "begun" or "is scheduled" or "on track" or that the Company or its management "anticipates", "believes", "estimates", "plans", "forecasts", "intends", "predicts", "projects", or "expects" a particular result, or is "committed", "confident", "optimistic" or has an "opinion" that an event will occur, or other words or phrases such as "ongoing", "future", "signs", "efforts", "tend", "exploring", "appearing", "until", "near term", "concern", "going forward", "focus", "starting", "initiative," "trend" and variations of such words and similar expressions. Such statements are based upon current beliefs and expectations and involve substantial risks and uncertainties which could cause actual results to differ materially from those expressed or implied by such forward-looking statements. These statements include, among others, those related to the risks and uncertainties related to, and the impact of, the global coronavirus (COVID-19) pandemic on the business, financial condition and results of operations of our company and our customers, future levels of earning assets, future composition of our loan portfolio, trends in credit quality metrics, future capital levels and capital needs, real estate valuation, future levels of repossessed and foreclosed properties and nonperforming assets, future levels of losses and costs associated with the administration and disposition of repossessed and foreclosed properties and nonperforming assets, future levels of loan charge-offs, future levels of other real estate owned, future levels of provisions for loan losses and reserve recoveries, the rate of asset dispositions, future dividends, future growth and funding sources, future cost of funds, future liquidity levels, future profitability levels, future interest rate levels, future net interest margin levels, the effects on earnings of changes in interest rates, future economic conditions, future effects of new or changed accounting standards, future loss recoveries, loan demand and loan growth and the future level of other revenue sources. Management's determination of the provision and allowance for loan losses, the appropriate carrying value of intangible assets (including deferred tax assets) and other real estate owned, and the fair value of investment securities (including whether any impairment on any investment security is temporary or other-than-temporary and the amount of any impairment) involves judgments that are inherently forward-looking. All statements with references to future time periods are forward-looking. All of the information concerning interest rate sensitivity is forward-looking. The future effect of changes in the real estate, financial and credit markets and the national and regional economy on the banking industry, generally, and Macatawa Bank Corporation, specifically, are also inherently uncertain. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions ("risk factors") that are difficult to predict with regard to timing, extent, likelihood and degree of occurrence. Therefore, actual results and outcomes may materially differ from what may be expressed or forecasted in such forward-looking statements. Macatawa Bank Corporation does not undertake to update forward-looking statements to reflect the impact of circumstances or events that may arise after the date of the forward-looking statements.

Risk factors include, but are not limited to, the risk factors described in "Item 1A - Risk Factors" of our Annual Report on Form 10-K for the year ended December 31, 2019. These and other factors are representative of the risk factors that may emerge and could cause a difference between an ultimate actual outcome and a preceding forward-looking statement.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation: The accompanying consolidated financial statements include the accounts of Macatawa Bank Corporation ("the Company", "our", "we") and its wholly-owned subsidiary, Macatawa Bank ("the Bank"). All significant intercompany accounts and transactions have been eliminated in consolidation.

Macatawa Bank is a Michigan chartered bank with depository accounts insured by the Federal Deposit Insurance Corporation. The Bank operates 26 full service branch offices providing a full range of commercial and consumer banking and trust services in Kent County, Ottawa County, and northern Allegan County, Michigan.

The Company owns all of the common stock of Macatawa Statutory Trust II. This is a grantor trust that issued trust preferred securities and is not consolidated with the Company under accounting principles generally accepted in the United States of America.

Recent Events: In December 2019, news began to surface regarding an influenza pandemic in China, known as the novel coronavirus, or COVID-19. In January 2020, the United States restricted entry to anyone traveling from China. In February 2020, the pandemic spread broadly and swiftly throughout Europe and the Middle East, particularly in Italy and Iran. Cases began to surface in the United States in February 2020 and accelerated in early March 2020. The Federal Reserve reduced the overnight federal funds rate by 50 basis points on March 3, 2020 and by another 100 basis points on March 15, 2020 and announced the resumption of quantitative easing. During the week of March 9, 2020, individual states began implementing restrictions and promoting "social distancing". These restrictions included closure of schools, restrictions on the number of public gatherings, encouragement of work at home arrangements and other measures.

In Michigan, beginning March 24, 2020, Governor Gretchen Whitmer issued a series of "stay home, stay safe" executive orders, which required residents to remain at home "to the maximum extent feasible" and prohibited in-person work that "is not necessary to sustain or protect life." These "stay home, stay safe" executive orders severely limited economic activity in Michigan, requiring businesses not deemed to be essential, to severely limit or shut down operations. Under later "stay home, stay safe" executive orders, Governor Whitmer permitted certain industries, such as automotive, manufacturing, construction and retail, to begin to reopen, subject to stringent health and safety requirements and strict social distancing measures. On June 1, 2020, Governor Whitmer issued a "reopen" executive order, which rescinded the then current "stay home, stay safe" executive order, and which permitted limited activities under the Michigan Safe Start Plan. On June 5, 2020, Governor Whitmer issued a supplemental reopen executive order, which did not rescind the reopen order, but modified it for regions in the northern lower peninsula and the upper peninsula of Michigan by permitting larger social gatherings and additional activities. The supplemental reopen order also allowed non-essential personal care services in all of Michigan. The reopen order was further modified by another executive order that addresses restarting professional sports and another executive order that closed indoor services at bars in all of Michigan. As of June 30 2020, most businesses in Michigan, other than fitness centers and certain leisure and entertainment businesses, were allowed to be open in some capacity, subject to stringent health and safety requirements, strict social distancing measures and nonsurgical face mask requirements.

Congress passed a number of measures in late March 2020, designed to infuse cash into the economy to offset the negative impacts of business closings and restrictions. The COVID-19 pandemic is a highly unusual, unprecedented and evolving public health and economic crisis and may have a negative material impact on the Company's business, financial condition and results of operations and has had, and is likely to continue to have, a negative impact on many of our customers' business, financial condition and results of operations. Additionally, the negative consequences of the unprecedented economic shutdown nationally and in Michigan is likely to result in a higher level of future delinquencies, loan impairments and loan losses and require additional provisions for loan losses, which will have a negative impact on our results of operations.

The Company quickly responded to the changing environment by executing its business continuity plan and purchasing and deploying additional equipment to allow for a majority of its workforce to work remotely. The Bank's branch facilities remained open, but lobbies were closed with transactions being conducted through drive-up windows or on-line channels. The Company implemented rotations for onsite personnel, implemented enhanced daily cleaning of facilities and instructed personnel to maintain appropriate social distancing in its offices. As of June 30, 2020, branches were fully open with additional health and safety requirements to comply with Governor Whitmer's current executive orders, including, among other things, daily deep cleaning, nonsurgical face mask requirements and strict social distancing measures.

On March 22, 2020, the federal banking agencies issued an "Interagency Statement on Loan Modifications and Reporting for Financial Institutions Working with Customers Affected by the Coronavirus". This guidance encourages financial institutions to work prudently with borrowers that may be unable to meet their contractual obligations because of the effects of COVID-19. The guidance goes on to explain that in consultation with the FASB staff the federal banking agencies conclude that short-term modifications (e.g. six months) made on a good faith basis to borrowers who were current as of the implementation date of a relief program are not Troubled Debt Restructurings ("TDRs"). The Coronavirus Aid, Relief and Economic Security ("CARES") Act was passed by Congress on March 27, 2020. Section 4013 of the CARES Act also addressed COVID-19 related modifications and specified that COVID-19 related modifications on loans that were current as of December 31, 2019 are not TDRs. Through June 30, 2020, the Bank had applied this guidance and modified 724 individual loans with aggregate principal balances totaling \$336.8 million. The majority of these modifications involved three-month extensions.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

The CARES Act, as amended, included an allocation of \$659 billion for loans to be issued by financial institutions through the Small Business Administration (“SBA”) Paycheck Protection Program (“PPP”). PPP loans are forgivable, in whole or in part, if the proceeds are used for payroll and other permitted purposes in accordance with the requirements of the PPP. These loans carry a fixed rate of 1.00% and a term of two years (loans made before June 5, 2020) or five years (loans made on or after June 5, 2020), if not forgiven, in whole or in part. Payments are deferred until either the date on which the SBA remits the amount of forgiveness proceeds to the lender or the date that is 10 months after the last day of the covered period if the borrower does not apply for forgiveness within that 10 month period. Through June 30, 2020, the Bank had originated 1,643 PPP loans totaling \$335.7 million, with an average loan size of \$209,500. Fees totaling \$9.8 million were collected from the SBA for these loans in the three months ended June 30, 2020. These fees are deferred and amortized into interest income over the contractual period of 24 months or 70 months, as applicable. Upon SBA forgiveness, unamortized fees are then recognized into interest income. Participation in the PPP had a significant impact on the Bank’s asset mix and net interest income in the second quarter of 2020 and will continue to impact both asset mix and net interest income for the remainder of 2020. The PPP program has been extended until August 8, 2020, and may be extended again. The Bank may have additional PPP loan originations in the third quarter of 2020, but not likely at the pace experienced in the second quarter of 2020 as applications have slowed dramatically beginning in June 2020. At June 30, 2020, the Bank had \$427.0 million in overnight funds and \$331.9 million of available borrowing capacity from its correspondent banks. In addition, the Federal Reserve has implemented a liquidity facility available to financial institutions participating in the PPP.

Basis of Presentation: The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments (consisting only of normal recurring accruals) believed necessary for a fair presentation have been included.

Operating results for the three and six month periods ended June 30, 2020 are not necessarily indicative of the results that may be expected for the year ending December 31, 2020. For further information, refer to the consolidated financial statements and related notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2019.

Use of Estimates: To prepare financial statements in conformity with accounting principles generally accepted in the United States of America, management makes estimates and assumptions based on available information. These estimates and assumptions affect the amounts reported in the financial statements and the disclosures provided, and future results could differ. The allowance for loan losses, valuation of deferred tax assets, loss contingencies, fair value of other real estate owned and fair values of financial instruments are particularly subject to change.

Allowance for Loan Losses: The allowance for loan losses (allowance) is a valuation allowance for probable incurred credit losses inherent in our loan portfolio, increased by the provision for loan losses and recoveries, and decreased by charge-offs of loans. Management believes the allowance for loan losses balance to be adequate based on known and inherent risks in the portfolio, past loan loss experience, information about specific borrower situations and estimated collateral values, economic conditions and other relevant factors. Allocations of the allowance may be made for specific loans, but the entire allowance is available for any loan that, in management’s judgment, should be charged-off. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Management continues its collection efforts on previously charged-off balances and applies recoveries as additions to the allowance for loan losses.

The allowance consists of specific and general components. The specific component relates to loans that are individually classified as impaired. The general component covers non-classified loans and is based on historical loss experience adjusted for current qualitative factors. The Company maintains a loss migration analysis that tracks loan losses and recoveries based on loan class and the loan risk grade assignment for commercial loans. PPP loans receive \$0 allocation as they are fully guaranteed by the SBA and are subject to be forgiven under the SBA forgiveness criteria. At June 30, 2020, an 18 month annualized historical loss experience was used for commercial loans and a 12 month historical loss experience period was applied to residential mortgage loans and consumer loans. These historical loss percentages are adjusted (both upwards and downwards) for certain qualitative factors, including economic trends, credit quality trends, valuation trends, concentration risk, quality of loan review, changes in personnel, external factors and other considerations. At March 31, 2020 and June 30, 2020, the qualitative factor allocations for economic trends were increased to provide additional coverage related to the COVID-19 pandemic.

A loan is impaired when, based on current information and events, it is believed to be probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. Loans for which the terms have been modified and a concession has been made, and for which the borrower is experiencing financial difficulties, are considered troubled debt restructurings and classified as impaired.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Commercial and commercial real estate loans with relationship balances exceeding \$500,000 and an internal risk grading of 6 or worse are evaluated for impairment. If a loan is impaired, a portion of the allowance is allocated and the loan is reported at the present value of estimated future cash flows using the loan's existing interest rate or at the fair value of collateral, less estimated costs to sell, if repayment is expected solely from the collateral. Large groups of smaller balance homogeneous loans, such as consumer and residential real estate loans, are collectively evaluated for impairment and they are not separately identified for impairment disclosures.

Troubled debt restructurings are also considered impaired with impairment generally measured at the present value of estimated future cash flows using the loan's effective rate at inception or using the fair value of collateral, less estimated costs to sell, if repayment is expected solely from the collateral.

Foreclosed Assets: Assets acquired through or instead of loan foreclosure, primarily other real estate owned, are initially recorded at fair value less estimated costs to sell when acquired, establishing a new cost basis. If fair value declines, a valuation allowance is recorded through expense. Costs after acquisition are expensed unless they add value to the property.

Income Taxes: Income tax expense is the sum of the current year income tax due or refundable and the change in deferred tax assets and liabilities. Deferred tax assets and liabilities are the expected future tax consequences of temporary differences between the carrying amounts and tax bases of assets and liabilities, computed using enacted tax rates. A valuation allowance, if needed, reduces deferred tax assets to the amount expected to be realized.

The Company recognizes a tax position as a benefit only if it is "more likely than not" that the tax position would be sustained in a tax examination, with a tax examination being presumed to occur. The amount recognized is the largest amount of tax benefit that is greater than 50% likely of being realized on examination. For tax positions not meeting the "more likely than not" test, no tax benefit is recorded. The Company recognizes interest and penalties related to income tax matters in income tax expense.

Revenue Recognition: The Company recognizes revenues as they are earned based on contractual terms, as transactions occur, or as services are provided and collectability is reasonably assured. The Company's primary source of revenue is interest income from the Bank's loans and investment securities. The Company also earns noninterest revenue from various banking services offered by the Bank.

Interest Income: The Company's largest source of revenue is interest income which is primarily recognized on an accrual basis based on contractual terms written into loans and investment contracts.

Noninterest Revenue: The Company derives the majority of its noninterest revenue from: (1) service charges for deposit related services, (2) gains related to mortgage loan sales, (3) trust fees and (4) debit and credit card interchange income. Most of these services are transaction based and revenue is recognized as the related service is provided.

Derivatives: Certain of the Bank's commercial loan customers have entered into interest rate swap agreements directly with the Bank. At the same time the Bank enters into a swap agreement with its customer, the Bank enters into a corresponding interest rate swap agreement with a correspondent bank at terms mirroring the Bank's interest rate swap with its commercial loan customer. This is known as a back-to-back swap agreement. Under this arrangement the Bank has five freestanding interest rate swaps, each of which is carried at fair value. As the terms mirror each other, there is no income statement impact to the Bank. At June 30, 2020 and December 31, 2019, the total notional amount of such agreements was \$96.5 million and \$70.3 million, respectively, and resulted in a derivative asset with a fair value of \$5.0 million and \$1.8 million, respectively, which were included in other assets and a derivative liability of \$5.0 million and \$1.8 million, respectively, which were included in other liabilities.

Reclassifications: Some items in the prior period financial statements were reclassified to conform to the current presentation.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Adoption of New Standards: On March 12, 2020, the Securities Exchange Commission finalized amendments to the definitions of “accelerated” and “large accelerated filer” definitions. The amendments increase the threshold criteria for meeting these categories and are effective on April 27, 2020. Prior to these changes, the Company was designated as an “accelerated” filer as it had more than \$75 million in public float but less than \$700 million at the end of the Company’s most recent second quarter. The rule change expands the definition of “smaller reporting companies” to include entities with public float of less than \$700 million and less than \$100 million in annual revenues in its most recent fiscal year. The Company expects to meet this expanded category of smaller reporting company based on the 2019 fiscal year and will no longer be considered an accelerated filer. If the Company’s annual revenues exceed \$100 million in a given fiscal year, its category will change back to “accelerated filer”. The categorization of “accelerated” or “large accelerated filer” drives the requirement for a public company to obtain an auditor attestation of its internal control over financial reporting. Smaller reporting companies also have additional time to file quarterly and annual financial statements. All public companies are required to obtain and file annual financial statement audits, as well as provide management’s assertion on effectiveness of internal control over financial reporting, but the external auditor attestation of internal control over financial reporting is not required if a company is not an accelerated or large accelerated filer. As the Bank has total assets exceeding \$1.0 billion, it remains subject to FDICIA, which requires an auditor attestation of internal controls over the Bank’s regulatory financial reporting. As such, other than the additional time provided to file quarterly and annual financial statements, this change did not significantly change the Company’s annual reporting and audit requirements.

Newly Issued Not Yet Effective Standards: FASB issued ASU No. 2016-13, *Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments*. This ASU provides financial statement users with more decision-useful information about the expected credit losses on financial instruments and other commitments to extend credit held by a reporting entity at each reporting date by replacing the incurred loss impairment methodology in current GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. The new guidance eliminates the probable initial recognition threshold and, instead, reflects an entity’s current estimate of all expected credit losses. The new guidance broadens the information that an entity must consider in developing its expected credit loss estimate for assets measured either collectively or individually to include forecasted information, as well as past events and current conditions. There is no specified method for measuring expected credit losses, and an entity is allowed to apply methods that reasonably reflect its expectations of the credit loss estimate. Although an entity may still use its current systems and methods for recording the allowance for credit losses, under the new rules, the inputs used to record the allowance for credit losses generally will need to change to appropriately reflect an estimate of all expected credit losses and the use of reasonable and supportable forecasts. Additionally, credit losses on available-for-sale debt securities will now have to be presented as an allowance rather than as a write-down.

ASU No. 2019-10 *Financial Instruments – Credit Losses (Topic 326), Derivatives and Hedging (Topic 815), and Leases (Topic 842) – Effective Dates* updated the effective date of this ASU for smaller reporting companies, such as the Company, to fiscal years beginning after December 15, 2022. The Company selected a software vendor for applying this new ASU, began implementation of the software in the second quarter of 2018, completed integration during the third quarter of 2018 and ran parallel computations with both systems using the current GAAP incurred loss model in the fourth quarter of 2018. The Company went live with this software beginning in January 2019 for its monthly incurred loss computations and began modeling the new current expected credit loss model assumptions to the allowance for loan losses computation. In the second, third and fourth quarters of 2019, the Company modeled the various methods prescribed in the ASU against the Company’s identified loan segments. The Company anticipates continuing to run parallel computations and fine tune assumptions as it continues to evaluate the impact of adoption of the new standard. The COVID-19 pandemic that broke out in the United States in the first quarter of 2020 may have a significant impact on allowance computations under the incurred loss model which would be amplified under the new standard. Efforts are underway in Congress and with banking regulators to require a further deferral of implementation of ASU No. 2016-13.

Other-Than-Temporary-Impairment

Management evaluates securities for other-than-temporary impairment ("OTTI") at least on a quarterly basis, and more frequently when economic or market conditions warrant such an evaluation. At June 30, 2020, 8 securities available for sale with fair values totaling \$7.7 million had unrealized losses totaling \$42,000. At June 30, 2020, there were no securities held to maturity which had unrealized losses. Management has the intent and ability to hold the securities classified as held to maturity until they mature, at which time the Company will receive full value for the securities. In addition, management believes it is more likely than not that the Company will not be required to sell any of its investment securities before a recovery of cost. Management determined that the unrealized losses for the three and six month periods ended June 30, 2020 and 2019 were attributable to changes in interest rates and not due to credit quality. As such, no OTTI charges were necessary during each period.

Securities with a carrying value of approximately \$5.1 million and \$3.0 million were pledged as security for public deposits, letters of credit and for other purposes required or permitted by law at June 30, 2020 and December 31, 2019, respectively.

Other secured	4,384	5,338
Total consumer	<u>251,971</u>	<u>287,597</u>
Total loans	1,562,688	1,385,627
Allowance for loan losses	(15,855)	(17,200)
	<u>\$ 1,546,833</u>	<u>\$ 1,368,427</u>

Included in commercial and industrial loans at June 30, 2020 are \$335.7 million in loans issued under the PPP. This program was created by the CARES Act in March 2020 to support businesses through the COVID-19 pandemic. Under the program, borrowers who use the funds for payroll and certain other expenses are eligible to have the loan balances forgiven by the SBA. Applications for forgiveness can be submitted to the Bank beginning 8 weeks after loan disbursement. The loans are 100% guaranteed by the SBA. We expect the majority of PPP loans to qualify for and receive forgiveness from the SBA by December 31, 2020. This expectation is subject to change due to borrower behavior, changing SBA requirements and processes related to loan forgiveness and other relevant factors.

MACATAWA BANK CORPORATION
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

NOTE 3 – LOANS (Continued)

The Company had allocated \$904,000 and \$1,624,000 of specific reserves to customers whose loan terms have been modified in troubled debt restructurings (“TDRs”) as of June 30, 2020 and December 31, 2019, respectively. These loans may have involved the restructuring of terms to allow customers to mitigate the risk of foreclosure by meeting a lower loan payment requirement based upon their current cash flow. These may also include loans that renewed at existing contractual rates, but below market rates for comparable credit. The Company has been active at utilizing these programs and working with its customers to reduce the risk of foreclosure. For commercial loans, these modifications typically include an interest only period and, in some cases, a lowering of the interest rate on the loan. In some cases, the modification will include separating the note into two notes with the first note structured to be supported by current cash flows and collateral, and the second note made for the remaining unsecured debt. The second note is charged off immediately and collected only after the first note is paid in full. This modification type is commonly referred to as an A-B note structure. For consumer mortgage loans, the restructuring typically includes a lowering of the interest rate to provide payment and cash flow relief. For each restructuring, a comprehensive credit underwriting analysis of the borrower’s financial condition and prospects of repayment under the revised terms is performed to assess whether the structure can be successful and that cash flows will be sufficient to support the restructured debt. An analysis is also performed to determine whether the restructured loan should be on accrual status. Generally, if the loan is on accrual at the time of restructure, it will remain on accrual after the restructuring. In some cases, a nonaccrual loan may be placed on accrual at restructuring if the loan’s actual payment history demonstrates it would have cash flowed under the restructured terms. After six consecutive payments under the restructured terms, a nonaccrual restructured loan is reviewed for possible upgrade to accruing status.

In situations where there is a subsequent modification or renewal and the loan is brought to market terms, including a contractual interest rate not less than a market interest rate for new debt with similar credit risk characteristics, the TDR and impaired loan designations may be removed. In addition, the TDR designation may also be removed from loans modified under an A-B note structure. If the remaining “A” note is at a market rate at the time of restructuring (taking into account the borrower’s credit risk and prevailing market conditions), the loan can be removed from TDR designation in a subsequent calendar year after six months of performance in accordance with the new terms. The market rate relative to the borrower’s credit risk is determined through analysis of market pricing information gathered from peers and use of a loan pricing model. The general objective of the model is to achieve a consistent return on equity from one credit to the next, taking into consideration differences in credit risk. In the model, credits with higher risk receive a higher potential loss allocation, and therefore require a higher interest rate to achieve the target return on equity.

As with other impaired loans, an allowance for loan loss is estimated for each TDR based on the most likely source of repayment for each loan. For impaired commercial real estate loans that are collateral dependent, the allowance is computed based on the fair value of the underlying collateral, less estimated costs to sell. For impaired commercial loans where repayment is expected from cash flows from business operations, the allowance is computed based on a discounted cash flow computation. Certain groups of TDRs, such as residential mortgages, have common characteristics and for them the allowance is computed based on a discounted cash flow computation on the change in weighted rate for the pool. The allowance allocations for commercial TDRs where we have reduced the contractual interest rate are computed by measuring cash flows using the new payment terms discounted at the original contractual rate.

The following table presents information regarding troubled debt restructurings as of June 30, 2020 and December 31, 2019 (dollars in thousands):

	June 30, 2020		December 31, 2019	
	Number of Loans	Outstanding Recorded Balance	Number of Loans	Outstanding Recorded Balance
Commercial and industrial	6	\$ 1,714	7	\$ 5,797
Commercial real estate	13	2,292	15	2,770
Consumer	65	4,688	69	5,140
	84	\$ 8,694	91	\$ 13,707

In late March 2020, the federal banking regulators issued guidance that modifications made to a borrower affected by the COVID-19 pandemic and governmental shutdown orders does not need to be identified as a TDR if the loan was current at the time a modification plan was implemented. Section 4013 of the CARES Act also addressed COVID-19 related modifications and specified that such modifications made on loans that were current as of December 31, 2019 are not TDRs. As of June 30, 2020, the Bank had applied this guidance and had made 724 such modifications with principal balances totaling \$336.8 million. The Bank continues to follow the guidance issued by the banking regulators in making any TDR determinations.

	<u>2</u>	<u>\$ 30</u>	<u>\$ —</u>	<u>1</u>	<u>\$ 24</u>	<u>\$ —</u>

According to the accounting standards, not all loan modifications are TDRs. TDRs are modifications or renewals where the Company has granted a concession to a borrower in financial distress. The Company reviews all modifications and renewals for determination of TDR status. In some situations a borrower may be experiencing financial distress, but the Company does not provide a concession. These modifications are not considered TDRs. In other cases, the Company might provide a concession, such as a reduction in interest rate, but the borrower is not experiencing financial distress. This could be the case if the Company is matching a competitor's interest rate. These modifications would also not be considered TDRs. Finally, any renewals at existing terms for borrowers not experiencing financial distress would not be considered TDRs. As with other loans not considered TDR or impaired, allowance allocations are based on the historical based allocation for the applicable loan grade and loan class.

Payment defaults on TDRs have been minimal and during the three and six month periods ended June 30, 2020 and 2019, the balance of loans that became delinquent by more than 90 days past due or that were transferred to nonaccrual within 12 months of restructuring were not material.

NOTE 3 – LOANS (Continued)

Credit Quality Indicators: The Company categorizes loans into risk categories based on relevant information about the ability of the borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information and current economic trends, among other factors. The Company analyzes commercial loans individually and classifies these relationships by credit risk grading. The Company uses an eight point grading system, with grades 5 through 8 being considered classified, or watch, credits. All commercial loans are assigned a grade at origination, at each renewal or any amendment. When a credit is first downgraded to a watch credit (either through renewal, amendment, loan officer identification or the loan review process), an Administrative Loan Review (“ALR”) is generated by the credit department and the loan officer. All watch credits have an ALR completed quarterly which analyzes the collateral position and cash flow of the borrower and its guarantors. Management meets quarterly with loan officers to discuss each of these credits in detail and to help formulate solutions where progress has stalled. When necessary, the loan officer proposes changes to the assigned loan grade as part of the ALR. Additionally, Loan Review reviews all loan grades upon origination, renewal or amendment and again as loans are selected through the loan review process. The credit will stay on the ALR until either its grade has improved to a 4 or the credit relationship is at a zero balance. The Company uses the following definitions for the risk grades:

1. Excellent - Loans supported by extremely strong financial condition or secured by the Bank’s own deposits. Minimal risk to the Bank and the probability of serious rapid financial deterioration is extremely small.

2. Above Average - Loans supported by sound financial statements that indicate the ability to repay or borrowings secured (and margined properly) with marketable securities. Nominal risk to the Bank and probability of serious financial deterioration is highly unlikely. The overall quality of these credits is very high.

3. Good Quality - Loans supported by satisfactory asset quality and liquidity, good debt capacity coverage, and good management in all critical positions. Loans are secured by acceptable collateral with adequate margins. There is a slight risk of deterioration if adverse market conditions prevail.

4. Acceptable Risk - Loans carrying an acceptable risk to the Bank, which may be slightly below average quality. The borrower has limited financial strength with considerable leverage. There is some probability of deterioration if adverse market conditions prevail. These credits should be monitored closely by the Relationship Manager.

5. Marginally Acceptable - Loans are of marginal quality with above normal risk to the Bank. The borrower shows acceptable asset quality but very little liquidity with high leverage. There is inconsistent earning performance without the ability to sustain adverse market conditions. The primary source of repayment is questionable, but the secondary source of repayment still remains an option. Very close attention by the Relationship Manager and management is needed.

6. Substandard - Loans are inadequately protected by the net worth and paying capacity of the borrower or the collateral pledged. The primary and secondary sources of repayment are questionable. Heavy debt condition may be evident and volume and earnings deterioration may be underway. It is possible that the Bank will sustain some loss if the deficiencies are not immediately addressed and corrected.

7. Doubtful - Loans supported by weak or no financial statements, as well as the ability to repay the entire loan, are questionable. Loans in this category are normally characterized less than adequate collateral, insolvent, or extremely weak financial condition. A loan classified doubtful has all the weaknesses inherent in one classified substandard with the added characteristic that the weaknesses makes collection or liquidation in full highly questionable. The possibility of loss is extremely high, however, activity may be underway to minimize the loss or maximize the recovery.

8. Loss - Loans are considered uncollectible and of little or no value as a bank asset.

NOTE 5 – FAIR VALUE

ASC Topic 820, *Fair Value Measurements and Disclosures*, establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The three levels of inputs that may be used to measure fair value include:

- Level 1:** Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.
- Level 2:** Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.
- Level 3:** Significant unobservable inputs that reflect a reporting entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

Investment Securities: The fair values of investment securities are determined by matrix pricing, which is a mathematical technique widely used in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted securities (Level 2 inputs). The fair values of certain securities held to maturity are determined by computing discounted cash flows using observable and unobservable market inputs (Level 3 inputs).

Loans Held for Sale: The fair value of loans held for sale is based upon binding quotes from third party investors (Level 2 inputs).

Impaired Loans: Loans identified as impaired are measured using one of three methods: the loan's observable market price, the fair value of collateral or the present value of expected future cash flows. For each period presented, no impaired loans were measured using the loan's observable market price. If an impaired loan has had a charge-off or if the fair value of the collateral is less than the recorded investment in the loan, we establish a specific reserve and report the loan as nonrecurring Level 3. The fair value of collateral of impaired loans is generally based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value.

Other Real Estate Owned: Other real estate owned (OREO) properties are initially recorded at fair value, less estimated costs to sell when acquired, establishing a new cost basis. Adjustments to OREO are measured at fair value, less costs to sell. Fair values are generally based on third party appraisals or realtor evaluations of the property. These appraisals and evaluations may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification. In cases where the carrying amount exceeds the fair value, less estimated costs to sell, an impairment loss is recognized through a valuation allowance, and the property is reported as nonrecurring Level 3.

Interest Rate Swaps: For interest rate swap agreements, we measure fair value utilizing pricing provided by a third-party pricing source that that uses market observable inputs, such as forecasted yield curves, and other unobservable inputs and accordingly, interest rate swap agreements are classified as Level 3.

NOTE 5 – FAIR VALUE (Continued)

The carrying amounts and estimated fair values of financial instruments, not previously presented, were as follows at June 30, 2020 and December 31, 2019 (dollars in thousands):

	Level in Fair Value Hierarchy	June 30, 2020		December 31, 2019	
		Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial assets					
Cash and due from banks	Level 1	\$ 33,079	\$ 33,079	\$ 31,942	\$ 31,942
Cash equivalents	Level 2	426,926	426,926	240,508	240,508
Securities held to maturity	Level 3	89,195	92,539	82,720	85,128
FHLB stock		11,558	NA	11,558	NA
Loans, net	Level 2	1,545,280	1,581,193	1,363,276	1,395,446
Bank owned life insurance	Level 3	42,654	42,654	42,156	42,156
Accrued interest receivable	Level 2	6,014	6,014	4,866	4,866
Financial liabilities					
Deposits	Level 2	(2,118,291)	(2,119,088)	(1,753,294)	(1,753,877)
Other borrowed funds	Level 2	(70,000)	(73,282)	(60,000)	(61,006)
Long-term debt	Level 2	(20,619)	(18,165)	(20,619)	(18,167)
Accrued interest payable	Level 2	(376)	(376)	(518)	(518)
Off-balance sheet credit-related items					
Loan commitments		—	—	—	—

The methods and assumptions used to estimate fair value are described as follows.

Carrying amount is the estimated fair value for cash and cash equivalents, bank owned life insurance, accrued interest receivable and payable, demand deposits, short-term borrowings and variable rate loans or deposits that reprice frequently and fully. Security fair values are determined by matrix pricing, which is a mathematical technique widely used in the industry to value debt securities as discussed above. For fixed rate loans, interest-bearing time deposits in other financial institutions, or deposits and for variable rate loans or deposits with infrequent repricing or repricing limits, fair value is based on discounted cash flows using current market rates applied to the estimated life and credit risk (including consideration of widening credit spreads). Fair value of debt is based on current rates for similar financing. It was not practicable to determine the fair value of FHLB stock due to restrictions placed on its transferability. The fair value of off-balance sheet credit-related items is not significant.

The estimated fair values of financial instruments disclosed above as follow the guidance in ASU 2016-01 which prescribes an “exit price” approach in estimating and disclosing fair value of financial instruments incorporating discounts for credit, liquidity and marketability factors.

NOTE 6 – DEPOSITS

Deposits are summarized as follows (dollars in thousands):

	June 30, 2020	December 31, 2019
Noninterest-bearing demand	\$ 748,624	\$ 482,499
Interest bearing demand	523,232	479,341
Savings and money market accounts	712,296	639,329
Certificates of deposit	134,139	152,125
	<u>\$ 2,118,291</u>	<u>\$ 1,753,294</u>

Time deposits that exceed the FDIC insurance limit of \$250,000 were approximately \$33.3 million at June 30, 2020 and \$37.7 million at December 31, 2019.

NOTE 7 - OTHER BORROWED FUNDS

Other borrowed funds include advances from the Federal Home Loan Bank and borrowings from the Federal Reserve Bank.

Federal Home Loan Bank Advances

At period-end, advances from the Federal Home Loan Bank were as follows (dollars in thousands):

<u>Principal Terms</u>	<u>Advance Amount</u>	<u>Range of Maturities</u>	<u>Weighted Average Interest Rate</u>
<u>June 30, 2020</u>			
Single maturity fixed rate advances	\$ 40,000	April 2021 to July 2024	2.50%
Putable advances	30,000	November 2024 to February 2030	1.36%
	<u>\$ 70,000</u>		

<u>Principal Terms</u>	<u>Advance Amount</u>	<u>Range of Maturities</u>	<u>Weighted Average Interest Rate</u>
<u>December 31, 2019</u>			
Single maturity fixed rate advances	\$ 40,000	April 2021 to July 2024	2.50%
Putable advances	20,000	November 2024	1.81%
	<u>\$ 60,000</u>		

MACATAWA BANK CORPORATION
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

NOTE 7 - OTHER BORROWED FUNDS (Continued)

Each advance is subject to a prepayment fee if paid prior to its maturity date. Fixed rate advances are payable at maturity. Amortizable mortgage advances are fixed rate advances with scheduled repayments based upon amortization to maturity. These advances were collateralized by residential and commercial real estate loans totaling \$460.9 million and \$498.1 million under a blanket lien arrangement at June 30, 2020 and December 31, 2019, respectively.

Scheduled repayments of FHLB advances as of June 30, 2020 were as follows (in thousands):

2020	\$	—
2021		10,000
2022		—
2023		10,000
2024		40,000
Thereafter		10,000
	\$	70,000

Federal Reserve Bank borrowings

The Company has a financing arrangement with the Federal Reserve Bank. There were no borrowings outstanding at June 30, 2020 and December 31, 2019, and the Company had approximately \$11.1 million and \$13.0 million in unused borrowing capacity based on commercial and mortgage loans pledged to the Federal Reserve Bank totaling \$12.5 million and \$15.2 million at June 30, 2020 and December 31, 2019, respectively.

NOTE 8 - EARNINGS PER COMMON SHARE

A reconciliation of the numerators and denominators of basic and diluted earnings per common share for the three and six month periods ended June 30, 2020 and 2019 are as follows (dollars in thousands, except per share data):

	Three Months Ended June 30, 2020	Three Months Ended June 30, 2019	Six Months Ended June 30, 2020	Six Months Ended June 30, 2019
Net income available to common shares	\$ 7,638	\$ 8,003	\$ 14,049	\$ 15,649
Weighted average shares outstanding, including participating stock awards - Basic	34,108,982	34,042,886	34,108,057	34,041,628
Dilutive potential common shares:				
Stock options	—	—	—	—
Weighted average shares outstanding - Diluted	34,108,982	34,042,886	34,108,057	34,041,628
Basic earnings per common share	\$ 0.22	\$ 0.24	\$ 0.41	\$ 0.46
Diluted earnings per common share	\$ 0.22	\$ 0.24	\$ 0.41	\$ 0.46

There were no antidilutive shares of common stock in the three and six month periods ended June 30, 2020 and 2019.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 9 - FEDERAL INCOME TAXES

Income tax expense was as follows (dollars in thousands):

	Three Months Ended June 30, 2020	Three Months Ended June 30, 2019	Six Months Ended June 30, 2020	Six Months Ended June 30, 2019
Current	\$ 2,970	\$ 1,851	\$ 4,671	\$ 3,319
Deferred	(1,211)	65	(1,483)	311
	<u>\$ 1,759</u>	<u>\$ 1,916</u>	<u>\$ 3,188</u>	<u>\$ 3,630</u>

The difference between the financial statement tax expense and amount computed by applying the statutory federal tax rate to pretax income was reconciled as follows (dollars in thousands):

	Three Months Ended June 30, 2020	Three Months Ended June 30, 2019	Six Months Ended June 30, 2020	Six Months Ended June 30, 2019
Statutory rate	21%	21%	21%	21%
Statutory rate applied to income before taxes	\$ 1,974	\$ 2,083	\$ 3,620	\$ 4,049
Deduct				
Tax-exempt interest income	(177)	(173)	(355)	(340)
Bank-owned life insurance	(48)	(52)	(99)	(102)
Other, net	10	58	22	23
	<u>\$ 1,759</u>	<u>\$ 1,916</u>	<u>\$ 3,188</u>	<u>\$ 3,630</u>

The realization of deferred tax assets (net of a recorded valuation allowance) is largely dependent upon future taxable income, future reversals of existing taxable temporary differences and the ability to carryback losses to available tax years. In assessing the need for a valuation allowance, we consider positive and negative evidence, including taxable income in carry-back years, scheduled reversals of deferred tax liabilities, expected future taxable income and tax planning strategies. At June 30, 2020 and December 31, 2019, a valuation allowance of \$92,000 was established for a capital loss carryforward related to the liquidation of assets of a partnership interest the Bank acquired through a loan settlement. Management believes it is more likely than not that all of the remaining deferred tax assets will be realized against deferred tax liabilities and projected future taxable income.

The net deferred tax asset recorded included the following amounts of deferred tax assets and liabilities (dollars in thousands):

	June 30, 2020	December 31, 2019
Deferred tax assets		
Allowance for loan losses	\$ 3,330	\$ 3,612
Net deferred loan fees	1,748	—
Nonaccrual loan interest	154	182
Valuation allowance on other real estate owned	83	76
Other	299	248
Gross deferred tax assets	5,614	4,118
Valuation allowance	(92)	(92)
Total net deferred tax assets	5,522	4,026
Deferred tax liabilities		
Depreciation	(1,124)	(1,053)
Prepaid expenses	(171)	(172)
Unrealized gain on securities available for sale	(1,213)	(406)
Net deferred loan costs	—	(67)
Other	(260)	(250)
Gross deferred tax liabilities	(2,768)	(1,948)
Net deferred tax asset	<u>\$ 2,754</u>	<u>\$ 2,078</u>

There were no unrecognized tax benefits at June 30, 2020 or December 31, 2019 and the Company does not expect the total amount of unrecognized tax benefits to significantly increase or decrease in the next twelve months. The Company is no longer subject to examination by the Internal Revenue Service for years before 2015.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 10 – COMMITMENTS AND OFF BALANCE-SHEET RISK

Some financial instruments are used to meet customer financing needs and to reduce exposure to interest rate changes. These financial instruments include commitments to extend credit and standby letters of credit. These involve, to varying degrees, credit and interest rate risk in excess of the amount reported in the financial statements.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the commitment, and generally have fixed expiration dates. Collateral or other security is normally not obtained for these financial instruments prior to their use and many of the commitments are expected to expire without being used. Standby letters of credit are conditional commitments to guarantee a customer's performance to a third party. Exposure to credit loss if the other party does not perform is represented by the contractual amount for commitments to extend credit and standby letters of credit.

A summary of the contractual amounts of financial instruments with off-balance-sheet risk was as follows at period-end (dollars in thousands):

	June 30, 2020	December 31, 2019
Commitments to make loans	\$ 83,367	\$ 65,648
Letters of credit	12,897	15,303
Unused lines of credit	584,989	502,200

The notional amount of commitments to fund mortgage loans to be sold into the secondary market was approximately \$25.1 million and \$11.0 million at June 30, 2020 and December 31, 2019, respectively.

At June 30, 2020, approximately 30.0% of the Bank's commitments to make loans were at fixed rates, offered at current market rates. The remainder of the commitments to make loans were at variable rates tied to prime or one month LIBOR and generally expire within 30 days. The majority of the unused lines of credit were at variable rates tied to prime.

NOTE 11 – CONTINGENCIES

The Company and its subsidiaries periodically become defendants in certain claims and legal actions arising in the ordinary course of business. As of June 30, 2020, there were no material pending legal proceedings to which the Company or any of its subsidiaries are a party or which any of its properties are the subject.

NOTE 12 – SHAREHOLDERS' EQUITY**Regulatory Capital**

The Company and the Bank are subject to regulatory capital requirements administered by federal banking agencies. Capital adequacy guidelines and prompt corrective action regulations involve quantitative measures of assets, liabilities, and certain off-balance-sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators about components, risk weightings, and other factors, and the regulators can lower classifications in certain cases. Failure to meet various capital requirements can initiate regulatory action that could have a direct material effect on the financial statements.

The prompt corrective action regulations provide five categories, including well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized, although these terms are not used to represent overall financial condition. If a bank is only adequately capitalized, regulatory approval is required to, among other things, accept, renew or roll-over brokered deposits. If a bank is undercapitalized, capital distributions and growth and expansion are limited, and plans for capital restoration are required.

In July 2013, the Board of Governors of the Federal Reserve Board and the FDIC approved the rules implementing the Basel Committee on Banking Supervision's capital guidelines for U.S. banks (commonly known as Basel III). The rules include a common equity Tier 1 capital to risk-weighted assets ratio (CET1 ratio) of 4.5% and a capital conservation buffer of 2.5% of risk-weighted assets, which effectively results in a minimum CET1 ratio of 7.0%. The minimum ratio of Tier 1 capital to risk-weighted assets is 6.0% (which, with the capital conservation buffer, effectively results in a minimum Tier 1 capital ratio of 8.5%), which effectively results in a minimum total capital to risk-weighted assets ratio of 10.5% (with the capital conservation buffer), and requires a minimum leverage ratio of 4.0%.

MACATAWA BANK CORPORATION

Approximately \$20.0 million of trust preferred securities outstanding at June 30, 2020 and December 31, 2019, respectively, qualified as Tier 1 capital. Refer to our 2019 Form 10-K for more information on the trust preferred securities.

The Bank was categorized as "well capitalized" at June 30, 2020 and December 31, 2019.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Macatawa Bank Corporation is a Michigan corporation and a registered bank holding company. It wholly-owns Macatawa Bank and Macatawa Statutory Trust II. Macatawa Bank is a Michigan chartered bank with depository accounts insured by the FDIC. The Bank operates twenty-six branch offices and a lending and operational service facility, providing a full range of commercial and consumer banking and trust services in Kent County, Ottawa County, and northern Allegan County, Michigan. Macatawa Statutory Trust II is a grantor trust and issued \$20.0 million of pooled trust preferred securities. Macatawa Statutory Trust II is not consolidated in our Consolidated Financial Statements. For further information regarding consolidation, see the Notes to Consolidated Financial Statements.

At June 30, 2020, we had total assets of \$2.45 billion, total loans of \$1.56 billion, total deposits of \$2.12 billion and shareholders' equity of \$229.3 million. For the three months ended June 30, 2020, we recognized net income of \$7.6 million compared to \$8.0 million for the same period in 2019. For the six months ended June 30, 2020, we recognized net income of \$14.0 million compared to \$15.6 million for the same period in 2019. The Bank was categorized as "well capitalized" under regulatory capital standards at June 30, 2020.

We paid a dividend of \$0.07 per share in each quarter in 2019 and \$0.08 per share in the first and second quarters of 2020.

In December 2019, news began to surface regarding an influenza pandemic in China, known as the novel coronavirus, or COVID-19. In January 2020, the United States restricted entry to anyone traveling from China. In February 2020, the pandemic spread broadly and swiftly throughout Europe and the Middle East, particularly in Italy and Iran. Cases began to surface in the United States in February 2020 and accelerated in early March 2020. The Federal Reserve reduced the overnight federal funds rate by 50 basis points on March 3, 2020 and by another 100 basis points on March 15, 2020 and announced the resumption of quantitative easing. During the week of March 9, 2020, individual states began implementing restrictions and promoting "social distancing". These restrictions included closure of schools, restrictions on the number of public gatherings, encouragement of work at home arrangements and other measures.

In Michigan, beginning March 24, 2020, Governor Gretchen Whitmer issued a series of "stay home, stay safe" executive orders, which required residents to remain at home "to the maximum extent feasible" and prohibited in-person work that "is not necessary to sustain or protect life." These "stay home, stay safe" executive orders severely limited economic activity in Michigan, requiring businesses not deemed to be essential, to severely limit or shut down operations. Under later "stay home, stay safe" executive orders, Governor Whitmer permitted certain industries, such as automotive, manufacturing, construction and retail, to begin to reopen, subject to stringent health and safety requirements and strict social distancing measures. On June 1, 2020, Governor Whitmer issued a "reopen" executive order, which rescinded the then current "stay home, stay safe" executive order, and which permitted limited activities under the Michigan Safe Start Plan. On June 5, 2020, Governor Whitmer issued a supplemental reopen executive order, which did not rescind the reopen order, but modified it for regions in the northern lower peninsula and the upper peninsula of Michigan by permitting larger social gatherings and additional activities. The supplemental reopen order also allowed non-essential personal care services in all of Michigan. The reopen order was further modified by another executive order that addresses restarting professional sports and another executive order that closed indoor services at bars in all of Michigan. As of June 30 2020, most businesses in Michigan, other than fitness centers and certain leisure and entertainment businesses, were allowed to be open in some capacity, subject to stringent health and safety requirements, strict social distancing measures and nonsurgical face mask requirements.

Congress passed a number of measures in late March 2020, designed to infuse cash into the economy to offset the negative impacts of business closings and restrictions. The COVID-19 pandemic is a highly unusual, unprecedented and evolving public health and economic crisis and may have a negative material impact on the Company's business, financial condition and results of operations and has had, and is likely to continue to have, a negative impact on many of our customers' business, financial condition and results of operations. Additionally, the negative consequences of the unprecedented economic shutdown nationally and in Michigan is likely to result in a higher level of future delinquencies, loan impairments and loan losses and require additional provisions for loan losses, which will have a negative impact on our results of operations.

The Company quickly responded to the changing environment by executing its business continuity plan and purchasing and deploying additional equipment to allow for a majority of its workforce to work remotely. The Bank's branch facilities remained open, but lobbies were closed with transactions being conducted through drive-up windows or on-line channels. The Company implemented rotations for onsite personnel, implemented enhanced daily cleaning of facilities and instructed personnel to maintain appropriate social distancing in its offices. As of June 30, 2020, branches were fully open with additional health and safety requirements to comply with Governor Whitmer's current executive orders, including, among other things, daily deep cleaning, nonsurgical face mask requirements and strict social distancing measures.

On March 22, 2020, the federal banking agencies issued an "Interagency Statement on Loan Modifications and Reporting for Financial Institutions Working with Customers Affected by the Coronavirus". This guidance encourages financial institutions to work prudently with borrowers that may be unable to meet their contractual obligations because of the effects of COVID-19. The guidance goes on to explain that in consultation with the FASB staff that the federal banking agencies conclude that short-term modifications (e.g. six months) made on a good faith basis to borrowers who were current as of the implementation date of a relief program are not Troubled Debt Restructurings ("TDRs"). The Coronavirus Aid, Relief and Economic Security ("CARES") Act was passed by Congress on March 27, 2020. Section 4013 of the CARES Act also addressed COVID-19 related modifications and specified that COVID-19 related modifications on loans that were current as of December 31, 2019 are not TDRs. Through June 30, 2020, the Bank had applied this guidance and modified 724 individual loans with aggregate principal balances totaling \$336.8 million. The majority of these modifications involved three-month extensions.

The CARES Act, as amended, included an allocation of \$659 billion for loans to be issued by financial institutions through the Small Business Administration (“SBA”) Paycheck Protection Program (“PPP”). PPP loans are forgivable, in whole or in part, if the proceeds are used for payroll and other permitted purposes in accordance with the requirements of the PPP. These loans carry a fixed rate of 1.00% and a term of two years (loans made before June 5, 2020) or five years (loans made on or after June 5, 2020), if not forgiven, in whole or in part. Payments are deferred until either the date on which the SBA remits the amount of forgiveness proceeds to the lender or the date that is 10 months after the last day of the covered period if the borrower does not apply for forgiveness within that 10 month period. The loans are 100% guaranteed by the SBA. Through June 30, 2020, the Bank had originated 1,643 PPP loans totaling \$335.7 million, with an average loan size of \$249,500. Fees totaling \$9.8 million were collected from the SBA for these loans in the three months ended June 30, 2020. These fees are deferred and amortized into interest income over the contractual period of 24 months or 70 months, as applicable. Upon SBA forgiveness, unamortized fees are then recognized into interest income. Participation in the PPP had a significant impact on the Bank’s asset mix and net interest income in the second quarter of 2020 and will continue to impact both asset mix and net interest income for the remainder of 2020. The PPP program has been extended until August 8, 2020, and may be extended again. The Bank may have additional PPP loan originations in the third quarter of 2020, but not likely at the pace experienced in the second quarter of 2020 as applications have slowed dramatically beginning in June 2020. At June 30, 2020, the Bank had \$427.0 million in overnight funds and \$331.9 million of available borrowing capacity from its correspondent banks. In addition, the Federal Reserve has implemented a liquidity facility available to financial institutions participating in the PPP. As such, the Bank believes it has sufficient liquidity sources as deposit balances decline with the deployment of these funds by PPP borrowers.

We are in an asset-sensitive position, so decreases in short-term interest rates have a net negative impact on our net interest income as our interest-earning assets will reprice faster than our interest-bearing liabilities. Given our asset-sensitivity, several years ago we established floors on our variable rate loans to help offset the negative impact of declining interest rates on net interest income. The benefit of these floors has become more evident in the second quarter of 2020 and will be in future quarters if the Federal Reserve maintains short-term interest rates at the low level established in March 2020. Additionally, our PPP loan origination activity should provide some offsetting positive impact on earnings in the remaining quarters of 2020, considering interest income on the loans and the processing fees paid by the SBA. The processing fees, alone, on the PPP loans originated in the second quarter 2020 amount to \$9.8 million, of which \$938,000 was recognized in the second quarter of 2020. We expect the majority of the remaining fees will be recognized in 2020 as the related loans are forgiven by the SBA. This expectation is subject to change due to borrower behavior, changing SBA requirements and processes related to loan forgiveness and other relevant factors. While the effects of COVID-19 are likely to have a far-reaching, long-lasting effect on the global, national, and Michigan economies, we believe we have sufficient capital and financial strength, as well as liquidity resources to mitigate the effects of the COVID-19 pandemic on our operations and financial condition, while continuing to serve our communities and protect shareholder value. This expectation is subject to change due to borrower behavior, changing SBA requirements and processes relating to loan forgiveness and other relevant factors.

RESULTS OF OPERATIONS

Summary: Net income for the three months ended June 30, 2020 was \$7.6 million, compared to \$8.0 million for the same period in 2019. Net income per share on a diluted basis for the three months ended June 30, 2020 was \$0.22 compared to \$0.24 for the same period in 2019. Net income for the six months ended June 30, 2020 was \$14.0 million, compared to \$15.6 million for the same period in 2019. Net income per share on a diluted basis for the six months ended June 30, 2020 was \$0.41 compared to \$0.46 for the same period in 2019.

The decrease in earnings in both the three and six months ended June 30, 2020 compared to the same periods in 2019 was due primarily to decreased net interest income and higher provision for loan losses. Net interest income decreased to \$15.0 million in the three months ended June 30, 2020 compared to \$16.0 million in the same period in 2019. Net interest income decreased to \$30.4 million in the six months ended June 30, 2020 compared to \$32.0 million in the six months ended June 30, 2019. These decreases in net interest income were primarily attributable to the decreases in short-term interest rates instituted by the Federal Reserve starting in July 2019 and through March 2020.

The provision for loan losses was \$1.0 million for the three months ended June 30, 2020, compared to a negative \$200,000 for the same period in 2019. We were in a net loan charge-off position for the three months ended June 30, 2020, with \$4.0 million in net loan charge-offs, compared to \$194,000 in net loan recoveries in the same period in 2019. We were also in a net loan charge-off position for the six months ended June 30, 2020, with \$3.0 million in net loan charge-offs compared to \$460,000 in net loan recoveries in the same period in 2019. Both the three and six month periods ended June 30, 2020 were impacted by a \$4.1 million charge-off taken in June 2020 related to a single loan relationship with a movie theater business where the underlying assets were sold through bankruptcy proceedings. The increase in provision for loan losses in the 2020 periods was also impacted by increases to qualitative environmental factors to address increased risk of loss attributable to the COVID-19 pandemic. Each of these items is discussed more fully below.

Net Interest Income: Net interest income totaled \$15.0 million for the three months ended June 30, 2020 compared to \$16.0 million for the same period in 2019. Net interest income decreased to \$30.4 million in the six months ended June 30, 2020 compared to \$32.0 million in the six months ended June 30, 2019.

Net interest income was positively impacted in the three months ended June 30, 2020 by an increase in average earning assets of \$355.8 million compared to the same period in 2019. However, our average yield on earning assets for the three months ended June 30, 2020 decreased 116 basis points compared to the same period in 2019 from 4.16% to 3.00%. For the six months ended June 30, 2020, our average earning assets increased by \$209.5 million compared to the same period in 2019, while our average yield on earning assets decreased 87 basis points compared to the same period in 2019 from 4.20% to 3.33%.

Net interest income for the second quarter of 2020 decreased \$908,000 compared to the same period in 2019. Of this decrease, \$4.3 million was due to changes in rates earned or paid, partially offset by an increase of \$3.4 million from changes in the volume of average interest assets and interest bearing liabilities. The largest changes came from interest income on commercial loans (excluding PPP loans) which fluctuated significantly in the second quarter of 2020 compared to the same period in 2019. The net change was \$2.5 million with a decrease in interest income due to rate of \$2.4 million and a decrease in interest income of \$42,000 due to portfolio contraction. PPP loans contributed \$1.6 million in net interest income in the second quarter of 2020. The other large change came in federal funds sold and other short-term investments interest income which decreased by \$1.0 million in the second quarter of 2020 compared to the same period in 2019. Of the \$1.0 million decrease in interest income on federal funds sold and other short-term investments, \$4.2 million was due to decreases in rates earned, partially offset by a \$3.2 million increase in average balances.

Average interest earning assets totaled \$2.22 billion for the three months ended June 30, 2020 compared to \$1.86 billion for the same period in 2019. An increase of \$206.2 million in average loans between periods and an increase of \$132.2 million in average federal funds sold and other short-term investments were the primary drivers of the increases. The net interest margin was 2.74% for the three months ended June 30, 2020 compared to 3.45% for the same period in 2019. Yield on commercial loans excluding PPP loans decreased from 4.84% for the three months ended June 30, 2019 to 3.91% for the same period in 2020. Yield on residential mortgage loans decreased from 3.72% for the three months ended June 30, 2019 to 3.70% for the same period in 2020, while yields on consumer loans decreased from 5.36% for the second quarter of 2019 to 4.18% for the second quarter of 2020. The decreases in yields on commercial loans and consumer loans, in particular, were the result of the predominance of loans in these categories with variable rates of interest tied to prime and LIBOR which decreased significantly from 2019 to 2020.

The Federal Reserve Board decreased the target federal funds rate by 50 basis points in the third quarter of 2019 and by 25 basis points in the fourth quarter of 2019 as the economy showed signs of slowing. In response to the news and government action related to COVID-19, the Federal Reserve Board decreased the target federal funds rate by 150 basis points in March 2020. As the Company is in an asset-sensitive position, reductions in market interest rates have a negative impact on margin as the Company's interest earning assets reprice faster than its interest-bearing liabilities. Much of our asset-sensitivity is due to commercial and consumer loans that have variable interest rates. For both loan types we established floor rates several years ago. These floors provide protection to net interest income when short-term interest rates decline. Our variable rate commercial and consumer loans tied to the prime rate or one-month LIBOR amounted to \$478.1 million at June 30, 2020. Of this total, approximately 82%, or \$390.1 million have interest rate floors. Without these floors net interest income for the second quarter of 2020 would have been lower than stated by approximately \$1.0 million.

The cost of funds decreased to 0.40% in the second quarter of 2020 compared to 1.01% in the second quarter of 2019. For the first six months of 2020, the cost of funds decreased to 0.53% compared to 1.00% for the same period in 2019. The sharp drop in the rates paid on our interest-bearing checking, savings and money market accounts in response to the federal funds rate decreases in the first quarter of 2020 and in the third and fourth quarters of 2019 caused the decrease in our cost of funds. Also contributing to the reduction in the cost of funds is our redemption of \$20.0 million in trust preferred securities on December 31, 2019, so there was no related interest expense in the 2020 periods.

The following table shows an analysis of net interest margin for the three month periods ended June 30, 2020 and 2019 (dollars in thousands):

	For the three months ended June 30,					
	2020			2019		
	Average Balance	Interest Earned or Paid	Average Yield or Cost	Average Balance	Interest Earned or Paid	Average Yield or Cost

Provision for Loan Losses: The provision for loan losses for the three months ended June 30, 2020 was \$1.0 million compared to a negative \$200,000 for the same period in 2019. The provision for loan losses for the first half of 2020 was \$1.7 million compared to a negative \$450,000 for the same period in 2019. The provisions for loan losses for the 2020 periods were impacted by additional qualitative adjustments made to provide for estimated losses associated with the COVID-19 pandemic as well as the large charge-off taken in June 2020, some of which was specifically reserved for previously. A \$4.1 million charge-off was taken in June 2020 related to a single loan relationship with a movie theater business for which the underlying assets were sold through bankruptcy proceedings. No other loans of this industry type remain in our portfolio. This was partially offset by continued strong asset quality metrics and loan portfolio contraction. The balances of loans graded 5 and 6, which receive higher allocations, decreased by \$16.6 million from December 31, 2019 to June 30, 2020. Specific reserves on impaired loans decreased by \$720,000 from \$1.6 million at December 31, 2019 to \$904,000 at June 30, 2020. When excluding PPP loans, which are 100% guaranteed by the SBA, total loans decreased by \$168.3 million in the three months ended June 30, 2020. Net loan charge-offs were \$4.0 million in the three months ended June 30, 2020 compared to net loan recoveries of \$194,000 in the same period in 2019.

Gross loan recoveries were \$149,000 for the three months ended June 30, 2020 and \$235,000 for the same period in 2019. In the three months ended June 30, 2020, we had \$4.2 million in charge-offs, compared to \$41,000 in the same period in 2019. For the six months ended June 30, 2020, we experienced gross loan recoveries of \$1.2 million compared to \$658,000 for the same period in 2019. Gross charge-offs for the six months ended June 30, 2020 were \$4.2 million compared to \$198,000 for the same period in 2019.

The amounts of loan loss provision in both the most recent quarter and comparable prior year period were the result of establishing our allowance for loan losses at levels believed necessary based upon our methodology for determining the adequacy of the allowance. More information about our allowance for loan losses and our methodology for establishing its level may be found under the heading "Allowance for Loan Losses" below.

Noninterest Income: Noninterest income for the three and six month periods ended June 30, 2020 was \$5.9 million and \$10.8 million compared to \$5.1 million and \$9.4 million for the same periods in 2019, respectively. The components of noninterest income are shown in the table below (in thousands):

	Three Months Ended June 30, 2020	Three Months Ended June 30, 2019	Six Months Ended June 30, 2020	Six Months Ended June 30, 2019
Service charges and fees on deposit accounts	\$ 860	\$ 1,078	\$ 1,970	\$ 2,128
Net gains on mortgage loans	1,849	614	2,499	825
Trust fees	945	1,003	1,880	1,893
Gain on sales of securities	—	—	—	—
ATM and debit card fees	1,321	1,481	2,658	2,808
Bank owned life insurance (“BOLI”) income	231	249	472	485
Investment services fees	228	353	652	649
Other income	420	320	682	638
Total noninterest income	\$ 5,854	\$ 5,098	\$ 10,813	\$ 9,426

Net gains on mortgage loans were up \$1.2 million in the three months ended June 30, 2020 and were up \$1.7 million in the six months ended June 30, 2020 compared to the same periods in 2019 as a result of an increase in the volume of loans originated for sale in the 2020 periods due to a lower interest rate environment, spurring more refinancing of fixed rate loans which we sell into the secondary market. Mortgage loans originated for sale in the three months ended June 30, 2020 were \$50.1 million, compared to \$21.4 million in the same period in 2019. For the first six months of 2020, mortgages originated for sale were \$79.4 million, compared to \$28.8 million for the same period in 2019.

Investment services fees were down \$125,000 in the three months ended June 30, 2020 and were up \$3,000 in the six months ended June 30, 2020 compared to the three and six months ended June 30, 2019, respectively. The reduction for the three month period ended June 30, 2020 was due to a slowdown in investment service activity resulting from the COVID-19 shutdown of the economy. ATM and debit card fees were down in the three and six months ended June 30, 2020 as compared to the three and six months ended June 30, 2019, respectively, due to reduced volume of usage by our customers during the COVID-19 shutdown of the economy in the second quarter of 2020. Service charges on deposit accounts decreased in the three and six months ended June 30, 2020 as compared to the same periods in 2019 due to lower overdraft fees as our customers have generally retained higher deposit balances in the low interest rate environment and due to uncertainty related to the COVID-19 pandemic, thereby resulting in fewer overdrafts.

Noninterest Expense: Noninterest expense decreased by \$830,000 to \$10.5 million for the three month period ended June 30, 2020 as compared to the same period in 2019. Noninterest expense decreased by \$347,000 to \$22.2 million for the six months ended June 30, 2020 compared to \$22.6 million for the same period in 2019. The components of noninterest expense are shown in the table below (in thousands):

	Three Months Ended June 30, 2020	Three Months Ended June 30, 2019	Six Months Ended June 30, 2020	Six Months Ended June 30, 2019
Salaries and benefits	\$ 5,766	\$ 6,379	\$ 12,457	\$ 12,623
Occupancy of premises	949	996	1,958	2,089
Furniture and equipment	882	866	1,737	1,710
Legal and professional	247	211	538	441
Marketing and promotion	239	233	477	461
Data processing	787	761	1,547	1,491
FDIC assessment	76	119	76	239
Interchange and other card expense	327	365	674	711
Bond and D&O insurance	104	103	209	206
Net (gains) losses on repossessed and foreclosed properties	2	(34)	32	(69)
Administration and disposition of problem assets	15	49	46	137
Outside services	378	493	831	945
Other noninterest expense	732	793	1,644	1,589
Total noninterest expense	\$ 10,504	\$ 11,334	\$ 22,226	\$ 22,573

Most categories of noninterest expense were relatively unchanged compared to the three months ended June 30, 2019 due to our ongoing efforts to manage expenses and scale our operations. Our largest component of noninterest expense, salaries and benefits, decreased by \$613,000 in the three months ended June 30, 2020 from same period in 2019. This decrease is due partially to actions taken to mitigate the effects of the COVID-19 pandemic including personnel hiring and pay freezes, salary reductions for senior management, and halting of 401k matching contributions and bonus accruals. In addition, we experienced lower claims in our on medical insurance plan and higher cost deferrals from commercial loan production due to 1,635 PPP loans originated. Partially offsetting these decreases was an increase in variable-based compensation due to higher mortgage origination volume. Salaries and benefits decreased by \$166,000 for the six months ended June 30, 2020 compared to the six months ended June 30, 2019 due to the same combination of factors. The table below identifies the primary components of salaries and benefits (in thousands):

	Three Months Ended June 30, 2020	Three Months Ended June 30, 2019	Six Months Ended June 30, 2020	Six Months Ended June 30, 2019
Salaries and other compensation	5,561	5,505	11,241	10,813
Salary deferral from commercial loans	(529)	(219)	(670)	(382)
Bonus accrual	54	282	323	568
Mortgage production - variable comp	334	132	518	207
401k matching contributions	58	178	270	372
Medical insurance costs	288	501	775	1,045
Total salaries and benefits	\$ 5,766	\$ 6,379	\$ 12,457	\$ 12,623

Occupancy expenses were down \$47,000 in the three months ended June 30, 2020 and were down \$131,000 in the six months ended June 30, 2020 compared to the same periods in 2019 due to lower maintenance costs incurred associated with certain branch facilities. Furniture and equipment expenses were up \$16,000 in the three months ended June 30, 2020 and were up \$27,000 in the six months ended June 30, 2020 compared to the same periods in 2019 due to costs associated with equipment and service contracts.

Our FDIC assessment costs decreased by \$43,000 in the three months ended June 30, 2020 compared to the same period in 2019 due to utilization of assessment credits. In January 2019, the FDIC notified us that the Bank would receive an assessment credit of approximately \$400,000 to offset future assessments as the FDIC Deposit Insurance Fund had exceeded its target ratio of 1.35%. Assessment credits totaling \$266,000 were applied in the third and fourth quarters of 2019, \$136,000 was applied in the first quarter of 2020 and the remaining \$36,000 was applied in the second quarter of 2020. Expenses for future periods will increase as the Bank has utilized all of its assessment credits as of June 30, 2020.

Costs associated with administration and disposition of problem assets have decreased significantly over the past several years. These expenses include legal costs and repossessed and foreclosed property administration expense. Repossessed and foreclosed property administration expense includes survey and appraisal, property maintenance and management and other disposition and carrying costs. Net (gains) losses on repossessed and foreclosed properties include both net gains and losses on the sale of properties and unrealized losses from value declines for outstanding properties.

These costs are itemized in the following table (in thousands):

	Three Months Ended June 30, 2020	Three Months Ended June 30, 2019	Six Months Ended June 30, 2020	Six Months Ended June 30, 2019
Legal and professional – nonperforming assets	\$ 8	\$ 26	\$ 24	\$ 69
Repossessed and foreclosed property administration	7	23	22	68
Net (gains) losses on repossessed and foreclosed properties	2	(34)	32	(69)
Total	\$ 17	\$ 15	\$ 78	\$ 68

As the level of problem loans and assets has declined, the costs associated with these nonperforming assets have decreased significantly over the past several years. Other real estate owned decreased from \$3.1 million at June 30, 2019 to \$2.6 million at June 30, 2020.

Net (gains) losses on repossessed assets and foreclosed properties for the three month period ended June 30, 2020 swung unfavorably by \$36,000 compared to the same period in 2019. For the first six months of 2020, net (gains) losses swung unfavorably by \$101,000 compared to the same period in 2019. These net increases in expense were due to an improvement in net gains realized in the 2019 periods. In the three month period ended June 30, 2020, valuation writedowns totaled \$2,000 while there were no valuation writedowns during the same period in 2019. In the six month period ended June 30, 2020, valuation writedowns totaled \$32,000 compared to valuation writedowns of \$10,000 for the same period in 2019. In the three month period ended June 30, 2020, net realized gains totaled \$0, compared to net realized gains of \$34,000 for the same period in 2019. For the six months ended June 30, 2020, net realized gains totaled \$0, compared to net realized gains of \$79,000 for the same period in 2019.

Outside services were down \$115,000 and \$114,000 in the three and six month periods ended June 30, 2020, respectively, compared to the same periods in 2019 due to ongoing efforts to manage and scale these costs.

Federal Income Tax Expense: We recorded \$1.8 million and \$3.2 million in federal income tax expense for the three and six month periods ended June 30, 2020 compared to \$1.9 million and \$3.6 million for the same periods in 2019. Our effective tax rates for the three and six month periods ended June 30, 2020 were 18.72% and 18.50%, respectively, compared to 19.32% and 18.83% for the same periods in 2019.

FINANCIAL CONDITION

Total assets were \$2.45 billion at June 30, 2020, an increase of \$382.4 million from December 31, 2019. This change reflected increases of \$187.6 million in cash and cash equivalents, \$4.2 million in securities available for sale, \$6.5 million in securities held to maturity, and \$335.7 million in PPP loans, partially offset by decreases of \$158.6 million in our loan portfolio excluding PPP loans. Total deposits increased by \$365.0 million at June 30, 2020 compared to December 31, 2019.

Cash and Cash Equivalents: Our cash and cash equivalents, which include federal funds sold and short-term investments, were \$460.0 million at June 30, 2020 compared to \$272.5 million at December 31, 2019. The increase in these balances related to an increase in our total deposits due to customers holding higher balances, particularly liquid deposits, in the low interest rate environment and due to uncertainty related to the COVID-19 pandemic.

Securities: Debt securities available for sale were \$229.5 million at June 30, 2020 compared to \$225.2 million at December 31, 2019. The balance at June 30, 2020 primarily consisted of U.S. agency securities, agency mortgage backed securities and various municipal investments. Our held to maturity portfolio was \$89.2 million at June 30, 2020 compared to \$82.7 million at December 31, 2019. Our held to maturity portfolio is comprised of state, municipal and privately placed commercial bonds.

Portfolio Loans and Asset Quality: Total portfolio loans increased by \$177.1 million in the first six months of 2020 and were \$1.56 billion at June 30, 2020 compared to \$1.39 billion at December 31, 2019. During the first six months of 2020, our commercial portfolio increased by \$212.7 million. The SBA created the Paycheck Protection Program to provide an efficient means to provide funding for small businesses to maintain payroll and operations during the COVID-19 pandemic. We are an active participant in this program and originated a total of 1,635 loans totaling \$335.7 million in the second quarter of 2020. Borrowers who use the funds from their PPP loans to maintain payroll and for certain fixed expenses such as rent, occupancy, etc. are eligible to have 100% of their loans forgiven by the SBA. We expect a substantial majority of our PPP borrowers will apply for and receive approval for loan forgiveness in the second half of 2020. This expectation is subject to change due to borrower behavior, changing SBA requirements and processes relating to loan forgiveness and other relevant factors. Excluding the PPP originations, our commercial loans decreased by \$123.0 million in the first six months of 2020. Our consumer portfolio decreased by \$7.4 million and our residential mortgage portfolio decreased by \$28.2 million in the first six months of 2020.

Mortgage loans originated for portfolio are typically adjustable rate loans as well as fixed rate loans that conform to secondary market requirements and have a term of fifteen years or less. Mortgage loans originated for portfolio in the first six months of 2020 increased \$3.1 million compared to the same period in 2019, from \$15.0 million in the first six months of 2019 to \$18.1 million in the same period in 2020.

The volume of residential mortgage loans originated for sale in the first six months of 2020 increased \$50.6 million compared to the same period in 2019. Residential mortgage loans originated for sale were \$79.4 million in the first six months of 2020 compared to \$28.8 million in the first six months of 2019.

The following table shows our loan origination activity for loans to be held in portfolio during the first six months of 2020 and 2019, broken out by loan type and also shows average originated loan size (dollars in thousands):

	Six months ended June 30, 2020			Six months ended June 30, 2019		
	Portfolio Originations	Percent of Total Originations	Average Loan Size	Portfolio Originations	Percent of Total Originations	Average Loan Size

(1) Six months ended June 30, 2020 includes \$335.7 million in PPP loan originations

The following table shows a breakout of our commercial loan activity during the first six months of 2020 and 2019 (dollars in thousands):

	Six Months Ended June 30, 2020	Six Months Ended June 30, 2019
Commercial loans originated (1)	\$ 500,039	\$ 138,463
Repayments of commercial loans	(206,256)	(170,076)
Change in undistributed - available credit	(81,096)	(19,910)
Net decrease in total commercial loans	\$ 212,687	\$ (51,523)

(1) Six months ended June 30, 2020 includes \$335.7 million in PPP loan originations

Overall, the commercial loan portfolio increased \$212.7 million in the first six months of 2020. Our commercial and industrial portfolio increased by \$241.2 million while our commercial real estate loans decreased by \$28.5 million. As discussed above, included in the commercial production for the first six months of 2020 is \$335.7 million in PPP loans. Our overall production of commercial loans increased by \$361.5 million from \$138.5 million in the first six months of 2019 to \$500.0 million in the same period of 2020. Beyond the effect of the PPP loan production, our commercial and industrial portfolio is subject to seasonal fluctuations and we typically experience large paydowns in certain commercial loan categories in the second quarter each year, particularly nursery and floriculture production, and loans to automobile, recreational vehicle and boat dealers. Excluding the PPP loan activity, the commercial loan categories with the largest balance fluctuations in the first six months of 2020 were: agricultural products (down \$26.3 million), construction (down \$6.2 million), manufacturing (down \$19.2 million), retail trade (down \$57.0 million) and real estate and rental/leasing (down \$13.3 million). Retail trade includes floor plan loan lines to vehicle dealers. The decline in borrowings in this sector was primarily the result of our dealers selling through their inventory but not being able to receive new inventory due to supply shortages from the COVID-19 shutdown of the economy.

Commercial and commercial real estate loans remained our largest loan segment and accounted for approximately 83.9% and 79.2% of the total loan portfolio at June 30, 2020 and December 31, 2019, respectively. Residential mortgage and consumer loans comprised approximately 16.1% and 20.8% of total loans at June 30, 2020 and December 31, 2019, respectively.

A further breakdown of the composition of the loan portfolio is shown in the table below (in thousands):

	June 30, 2020		December 31, 2019	
	Balance	Percent of Total Loans	Balance	Percent of Total Loans
Commercial real estate: (1)				
Residential developed	\$ 10,930	0.7%	\$ 14,705	1.1%
Unsecured to residential developers	—	—	—	—
Vacant and unimproved	42,275	2.7	41,796	3.0

Home equity	64,554	4.1	70,936	5.1
Other secured	4,384	0.3	5,338	0.4
Total consumer	251,971	16.1	287,597	20.8
Total loans	\$ 1,562,688	100.0%	\$ 1,385,627	100.0%

(1) Includes both owner occupied and non-owner occupied commercial real estate.

(2) June 30, 2020 balances include PPP loans totaling \$335.7 million.

Commercial real estate loans accounted for 36.5% and 43.2% of the total loan portfolio at June 30, 2020 and December 31, 2019, respectively, and consisted primarily of loans to business owners and developers of owner and non-owner occupied commercial properties and loans to developers of single and multi-family residential properties. In the table above, we show our commercial real estate portfolio by loans secured by residential and commercial real estate, and by stage of development. Improved loans are generally secured by properties that are under construction or completed and placed in use. Development loans are secured by properties that are in the process of development or fully developed. Vacant and unimproved loans are secured by raw land for which development has not yet begun and agricultural land.

Our consumer residential mortgage loan portfolio, which also includes residential construction loans made to individual homeowners, comprised 11.7% of portfolio loans at June 30, 2020 and 15.3% at December 31, 2019. We expect to continue to retain in our loan portfolio certain types of residential mortgage loans (primarily high quality, low loan-to-value loans) in an effort to continue to diversify our credit risk and deploy our excess liquidity.

The volume of residential mortgage loans originated for sale during the first six months of 2020 increased significantly from the first six months of 2019 as a result of interest rate conditions. The decrease in market interest rates in early 2020 has caused an increase in refinancing of fixed rate mortgages which we sell into the secondary market.

Our portfolio of other consumer loans includes loans secured by personal property and home equity fixed term and line of credit loans. This portfolio decreased by \$7.4 million to \$69.2 million at June 30, 2020 from \$76.5 million at December 31, 2019, due primarily to a decrease in home equity loans. These other consumer loans comprised 4.4% of our portfolio loans at June 30, 2020 and 5.5% at December 31, 2019.

Our loan portfolio is reviewed regularly by our senior management, our loan officers, and an internal loan review team that is independent of our loan originators and credit administration. An administrative loan committee consisting of senior management and seasoned lending and collections personnel meets quarterly to manage our internal watch list and proactively manage high risk loans.

When reasonable doubt exists concerning collectability of interest or principal of one of our loans, the loan is placed in nonaccrual status. Any interest previously accrued but not collected is reversed and charged against current earnings.

Nonperforming assets are comprised of nonperforming loans, foreclosed assets and repossessed assets. At June 30, 2020, nonperforming assets totaled \$5.6 million compared to \$3.0 million at December 31, 2019. There were no additions to other real estate owned in the first six months of 2020 or in the first six months of 2019. At June 30, 2020, there were no loans in redemption, so we expect there to be few additions to other real estate owned in 2020. Proceeds from sales of foreclosed properties were \$92,000 in the first six months of 2020, resulting in net realized gain on sales of \$0. Proceeds from sales of foreclosed properties were \$382,000 in the first six months of 2019 resulting in net realized gain on sales of \$79,000.

Nonperforming loans include loans on nonaccrual status and loans delinquent more than 90 days but still accruing. Nonperforming loans at June 30, 2020 consisted of \$2.9 million of commercial real estate loans and \$100,000 of consumer and residential mortgage loans. As of June 30, 2020, nonperforming loans totaled \$3.0 million, or 0.19% of total portfolio loans, compared to \$203,000, or 0.01% of total portfolio loans, at December 31, 2019. The increase in nonperforming loans in the six months ended June 30, 2020 is attributable to one loan relationship for which a charge-off of \$4.1 million was taken in June 2020. The remaining balance for this loan of \$2.9 million constitutes most of the nonperforming loan total.

Foreclosed and repossessed assets include assets acquired in settlement of loans. Foreclosed assets totaled \$2.6 million at June 30, 2020 and \$2.7 million at December 31, 2019. The entire balance at June 30, 2020 was comprised of eight commercial real estate properties. All properties acquired through or in lieu of foreclosure are initially transferred at their fair value less estimated costs to sell and then evaluated monthly for impairment after transfer using a lower of cost or market approach. Updated property valuations are obtained at least annually on all foreclosed assets.

At June 30, 2020, our foreclosed asset portfolio had a weighted average age held in portfolio of 8.34 years. Below is a breakout of our foreclosed asset portfolio at June 30, 2020 and December 31, 2019 by property type and the percentages the property has been written down since taken into our possession and the combined writedown percentage, including losses taken when the property was loan collateral (dollars in thousands):

Foreclosed Asset Property Type	June 30, 2020			December 31, 2019		
	Carrying Value	Foreclosed Asset Writedown	Combined Writedown (Loan and Foreclosed Asset)	Carrying Value	Foreclosed Asset Writedown	Combined Writedown (Loan and Foreclosed Asset)
Single Family	—	—	—	—	—	—
Residential Lot	—	—	—	—	—	—
Multi-Family	—	—	—	—	—	—
Vacant Land	66	72.0%	78.2%	79	66.6%	74.1%
Residential Development	215	51.2	77.7	326	38.7	69.1
Commercial Office	—	—	—	—	—	—
Commercial Industrial	—	—	—	—	—	—
Commercial Improved	2,343	—	—	2,343	—	—
	<u>\$ 2,624</u>	13.1	27.3	<u>\$ 2,748</u>	11.7	25.8

The following table shows the composition and amount of our nonperforming assets (dollars in thousands):

	June 30, 2020	December 31, 2019
Nonaccrual loans	\$ 2,957	\$ 203
Loans 90 days or more delinquent and still accruing	—	—
Total nonperforming loans (NPLs)	2,957	203
Foreclosed assets	2,624	2,748
Repossessed assets	—	—
Total nonperforming assets (NPAs)	\$ 5,581	\$ 2,951
NPLs to total loans	0.19%	0.01%
NPAs to total assets	0.23%	0.14%

The following table shows the composition and amount of our troubled debt restructurings (TDRs) at June 30, 2020 and December 31, 2019 (dollars in thousands):

	June 30, 2020			December 31, 2019		
	Commercial	Consumer	Total	Commercial	Consumer	Total
Performing TDRs	\$ 3,909	\$ 4,688	\$ 8,597	\$ 8,469	\$ 5,140	\$ 13,609
Nonperforming TDRs (1)	97	—	97	98	—	98
Total TDRs	\$ 4,006	\$ 4,688	\$ 8,694	\$ 8,567	\$ 5,140	\$ 13,707

(1) Included in nonperforming asset table above

We had a total of \$8.7 million and \$13.7 million of loans whose terms have been modified in TDRs as of June 30, 2020 and December 31, 2019, respectively. These loans may have involved the restructuring of terms to allow customers to mitigate the risk of foreclosure by meeting a lower loan payment requirement based upon their current cash flow. These may also include loans that renewed at existing contractual rates, but below market rates for comparable credit. For each restructuring, a comprehensive credit underwriting analysis of the borrower's financial condition and prospects of repayment under the revised terms is performed to assess whether the structure can be successful and whether cash flows will be sufficient to support the restructured debt. An analysis is also performed to determine whether the restructured loan should be on accrual status. Generally, if the loan is on accrual at the time of restructure, it will remain on accrual after the restructuring. In some cases, a nonaccrual loan may be placed on accrual at restructuring if the loan's actual payment history demonstrates it would have cash flowed under the restructured terms. After six consecutive payments under the restructured terms, a nonaccrual restructured loan is reviewed for possible upgrade to accruing status. In situations where there is a subsequent modification or renewal and the loan is brought to market terms, including a contractual interest rate not less than a market interest rate for new debt with similar credit risk characteristics, the TDR and impaired designations may be removed. Total TDRs decreased by \$5.0 million from December 31, 2019 to June 30, 2020 due to payoffs and paydowns on existing TDRs exceeding new additions. There were 84 loans identified as TDRs at June 30, 2020 compared to 91 loans at December 31, 2019.

As with other impaired loans, an allowance for loan loss is estimated for each TDR based on the most likely source of repayment for each loan. For impaired commercial real estate loans that are collateral dependent, the allowance is computed based on the fair value of the underlying collateral, less estimated costs to sell. For impaired commercial loans where repayment is expected from cash flows from business operations, the allowance is computed based on a discounted cash flow computation. Certain groups of TDRs, such as residential mortgages, have common characteristics and for them the allowance is computed based on a discounted cash flow computation on the change in weighted rate for the pool. The allowance allocations for commercial TDRs where we have reduced the contractual interest rate are computed by measuring cash flows using the new payment terms discounted at the original contractual rate.

On March 22, 2020, the federal banking agencies issued an "Interagency Statement on Loan Modifications and Reporting for Financial Institutions Working with Customers Affected by the Coronavirus". This guidance encourages financial institutions to work prudently with borrowers that may be unable to meet their contractual obligations because of the effects of COVID-19. The guidance goes on to explain that in consultation with the FASB staff that the federal banking agencies conclude that short-term modifications (e.g. six months) made on a good faith basis to borrowers who were current as of the implementation date of a relief program are not Troubled Debt Restructurings ("TDRs"). The Coronavirus Aid, Relief and Economic Security ("CARES") Act was passed by Congress on March 27, 2020. Section 4013 of the CARES Act also addressed COVID-19 related modifications and specified that COVID-19 related modifications on loans that were current as of December 31, 2019 are not TDRs. Through June 30, 2020, the Bank had applied this guidance and modified 724 individual loans with aggregate principal balances totaling \$336.8 million. The majority of these modifications involved three-month extensions.

Allowance for loan losses: The allowance for loan losses at June 30, 2020 was \$15.9 million, a decrease of \$1.3 million from December 31, 2019. The allowance for loan losses represented 1.01% of total portfolio loans at June 30, 2020 and 1.24% at December 31, 2019. The ratio at June 30, 2020 is impacted by \$335.7 million of PPP loans which were generated during the second quarter of 2020. The ratio excluding these loans was 1.29% at June 30, 2020. The allowance for loan losses to nonperforming loan coverage ratio decreased from 8473% at December 31, 2019 to 536.2% at June 30, 2020.

The table below shows the changes in certain credit metrics over the past five quarters (dollars in millions):

	Quarter Ended June 30, 2020	Quarter Ended March 31, 2020	Quarter Ended December 31, 2019	Quarter Ended September 30, 2019	Quarter Ended June 30, 2019
Commercial loans	\$ 1,310.7	\$ 1,120.0	\$ 1,098.0	\$ 1,072.5	\$ 1,030.6
Nonperforming loans	3.0	7.2	0.2	0.2	0.3
Other real estate owned and repo assets	2.6	2.6	2.7	3.1	3.1
Total nonperforming assets	5.6	9.9	3.0	3.3	3.4
Net charge-offs (recoveries)	4.0	(1.0)	(0.0)	(0.3)	(0.2)
Total delinquencies	3.3	0.5	0.4	0.2	0.4

A \$4.1 million charge-off was taken in June 2020 related to a single loan relationship with a movie theater business for which the underlying assets were sold through bankruptcy proceedings. This was an isolated charge-off, the amount of which was amplified by the COVID-19 shutdown of the economy. No other loans of this industry type remain in our portfolio. While the large charge-off taken in the second quarter of 2020 caused us to have net loan charge-offs for the quarter, at June 30, 2020, we had net loan recoveries in twenty of the past twenty-two quarters. Our total delinquencies were \$3.3 million at June 30, 2020 and \$405,000 at December 31, 2019. Our delinquency percentage at June 30, 2020 was 0.21%.

These factors all impact our necessary level of allowance for loan losses and our provision for loan losses. The allowance for loan losses decreased \$1.3 million in the first six months of 2020. We recorded a provision for loan losses of \$1.7 million for the six months ended June 30, 2020 compared to a negative \$450,000 for the same period of 2019. Net loan charge-offs were \$3.0 million for the six months ended June 30, 2020, compared to net loan recoveries of \$460,000 for the same period in 2019. The ratio of net charge-offs (recoveries) to average loans was 0.41% on an annualized basis for the first six months of 2020 and -0.07% for the first six months of 2019.

Despite the large charge-off taken in the second quarter of 2020, we are encouraged by the reduced level of gross charge-offs over recent quarters. We do, however, recognize that future charge-offs and resulting provisions for loan losses are expected to be impacted by the timing and extent of changes in the overall economy and the real estate markets, in particular due to the impact of COVID-19.

Our allowance for loan losses is maintained at a level believed appropriate based upon our assessment of the probable estimated losses inherent in the loan portfolio. Our methodology for measuring the appropriate level of allowance and related provision for loan losses relies on several key elements, which include specific allowances for loans considered impaired, general allowance for commercial loans not considered impaired based upon applying our loan rating system, and general allocations based on historical trends for homogeneous loan groups with similar risk characteristics.

Overall, impaired loans declined by \$2.4 million to \$11.5 million at June 30, 2020 compared to \$13.9 million at December 31, 2019. The specific allowance for impaired loans decreased \$720,000 to \$904,000 at June 30, 2020, compared to \$1.6 million at December 31, 2019. The specific allowance for impaired loans represented 7.9% of total impaired loans at June 30, 2020 and 11.7% at December 31, 2019.

The general allowance allocated to commercial loans that were not considered to be impaired was based upon the internal risk grade of such loans. We use a loan rating method based upon an eight point system. Loans are stratified between real estate secured and non-real estate secured. The real estate secured portfolio is further stratified by the type of real estate. Each stratified portfolio is assigned a loss allocation factor. A higher numerical grade assigned to a loan category generally results in a greater allocation percentage. Changes in risk grade of loans affect the amount of the allowance allocation.

The determination of our loss factors is based upon our actual loss history by loan grade and adjusted for significant factors that, in management's judgment, affect the collectability of the portfolio as of the analysis date. We use a rolling 18 month actual net charge-off history as the base for our computation. Over the past few years, the 18 month period computations have reflected sizeable decreases in net charge-off experience. We addressed this volatility in the qualitative factor considerations applied in our allowance for loan losses computation. We also considered the extended period of strong asset quality in assessing the overall qualitative component.

At June 30, 2020, we also considered the effect that the global economic shutdown to combat COVID-19 is having on our loan borrowers and our local economy. An analysis of each credit in our commercial loan portfolio was performed during the quarter ended June 30, 2020 to evaluate the impact of the shutdown on each business and identify the potential loss exposure. While this analysis revealed limited stress in our portfolio and significant stimulus and mitigation efforts are expected to soften the shutdown impact, we believe a downgrade to our economic qualitative factor was appropriate and, after adding 7 basis points to this qualitative factor at March 31, 2020, we added another 6 basis points at June 30, 2020. We also added 4 basis points to our valuation qualitative factor at June 30, 2020 due to the potential for devalued collateral in the current environment.

Certain industry sectors will be more negatively impacted by the economic effects of COVID-19 and governmental action than others. For example, businesses that thrive on large masses of people assembling in close proximity, such as hospitality, restaurants and sporting events will likely incur longer negative effects than other industries. We believe our commercial portfolio is adequately diversified, with our largest commercial concentrations in Real Estate, Rental and Leasing (22%), followed by Manufacturing (13%) and Retail Trade (10%).

The table below breaks down our commercial loan portfolio by industry type at June 30, 2020 and identifies the percentage of loans in each type that have a pass rating within our grading system (4 or better) and criticized rating (5 or worse) (dollars in thousands):

Industry:	June 30, 2020					
	Excluding PPP	PPP Loans	Total	Percent of Total Loans	Percent Grade 4 or Better	Percent Grade 5 or Worse
Agricultural Products	\$ 52,136	\$ 17,617	\$ 69,753	5.32%	96.04%	3.96%
Mining and Oil Extraction	1,935	103	2,038	0.16%	100.00%	0.00%
Utilities	—	44	44	0.00%	100.00%	0.00%
Construction	75,390	51,443	126,833	9.68%	99.37%	0.63%
Manufacturing	116,064	59,638	175,702	13.41%	96.83%	3.17%
Wholesale Trade	63,868	16,446	80,314	6.13%	99.90%	0.10%
Retail Trade	111,379	22,598	133,977	10.22%	99.97%	0.03%
Transportation and Warehousing	43,882	20,956	64,838	4.95%	97.84%	2.16%
Information	3,518	4,596	8,114	0.62%	65.98%	34.02%
Finance and Insurance	37,861	6,569	44,430	3.39%	100.00%	0.00%
Real Estate and Rental and Leasing	289,263	4,250	293,513	22.39%	99.39%	0.61%
Professional, Scientific and Technical Services	5,403	24,258	29,661	2.26%	99.12%	0.88%
Management of Companies and Enterprises	6,267	349	6,616	0.50%	100.00%	0.00%
Administrative and Support Services	22,395	28,695	51,090	3.90%	100.00%	0.00%
Education Services	3,310	10,054	13,364	1.02%	99.25%	0.75%
Health Care and Social Assistance	60,460	32,403	92,863	7.08%	99.99%	0.01%
Arts, Entertainment and Recreation	7,909	4,458	12,367	0.94%	97.17%	2.83%
Accommodations and Food Services	42,398	12,996	55,394	4.23%	96.99%	3.01%
Other Services	31,595	18,089	49,684	3.79%	99.26%	0.74%
Public Administration	16	106	122	0.01%	100.00%	0.00%
Private Households	—	—	—	0.00%	0.00%	0.00%
Total commercial loans	<u>\$ 975,049</u>	<u>\$ 335,668</u>	<u>\$ 1,310,717</u>	<u>100.00%</u>	<u>98.63%</u>	<u>1.37%</u>

Accommodations and Food Services in the table above includes our loans to restaurants and hotels. We have reviewed each relationship in this industry group and have determined based upon their nature of operations and our loan structure that we believe our loss exposure is limited. Further, the Information segment noted above shows 34.02% of the total with a loan grade of 5 or worse. This entire balance relates solely to the remaining balance of the movie theater relationship on which the large June 2020 charge-off was taken. This remaining balance has been deemed fully collectible as of June 30, 2020.

Groups of homogeneous loans, such as residential real estate and open- and closed-end consumer loans, receive allowance allocations based on loan type. A rolling 12 month (four quarter) historical loss experience period was applied to residential mortgage and consumer loan portfolios. As with commercial loans that are not considered impaired, the determination of the allowance allocation percentage is based principally on our historical loss experience. These allocations are adjusted for consideration of general economic and business conditions, credit quality and delinquency trends, collateral values, and recent loss experience for these similar pools of loans. The homogeneous loan allowance was \$2.7 million at June 30, 2020 and \$2.6 million at December 31, 2019.

The allowance allocations are not intended to imply limitations on usage of the allowance for loan losses. The entire allowance for loan losses is available for any loan losses without regard to loan type.

Premises and Equipment: Premises and equipment totaled \$43.1 million at June 30, 2020, down \$365,000 from \$43.4 million at December 31, 2019.

Deposits and Other Borrowings: Total deposits increased \$365.0 million to \$2.12 billion at June 30, 2020, as compared to \$1.75 billion at December 31, 2019. Non-interest checking account balances increased \$266.1 million during the first six months of 2020. Interest bearing demand account balances increased \$43.9 million and savings and money market account balances increased \$73.0 million in the first six months of 2020. Certificates of deposits decreased by \$18.0 million in the first six months of 2020. Our overall deposit balances are elevated as a result of customers holding higher level of liquid deposits in this low interest rate environment and due to uncertainty related to the COVID-19 pandemic. Business deposits are also elevated due to balances including PPP loan proceeds not yet fully utilized. We believe our success in maintaining the balances of personal and business checking and savings accounts was primarily attributable to our focus on quality customer service, the desire of customers to deal with a local bank, the convenience of our branch network and the breadth and depth of our sophisticated product line.

Noninterest bearing demand accounts comprised 35.4% of total deposits at June 30, 2020 and 27.5% at December 31, 2019. These balances typically increase at year end for many of our commercial customers, then decline in the first quarter. Because of the generally low rates paid on interest bearing account alternatives, many of our business customers chose to keep their balances in these more liquid noninterest bearing demand account types. Interest bearing demand, including money market and savings accounts, comprised 58.3% of total deposits at June 30, 2020 and 63.8% at December 31, 2019. Time accounts as a percentage of total deposits were 6.3% at June 30, 2020 and 8.7% December 31, 2019.

Borrowed funds totaled \$90.6 million at June 30, 2020, including \$70.0 million of Federal Home Loan Bank ("FHLB") advances and \$20.6 million in long-term debt associated with trust preferred securities. Borrowed funds totaled \$80.6 million at December 31, 2019, including \$60.0 million of FHLB advances and \$20.6 million in long-term debt associated with trust preferred securities. The \$10.0 million increase in borrowed funds in the six months ended June 30, 2020 was due to the addition of a \$10.0 million FHLB advance in February 2020.

CAPITAL RESOURCES

Total shareholders' equity of \$229.3 million at June 30, 2020 increased \$11.9 million from \$217.5 million at December 31, 2019. The increase was primarily a result of net income of \$14.0 million earned in the first six months of 2020 and an increase of \$3.0 million in accumulated other comprehensive income, partially offset by a payment of \$5.4 million in cash dividends to shareholders. The Bank was categorized as "well capitalized" at June 30, 2020.

Capital guidelines for U.S. banks are commonly known as Basel III guidelines. The rules include a common equity Tier 1 capital to risk-weighted assets ratio (CET1 ratio) of 4.5% and a capital conservation buffer of 2.5% of risk-weighted assets, effectively resulting in a minimum CET1 ratio of 7.0%. The Basel III minimum ratio of Tier 1 capital to risk-weighted assets is 6.0% (which, with the capital conservation buffer, effectively results in a minimum Tier 1 capital ratio of 8.5%), and the minimum total capital to risk-weighted assets ratio is 10.5% (with the capital conservation buffer), and Basel III requires a minimum leverage ratio of 4.0%. The capital ratios for the Company and the Bank under Basel III have continued to exceed the well capitalized minimum capital requirements.

The following table shows our regulatory capital ratios (on a consolidated basis) for the past several quarters:

	June 30, 2020	March 31, 2020	Dec 31, 2019	Sept 30, 2019	June 30, 2019
Macatawa Bank Corporation					
Total capital to risk weighted assets	17.3%	15.8%	15.8%	16.8%	16.8%
Common Equity Tier 1 to risk weighted assets	14.9	13.4	13.5	13.2	13.1
Tier 1 capital to risk weighted assets	16.3	14.7	14.7	15.8	15.7
Tier 1 capital to average assets	10.5	11.9	11.5	12.2	12.3

Approximately \$20.0 million of trust preferred securities outstanding at June 30, 2020 qualified as Tier 1 capital.

LIQUIDITY

Liquidity of Macatawa Bank: The liquidity of a financial institution reflects its ability to manage a variety of sources and uses of funds. Our Consolidated Statements of Cash Flows categorize these sources and uses into operating, investing and financing activities. We primarily focus on developing access to a variety of borrowing sources to supplement our deposit gathering activities and provide funds for our investment and loan portfolios. Our sources of liquidity include our borrowing capacity with the FRB's discount window, the Federal Home Loan Bank, federal funds purchased lines of credit and other secured borrowing sources with our correspondent banks, loan payments by our borrowers, maturity and sales of our securities available for sale, growth of our deposits, federal funds sold and other short-term investments, and the various capital resources discussed above.

Liquidity management involves the ability to meet the cash flow requirements of our customers. Our customers may be either borrowers with credit needs or depositors wanting to withdraw funds. Our liquidity management involves periodic monitoring of our assets considered to be liquid and illiquid, and our funding sources considered to be core and non-core and short-term (less than 12 months) and long-term. We have established parameters that monitor, among other items, our level of liquid assets to short-term liabilities, our level of non-core funding reliance and our level of available borrowing capacity. We maintain a diversified wholesale funding structure and actively manage our maturing wholesale sources to reduce the risk to liquidity shortages. We have also developed a contingency funding plan to stress test our liquidity requirements arising from certain events that may trigger liquidity shortages, such as rapid loan growth in excess of normal growth levels or the loss of deposits and other funding sources under extreme circumstances.

We have actively pursued initiatives to maintain a strong liquidity position. The Bank has reduced its reliance on non-core funding sources, including brokered deposits, and focused on achieving a non-core funding dependency ratio below its peer group average. We have had no brokered deposits on our balance sheet since December 2011. We continue to maintain significant on-balance sheet liquidity. At June 30, 2020, the Bank held \$426.9 million of federal funds sold and other short-term investments. In addition, the Bank had available borrowing capacity from correspondent banks of approximately \$329.7 million as of June 30, 2020.

In the normal course of business, we enter into certain contractual obligations, including obligations which are considered in our overall liquidity management. The table below summarizes our significant contractual obligations at June 30, 2020 (dollars in thousands):

	Less than 1 year	1-3 years	3-5 years	More than 5 years
Long term debt	\$ —	\$ —	\$ —	\$ 20,619
Time deposit maturities	111,170	20,136	2,777	56
Other borrowed funds	10,000	5,000	45,000	10,000
Operating lease obligations	244	268	85	—
Total	\$ 121,414	\$ 25,404	\$ 47,862	\$ 30,675

In addition to normal loan funding, we also maintain liquidity to meet customer financing needs through unused lines of credit, unfunded loan commitments and standby letters of credit. The level and fluctuation of these commitments is also considered in our overall liquidity management. At June 30, 2020, we had a total of \$585.0 million in unused lines of credit, \$83.4 million in unfunded loan commitments and \$12.9 million in standby letters of credit.

Liquidity of Holding Company: The primary sources of liquidity for the Company are dividends from the Bank, existing cash resources and the capital markets if the need to raise additional capital arises. Banking regulations and the laws of the State of Michigan in which our Bank is chartered limit the amount of dividends the Bank may declare and pay to the Company in any calendar year. Under the state law limitations, the Bank is restricted from paying dividends to the Company in excess of retained earnings. In 2019, the Bank paid dividends to the Company totaling \$32.5 million. In the same period, the Company paid \$20.0 million to redeem trust preferred securities and paid \$9.5 million in dividends to its shareholders. On February 25, 2020, the Bank paid a dividend totaling \$2.8 million to the Company in anticipation of the common share cash dividend of \$0.08 per share paid on February 27, 2020 to shareholders of record on February 11, 2020. The cash distributed for this cash dividend payment totaled \$2.7 million. On May 26, 2020, the Bank paid a dividend totaling \$2.7 million to the Company in anticipation of the common share cash dividend of \$0.08 per share paid on May 28, 2020 to shareholders of record on May 12, 2020. The cash distributed for this cash dividend payment totaled \$2.7 million. The Company retained the remaining balance in each period for general corporate purposes. At June 30, 2020, the Bank had a retained earnings balance of \$75.8 million.

The Company has the right to defer interest payments for 20 consecutive quarters on its trust preferred securities if necessary for liquidity purposes. During the deferral period, the Company may not declare or pay any dividends on its common stock or make any payment on any outstanding debt obligations that rank equally with or junior to the trust preferred securities.

The Company's cash balance at June 30, 2020 was \$6.8 million. The Company believes that it has sufficient liquidity to meet its cash flow obligations.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES:

To prepare financial statements in conformity with accounting principles generally accepted in the United States of America, management makes estimates and assumptions based on available information. These estimates and assumptions affect the amounts reported in the financial statements and future results could differ. The allowance for loan losses, other real estate owned valuation, loss contingencies, revenue recognition and income taxes are deemed critical due to the required level of management judgment and the use of estimates, making them particularly subject to change.

Our methodology for determining the allowance for loan losses and the related provision for loan losses is described above in the "Allowance for Loan Losses" discussion. This area of accounting requires significant judgment due to the number of factors which can influence the collectability of a loan. Unanticipated changes in these factors could significantly change the level of the allowance for loan losses and the related provision for loan losses. Although, based upon our internal analysis, and in our judgment, we believe that we have provided an adequate allowance for loan losses, there can be no assurance that our analysis has properly identified all of the probable losses in our loan portfolio. As a result, we could record future provisions for loan losses that may be significantly different than the levels that we recorded in the first six months of 2020.

Assets acquired through or instead of foreclosure, primarily other real estate owned, are initially recorded at fair value less estimated costs to sell when acquired, establishing a new cost basis. New real estate appraisals are generally obtained at the time of foreclosure and are used to establish fair value. If fair value declines, a valuation allowance is recorded through expense. Estimating the initial and ongoing fair value of these properties involves a number of factors and judgments including holding time, costs to complete, holding costs, discount rate, absorption and other factors.

Loss contingencies are recorded as liabilities when the likelihood of loss is probable and an amount or range of loss can be reasonably estimated. This, too, is an accounting area that involves significant judgment. Although, based upon our judgment, internal analysis, and consultations with legal counsel we believe that we have properly accounted for loss contingencies, future changes in the status of such contingencies could result in a significant change in the level of contingent liabilities and a related impact to operating earnings.

Noninterest revenue is recognized in accordance with contractual requirements and as we fulfill our obligations under contractual terms. Most of our noninterest revenue comes from services that are transaction based and such revenue is recognized as the related service is provided.

Our accounting for income taxes involves the valuation of deferred tax assets and liabilities primarily associated with differences in the timing of the recognition of revenues and expenses for financial reporting and tax purposes. At June 30, 2020, we had gross deferred tax assets of \$5.6 million and gross deferred tax liabilities of \$2.8 million resulting in a net deferred tax asset of \$2.8 million. Accounting standards require that companies assess whether a valuation allowance should be established against their deferred tax assets based on the consideration of all available evidence using a "more likely than not" standard. At December 31, 2018, a valuation allowance of \$92,000 was established against a capital loss carryforward created by the liquidation of the assets of a partnership interest the Bank acquired through a loan settlement thereby reducing net deferred tax assets. This valuation allowance was maintained at June 30, 2020, resulting in a net deferred tax asset balance of \$2.8 million. With the positive results in 2019 and the first six months of 2020, we concluded at June 30, 2020 that no other valuation allowance on our net deferred tax asset was required. Changes in tax laws, changes in tax rates, changes in ownership and our future level of earnings can impact the ultimate realization of our net deferred tax asset.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Our primary market risk exposure is interest rate risk and, to a lesser extent, liquidity risk. All of our transactions are denominated in U.S. dollars with no specific foreign exchange exposure. Macatawa Bank has only limited agricultural-related loan assets, and therefore has no significant exposure to changes in commodity prices.

Our balance sheet has sensitivity, in various categories of assets and liabilities, to changes in prevailing rates in the U.S. for prime rate, mortgage rates, U.S. Treasury rates and various money market indexes. Our asset/liability management process aids us in providing liquidity while maintaining a balance between interest earning assets and interest bearing liabilities.

We utilize a simulation model as our primary tool to assess the direction and magnitude of variations in net interest income and the economic value of equity ("EVE") resulting from potential changes in market interest rates. Key assumptions in the model include contractual cash flows and maturities of interest-sensitive assets and interest-sensitive liabilities, prepayment speeds on certain assets, and changes in market conditions impacting loan and deposit pricing. We also include pricing floors on discretionary priced liability products which limit how low various checking and savings products could go under declining interest rates. These floors reflect our pricing philosophy in response to changing interest rates.

We forecast the next twelve months of net interest income under an assumed environment of gradual changes in market interest rates under various scenarios. The resulting change in net interest income is an indication of the sensitivity of our earnings to directional changes in market interest rates. The simulation also measures the change in EVE, or the net present value of our assets and liabilities, under an immediate shift, or shock, in interest rates under various scenarios, as calculated by discounting the estimated future cash flows using market-based discount rates.

The following table shows the impact of changes in interest rates on net interest income over the next twelve months and EVE based on our balance sheet as of June 30, 2020 (dollars in thousands):

<u>Interest Rate Scenario</u>	<u>Economic Value of Equity</u>	<u>Percent Change</u>	<u>Net Interest Income</u>	<u>Percent Change</u>
Interest rates up 200 basis points	\$ 283,912	2.25%	\$ 59,668	11.43%
Interest rates up 100 basis points	283,025	1.93	56,607	5.71
No change	277,666	—	53,547	—
Interest rates down 100 basis points	279,579	0.69	54,147	1.12
Interest rates down 200 basis points	279,520	0.67	54,331	1.46

If interest rates were to increase, this analysis suggests that we are positioned for an improvement in net interest income over the next twelve months. If interest rates were to decrease, this analysis suggests we would experience a reduction in net interest income over the next twelve months.

We also forecast the impact of immediate and parallel interest rate shocks on net interest income under various scenarios to measure the sensitivity of our earnings under extreme conditions.

The quarterly simulation analysis is monitored against acceptable interest rate risk parameters by the Asset/Liability Committee and reported to the Board of Directors.

In addition to changes in interest rates, the level of future net interest income is also dependent on a number of other variables, including: the growth, composition and absolute levels of loans, deposits, and other earning assets and interest-bearing liabilities; economic and competitive conditions; potential changes in lending, investing and deposit gathering strategies; and client preferences.

Item 4:

CONTROLS AND PROCEDURES

- (a) Evaluation of Disclosure Controls and Procedures. Under the supervision and with the participation of our management, including our Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Exchange Act Rule 13a-15(e) as of June 30, 2020, the end of the period covered by this report.

In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, as the Company's are designed to do, and management necessarily was required to apply its judgment in evaluating whether the benefits of the controls and procedures that the Company adopts outweigh their costs.

Our CEO and CFO, after evaluating the effectiveness of the Company's disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e)) as of the end of the period covered by this report, have concluded that the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in the reports it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms.

- (b) Changes in Internal Controls. During the period covered by this report, there have been no changes in the Company's internal control over financial reporting that have materially affected or are reasonably likely to materially affect the Company's internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1A.

Risk Factors.

The coronavirus pandemic (COVID-19) could adversely affect the business, financial condition and results of operations of the Company and has had, and may continue to have, an adverse impact on the business, financial condition and results of operations of many of its customers.

In December 2019, news began to surface regarding an influenza pandemic in China, known as the novel coronavirus, or COVID-19. In January 2020, the United States restricted entry to anyone traveling from China. In February 2020, the pandemic spread broadly and swiftly throughout Europe and the Middle East, particularly in Italy and Iran. Cases began to surface in the United States in February 2020 and accelerated in early March 2020. The Federal Reserve reduced the overnight federal funds rate by 50 basis points on March 3, 2020 and by another 100 basis points on March 15, 2020 and announced the resumption of quantitative easing. On March 11, 2020, the World Health Organization declared COVID-19 to be a world-wide pandemic.

In response to COVID-19, many state and local governments have instituted emergency restrictions that have substantially limited the activities of individuals and the operations of businesses and industries. During the week of March 9, 2020, individual states began implementing restrictions and promoting “social distancing”. These restrictions included closure of schools, restrictions on the number of public gatherings, encouragement of work at home arrangements and other measures.

In Michigan, beginning March 24, 2020, Governor Gretchen Whitmer issued a series of “stay home, stay safe” executive orders, which required residents to remain at home “to the maximum extent feasible” and prohibited in-person work that “is not necessary to sustain or protect life.” These “stay home, stay safe” executive orders severely limited economic activity in Michigan, requiring businesses not deemed to be essential, to severely limit or shut down operations. Under later “stay home, stay safe” executive orders, Governor Whitmer permitted certain industries, such as automotive, manufacturing, construction and retail, to begin to reopen, subject to stringent health and safety requirements and strict social distancing measures. On June 1, 2020, Governor Whitmer issued a “reopen” executive order, which rescinded the then current “stay home, stay safe” executive order, and which permitted limited activities under the Michigan Safe Start Plan. On June 5, 2020, Governor Whitmer issued a supplemental reopen executive order, which did not rescind the reopen order, but modified it for regions in the northern lower peninsula and the upper peninsula of Michigan by permitting larger social gatherings and additional activities. The supplemental reopen order also allowed non-essential personal care services in all of Michigan. The reopen order was further modified by another executive order that addresses restarting professional sports and another executive order that closed indoor services at bars in all of Michigan. As of June 30 2020, most businesses in Michigan, other than fitness centers and certain leisure and entertainment businesses, were allowed to be open in some capacity, subject to stringent health and safety requirements, strict social distancing measures and nonsurgical face mask requirements. The Governor's executive orders, along with guidance issued by the federal government and the Centers for Disease Control and Prevention, have substantially affected many different types of businesses and have resulted in the temporary or permanent closing of businesses and significant layoffs and furloughs throughout Michigan and the United States generally and are likely to continue to do so in the future, especially if Governor Whitmer issues future executive orders containing tightening restrictions on individuals and businesses or additional “stay home, stay safe” executive orders, which is a possibility.

COVID-19 has had a substantial impact on numerous aspects of life in the United States, including threats to public health, increased volatility in markets, and severe effects on national and local economies. The ultimate effect of COVID-19 on the Company's business will depend on numerous factors and future developments that are highly uncertain and cannot be predicted with confidence. At this time, it is unknown how long the COVID-19 pandemic will last, or when restrictions on individuals and businesses will be lifted and businesses and their employees will be able to resume normal activities. Further, additional information may emerge regarding the severity of COVID-19, including a significant increase in the number of COVID-19 cases in Michigan and nationally. If the severity of COVID-19 worsens, additional actions may be taken by federal, state, and local governments to contain COVID-19 or treat its impact, including that Governor Whitmer may issue additional executive orders containing tightening restrictions on individuals and businesses or additional “stay home, stay safe” executive orders, which is a possibility, and which would have a further significant negative impact on the Michigan economy and Michigan businesses. Changes in the behavior of customers, businesses and their employees as a result of the COVID-19 pandemic, including social distancing practices, even after formal restrictions have been lifted, are also unknown. As a result of the COVID-19 pandemic and the actions taken to contain it or reduce its impact, the Company may experience changes in the value of collateral securing outstanding loans, reductions in the credit quality of borrowers and the inability of borrowers to repay loans in accordance with their terms. These and similar factors and events may have substantial negative effects on the business, financial condition, and results of operations of the Company and have had, and may continue to have, substantial negative effects on the business, financial condition, and results of operations of many of its customers. Additionally, the negative consequences of the unprecedented economic shutdown nationally and in Michigan is likely to result in a higher level of future delinquencies, loan impairments and loan losses and require additional provisions for loan losses, which will have a negative impact on our results of operations.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

The following table provides information regarding the Company's purchase of its own common stock during the second quarter of 2020. All employee transactions are under stock compensation plans. These include shares of Macatawa Bank Corporation common stock surrendered to satisfy tax withholding obligations that occur upon the vesting of restricted shares. The value of the shares withheld is determined based on the closing price of Macatawa Bank Corporation common stock at the date of vesting. The Company has no publicly announced repurchase plans or programs.

(Principal Financial and Accounting Officer)

Dated: July 23, 2020

I, Ronald L. Haan, certify that:

1. I have reviewed this quarterly report on Form 10-Q for the quarter ended June 30, 2020 of Macatawa Bank Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared; and
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles; and
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
